**Project Chairs:**

Jim Amsden ([jamsden@us.ibm.com](mailto:jamsden@us.ibm.com)), [IBM](#)

Jad El-khoury ([jad@kth.se](mailto:jad@kth.se)), [KTH Royal Institute of Technology](#)

#### Editor:

Jim Amsden ([jamsden@us.ibm.com](mailto:jamsden@us.ibm.com)), [IBM](#)

#### Additional components:

This specification is one component of a Work Product that also includes:

- *OSLC Systems Modeling Language Version 2.0. Part 1: Specification.* [sysml-spec.html](#)
- *OSLC Systems Modeling Language Version 2.0. Part 2: Vocabulary.* [sysml-vocab.html](#)
- *OSLC Systems Modeling Language Version 2.0. Part 3: Constraints (this document).* [sysml-shapes.html](#)
- *OSLC Systems Modeling Language Version 2.0. Part 4: Machine Readable Vocabulary Terms.* [sysml-vocab.ttl](#)
- *OSLC Systems Modeling Language Version 2.0. Part 5: Machine Readable Constraints.* [sysml-shapes.ttl](#)

#### Related work:

This specification is related to:

- *OMG Systems Modeling Language.* <https://www.omg.org/spec/SysML/>
- *Systems Modeling Application Programming Interface (API) and Services.* <https://www.omg.org/spec/SystemsModelingAPI/1.0/Beta1/PDF>

#### RDF Namespaces:

<http://open-services.net/ns/sysmlv2#>

#### Abstract:

OSLC Systems Modeling Language Version 2.0. Part 3: Constraints defines the standard OSLC constraint on the RDF vocabulary terms and resources that are the OSLC representation of the corresponding OMG Systems Modeling Language Version 2.0.

#### Status:

This document was last revised or approved by the [OASIS Open Services for Lifecycle Collaboration \(OSLC\) OP](#) on the above date. The level of approval is also listed above. Check the “Latest stage” location noted above for possible later revisions of this document. Any other numbered Versions and other technical work produced by the Open Project are listed at <https://open-services.net/about/>.

Comments on this work can be provided by opening issues in the project repository or by sending email to the project’s public comment list [oslc-op@lists.oasis-open-projects.org](mailto:oslc-op@lists.oasis-open-projects.org).

Note that any machine-readable content ([Computer Language Definitions](#)) declared Normative for this Work Product is provided in separate plain text files. In the event of a discrepancy between any such plain text file and

display content in the Work Product's prose narrative document(s), the content in the separate plain text file prevails.

## 1. Introduction

*This section is non-normative.*

RDF vocabularies define the terms and resources for a domain of interest, life-cycle management in the case of OSLC SysML v2. These vocabularies are often specified in an open manner, without providing information such as property domain and range assertions, cardinalities, etc. This helps keep the vocabulary applicable for a wide range of uses and furthering integration with other vocabularies.

However, it is often desirable to closed down a vocabulary with specific constraints to facilitate using the vocabulary for a specific purpose. This document specifies the constraints for using the OSLC SysML v2 vocabulary in OSLC. Different sets of constraints may be applied to a vocabulary in order to tailor its use, without overly constraining the vocabulary for other usages.

These constraints apply to the core vocabulary defined in [OSLC SysML Version 2.0. Part 2: Vocabulary](#).

### 1.1 Terminology

*This section is non-normative.*

Terminology is based on OSLC Core Overview [[OSLCCore3](#)], W3C Linked Data Platform [[LDP](#)], W3C's Architecture of the World Wide Web [[WEBARCH](#)], Hyper-text Transfer Protocol [[HTTP11](#)]. Terminology for this specification is defined in part 1 of the multi-part specification.

### 1.2 References

### 1.2.2 Informative references

[WEBARCH]

Ian Jacobs; Norman Walsh. [Architecture of the World Wide Web, Volume One](https://www.w3.org/TR/webarch/). W3C, 15 December 2004. W3C Recommendation. URL: <https://www.w3.org/TR/webarch/>

## 1.3 Typographical Conventions and Use of RFC Terms

As well as sections marked as non-normative, all authoring guidelines, diagrams, examples, and notes in this specification are non-normative. Everything else in this specification is normative.

The key words "**MUST**", "**MUST NOT**", "**REQUIRED**", "**SHALL**", "**SHALL NOT**", "**SHOULD**", "**SHOULD NOT**", "**RECOMMENDED**", "**NOT RECOMMENDED**", "**MAY**", and "**OPTIONAL**" in this specification are to be interpreted as described in [BCP 14](#) [[RFC2119](#)] [[RFC8174](#)] when, and only when, they appear in all capitals, as shown here.

In addition to the namespace URIs and namespace prefixes `oslc`, `rdf`, `dcterms` and `foaf` defined in the [OSLC Core specification](#), OSLC SysML v2 defines the namespace URI of `http://open-services.net/ns/sysmlv2#` with a namespace prefix of `oslc_sysmlv2`

This specification also uses these namespace prefix definitions:

- `oslc` : `http://open-services.net/ns/core#` [[OSLCCore3](#)]

## 2. Resource Constraints

This section specifies the constraints for the SysML v2 resources. The resource properties are not limited to the ones defined in this specification, SysML v2 Servers may provide additional properties. It is recommended that any additional properties exist in their own unique namespace and not use the namespaces defined in these specifications.

- **Describes:** <http://open-services.net/ns/sysmlv2#AnnotatingElement>
- **Summary:** AnnotatingElementShape
- **Description:** An **AnnotatingElement** is an **Element** that provides additional description of or metadata on some other **Element**. An **AnnotatingElement** is either attached to its **annotatedElements** by **Annotation Relationships**, or it implicitly annotates its **owningNamespace**.

### AnnotatingElement Properties

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>dcterms:contributor</code>	Zero-or-many	false	AnyResource	Either	<code>oslc:Any</code>	Contributor or contributors to the resource. It is likely that the target resource will be a foaf:Person but that is not necessarily the case.
<code>dcterms:created</code>	Zero-or-one	false	dateTime	N/A	Unspecified	Timestamp of resource creation.
<code>dcterms:creator</code>	Zero-or-many	false	AnyResource	Either	<code>oslc:Any</code>	Creator or creators of the resource. It is likely that the target resource will be a foaf:Person but that is not necessarily the case.
<code>dcterms:description</code>	Zero-or-one	false	XMLLiteral	N/A	Unspecified	Descriptive text about resource represented as rich text in XHTML content.
<code>dcterms:identifier</code>	Exactly-one	true	string	N/A	Unspecified	A unique identifier for a resource. Typically read-only and assigned by the service provider when a resource is created. Not typically intended for end-user display.
<code>dcterms:modified</code>	Zero-or-one	false	dateTime	N/A	Unspecified	Timestamp of latest resource modification.

Standards Track Work Product

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>dcterms:source</code>	Zero-or-one	false	Resource	Reference	<code>oslc:Any</code>	The resource URI a client can perform a get on to obtain the original non-OSLC AM formatted resource that was used to create this resource. The source resource is usually a binary or proprietary format that the service provider can consume and convert into an OSLC AM format. The service may use content negotiation with the Accept header to obtain the desired content type.
<code>dcterms:title</code>	Exactly-one	false	XMLLiteral	N/A	Unspecified	Title of the resource represented as rich text in XHTML content.
<code>dcterms:type</code>	Zero-or-many	false	string	N/A	Unspecified	A short string representation for the type, for example 'Car'.
<code>jazz_am:derives</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The resource that derives from another resource originated from or is significantly influenced by the referenced resource. For example a model element derives from a requirement.
<code>jazz_am:elaborates</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	This resource elaborates the referenced resource.
<code>jazz_am:external</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	A generic link from a resource to an external web page.
<code>jazz_am:refine</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The target is a refinement of the source. (e.g. a use case scenario might be a refinement of a textual requirement that describes the interaction).
<code>jazz_am:satisfy</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The model element satisfies the requirement (e.g. The use case satisfies a functional requirement).
<code>jazz_am:trace</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The model element has a trace to the requirement (e.g. An attribute or its value are traced to a requirement).

Standards Track Work Product

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:annotatingElement_AnnotatedElement</code>	One-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The <b>Elements</b> that are annotated by this <b>AnnotatingElement</b> . If <b>annotation</b> is not empty, these are the <b>annotatedElements</b> of the <b>annotations</b> . If <b>annotation</b> is empty, then it is the <b>owningNamespace</b> of the <b>AnnotatingElement</b> .
<code>oslc_sysmlv2:annotatingElement_Annotation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Annotation</code>	The <b>Annotations</b> that relate this <b>AnnotatingElement</b> to its <b>annotatedElements</b> .
<code>oslc_sysmlv2:annotatingElement_OwnedAnnotatingRelationship</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Annotation</code>	The <b>ownedRelationships</b> of this <b>AnnotatingElement</b> that are <b>Annotations</b> , for which this <b>AnnotatingElement</b> is the <b>annotatingElement</b> .
<code>oslc_sysmlv2:element_AliasIds</code>	Zero-or-many	false	unspecified	Either	<code>xsd:string</code>	Various alternative identifiers for this Element. Generally, these will be set by tools.
<code>oslc_sysmlv2:element_DeclaredName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The declared name of this <b>Element</b> .
<code>oslc_sysmlv2:element_DeclaredShortName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	An optional alternative name for the <b>Element</b> that is intended to be shorter or in some way more succinct than its primary <b>name</b> . It may act as a modeler-specified identifier for the <b>Element</b> , though it is then the responsibility of the modeler to maintain the uniqueness of this identifier within a model or relative to some other context.
<code>oslc_sysmlv2:element_Documentation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Documentation</code>	The Documentation owned by this Element.
<code>oslc_sysmlv2:element_ElementId</code>	Exactly-one	false	unspecified	Either	<code>xsd:string</code>	The globally unique identifier for this Element. This is intended to be set by tooling, and it must not change during the lifetime of the Element.

Standards Track Work Product

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:element_IsImpliedIncluded</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether all necessary implied Relationships have been included in the <code>ownedRelationships</code> of this Element. This property may be true, even if there are not actually any <code>ownedRelationships</code> with <code>isImplied = true</code> , meaning that no such Relationships are actually implied for this Element. However, if it is false, then <code>ownedRelationships</code> may <i>not</i> contain any implied Relationships. That is, either <i>all</i> required implied Relationships must be included, or none of them.
<code>oslc_sysmlv2:element_IsLibraryElement</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether this Element is contained in the ownership tree of a library model.
<code>oslc_sysmlv2:element_Name</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The name to be used for this Element during name resolution within its <code>owningNamespace</code> . This is derived using the <code>effectiveName()</code> operation. By default, it is the same as the <code>declaredName</code> , but this is overridden for certain kinds of Elements to compute a <code>name</code> even when the <code>declaredName</code> is null.
<code>oslc_sysmlv2:element_OwnedAnnotation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Annotation</code>	The <code>ownedRelationships</code> of this Element that are <code>Annotations</code> , for which this Element is the <code>annotatedElement</code> .
<code>oslc_sysmlv2:element_OwnedElement</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The Elements owned by this Element, derived as the <code>ownedRelatedElements</code> of the <code>ownedRelationships</code> of this Element.
<code>oslc_sysmlv2:element_OwnedRelationship</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Relationship</code>	The Relationships for which this Element is the <code>owningRelatedElement</code> .
<code>oslc_sysmlv2:element_Owner</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The owner of this Element, derived as the <code>owningRelatedElement</code> of the <code>owningRelationship</code> of this Element, if any.
<code>oslc_sysmlv2:element_OwningMembership</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:OwningMembership</code>	The <code>owningRelationship</code> of this Element, if that Relationship is a <code>Membership</code> .
<code>oslc_sysmlv2:element_OwningNamespace</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Namespace</code>	The <code>Namespace</code> that owns this Element, which is the <code>membershipOwningNamespace</code> of the <code>owningMembership</code> of this Element, if any.

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:element_OwningRelationship</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Relationship</code>	The Relationship for which this Element is an <code>ownedRelatedElement</code> , if any.
<code>oslc_sysmlv2:element_QualifiedName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The full ownership-qualified name of this <b>Element</b> , represented in a form that is valid according to the KerML textual concrete syntax for qualified names (including use of unrestricted name notation and escaped characters, as necessary). The <code>qualifiedName</code> is null if this <b>Element</b> has no <code>owningNamespace</code> or if there is not a complete ownership chain of named <b>Namespaces</b> from a root <b>Namespace</b> to this <b>Element</b> .
<code>oslc_sysmlv2:element_ShortName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The short name to be used for this <b>Element</b> during name resolution within its <code>owningNamespace</code> . This is derived using the <code>effectiveShortName()</code> operation. By default, it is the same as the <code>declaredShortName</code> , but this is overridden for certain kinds of <b>Elements</b> to compute a <code>shortName</code> even when the <code>declaredName</code> is null.
<code>oslc_sysmlv2:element_TextualRepresentation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:TextualRepresentation</code>	The <code>TextualRepresentations</code> that annotate this <b>Element</b> .
<code>oslc:instanceShape</code>	Zero-or-one	false	Resource	Reference	<code>oslc:ResourceShape</code>	The URI of a Resource Shape that describes the possible properties, occurrence, value types, allowed values and labels. This shape information is useful in displaying the subject resource as well as guiding clients in performing modifications. Instance shapes may be specific to the authenticated user associated with the request that retrieved the resource, the current state of the resource and other factors and thus should not be cached.
<code>oslc:serviceProvider</code>	Zero-or-many	false	Resource	Reference	<code>oslc:ServiceProvider</code>	A link to the resource's OSLC Service Provider. There may be cases when the subject resource is available from a service provider that implements multiple domain specifications, which could result in multiple values for this property.

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc:shortTitle</code>	Zero-or-one	false	XMLLiteral	N/A	Unspecified	Short name identifying a resource, often used as an abbreviated identifier for presentation to end-users. <b>SHOULD</b> include only content that is valid inside an XHTML <code>&lt;span&gt;</code> element [sml-1].
<code>rdf:type</code>	Zero-or-many	false	Resource	Reference	<code>rdfs:Class</code>	The resource type URIs.

- **Describes:** <http://open-services.net/ns/sysmlv2#EventOccurrenceUsage>
- **Summary:** EventOccurrenceUsageShape
- **Description:** An `EventOccurrenceUsage` is an `OccurrenceUsage` that represents another `OccurrenceUsage` occurring as a `suboccurrence` of the containing occurrence of the `EventOccurrenceUsage`. Unless it is the `EventOccurrenceUsage` itself, the referenced `OccurrenceUsage` is related to the `EventOccurrenceUsage` by a `ReferenceSubsetting Relationship`.

#### EventOccurrenceUsage Properties

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>dcterms:contributor</code>	Zero-or-many	false	AnyResource	Either	<code>oslc:Any</code>	Contributor or contributors to the resource. It is likely that the target resource will be a foaf:Person but that is not necessarily the case.
<code>dcterms:created</code>	Zero-or-one	false	dateTime	N/A	Unspecified	Timestamp of resource creation.
<code>dcterms:creator</code>	Zero-or-many	false	AnyResource	Either	<code>oslc:Any</code>	Creator or creators of the resource. It is likely that the target resource will be a foaf:Person but that is not necessarily the case.
<code>dcterms:description</code>	Zero-or-one	false	XMLLiteral	N/A	Unspecified	Descriptive text about resource represented as rich text in XHTML content.
<code>dcterms:identifier</code>	Exactly-one	true	string	N/A	Unspecified	A unique identifier for a resource. Typically read-only and assigned by the service provider when a resource is created. Not typically intended for end-user display.
<code>dcterms:modified</code>	Zero-or-one	false	dateTime	N/A	Unspecified	Timestamp of latest resource modification.

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>dcterms:source</code>	Zero-or-one	false	Resource	Reference	<code>oslc:Any</code>	The resource URI a client can perform a get on to obtain the original non-OSLC AM formatted resource that was used to create this resource. The source resource is usually a binary or proprietary format that the service provider can consume and convert into an OSLC AM format. The service may use content negotiation with the Accept header to obtain the desired content type.
<code>dcterms:title</code>	Exactly-one	false	XMLLiteral	N/A	Unspecified	Title of the resource represented as rich text in XHTML content.
<code>dcterms:type</code>	Zero-or-many	false	string	N/A	Unspecified	A short string representation for the type, for example 'Car'.
<code>jazz_am:derives</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The resource that derives from another resource originated from or is significantly influenced by the referenced resource. For example a model element derives from a requirement.
<code>jazz_am:elaborates</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	This resource elaborates the referenced resource.
<code>jazz_am:external</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	A generic link from a resource to an external web page.
<code>jazz_am:refine</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The target is a refinement of the source. (e.g. a use case scenario might be a refinement of a textual requirement that describes the interaction).
<code>jazz_am:satisfy</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The model element satisfies the requirement (e.g. The use case satisfies a functional requirement).

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:element_OwnedRelationship</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Relationship</code>	The Relationships for which this Element is the <code>owningRelatedElement</code> .
<code>oslc_sysmlv2:element_Owner</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The owner of this Element, derived as the <code>owningRelatedElement</code> of the <code>owningRelationship</code> of this Element, if any.
<code>oslc_sysmlv2:element_OwningMembership</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:OwningMembership</code>	The <code>owningRelationship</code> of this Element, if that Relationship is a <code>Membership</code> .
<code>oslc_sysmlv2:element_OwningNamespace</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Namespace</code>	The <code>Namespace</code> that owns this Element, which is the <code>membershipOwningNamespace</code> of the <code>owningMembership</code> of this Element, if any.
<code>oslc_sysmlv2:element_OwningRelationship</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Relationship</code>	The Relationship for which this Element is an <code>ownedRelatedElement</code> , if any.
<code>oslc_sysmlv2:element_QualifiedName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The full ownership-qualified name of this Element, represented in a form that is valid according to the KerML textual concrete syntax for qualified names (including use of unrestricted name notation and escaped characters, as necessary). The <code>qualifiedName</code> is null if this Element has no <code>owningNamespaces</code> or if there is not a complete ownership chain of named <code>Namespaces</code> from a root <code>Namespace</code> to this Element.
<code>oslc_sysmlv2:element_ShortName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The short name to be used for this Element during name resolution within its <code>owningNamespace</code> . This is derived using the <code>effectiveShortName()</code> operation. By default, it is the same as the <code>declaredShortName</code> , but this is overridden for certain kinds of Elements to compute a <code>shortName</code> even when the <code>declaredName</code> is null.
<code>oslc_sysmlv2:element_TextualRepresentation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:TextualRepresentation</code>	The <code>TextualRepresentations</code> that annotate this Element.
<code>oslc_sysmlv2:eventOccurrenceUsage_EventOccurrence</code>	Exactly-one	false	Resource	Either	<code>oslc_sysmlv2:OccurrenceUsage</code>	The <code>OccurrenceUsage</code> referenced as an event by this <code>EventOccurrenceUsage</code> . It is the <code>referenceFeature</code> of the <code>ownedReferenceSubsetting</code> for the <code>EventOccurrenceUsage</code> , if there is one, and, otherwise, the <code>EventOccurrenceUsage</code> itself.

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:feature_ChainingFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <b>Feature</b> that are chained together to determine the values of this <b>Feature</b> , derived from the <b>chainingFeatures</b> of the <b>ownedFeatureChainings</b> of this <b>Feature</b> , in the same order. The values of a <b>Feature</b> with <b>chainingFeatures</b> are the same as values of the last <b>Feature</b> in the chain, which can be found by starting with the values of the first <b>Feature</b> (for each instance of the domain of the original <b>Feature</b> ), then using each of those as domain instances to find the values of the second <b>Feature</b> in <b>chainingFeatures</b> , and so on, to values of the last <b>Feature</b> .
<code>oslc_sysmlv2:feature_Direction</code>	Zero-or-one	false	unspecified	Either	<code>oslc_sysmlv2:FeatureDirectionKind</code>	Indicates how values of this <b>Feature</b> are determined or used (as specified for the <b>FeatureDirectionKind</b> ).
<code>oslc_sysmlv2:feature_EndOwningType</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The <b>Type</b> that is related to this <b>Feature</b> by an <b>EndFeatureMembership</b> in which the <b>Feature</b> is an <b>ownedMemberFeature</b> .
<code>oslc_sysmlv2:feature_FeaturingType</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	<b>Types</b> that feature this <b>Feature</b> , such that any instance in the domain of the <b>Feature</b> must be classified by all of these <b>Types</b> , including at least all the <b>featuringTypes</b> of its <b>typeFeaturings</b> . If the <b>Feature</b> is chained, then the <b>featuringTypes</b> of the first <b>Feature</b> in the chain are also <b>featuringTypes</b> of the chained <b>Feature</b> .
<code>oslc_sysmlv2:feature_IsComposite</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether the <b>Feature</b> is a composite <b>feature</b> of its <b>featuringType</b> . If so, the values of the <b>Feature</b> cannot exist after its <b>featuring</b> instance no longer does.
<code>oslc_sysmlv2:feature_IsDerived</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether the values of this <b>Feature</b> can always be computed from the values of other <b>Features</b> .
<code>oslc_sysmlv2:feature_IsEnd</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether or not the this <b>Feature</b> is an end <b>Feature</b> , requiring a different interpretation of the <b>multiplicity</b> of the <b>Feature</b> .
<code>oslc_sysmlv2:feature_IsNonunique</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	isNonunique.
<code>oslc_sysmlv2:feature_IsOrdered</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether an order exists for the values of this <b>Feature</b> or not.
<code>oslc_sysmlv2:feature_IsPortion</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether the values of this <b>Feature</b> are contained in the space and time of instances of the domain of the <b>Feature</b> and represent the same thing as those instances.

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:feature_IsReadOnly</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether the values of this <b>Feature</b> can change over the lifetime of an instance of the domain.
<code>oslc_sysmlv2:feature_IsUnique</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether or not values for this <b>Feature</b> must have no duplicates or not.
<code>oslc_sysmlv2:feature_OwnedFeatureChaining</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:FeatureChaining</code>	The <b>ownedRelationships</b> of this <b>Feature</b> that are <b>FeatureChainings</b> , for which the <b>Feature</b> will be the <b>featureChained</b> .
<code>oslc_sysmlv2:feature_OwnedFeatureInverting</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:FeatureInverting</code>	The <b>ownedRelationships</b> of this <b>Feature</b> that are <b>FeatureInvertings</b> and for which the <b>Feature</b> is the <b>featureInverted</b> .
<code>oslc_sysmlv2:feature_OwnedRedefinition</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Redefinition</code>	The <b>ownedSubsettings</b> of this <b>Feature</b> that are <b>Redefinitions</b> , for which the <b>Feature</b> is the <b>redefiningFeature</b> .
<code>oslc_sysmlv2:feature_OwnedReferenceSubsetting</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:ReferenceSubsetting</code>	The one <b>ownedSubsetting</b> of this <b>Feature</b> , if any, that is a <b>ReferenceSubsetting</b> , for which the <b>Feature</b> is the <b>referencingFeature</b> .
<code>oslc_sysmlv2:feature_OwnedSubsetting</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Subsetting</code>	The <b>ownedSpecializations</b> of this <b>Feature</b> that are <b>Subsettings</b> , for which the <b>Feature</b> is the <b>subsettingFeature</b> .
<code>oslc_sysmlv2:feature_OwnedTypeFeaturing</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:TypeFeaturing</code>	The <b>ownedRelationships</b> of this <b>Feature</b> that are <b>TypeFeaturings</b> and for which the <b>Feature</b> is the <b>featureOfType</b> .
<code>oslc_sysmlv2:feature_OwnedTyping</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:FeatureTyping</code>	The <b>ownedSpecializations</b> of this <b>Feature</b> that are <b>FeatureTypings</b> , for which the <b>Feature</b> is the <b>typedFeature</b> .
<code>oslc_sysmlv2:feature_OwningFeatureMembership</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:FeatureMembership</code>	The <b>FeatureMembership</b> that owns this <b>Feature</b> as an <b>ownedMemberFeature</b> , determining its <b>owningType</b> .
<code>oslc_sysmlv2:feature_OwningType</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The <b>Type</b> that is the <b>owningType</b> of the <b>owningFeatureMembership</b> of this <b>Feature</b> .
<code>oslc_sysmlv2:feature_Type</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	<b>Types</b> that restrict the values of this <b>Feature</b> , such that the values must be instances of all the <b>types</b> . The types of a <b>Feature</b> are derived from its <b>typings</b> and the <b>types</b> of its <b>subsettings</b> . If the <b>Feature</b> is chained, then the <b>types</b> of the last <b>Feature</b> in the chain are also <b>types</b> of the chained <b>Feature</b> .

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:namespace_ImportedMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Membership</code>	The <b>Memberships</b> in this <b>Namespace</b> that result from the <b>ownedImports</b> of this <b>Namespace</b> .
<code>oslc_sysmlv2:namespace_Member</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The set of all member <b>Elements</b> of this <b>Namespace</b> , which are the <b>memberElements</b> of all <b>memberships</b> of the <b>Namespace</b> .
<code>oslc_sysmlv2:namespace_Membership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Membership</code>	All <b>Memberships</b> in this <b>Namespace</b> , including (at least) the union of <b>ownedMemberships</b> and <b>importedMemberships</b> .
<code>oslc_sysmlv2:namespace_OwnedImport</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Import</code>	The <b>ownedRelationships</b> of this <b>Namespace</b> that are <b>Imports</b> , for which the <b>Namespace</b> is the <b>importOwningNamespace</b> .
<code>oslc_sysmlv2:namespace_OwnedMember</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The owned <b>members</b> of this <b>Namespace</b> , which are the <b>ownedMemberElements</b> of the <b>ownedMemberships</b> of the ..
<code>oslc_sysmlv2:namespace_OwnedMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Membership</code>	The <b>ownedRelationships</b> of this <b>Namespace</b> that are <b>Memberships</b> , for which the <b>Namespace</b> is the <b>membershipOwningNamespace</b> .
<code>oslc_sysmlv2:occurrenceUsage_IndividualDefinition</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:OccurrenceDefinition</code>	The at most one <b>occurrenceDefinition</b> that has <b>isIndividual = true</b> .
<code>oslc_sysmlv2:occurrenceUsage_IsIndividual</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether this <b>OccurrenceUsage</b> represents the usage of the specific individual (or portion of it) represented by its <b>individualDefinition</b> .
<code>oslc_sysmlv2:occurrenceUsage_OccurrenceDefinition</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Class</code>	The <b>Classes</b> that are the types of this <b>OccurrenceUsage</b> . Nominally, these are <b>OccurrenceDefinitions</b> , but other kinds of kernel <b>Classes</b> are also allowed, to permit use of <b>Classes</b> from the Kernel Model Libraries.
<code>oslc_sysmlv2:occurrenceUsage_PortionKind</code>	Zero-or-one	false	unspecified	Either	<code>oslc_sysmlv2:PortionKind</code>	The kind of (temporal) portion of the life of the <b>occurrenceDefinition</b> represented by this <b>OccurrenceUsage</b> , if it is so restricted.

Standards Track Work Product

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:type_DifferencingType</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The interpretations of a <b>Type</b> with <b>differencingTypes</b> are asserted to be those of the first of those <b>Types</b> , but not including those of the remaining <b>Types</b> . For example, a <b>Classifier</b> might be the difference of a <b>Classifier</b> for people and another for people of a particular nationality, leaving people who are not of that nationality. Similarly, a feature of people might be the difference between a feature for their children and a <b>Classifier</b> for people of a particular sex, identifying their children not of that sex (because the interpretations of the children <b>Feature</b> that identify those of that sex are also interpretations of the <b>Classifier</b> for that sex).
<code>oslc_sysmlv2:type_DirectedFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <b>features</b> of this <b>Type</b> that have a non-null <b>direction</b> .
<code>oslc_sysmlv2:type_EndFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All <b>features</b> of this <b>Type</b> with <b>isEnd = true</b> .
<code>oslc_sysmlv2:type_Feature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <b>ownedMemberFeatures</b> of the <b>featureMemberships</b> of this <b>Type</b> .
<code>oslc_sysmlv2:type_FeatureMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:FeatureMembership</code>	The <b>FeatureMemberships</b> for <b>features</b> of this <b>Type</b> , which include all <b>ownedFeatureMemberships</b> and those <b>inheritedMemberships</b> that are <b>FeatureMemberships</b> (but does <i>not</i> include any <b>importedMemberships</b> ).
<code>oslc_sysmlv2:type_InheritedFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All the <b>memberFeatures</b> of the <b>inheritedMemberships</b> of this <b>Type</b> that are <b>FeatureMemberships</b> .
<code>oslc_sysmlv2:type_InheritedMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Membership</code>	All <b>Memberships</b> inherited by this <b>Type</b> via <b>Specialization</b> or <b>Conjugation</b> . These are included in the derived union for the <b>memberships</b> of the <b>Type</b> .
<code>oslc_sysmlv2:type_Input</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All <b>features</b> related to this <b>Type</b> by <b>FeatureMemberships</b> that have <b>direction in or inout..</b>

Standards Track Work Product

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:type_IntersectingType</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The interpretations of a <b>Type</b> with <b>intersectingTypes</b> are asserted to be those in common among the <b>intersectingTypes</b> , which are the <b>Types</b> derived from the <b>intersectingType</b> of the <b>ownedIntersectings</b> of this <b>Type</b> . For example, a <b>Classifier</b> might be an intersection of <b>Classifiers</b> for people of a particular sex and of a particular nationality. Similarly, a feature for people's children of a particular sex might be the intersection of a <b>Feature</b> for their children and a <b>Classifier</b> for people of that sex (because the interpretations of the children <b>Feature</b> that identify those of that sex are also interpretations of the <b>Classifier</b> for that sex).
<code>oslc_sysmlv2:type_IsAbstract</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Indicates whether instances of this <b>Type</b> must also be instances of at least one of its specialized <b>Types</b> .
<code>oslc_sysmlv2:type_IsConjugated</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Indicates whether this <b>Type</b> has an <b>ownedConjugator</b> .
<code>oslc_sysmlv2:type_IsSufficient</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether all things that meet the classification conditions of this <b>Type</b> must be classified by the <b>Type</b> .
<code>oslc_sysmlv2:type_Multiplicity</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Multiplicity</code>	An <b>ownedMember</b> of this <b>Type</b> that is a <b>Multiplicity</b> , which constrains the cardinality of the <b>Type</b> . If there is no such <b>ownedMember</b> , then the cardinality of this <b>Type</b> is constrained by all the <b>Multiplicity</b> constraints applicable to any direct supertypes.
<code>oslc_sysmlv2:type_Output</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All <b>features</b> related to this <b>Type</b> by <b>FeatureMemberships</b> that have <b>direction out or inout..</b>
<code>oslc_sysmlv2:type_OwnedConjugator</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Conjugation</code>	A <b>Conjugation</b> owned by this <b>Type</b> for which the <b>Type</b> is the <b>originalType</b> .
<code>oslc_sysmlv2:type_OwnedDifferencing</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Differencing</code>	The <b>ownedRelationships</b> of this <b>Type</b> that are <b>Differencings</b> , having this <b>Type</b> as their <b>typeDifferenced</b> .
<code>oslc_sysmlv2:type_OwnedDisjoining</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Disjoining</code>	The <b>ownedRelationships</b> of this <b>Type</b> that are <b>Disjoinings</b> , for which the <b>Type</b> is the <b>typeDisjoined Type</b> .
<code>oslc_sysmlv2:type_OwnedEndFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All <b>endFeatures</b> of this <b>Type</b> that are <b>ownedFeatures</b> .

Standards Track Work Product

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:type_OwnedFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <code>ownedMemberFeatures</code> of the <code>ownedFeatureMemberships</code> of this <code>Type</code> .
<code>oslc_sysmlv2:type_OwnedFeatureMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:FeatureMembership</code>	The <code>ownedMemberships</code> of this <code>Type</code> that are <code>FeatureMemberships</code> , for which the <code>Type</code> is the <code>owningType</code> . Each such <code>FeatureMembership</code> identifies an <code>ownedFeature</code> of the <code>Type</code> .
<code>oslc_sysmlv2:type_OwnedIntersecting</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Intersecting</code>	The <code>ownedRelationships</code> of this <code>Type</code> that are <code>Intersectings</code> , have the <code>Type</code> as their <code>typeIntersected</code> .
<code>oslc_sysmlv2:type_OwnedSpecialization</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Specialization</code>	The <code>ownedRelationships</code> of this <code>Type</code> that are <code>Specializations</code> , for which the <code>Type</code> is the <code>specific Type</code> .
<code>oslc_sysmlv2:type_OwnedUnioning</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Unioning</code>	The <code>ownedRelationships</code> of this <code>Type</code> that are <code>Unionings</code> , having the <code>Type</code> as their <code>typeUnioned</code> .
<code>oslc_sysmlv2:type_UnioningType</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The interpretations of a <code>Type</code> with <code>unioningTypes</code> are asserted to be the same as those of all the <code>unioningTypes</code> together, which are the <code>Types</code> derived from the <code>unioningType</code> of the <code>ownedUnionings</code> of this <code>Type</code> . For example, a <code>Classifier</code> for people might be the union of <code>Classifiers</code> for all the sexes. Similarly, a feature for people's children might be the union of features dividing them in the same ways as people in general.
<code>oslc_sysmlv2:usage_Definition</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Classifier</code>	The <code>Classifiers</code> that are the types of this <code>Usage</code> . Nominally, these are <code>Definitions</code> , but other kinds of Kernel <code>Classifiers</code> are also allowed, to permit use of <code>Classifiers</code> from the Kernel Model Libraries.
<code>oslc_sysmlv2:usage_DirectedUsage</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Usage</code>	The <code>usages</code> of this <code>Usage</code> that are <code>directedFeatures</code> .
<code>oslc_sysmlv2:usage_IsReference</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether this <code>Usage</code> is a referential <code>Usage</code> , that is, it has <code>isComposite = false</code> .

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:usage_IsVariation</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether this <b>Usage</b> is for a variation point or not. If true, then all the <b>memberships</b> of the <b>Usage</b> must be <b>VariantMemberships</b> .
<code>oslc_sysmlv2:usage_NestedAction</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:ActionUsage</code>	The <b>ActionUsages</b> that are <b>nestedUsages</b> of this <b>Usage</b> .
<code>oslc_sysmlv2:usage_NestedAllocation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:AllocationUsage</code>	The <b>AllocationUsages</b> that are <b>nestedUsages</b> of this <b>Usage</b> .
<code>oslc_sysmlv2:usage_NestedAnalysisCase</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:AnalysisCaseUsage</code>	The <b>AnalysisCaseUsages</b> that are <b>nestedUsages</b> of this <b>Usage</b> .
<code>oslc_sysmlv2:usage_NestedAttribute</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:AttributeUsage</code>	The <code>&gt;</code> <b>AttributeUsages</b> that are <b>nestedUsages</b> of this <b>Usage</b> .
<code>oslc_sysmlv2:usage_NestedCalculation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:CalculationUsage</code>	The <b>CalculationUsage</b> that are <b>nestedUsages</b> of this <b>Usage</b> .
<code>oslc_sysmlv2:usage_NestedCase</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:CaseUsage</code>	The <b>CaseUsages</b> that are <b>nestedUsages</b> of this <b>Usage</b> .
<code>oslc_sysmlv2:usage_NestedConcern</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:ConcernUsage</code>	The <b>ConcernUsages</b> that are <b>nestedUsages</b> of this <b>Usage</b> .
<code>oslc_sysmlv2:usage_NestedConnection</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:ConnectorAsUsage</code>	The <b>ConnectorAsUsages</b> that are <b>nestedUsages</b> of this <b>Usage</b> . Note that this list includes <b>BindingConnectorAsUsages</b> and <b>SuccessionAsUsages</b> , even though these are <b>ConnectorAsUsages</b> but not <b>ConnectionUsages</b> .
<code>oslc_sysmlv2:usage_NestedConstraint</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:ConstraintUsage</code>	The <b>ConstraintUsages</b> that are <b>nestedUsages</b> of this <b>Usage</b> .
<code>oslc_sysmlv2:usage_NestedEnumeration</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:EnumerationUsage</code>	The <code>&gt;</code> <b>EnumerationUsages</b> that are <b>nestedUsages</b> of this <b>Usage</b> .

<code>oslc_sysmlv2:usage_OwningUsage</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Usage</code>	The <code>Usage</code> in which this <code>Usage</code> is nested (if any).
<code>oslc_sysmlv2:usage_Usage</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Usage</code>	The <code>Usages</code> that are <code>features</code> of this <code>Usage</code> (not necessarily owned).
<code>oslc_sysmlv2:usage_Variant</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Usage</code>	The <code>Usages</code> which represent the variants of this <code>Usage</code> as a variation point <code>Usage</code> , if <code>isVariation = true</code> . If <code>isVariation = false</code> , then there must be no <code>variants</code> .
<code>oslc_sysmlv2:usage_VariantMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:VariantMembership</code>	The <code>ownedMemberships</code> of this <code>Usage</code> that are <code>VariantMemberships</code> . If <code>isVariation = true</code> , then this must be all <code>memberships</code> of the <code>Usage</code> . If <code>isVariation = false</code> , then <code>variantMembership</code> must be empty.

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc:instanceShape</code>	Zero-or-one	false	Resource	Reference	<code>oslc:ResourceShape</code>	The URI of a Resource Shape that describes the possible properties, occurrence, value types, allowed values and labels. This shape information is useful in displaying the subject resource as well as guiding clients in performing modifications. Instance shapes may be specific to the authenticated user associated with the request that retrieved the resource, the current state of the resource and other factors and thus should not be cached.
<code>oslc:serviceProvider</code>	Zero-or-many	false	Resource	Reference	<code>oslc:ServiceProvider</code>	A link to the resource's OSLC Service Provider. There may be cases when the subject resource is available from a service provider that implements multiple domain specifications, which could result in multiple values for this property.
<code>oslc:shortTitle</code>	Zero-or-one	false	XMLLiteral	N/A	Unspecified	Short name identifying a resource, often used as an abbreviated identifier for presentation to end-users. <b>SHOULD</b> include only content that is valid inside an XHTML <code>&lt;span&gt;</code> element [sml-2].
<code>rdf:type</code>	Zero-or-many	false	Resource	Reference	<code>rdfs:Class</code>	The resource type URIs.

- **Describes:** <http://open-services.net/ns/sysmlv2#ConjugatedPortDefinition>
- **Summary:** ConjugatedPortDefinitionShape
- **Description:** A `ConjugatedPortDefinition` is a `PortDefinition` that is a `PortDefinition` of its original `PortDefinition`. That is, a `ConjugatedPortDefinition` inherits all the `features` of the original `PortDefinition`, but input `flows` of the original `PortDefinition` become outputs on the `ConjugatedPortDefinition` and output `flows` of the original `PortDefinition` become inputs on the `ConjugatedPortDefinition`. Every `PortDefinition` (that is not itself a `ConjugatedPortDefinition`) has exactly one corresponding `ConjugatedPortDefinition`, whose effective name is the name of the `originalPortDefinition`, with the character `~` prepended.

#### ConjugatedPortDefinition Properties

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>dcterms:contributor</code>	Zero-or-many	false	AnyResource	Either	<code>oslc:Any</code>	Contributor or contributors to the resource. It is likely that the target resource will be a foaf:Person but that is not necessarily the case.
<code>dcterms:created</code>	Zero-or-one	false	dateTime	N/A	Unspecified	Timestamp of resource creation.

Standards Track Work Product

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>dcterms:creator</code>	Zero-or-many	false	AnyResource	Either	<code>oslc:Any</code>	Creator or creators of the resource. It is likely that the target resource will be a foaf:Person but that is not necessarily the case.
<code>dcterms:description</code>	Zero-or-one	false	XMLLiteral	N/A	Unspecified	Descriptive text about resource represented as rich text in XHTML content.
<code>dcterms:identifier</code>	Exactly-one	true	string	N/A	Unspecified	A unique identifier for a resource. Typically read-only and assigned by the service provider when a resource is created. Not typically intended for end-user display.
<code>dcterms:modified</code>	Zero-or-one	false	dateTime	N/A	Unspecified	Timestamp of latest resource modification.
<code>dcterms:source</code>	Zero-or-one	false	Resource	Reference	<code>oslc:Any</code>	The resource URI a client can perform a get on to obtain the original non-OSLC AM formatted resource that was used to create this resource. The source resource is usually a binary or proprietary format that the service provider can consume and convert into an OSLC AM format. The service may use content negotiation with the Accept header to obtain the desired content type.
<code>dcterms:title</code>	Exactly-one	false	XMLLiteral	N/A	Unspecified	Title of the resource represented as rich text in XHTML content.
<code>dcterms:type</code>	Zero-or-many	false	string	N/A	Unspecified	A short string representation for the type, for example 'Car'.
<code>jazz_am:derives</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The resource that derives from another resource originated from or is significantly influenced by the referenced resource. For example a model element derives from a requirement.
<code>jazz_am:elaborates</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	This resource elaborates the referenced resource.
<code>jazz_am:external</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	A generic link from a resource to an external web page.

Standards Track Work Product

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>jazz_am:refine</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The target is a refinement of the source. (e.g. a use case scenario might be a refinement of a textual requirement that describes the interaction).
<code>jazz_am:satisfy</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The model element satisfies the requirement (e.g. The use case satisfies a functional requirement).
<code>jazz_am:trace</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The model element has a trace to the requirement (e.g. An attribute or its value are traced to a requirement).
<code>oslc_sysmlv2:classifier_OwnedSubclassification</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Subclassification</code>	The <code>ownedSpecializations</code> of this <code>Classifier</code> that are <code>Subclassifications</code> , for which this <code>Classifier</code> is the <code>subclassifier</code> .
<code>oslc_sysmlv2:conjugatedPortDefinition_OriginalPortDefinition</code>	Exactly-one	false	Resource	Either	<code>oslc_sysmlv2:PortDefinition</code>	The original <code>PortDefinition</code> for this <code>ConjugatedPortDefinition</code> , which is the <code>owningNamespace</code> of the <code>ConjugatedPortDefinition</code> .
<code>oslc_sysmlv2:conjugatedPortDefinition_OwnedPortConjugator</code>	Exactly-one	false	Resource	Either	<code>oslc_sysmlv2:PortConjugation</code>	The <code>PortConjugation</code> that is the <code>ownedConjugator</code> of this <code>ConjugatedPortDefinition</code> , linking it to its <code>originalPortDefinition</code> .
<code>oslc_sysmlv2:definition_DirectedUsage</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Usage</code>	The <code>usages</code> of this <code>Definition</code> that are <code>directedFeatures</code> .
<code>oslc_sysmlv2:definition_IsVariation</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether this <code>Definition</code> is for a variation point or not. If true, then all the <code>memberships</code> of the <code>Definition</code> must be <code>VariantMemberships</code> .
<code>oslc_sysmlv2:definition_OwnedAction</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:ActionUsage</code>	The <code>ActionUsages</code> that are <code>ownedUsages</code> of this <code>Definition</code> .
<code>oslc_sysmlv2:definition_OwnedAllocation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:AllocationUsage</code>	The <code>AllocationUsages</code> that are <code>ownedUsages</code> of this <code>Definition</code> .

<code>oslc_sysmlv2:definition_OwnedUseCase</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:UseCaseUsage</code>	The <code>UseCaseUsages</code> that are <code>ownedUsages</code> of this <code>Definition</code> .
<code>oslc_sysmlv2:definition_OwnedVerificationCase</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:VerificationCaseUsage</code>	The <code>VerificationCaseUsages</code> that are <code>ownedUsages</code> of this <code>Definition</code> .
<code>oslc_sysmlv2:definition_OwnedView</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:ViewUsage</code>	The <code>ViewUsages</code> that are <code>ownedUsages</code> of this <code>Definition</code> .
<code>oslc_sysmlv2:definition_OwnedViewpoint</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:ViewpointUsage</code>	The <code>ViewpointUsages</code> that are <code>ownedUsages</code> of this <code>Definition</code> .
<code>oslc_sysmlv2:definition_Usage</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Usage</code>	The <code>Usages</code> that are <code>features</code> of this <code>Definition</code> (not necessarily owned).
<code>oslc_sysmlv2:definition_Variant</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Usage</code>	The <code>Usages</code> which represent the variants of this <code>Definition</code> as a variation point <code>Definition</code> , if <code>isVariation</code> = true. If <code>isVariation</code> = false, the there must be no <code>variants</code> .
<code>oslc_sysmlv2:definition_VariantMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:VariantMembership</code>	The <code>ownedMemberships</code> of this <code>Definition</code> that are <code>VariantMemberships</code> . If <code>isVariation</code> = true, then this must be all <code>ownedMemberships</code> of the <code>Definition</code> . If <code>isVariation</code> = false, then <code>variantMembership</code> must be empty.
<code>oslc_sysmlv2:element_AliasIds</code>	Zero-or-many	false	unspecified	Either	<code>xsd:string</code>	Various alternative identifiers for this Element. Generally, these will be set by tools.
<code>oslc_sysmlv2:element_DeclaredName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The declared name of this Element.

Standards Track Work Product

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:element_DeclaredShortName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	An optional alternative name for the <b>Element</b> that is intended to be shorter or in some way more succinct than its primary <b>name</b> . It may act as a modeler-specified identifier for the <b>Element</b> , though it is then the responsibility of the modeler to maintain the uniqueness of this identifier within a model or relative to some other context.
<code>oslc_sysmlv2:element_Documentation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Documentation</code>	The Documentation owned by this Element.
<code>oslc_sysmlv2:element_ElementId</code>	Exactly-one	false	unspecified	Either	<code>xsd:string</code>	The globally unique identifier for this Element. This is intended to be set by tooling, and it must not change during the lifetime of the Element.
<code>oslc_sysmlv2:element_IsImpliedIncluded</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether all necessary implied Relationships have been included in the <b>ownedRelationships</b> of this Element. This property may be true, even if there are not actually any <b>ownedRelationships</b> with <b>isImplied = true</b> , meaning that no such Relationships are actually implied for this Element. However, if it is false, then <b>ownedRelationships</b> may <i>not</i> contain any implied Relationships. That is, either <i>all</i> required implied Relationships must be included, or none of them.
<code>oslc_sysmlv2:element_IsLibraryElement</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether this Element is contained in the ownership tree of a library model.
<code>oslc_sysmlv2:element_Name</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The name to be used for this <b>Element</b> during name resolution within its <b>owningNamespace</b> . This is derived using the <b>effectiveName()</b> operation. By default, it is the same as the <b>declaredName</b> , but this is overridden for certain kinds of <b>Elements</b> to compute a <b>name</b> even when the <b>declaredName</b> is null.
<code>oslc_sysmlv2:element_OwnedAnnotation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Annotation</code>	The <b>ownedRelationships</b> of this <b>Element</b> that are <b>Annotations</b> , for which this <b>Element</b> is the <b>annotatedElement</b> .

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:element_OwnedElement</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The Elements owned by this Element, derived as the <code>ownedRelatedElements</code> of the <code>ownedRelationships</code> of this Element.
<code>oslc_sysmlv2:element_OwnedRelationship</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Relationship</code>	The Relationships for which this Element is the <code>owningRelatedElement</code> .
<code>oslc_sysmlv2:element_Owner</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The owner of this Element, derived as the <code>owningRelatedElement</code> of the <code>owningRelationship</code> of this Element, if any.
<code>oslc_sysmlv2:element_OwningMembership</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:OwningMembership</code>	The <code>owningRelationship</code> of this Element, if that Relationship is a Membership.
<code>oslc_sysmlv2:element_OwningNamespace</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Namespace</code>	The Namespace that owns this Element, which is the <code>membershipOwningNamespace</code> of the <code>owningMembership</code> of this Element, if any.
<code>oslc_sysmlv2:element_OwningRelationship</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Relationship</code>	The Relationship for which this Element is an <code>ownedRelatedElement</code> , if any.
<code>oslc_sysmlv2:element_QualifiedName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The full ownership-qualified name of this Element, represented in a form that is valid according to the KerML textual concrete syntax for qualified names (including use of unrestricted name notation and escaped characters, as necessary). The <code>qualifiedName</code> is null if this Element has no <code>owningNamespace</code> or if there is not a complete ownership chain of named Namespaces from a root Namespace to this Element.
<code>oslc_sysmlv2:element_ShortName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The short name to be used for this Element during name resolution within its <code>owningNamespace</code> . This is derived using the <code>effectiveShortName()</code> operation. By default, it is the same as the <code>declaredShortName</code> , but this is overridden for certain kinds of Elements to compute a <code>shortName</code> even when the <code>declaredName</code> is null.

<code>oslc_sysmlv2:type_OwnedEndFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All <b>endFeatures</b> of this <b>Type</b> that are <b>ownedFeatures</b> .
<code>oslc_sysmlv2:type_OwnedFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <b>ownedMemberFeatures</b> of the <b>ownedFeatureMemberships</b> of this <b>Type</b> .
<code>oslc_sysmlv2:type_OwnedFeatureMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:FeatureMembership</code>	The <b>ownedMemberships</b> of this <b>Type</b> that are <b>FeatureMemberships</b> , for which the <b>Type</b> is the <b>owningType</b> . Each such <b>FeatureMembership</b> identifies an <b>ownedFeature</b> of the <b>Type</b> .
<code>oslc_sysmlv2:type_OwnedIntersecting</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Intersecting</code>	The <b>ownedRelationships</b> of this <b>Type</b> that are <b>Intersectings</b> , have the <b>Type</b> as their <b>typeIntersected</b> .
<code>oslc_sysmlv2:type_OwnedSpecialization</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Specialization</code>	The <b>ownedRelationships</b> of this <b>Type</b> that are <b>Specializations</b> , for which the <b>Type</b> is the <b>specific Type</b> .
<code>oslc_sysmlv2:type_OwnedUnioning</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Unioning</code>	The <b>ownedRelationships</b> of this <b>Type</b> that are <b>Unionings</b> , having the <b>Type</b> as their <b>typeUnioned</b> .

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:type_UnioningType</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The interpretations of a <b>Type</b> with <b>unioningTypes</b> are asserted to be the same as those of all the <b>unioningTypes</b> together, which are the <b>Types</b> derived from the <b>unioningType</b> of the <b>ownedUnionings</b> of this <b>Type</b> . For example, a <b>Classifier</b> for people might be the union of <b>Classifiers</b> for all the sexes. Similarly, a feature for people's children might be the union of features dividing them in the same ways as people in general.
<code>oslc:instanceShape</code>	Zero-or-one	false	Resource	Reference	<code>oslc:ResourceShape</code>	The URI of a Resource Shape that describes the possible properties, occurrence, value types, allowed values and labels. This shape information is useful in displaying the subject resource as well as guiding clients in performing modifications. Instance shapes may be specific to the authenticated user associated with the request that retrieved the resource, the current state of the resource and other factors and thus should not be cached.
<code>oslc:serviceProvider</code>	Zero-or-many	false	Resource	Reference	<code>oslc:ServiceProvider</code>	A link to the resource's OSLC Service Provider. There may be cases when the subject resource is available from a service provider that implements multiple domain specifications, which could result in multiple values for this property.
<code>oslc:shortTitle</code>	Zero-or-one	false	XMLLiteral	N/A	Unspecified	Short name identifying a resource, often used as an abbreviated identifier for presentation to end-users. <b>SHOULD</b> include only content that is valid inside an XHTML <code>&lt;span&gt;</code> element [sml-3].
<code>rdf:type</code>	Zero-or-many	false	Resource	Reference	<code>rdfs:Class</code>	The resource type URIs.

- **Describes:** <http://open-services.net/ns/sysmlv2#ActionDefinition>
- **Summary:** ActionDefinitionShape
- **Description:** An **ActionDefinition** is a **Definition** that is also a **Behavior** that defines an **Action** performed by a system or part of a system.

## ActionDefinition Properties

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>dcterms:contributor</code>	Zero-or-many	false	AnyResource	Either	<code>oslc:Any</code>	Contributor or contributors to the resource. It is likely that the target resource will be a foaf:Person but that is not necessarily the case.
<code>dcterms:created</code>	Zero-or-one	false	dateTime	N/A	Unspecified	Timestamp of resource creation.
<code>dcterms:creator</code>	Zero-or-many	false	AnyResource	Either	<code>oslc:Any</code>	Creator or creators of the resource. It is likely that the target resource will be a foaf:Person but that is not necessarily the case.
<code>dcterms:description</code>	Zero-or-one	false	XMLLiteral	N/A	Unspecified	Descriptive text about resource represented as rich text in XHTML content.
<code>dcterms:identifier</code>	Exactly-one	true	string	N/A	Unspecified	A unique identifier for a resource. Typically read-only and assigned by the service provider when a resource is created. Not typically intended for end-user display.
<code>dcterms:modified</code>	Zero-or-one	false	dateTime	N/A	Unspecified	Timestamp of latest resource modification.
<code>dcterms:source</code>	Zero-or-one	false	Resource	Reference	<code>oslc:Any</code>	The resource URI a client can perform a get on to obtain the original non-OSLC AM formatted resource that was used to create this resource. The source resource is usually a binary or proprietary format that the service provider can consume and convert into an OSLC AM format. The service may use content negotiation with the Accept header to obtain the desired content type.
<code>dcterms:title</code>	Exactly-one	false	XMLLiteral	N/A	Unspecified	Title of the resource represented as rich text in XHTML content.
<code>dcterms:type</code>	Zero-or-many	false	string	N/A	Unspecified	A short string representation for the type, for example 'Car'.
<code>jazz_am:derives</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The resource that derives from another resource originated from or is significantly influenced by the referenced resource. For example a model element derives from a requirement.
<code>jazz_am:elaborates</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	This resource elaborates the referenced resource.

Standards Track Work Product

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>jazz_am:external</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	A generic link from a resource to an external web page.
<code>jazz_am:refine</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The target is a refinement of the source. (e.g. a use case scenario might be a refinement of a textual requirement that describes the interaction).
<code>jazz_am:satisfy</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The model element satisfies the requirement (e.g. The use case satisfies a functional requirement).
<code>jazz_am:trace</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The model element has a trace to the requirement (e.g. An attribute or its value are traced to a requirement).
<code>oslc_sysmlv2:actionDefinition_Action</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:ActionUsage</code>	The <b>ActionUsages</b> that are <b>steps</b> in this <b>ActionDefinition</b> , which define the actions that specify the behavior of the <b>ActionDefinition</b> .
<code>oslc_sysmlv2:behavior_Parameter</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The parameters of this <b>Behavior</b> , which are defined as its <b>directedFeatures</b> , whose values are passed into and/or out of a performance of the <b>Behavior</b> .
<code>oslc_sysmlv2:behavior_Step</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Step</code>	The <b>Steps</b> that make up this <b>Behavior</b> .
<code>oslc_sysmlv2:classifier_OwnedSubclassification</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Subclassification</code>	The <b>ownedSpecializations</b> of this <b>Classifier</b> that are <b>Subclassifications</b> , for which this <b>Classifier</b> is the <b>subclassifier</b> .
<code>oslc_sysmlv2:definition_DirectedUsage</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Usage</code>	The <b>usages</b> of this <b>Definition</b> that are <b>directedFeatures</b> .
<code>oslc_sysmlv2:definition_IsVariation</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether this <b>Definition</b> is for a variation point or not. If true, then all the <b>memberships</b> of the <b>Definition</b> must be <b>VariantMemberships</b> .
<code>oslc_sysmlv2:definition_OwnedAction</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:ActionUsage</code>	The <b>ActionUsages</b> that are <b>ownedUsages</b> of this <b>Definition</b> .

Standards Track Work Product

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:definition_OwnedAllocation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:AllocationUsage</code>	The <code>AllocationUsages</code> that are <code>ownedUsages</code> of this <code>Definition</code> .
<code>oslc_sysmlv2:definition_OwnedAnalysisCase</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:AnalysisCaseUsage</code>	The <code>AnalysisCaseUsages</code> that are <code>ownedUsages</code> of this <code>Definition</code> .
<code>oslc_sysmlv2:definition_OwnedAttribute</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:AttributeUsage</code>	The <code>AttributeUsages</code> that are <code>ownedUsages</code> of this <code>Definition</code> .
<code>oslc_sysmlv2:definition_OwnedCalculation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:CalculationUsage</code>	The <code>CalculationUsages</code> that are <code>ownedUsages</code> of this <code>Definition</code> .
<code>oslc_sysmlv2:definition_OwnedCase</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:CaseUsage</code>	The <code>CaseUsages</code> that are <code>ownedUsages</code> of this <code>Definition</code> .
<code>oslc_sysmlv2:definition_OwnedConcern</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:ConcernUsage</code>	The <code>ConcernUsages</code> that are <code>ownedUsages</code> of this <code>Definition</code> .
<code>oslc_sysmlv2:definition_OwnedConnection</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:ConnectorAsUsage</code>	The <code>ConnectorAsUsages</code> that are <code>ownedUsages</code> of this <code>Definition</code> . Note that this list includes <code>BindingConnectorAsUsages</code> and <code>SuccessionAsUsages</code> , even though these are <code>ConnectorAsUsages</code> but not <code>ConnectionUsages</code> .
<code>oslc_sysmlv2:definition_OwnedConstraint</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:ConstraintUsage</code>	The <code>ConstraintUsages</code> that are <code>ownedUsages</code> of this <code>Definition</code> .
<code>oslc_sysmlv2:definition_OwnedEnumeration</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:EnumerationUsage</code>	The <code>EnumerationUsages</code> that are <code>ownedUsages</code> of this <code>Definition</code> .
<code>oslc_sysmlv2:definition_OwnedFlow</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:FlowConnectionUsage</code>	The <code>FlowConnectionUsages</code> that are <code>ownedUsages</code> of this <code>Definition</code> .
<code>oslc_sysmlv2:definition_OwnedInterface</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:InterfaceUsage</code>	The <code>InterfaceUsages</code> that are <code>ownedUsages</code> of this <code>Definition</code> .

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:definition_OwnedItem</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:ItemUsage</code>	The <code>ItemUsages</code> that are <code>ownedUsages</code> of this <code>Definition</code> .
<code>oslc_sysmlv2:definition_OwnedMetadata</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:MetadataUsage</code>	The <code>MetadataUsages</code> that are <code>ownedUsages</code> of this <code>Definition</code> .
<code>oslc_sysmlv2:definition_OwnedOccurrence</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:OccurrenceUsage</code>	The <code>OccurrenceUsages</code> that are <code>ownedUsages</code> of this <code>Definition</code> .
<code>oslc_sysmlv2:definition_OwnedPart</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:PartUsage</code>	The <code>PartUsages</code> that are <code>ownedUsages</code> of this <code>Definition</code> .
<code>oslc_sysmlv2:definition_OwnedPort</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:PortUsage</code>	The <code>PortUsages</code> that are <code>ownedUsages</code> of this <code>Definition</code> .
<code>oslc_sysmlv2:definition_OwnedReference</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:ReferenceUsage</code>	The <code>ReferenceUsages</code> that are <code>ownedUsages</code> of this <code>Definition</code> .
<code>oslc_sysmlv2:definition_OwnedRendering</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:RenderingUsage</code>	The <code>RenderingUsages</code> that are <code>ownedUsages</code> of this <code>Definition</code> .
<code>oslc_sysmlv2:definition_OwnedRequirement</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:RequirementUsage</code>	The <code>RequirementUsages</code> that are <code>ownedUsages</code> of this <code>Definition</code> .
<code>oslc_sysmlv2:definition_OwnedState</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:StateUsage</code>	The <code>StateUsages</code> that are <code>ownedUsages</code> of this <code>Definition</code> .
<code>oslc_sysmlv2:definition_OwnedTransition</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:TransitionUsage</code>	The <code>TransitionUsages</code> that are <code>ownedUsages</code> of this <code>Definition</code> .
<code>oslc_sysmlv2:definition_OwnedUsage</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Usage</code>	The <code>Usages</code> that are <code>ownedFeatures</code> of this <code>Definition</code> .

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:definition_OwnedUseCase</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:UseCaseUsage</code>	The <code>UseCaseUsages</code> that are <code>ownedUsages</code> of this <code>Definition</code> .
<code>oslc_sysmlv2:definition_OwnedVerificationCase</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:VerificationCaseUsage</code>	The <code>VerificationCaseUsages</code> that are <code>ownedUsages</code> of this <code>Definition</code> .
<code>oslc_sysmlv2:definition_OwnedView</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:ViewUsage</code>	The <code>ViewUsages</code> that are <code>ownedUsages</code> of this <code>Definition</code> .
<code>oslc_sysmlv2:definition_OwnedViewpoint</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:ViewpointUsage</code>	The <code>ViewpointUsages</code> that are <code>ownedUsages</code> of this <code>Definition</code> .
<code>oslc_sysmlv2:definition_Usage</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Usage</code>	The <code>Usages</code> that are <code>features</code> of this <code>Definition</code> (not necessarily owned).
<code>oslc_sysmlv2:definition_Variant</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Usage</code>	The <code>Usages</code> which represent the variants of this <code>Definition</code> as a variation point <code>Definition</code> , if <code>isVariation</code> = true. If <code>isVariation</code> = false, the there must be no <code>variants</code> .
<code>oslc_sysmlv2:definition_VariantMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:VariantMembership</code>	The <code>ownedMemberships</code> of this <code>Definition</code> that are <code>VariantMemberships</code> . If <code>isVariation</code> = true, then this must be all <code>ownedMemberships</code> of the <code>Definition</code> . If <code>isVariation</code> = false, then <code>variantMembership</code> must be empty.
<code>oslc_sysmlv2:element_AliasIds</code>	Zero-or-many	false	unspecified	Either	<code>xsd:string</code>	Various alternative identifiers for this <code>Element</code> . Generally, these will be set by tools.
<code>oslc_sysmlv2:element_DeclaredName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The declared name of this <code>Element</code> .
<code>oslc_sysmlv2:element_DeclaredShortName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	An optional alternative name for the <code>Element</code> that is intended to be shorter or in some way more succinct than its primary <code>name</code> . It may act as a modeler-specified identifier for the <code>Element</code> , though it is then the responsibility of the modeler to maintain the uniqueness of this identifier within a model or relative to some other context.
<code>oslc_sysmlv2:element_Documentation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Documentation</code>	The <code>Documentation</code> owned by this <code>Element</code> .

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:element_ElementId</code>	Exactly-one	false	unspecified	Either	<code>xsd:string</code>	The globally unique identifier for this Element. This is intended to be set by tooling, and it must not change during the lifetime of the Element.
<code>oslc_sysmlv2:element_IsImpliedIncluded</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether all necessary implied Relationships have been included in the <code>ownedRelationships</code> of this Element. This property may be true, even if there are not actually any <code>ownedRelationships</code> with <code>isImplied = true</code> , meaning that no such Relationships are actually implied for this Element. However, if it is false, then <code>ownedRelationships</code> may <i>not</i> contain any implied Relationships. That is, either <i>all</i> required implied Relationships must be included, or none of them.
<code>oslc_sysmlv2:element_IsLibraryElement</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether this Element is contained in the ownership tree of a library model.
<code>oslc_sysmlv2:element_Name</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The name to be used for this Element during name resolution within its <code>owningNamespace</code> . This is derived using the <code>effectiveName()</code> operation. By default, it is the same as the <code>declaredName</code> , but this is overridden for certain kinds of Elements to compute a <code>name</code> even when the <code>declaredName</code> is null.
<code>oslc_sysmlv2:element_OwnedAnnotation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Annotation</code>	The <code>ownedRelationships</code> of this Element that are Annotations, for which this Element is the <code>annotatedElement</code> .
<code>oslc_sysmlv2:element_OwnedElement</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The Elements owned by this Element, derived as the <code>ownedRelatedElements</code> of the <code>ownedRelationships</code> of this Element.
<code>oslc_sysmlv2:element_OwnedRelationship</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Relationship</code>	The Relationships for which this Element is the <code>owningRelatedElement</code> .
<code>oslc_sysmlv2:element_Owner</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The owner of this Element, derived as the <code>owningRelatedElement</code> of the <code>owningRelationship</code> of this Element, if any.
<code>oslc_sysmlv2:element_OwningMembership</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:OwningMembership</code>	The <code>owningRelationship</code> of this Element, if that Relationship is a Membership.
<code>oslc_sysmlv2:element_OwningNamespace</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Namespace</code>	The Namespace that owns this Element, which is the <code>membershipOwningNamespace</code> of the <code>owningMembership</code> of this Element, if any.

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:element_OwningRelationship</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Relationship</code>	The Relationship for which this Element is an <code>ownedRelatedElement</code> , if any.
<code>oslc_sysmlv2:element_QualifiedName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The full ownership-qualified name of this <b>Element</b> , represented in a form that is valid according to the KerML textual concrete syntax for qualified names (including use of unrestricted name notation and escaped characters, as necessary). The <code>qualifiedName</code> is null if this <b>Element</b> has no <code>owningNamespace</code> or if there is not a complete ownership chain of named <b>Namespaces</b> from a root <b>Namespace</b> to this <b>Element</b> .
<code>oslc_sysmlv2:element_ShortName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The short name to be used for this <b>Element</b> during name resolution within its <code>owningNamespace</code> . This is derived using the <code>effectiveShortName()</code> operation. By default, it is the same as the <code>declaredShortName</code> , but this is overridden for certain kinds of <b>Elements</b> to compute a <code>shortName</code> even when the <code>declaredName</code> is null.
<code>oslc_sysmlv2:element_TextualRepresentation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:TextualRepresentation</code>	The <b>TextualRepresentations</b> that annotate this <b>Element</b> .
<code>oslc_sysmlv2:namespace_ImportedMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Membership</code>	The <b>Memberships</b> in this <b>Namespace</b> that result from the <code>ownedImports</code> of this <b>Namespace</b> .
<code>oslc_sysmlv2:namespace_Member</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The set of all member <b>Elements</b> of this <b>Namespace</b> , which are the <code>memberElements</code> of all <code>memberships</code> of the <b>Namespace</b> .
<code>oslc_sysmlv2:namespace_Membership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Membership</code>	All <b>Memberships</b> in this <b>Namespace</b> , including (at least) the union of <code>ownedMemberships</code> and <code>importedMemberships</code> .
<code>oslc_sysmlv2:namespace_OwnedImport</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Import</code>	The <code>ownedRelationships</code> of this <b>Namespace</b> that are <b>Imports</b> , for which the <b>Namespace</b> is the <code>importOwningNamespace</code> .
<code>oslc_sysmlv2:namespace_OwnedMember</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The owned <b>members</b> of this <b>Namespace</b> , which are the <code>ownedMemberElements</code> of the <code>ownedMemberships</code> of the ..
<code>oslc_sysmlv2:namespace_OwnedMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Membership</code>	The <code>ownedRelationships</code> of this <b>Namespace</b> that are <b>Memberships</b> , for which the <b>Namespace</b> is the <code>membershipOwningNamespace</code> .

## Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:occurrenceDefinition_IsIndividual</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether this OccurrenceDefinition is constrained to represent single individual.
<code>oslc_sysmlv2:occurrenceDefinition_LifeClass</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:LifeClass</code>	If <code>isIndividual</code> is true, a <code>LifeClass</code> that specializes this <code>OccurrenceDefinition</code> , restricting it to represent an individual.
<code>oslc_sysmlv2:type_DifferencingType</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The interpretations of a <code>Type</code> with <code>differencingTypes</code> are asserted to be those of the first of those <code>Types</code> , but not including those of the remaining <code>Types</code> . For example, a <code>Classifier</code> might be the difference of a <code>Classifier</code> for people and another for people of a particular nationality, leaving people who are not of that nationality. Similarly, a feature of people might be the difference between a feature for their children and a <code>Classifier</code> for people of a particular sex, identifying their children not of that sex (because the interpretations of the children <code>Feature</code> that identify those of that sex are also interpretations of the <code>Classifier</code> for that sex).
<code>oslc_sysmlv2:type_DirectedFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <code>features</code> of this <code>Type</code> that have a non-null <code>direction</code> .
<code>oslc_sysmlv2:type_EndFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All <code>features</code> of this <code>Type</code> with <code>isEnd = true</code> .
<code>oslc_sysmlv2:type_Feature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <code>ownedMemberFeatures</code> of the <code>featureMemberships</code> of this <code>Type</code> .
<code>oslc_sysmlv2:type_FeatureMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:FeatureMembership</code>	The <code>FeatureMemberships</code> for <code>features</code> of this <code>Type</code> , which include all <code>ownedFeatureMemberships</code> and those <code>inheritedMemberships</code> that are <code>FeatureMemberships</code> (but does <i>not</i> include any <code>importedMemberships</code> ).
<code>oslc_sysmlv2:type_InheritedFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All the <code>memberFeatures</code> of the <code>inheritedMemberships</code> of this <code>Type</code> that are <code>FeatureMemberships</code> .
<code>oslc_sysmlv2:type_InheritedMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Membership</code>	All <code>Memberships</code> inherited by this <code>Type</code> via <code>Specialization</code> or <code>Conjugation</code> . These are included in the derived union for the <code>memberships</code> of the <code>Type</code> .
<code>oslc_sysmlv2:type_Input</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All <code>features</code> related to this <code>Type</code> by <code>FeatureMemberships</code> that have <code>direction in or inout..</code>

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:type_IntersectingType</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The interpretations of a <b>Type</b> with <b>intersectingTypes</b> are asserted to be those in common among the <b>intersectingTypes</b> , which are the <b>Types</b> derived from the <b>intersectingType</b> of the <b>ownedIntersectings</b> of this <b>Type</b> . For example, a <b>Classifier</b> might be an intersection of <b>Classifiers</b> for people of a particular sex and of a particular nationality. Similarly, a feature for people's children of a particular sex might be the intersection of a <b>Feature</b> for their children and a <b>Classifier</b> for people of that sex (because the interpretations of the children <b>Feature</b> that identify those of that sex are also interpretations of the <b>Classifier</b> for that sex).
<code>oslc_sysmlv2:type_IsAbstract</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Indicates whether instances of this <b>Type</b> must also be instances of at least one of its specialized <b>Types</b> .
<code>oslc_sysmlv2:type_IsConjugated</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Indicates whether this <b>Type</b> has an <b>ownedConjugator</b> .
<code>oslc_sysmlv2:type_IsSufficient</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether all things that meet the classification conditions of this <b>Type</b> must be classified by the <b>Type</b> .
<code>oslc_sysmlv2:type_Multiplicity</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Multiplicity</code>	An <b>ownedMember</b> of this <b>Type</b> that is a <b>Multiplicity</b> , which constrains the cardinality of the <b>Type</b> . If there is no such <b>ownedMember</b> , then the cardinality of this <b>Type</b> is constrained by all the <b>Multiplicity</b> constraints applicable to any direct supertypes.
<code>oslc_sysmlv2:type_Output</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All <b>features</b> related to this <b>Type</b> by <b>FeatureMemberships</b> that have <b>direction out or inout</b> .
<code>oslc_sysmlv2:type_OwnedConjugator</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Conjugation</code>	A <b>Conjugation</b> owned by this <b>Type</b> for which the <b>Type</b> is the <b>originalType</b> .
<code>oslc_sysmlv2:type_OwnedDifferencing</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Differencing</code>	The <b>ownedRelationships</b> of this <b>Type</b> that are <b>Differencings</b> , having this <b>Type</b> as their <b>typeDifferenced</b> .
<code>oslc_sysmlv2:type_OwnedDisjoining</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Disjoining</code>	The <b>ownedRelationships</b> of this <b>Type</b> that are <b>Disjoinings</b> , for which the <b>Type</b> is the <b>typeDisjoined Type</b> .
<code>oslc_sysmlv2:type_OwnedEndFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All <b>endFeatures</b> of this <b>Type</b> that are <b>ownedFeatures</b> .

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:type_OwnedFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <code>ownedMemberFeatures</code> of the <code>ownedFeatureMemberships</code> of this <code>Type</code> .
<code>oslc_sysmlv2:type_OwnedFeatureMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:FeatureMembership</code>	The <code>ownedMemberships</code> of this <code>Type</code> that are <code>FeatureMemberships</code> , for which the <code>Type</code> is the <code>owningType</code> . Each such <code>FeatureMembership</code> identifies an <code>ownedFeature</code> of the <code>Type</code> .
<code>oslc_sysmlv2:type_OwnedIntersecting</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Intersecting</code>	The <code>ownedRelationships</code> of this <code>Type</code> that are <code>Intersectings</code> , have the <code>Type</code> as their <code>typeIntersected</code> .
<code>oslc_sysmlv2:type_OwnedSpecialization</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Specialization</code>	The <code>ownedRelationships</code> of this <code>Type</code> that are <code>Specializations</code> , for which the <code>Type</code> is the <code>specific Type</code> .
<code>oslc_sysmlv2:type_OwnedUnioning</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Unioning</code>	The <code>ownedRelationships</code> of this <code>Type</code> that are <code>Unionings</code> , having the <code>Type</code> as their <code>typeUnioned</code> .
<code>oslc_sysmlv2:type_UnioningType</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The interpretations of a <code>Type</code> with <code>unioningTypes</code> are asserted to be the same as those of all the <code>unioningTypes</code> together, which are the <code>Types</code> derived from the <code>unioningType</code> of the <code>ownedUnionings</code> of this <code>Type</code> . For example, a <code>Classifier</code> for people might be the union of <code>Classifiers</code> for all the sexes. Similarly, a feature for people's children might be the union of features dividing them in the same ways as people in general.
<code>oslc:instanceShape</code>	Zero-or-one	false	Resource	Reference	<code>oslc:ResourceShape</code>	The URI of a Resource Shape that describes the possible properties, occurrence, value types, allowed values and labels. This shape information is useful in displaying the subject resource as well as guiding clients in performing modifications. Instance shapes may be specific to the authenticated user associated with the request that retrieved the resource, the current state of the resource and other factors and thus should not be cached.
<code>oslc:serviceProvider</code>	Zero-or-many	false	Resource	Reference	<code>oslc:ServiceProvider</code>	A link to the resource's OSLC Service Provider. There may be cases when the subject resource is available from a service provider that implements multiple domain specifications, which could result in multiple values for this property.
<code>oslc:shortTitle</code>	Zero-or-one	false	XMLLiteral	N/A	Unspecified	Short name identifying a resource, often used as an abbreviated identifier for presentation to end-users. <b>SHOULD</b> include only content that is valid inside an XHTML <code>&lt;span&gt;</code> element [sml-4].

- **Describes:** <http://open-services.net/ns/sysmlv2#ReturnParameterMembership>
- **Summary:** ReturnParameterMembershipShape
- **Description:** A `ReturnParameterMembership` is a `ParameterMembership` that indicates that the `ownedMemberParameter` is the `result parameter` of a `Function` or `Expression`. The `direction` of the `ownedMemberParameter` must be `out`.

## ReturnParameterMembership Properties

Prefixes	Prefixes	Prefixes	Prefixes	Prefixes	Prefixes	Prefixes
<code>dcterms:contributor</code>	Zero-or-many	false	AnyResource	Either	<code>oslc:Any</code>	Contributor or contributors to the resource. It is likely that the target resource will be a foaf:Person but that is not necessarily the case.
<code>dcterms:created</code>	Zero-or-one	false	dateTime	N/A	Unspecified	Timestamp of resource creation.
<code>dcterms:creator</code>	Zero-or-many	false	AnyResource	Either	<code>oslc:Any</code>	Creator or creators of the resource. It is likely that the target resource will be a foaf:Person but that is not necessarily the case.
<code>dcterms:description</code>	Zero-or-one	false	XMLLiteral	N/A	Unspecified	Descriptive text about resource represented as rich text in XHTML content.
<code>dcterms:identifier</code>	Exactly-one	true	string	N/A	Unspecified	A unique identifier for a resource. Typically read-only and assigned by the service provider when a resource is created. Not typically intended for end-user display.
<code>dcterms:modified</code>	Zero-or-one	false	dateTime	N/A	Unspecified	Timestamp of latest resource modification.
<code>dcterms:source</code>	Zero-or-one	false	Resource	Reference	<code>oslc:Any</code>	The resource URI a client can perform a get on to obtain the original non-OSLC AM formatted resource that was used to create this resource. The source resource is usually a binary or proprietary format that the service provider can consume and convert into an OSLC AM format. The service may use content negotiation with the Accept header to obtain the desired content type.

By default, it is the same as the <b>declaredShortName</b> , but this is overridden for certain kinds of <b>Elements</b> to compute a <b>shortName</b> even when the <b>declaredName</b> is null.
<code>oslc_sysmlv2:element_TextualRepresentation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:TextualRepresentation</code>	The <b>TextualRepresentations</b> that annotate this <b>Element</b> .
<code>oslc_sysmlv2:feature_ChainingFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <b>Feature</b> that are chained together to determine the values of this <b>Feature</b> , derived from the <b>chainingFeatures</b> of the <b>ownedFeatureChainings</b> of this <b>Feature</b> , in the same order. The values of a <b>Feature</b> with <b>chainingFeatures</b> are the same as values of the last <b>Feature</b> in the chain, which can be found by starting with the values of the first <b>Feature</b> (for each instance of the domain of the original <b>Feature</b> ), then using each of those as domain instances to find the values of the second <b>Feature</b> in <b>chainingFeatures</b> , and so on, to values of the last <b>Feature</b> .
<code>oslc_sysmlv2:feature_Direction</code>	Zero-or-one	false	unspecified	Either	<code>oslc_sysmlv2:FeatureDirectionKind</code>	Indicates how values of this <b>Feature</b> are determined or used (as specified for the <b>FeatureDirectionKind</b> ).
<code>oslc_sysmlv2:feature_EndOwningType</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The <b>Type</b> that is related to this <b>Feature</b> by an <b>EndFeatureMembership</b> in which the <b>Feature</b> is an <b>ownedMemberFeature</b> .

Standards Track Work Product

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:feature_FeaturingType</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	<b>Types</b> that feature this <b>Feature</b> , such that any instance in the domain of the <b>Feature</b> must be classified by all of these <b>Types</b> , including at least all the <b>featuringTypes</b> of its <b>typeFeaturings</b> . If the <b>Feature</b> is chained, then the <b>featuringTypes</b> of the first <b>Feature</b> in the chain are also <b>featuringTypes</b> of the chained <b>Feature</b> .
<code>oslc_sysmlv2:feature_IsComposite</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether the <b>Feature</b> is a composite <b>feature</b> of its <b>featuringType</b> . If so, the values of the <b>Feature</b> cannot exist after its featuring instance no longer does.
<code>oslc_sysmlv2:feature_IsDerived</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether the values of this <b>Feature</b> can always be computed from the values of other <b>Features</b> .
<code>oslc_sysmlv2:feature_IsEnd</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether or not the this <b>Feature</b> is an end <b>Feature</b> , requiring a different interpretation of the <b>multiplicity</b> of the <b>Feature</b> .
<code>oslc_sysmlv2:feature_IsNonunique</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	isNonunique.
<code>oslc_sysmlv2:feature_IsOrdered</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether an order exists for the values of this <b>Feature</b> or not.
<code>oslc_sysmlv2:feature_IsPortion</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether the values of this <b>Feature</b> are contained in the space and time of instances of the domain of the <b>Feature</b> and represent the same thing as those instances.
<code>oslc_sysmlv2:feature_IsReadOnly</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether the values of this <b>Feature</b> can change over the lifetime of an instance of the domain.
<code>oslc_sysmlv2:feature_IsUnique</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether or not values for this <b>Feature</b> must have no duplicates or not.
<code>oslc_sysmlv2:feature_OwnedFeatureChaining</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:FeatureChaining</code>	The <b>ownedRelationships</b> of this <b>Feature</b> that are <b>FeatureChainings</b> , for which the <b>Feature</b> will be the <b>featureChained</b> .
<code>oslc_sysmlv2:feature_OwnedFeatureInverting</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:FeatureInverting</code>	The <b>ownedRelationships</b> of this <b>Feature</b> that are <b>FeatureInvertings</b> and for which the <b>Feature</b> is the <b>featureInverted</b> .
<code>oslc_sysmlv2:feature_OwnedRedefinition</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Redefinition</code>	The <b>ownedSubsettings</b> of this <b>Feature</b> that are <b>Redefinitions</b> , for which the <b>Feature</b> is the <b>redefiningFeature</b> .

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:feature_OwnedReferenceSubsetting</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:ReferenceSubsetting</code>	The one <code>ownedSubsetting</code> of this <code>Feature</code> , if any, that is a <code>ReferenceSubsetting</code> , for which the <code>Feature</code> is the <code>referencingFeature</code> .
<code>oslc_sysmlv2:feature_OwnedSubsetting</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Subsetting</code>	The <code>ownedSpecializations</code> of this <code>Feature</code> that are <code>Subsettings</code> , for which the <code>Feature</code> is the <code>subsettingFeature</code> .
<code>oslc_sysmlv2:feature_OwnedTypeFeaturing</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:TypeFeaturing</code>	The <code>ownedRelationships</code> of this <code>Feature</code> that are <code>TypeFeaturings</code> and for which the <code>Feature</code> is the <code>featureOfType</code> .
<code>oslc_sysmlv2:feature_OwnedTyping</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:FeatureTyping</code>	The <code>ownedSpecializations</code> of this <code>Feature</code> that are <code>FeatureTypings</code> , for which the <code>Feature</code> is the <code>typedFeature</code> .
<code>oslc_sysmlv2:feature_OwningFeatureMembership</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:FeatureMembership</code>	The <code>FeatureMembership</code> that owns this <code>Feature</code> as an <code>ownedMemberFeature</code> , determining its <code>owningType</code> .
<code>oslc_sysmlv2:feature_OwningType</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The <code>Type</code> that is the <code>owningType</code> of the <code>owningFeatureMembership</code> of this <code>Feature</code> .
<code>oslc_sysmlv2:feature_Type</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	<code>Types</code> that restrict the values of this <code>Feature</code> , such that the values must be instances of all the <code>types</code> . The types of a <code>Feature</code> are derived from its <code>typings</code> and the <code>types</code> of its <code>subsettings</code> . If the <code>Feature</code> is chained, then the <code>types</code> of the last <code>Feature</code> in the chain are also <code>types</code> of the chained <code>Feature</code> .
<code>oslc_sysmlv2:namespace_ImportedMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Membership</code>	The <code>Memberships</code> in this <code>Namespace</code> that result from the <code>ownedImports</code> of this <code>Namespace</code> .
<code>oslc_sysmlv2:namespace_Member</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The set of all member <code>Elements</code> of this <code>Namespace</code> , which are the <code>memberElements</code> of all <code>memberships</code> of the <code>Namespace</code> .
<code>oslc_sysmlv2:namespace_Membership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Membership</code>	All <code>Memberships</code> in this <code>Namespace</code> , including (at least) the union of <code>ownedMemberships</code> and <code>importedMemberships</code> .
<code>oslc_sysmlv2:namespace_OwnedImport</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Import</code>	The <code>ownedRelationships</code> of this <code>Namespace</code> that are <code>Imports</code> , for which the <code>Namespace</code> is the <code>importOwningNamespace</code> .

Standards Track Work Product

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:namespace_OwnedMember</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The owned <b>members</b> of this <b>Namespace</b> , which are the <b>ownedMemberElements</b> of the <b>ownedMemberships</b> of the ..
<code>oslc_sysmlv2:namespace_OwnedMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Membership</code>	The <b>ownedRelationships</b> of this <b>Namespace</b> that are <b>Memberships</b> , for which the <b>Namespace</b> is the <b>membershipOwningNamespace</b> .
<code>oslc_sysmlv2:relationship_IsImplied</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether this Relationship was generated by tooling to meet semantic rules, rather than being directly created by a modeler.
<code>oslc_sysmlv2:relationship_OwnedRelatedElement</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The <b>relatedElements</b> of this Relationship that are owned by the Relationship.
<code>oslc_sysmlv2:relationship_OwningRelatedElement</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The <b>relatedElement</b> of this Relationship that owns the Relationship, if any.
<code>oslc_sysmlv2:relationship_RelatedElement</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The Elements that are related by this Relationship, derived as the union of the <b>source</b> and <b>target</b> Elements of the Relationship.
<code>oslc_sysmlv2:relationship_Source</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The <b>relatedElements</b> from which this Relationship is considered to be directed..
<code>oslc_sysmlv2:relationship_Target</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The <b>relatedElements</b> to which this Relationship is considered to be directed.
<code>oslc_sysmlv2:succession_EffectStep</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Step</code>	<b>Steps</b> that represent occurrences that are side effects of the <b>transitionStep</b> occurring.
<code>oslc_sysmlv2:succession_GuardExpression</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Expression</code>	<b>Expressions</b> that must evaluate to true before the <b>transitionStep</b> can occur.
<code>oslc_sysmlv2:succession_TransitionStep</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Step</code>	A <b>Step</b> that is typed by the <b>Behavior</b> <b>TransitionPerformances::TransitionPerformance</b> (from the Kernel Semantic Library) that has this <b>Succession</b> as its <b>transitionLink</b> .

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:succession_TriggerStep</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Step</code>	<b>Steps</b> that map incoming events to the timing of occurrences of the <b>transitionStep</b> . The values of <b>triggerStep</b> subset the list of acceptable events to be received by a <b>Behavior</b> or the object that performs it.
<code>oslc_sysmlv2:type_DifferencingType</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The interpretations of a <b>Type</b> with <b>differencingTypes</b> are asserted to be those of the first of those <b>Types</b> , but not including those of the remaining <b>Types</b> . For example, a <b>Classifier</b> might be the difference of a <b>Classifier</b> for people and another for people of a particular nationality, leaving people who are not of that nationality. Similarly, a feature of people might be the difference between a feature for their children and a <b>Classifier</b> for people of a particular sex, identifying their children not of that sex (because the interpretations of the children <b>Feature</b> that identify those of that sex are also interpretations of the <b>Classifier</b> for that sex).
<code>oslc_sysmlv2:type_DirectedFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <b>features</b> of this <b>Type</b> that have a non-null <b>direction</b> .
<code>oslc_sysmlv2:type_EndFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All <b>features</b> of this <b>Type</b> with <b>isEnd = true</b> .
<code>oslc_sysmlv2:type_Feature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <b>ownedMemberFeatures</b> of the <b>featureMemberships</b> of this <b>Type</b> .
<code>oslc_sysmlv2:type_FeatureMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:FeatureMembership</code>	The <b>FeatureMemberships</b> for <b>features</b> of this <b>Type</b> , which include all <b>ownedFeatureMemberships</b> and those <b>inheritedMemberships</b> that are <b>FeatureMemberships</b> (but does <i>not</i> include any <b>importedMemberships</b> ).
<code>oslc_sysmlv2:type_InheritedFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All the <b>memberFeatures</b> of the <b>inheritedMemberships</b> of this <b>Type</b> that are <b>FeatureMemberships</b> .
<code>oslc_sysmlv2:type_InheritedMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Membership</code>	All <b>Memberships</b> inherited by this <b>Type</b> via <b>Specialization</b> or <b>Conjugation</b> . These are included in the derived union for the <b>memberships</b> of the <b>Type</b> .
<code>oslc_sysmlv2:type_Input</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All <b>features</b> related to this <b>Type</b> by <b>FeatureMemberships</b> that have <b>direction in or inout..</b>

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:type_IntersectingType</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The interpretations of a <b>Type</b> with <b>intersectingTypes</b> are asserted to be those in common among the <b>intersectingTypes</b> , which are the <b>Types</b> derived from the <b>intersectingType</b> of the <b>ownedIntersectings</b> of this <b>Type</b> . For example, a <b>Classifier</b> might be an intersection of <b>Classifiers</b> for people of a particular sex and of a particular nationality. Similarly, a feature for people's children of a particular sex might be the intersection of a <b>Feature</b> for their children and a <b>Classifier</b> for people of that sex (because the interpretations of the children <b>Feature</b> that identify those of that sex are also interpretations of the <b>Classifier</b> for that sex).
<code>oslc_sysmlv2:type_IsAbstract</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Indicates whether instances of this <b>Type</b> must also be instances of at least one of its specialized <b>Types</b> .
<code>oslc_sysmlv2:type_IsConjugated</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Indicates whether this <b>Type</b> has an <b>ownedConjugator</b> .
<code>oslc_sysmlv2:type_IsSufficient</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether all things that meet the classification conditions of this <b>Type</b> must be classified by the <b>Type</b> .
<code>oslc_sysmlv2:type_Multiplicity</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Multiplicity</code>	An <b>ownedMember</b> of this <b>Type</b> that is a <b>Multiplicity</b> , which constrains the cardinality of the <b>Type</b> . If there is no such <b>ownedMember</b> , then the cardinality of this <b>Type</b> is constrained by all the <b>Multiplicity</b> constraints applicable to any direct supertypes.
<code>oslc_sysmlv2:type_Output</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All <b>features</b> related to this <b>Type</b> by <b>FeatureMemberships</b> that have <b>direction out or inout</b> .
<code>oslc_sysmlv2:type_OwnedConjugator</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Conjugation</code>	A <b>Conjugation</b> owned by this <b>Type</b> for which the <b>Type</b> is the <b>originalType</b> .
<code>oslc_sysmlv2:type_OwnedDifferencing</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Differencing</code>	The <b>ownedRelationships</b> of this <b>Type</b> that are <b>Differencings</b> , having this <b>Type</b> as their <b>typeDifferenced</b> .
<code>oslc_sysmlv2:type_OwnedDisjoining</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Disjoining</code>	The <b>ownedRelationships</b> of this <b>Type</b> that are <b>Disjoinings</b> , for which the <b>Type</b> is the <b>typeDisjoined Type</b> .
<code>oslc_sysmlv2:type_OwnedEndFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All <b>endFeatures</b> of this <b>Type</b> that are <b>ownedFeatures</b> .

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:type_OwnedFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <code>ownedMemberFeatures</code> of the <code>ownedFeatureMemberships</code> of this <code>Type</code> .
<code>oslc_sysmlv2:type_OwnedFeatureMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:FeatureMembership</code>	The <code>ownedMemberships</code> of this <code>Type</code> that are <code>FeatureMemberships</code> , for which the <code>Type</code> is the <code>owningType</code> . Each such <code>FeatureMembership</code> identifies an <code>ownedFeature</code> of the <code>Type</code> .
<code>oslc_sysmlv2:type_OwnedIntersecting</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Intersecting</code>	The <code>ownedRelationships</code> of this <code>Type</code> that are <code>Intersectings</code> , have the <code>Type</code> as their <code>typeIntersected</code> .
<code>oslc_sysmlv2:type_OwnedSpecialization</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Specialization</code>	The <code>ownedRelationships</code> of this <code>Type</code> that are <code>Specializations</code> , for which the <code>Type</code> is the <code>specific Type</code> .
<code>oslc_sysmlv2:type_OwnedUnioning</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Unioning</code>	The <code>ownedRelationships</code> of this <code>Type</code> that are <code>Unionings</code> , having the <code>Type</code> as their <code>typeUnioned</code> .
<code>oslc_sysmlv2:type_UnioningType</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The interpretations of a <code>Type</code> with <code>unioningTypes</code> are asserted to be the same as those of all the <code>unioningTypes</code> together, which are the <code>Types</code> derived from the <code>unioningType</code> of the <code>ownedUnionings</code> of this <code>Type</code> . For example, a <code>Classifier</code> for people might be the union of <code>Classifiers</code> for all the sexes. Similarly, a feature for people's children might be the union of features dividing them in the same ways as people in general.
<code>oslc_sysmlv2:usage_Definition</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Classifier</code>	The <code>Classifiers</code> that are the types of this <code>Usage</code> . Nominally, these are <code>Definitions</code> , but other kinds of Kernel <code>Classifiers</code> are also allowed, to permit use of <code>Classifiers</code> from the Kernel Model Libraries.
<code>oslc_sysmlv2:usage_DirectedUsage</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Usage</code>	The <code>usages</code> of this <code>Usage</code> that are <code>directedFeatures</code> .
<code>oslc_sysmlv2:usage_IsReference</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether this <code>Usage</code> is a referential <code>Usage</code> , that is, it has <code>isComposite = false</code> .
<code>oslc_sysmlv2:usage_IsVariation</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether this <code>Usage</code> is for a variation point or not. If true, then all the <code>memberships</code> of the <code>Usage</code> must be <code>VariantMemberships</code> .

If <code>isVariation = false</code> , then <code>variantMembership</code> must be empty.

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc:instanceShape</code>	Zero-or-one	false	Resource	Reference	<code>oslc:ResourceShape</code>	The URI of a Resource Shape that describes the possible properties, occurrence, value types, allowed values and labels. This shape information is useful in displaying the subject resource as well as guiding clients in performing modifications. Instance shapes may be specific to the authenticated user associated with the request that retrieved the resource, the current state of the resource and other factors and thus should not be cached.
<code>oslc:serviceProvider</code>	Zero-or-many	false	Resource	Reference	<code>oslc:ServiceProvider</code>	A link to the resource's OSLC Service Provider. There may be cases when the subject resource is available from a service provider that implements multiple domain specifications, which could result in multiple values for this property.
<code>oslc:shortTitle</code>	Zero-or-one	false	XMLLiteral	N/A	Unspecified	Short name identifying a resource, often used as an abbreviated identifier for presentation to end-users. <b>SHOULD</b> include only content that is valid inside an XHTML <code>&lt;span&gt;</code> element [sml-6].
<code>rdf:type</code>	Zero-or-many	false	Resource	Reference	<code>rdfs:Class</code>	The resource type URIs.

- **Describes:** <http://open-services.net/ns/sysmlv2#InvocationExpression>
- **Summary:** InvocationExpressionShape
- **Description:** An `InvocationExpression` is an `Expression` each of whose input `parameters` are bound to the `result` of an `argument` Expression.

#### InvocationExpression Properties

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>dcterms:contributor</code>	Zero-or-many	false	AnyResource	Either	<code>oslc:Any</code>	Contributor or contributors to the resource. It is likely that the target resource will be a foaf:Person but that is not necessarily the case.
<code>dcterms:created</code>	Zero-or-one	false	dateTime	N/A	Unspecified	Timestamp of resource creation.
<code>dcterms:creator</code>	Zero-or-many	false	AnyResource	Either	<code>oslc:Any</code>	Creator or creators of the resource. It is likely that the target resource will be a foaf:Person but that is not necessarily the case.
<code>dcterms:description</code>	Zero-or-one	false	XMLLiteral	N/A	Unspecified	Descriptive text about resource represented as rich text in XHTML content.

Standards Track Work Product

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>dcterms:identifier</code>	Exactly-one	true	string	N/A	Unspecified	A unique identifier for a resource. Typically read-only and assigned by the service provider when a resource is created. Not typically intended for end-user display.
<code>dcterms:modified</code>	Zero-or-one	false	dateTime	N/A	Unspecified	Timestamp of latest resource modification.
<code>dcterms:source</code>	Zero-or-one	false	Resource	Reference	<code>oslc:Any</code>	The resource URI a client can perform a get on to obtain the original non-OSLC AM formatted resource that was used to create this resource. The source resource is usually a binary or proprietary format that the service provider can consume and convert into an OSLC AM format. The service may use content negotiation with the Accept header to obtain the desired content type.
<code>dcterms:title</code>	Exactly-one	false	XMLLiteral	N/A	Unspecified	Title of the resource represented as rich text in XHTML content.
<code>dcterms:type</code>	Zero-or-many	false	string	N/A	Unspecified	A short string representation for the type, for example 'Car'.
<code>jazz_am:derives</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The resource that derives from another resource originated from or is significantly influenced by the referenced resource. For example a model element derives from a requirement.
<code>jazz_am:elaborates</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	This resource elaborates the referenced resource.
<code>jazz_am:external</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	A generic link from a resource to an external web page.
<code>jazz_am:refine</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The target is a refinement of the source. (e.g. a use case scenario might be a refinement of a textual requirement that describes the interaction).
<code>jazz_am:satisfy</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The model element satisfies the requirement (e.g. The use case satisfies a functional requirement).
<code>jazz_am:trace</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The model element has a trace to the requirement (e.g. An attribute or its value are traced to a requirement).

Standards Track Work Product

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:element_AliasIds</code>	Zero-or-many	false	unspecified	Either	<code>xsd:string</code>	Various alternative identifiers for this Element. Generally, these will be set by tools.
<code>oslc_sysmlv2:element_DeclaredName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The declared name of this Element.
<code>oslc_sysmlv2:element_DeclaredShortName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	An optional alternative name for the Element that is intended to be shorter or in some way more succinct than its primary name. It may act as a modeler-specified identifier for the Element, though it is then the responsibility of the modeler to maintain the uniqueness of this identifier within a model or relative to some other context.
<code>oslc_sysmlv2:element_Documentation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Documentation</code>	The Documentation owned by this Element.
<code>oslc_sysmlv2:element_ElementId</code>	Exactly-one	false	unspecified	Either	<code>xsd:string</code>	The globally unique identifier for this Element. This is intended to be set by tooling, and it must not change during the lifetime of the Element.
<code>oslc_sysmlv2:element_IsImpliedIncluded</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether all necessary implied Relationships have been included in the ownedRelationships of this Element. This property may be true, even if there are not actually any ownedRelationships with <code>isImplied = true</code> , meaning that no such Relationships are actually implied for this Element. However, if it is false, then ownedRelationships may not contain any implied Relationships. That is, either all required implied Relationships must be included, or none of them.
<code>oslc_sysmlv2:element_IsLibraryElement</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether this Element is contained in the ownership tree of a library model.
<code>oslc_sysmlv2:element_Name</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The name to be used for this Element during name resolution within its owningNamespace. This is derived using the <code>effectiveName()</code> operation. By default, it is the same as the <code>declaredName</code> , but this is overridden for certain kinds of Elements to compute a name even when the <code>declaredName</code> is null.
<code>oslc_sysmlv2:element_OwnedAnnotation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Annotation</code>	The ownedRelationships of this Element that are Annotations, for which this Element is the annotatedElement.

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:element_OwnedElement</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The Elements owned by this Element, derived as the <code>ownedRelatedElements</code> of the <code>ownedRelationships</code> of this Element.
<code>oslc_sysmlv2:element_OwnedRelationship</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Relationship</code>	The Relationships for which this Element is the <code>owningRelatedElement</code> .
<code>oslc_sysmlv2:element_Owner</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The owner of this Element, derived as the <code>owningRelatedElement</code> of the <code>owningRelationship</code> of this Element, if any.
<code>oslc_sysmlv2:element_OwningMembership</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:OwningMembership</code>	The <code>owningRelationship</code> of this Element, if that Relationship is a <code>Membership</code> .
<code>oslc_sysmlv2:element_OwningNamespace</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Namespace</code>	The <code>Namespace</code> that owns this Element, which is the <code>membershipOwningNamespace</code> of the <code>owningMembership</code> of this Element, if any.
<code>oslc_sysmlv2:element_OwningRelationship</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Relationship</code>	The Relationship for which this Element is an <code>ownedRelatedElement</code> , if any.
<code>oslc_sysmlv2:element_QualifiedName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The full ownership-qualified name of this Element, represented in a form that is valid according to the KerML textual concrete syntax for qualified names (including use of unrestricted name notation and escaped characters, as necessary). The <code>qualifiedName</code> is null if this Element has no <code>owningNamespace</code> or if there is not a complete ownership chain of named <code>Namespaces</code> from a root <code>Namespace</code> to this Element.
<code>oslc_sysmlv2:element_ShortName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The short name to be used for this Element during name resolution within its <code>owningNamespace</code> . This is derived using the <code>effectiveShortName()</code> operation. By default, it is the same as the <code>declaredShortName</code> , but this is overridden for certain kinds of Elements to compute a <code>shortName</code> even when the <code>declaredName</code> is null.
<code>oslc_sysmlv2:element_TextualRepresentation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:TextualRepresentation</code>	The <code>TextualRepresentations</code> that annotate this Element.
<code>oslc_sysmlv2:expression_Function</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Function</code>	The <code>Function</code> that types this Expression.
<code>oslc_sysmlv2:expression_IsModelLevelEvaluable</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether this Expression meets the constraints necessary to be evaluated at <i>model level</i> , that is, using metadata within the model.

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:expression_Result</code>	Exactly-one	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	.
<code>oslc_sysmlv2:feature_ChainingFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <b>Feature</b> that are chained together to determine the values of this <b>Feature</b> , derived from the <b>chainingFeatures</b> of the <b>ownedFeatureChainings</b> of this <b>Feature</b> , in the same order. The values of a <b>Feature</b> with <b>chainingFeatures</b> are the same as values of the last <b>Feature</b> in the chain, which can be found by starting with the values of the first <b>Feature</b> (for each instance of the domain of the original <b>Feature</b> ), then using each of those as domain instances to find the values of the second <b>Feature</b> in <b>chainingFeatures</b> , and so on, to values of the last <b>Feature</b> .
<code>oslc_sysmlv2:feature_Direction</code>	Zero-or-one	false	unspecified	Either	<code>oslc_sysmlv2:FeatureDirectionKind</code>	Indicates how values of this <b>Feature</b> are determined or used (as specified for the <b>FeatureDirectionKind</b> ).
<code>oslc_sysmlv2:feature_EndOwningType</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The <b>Type</b> that is related to this <b>Feature</b> by an <b>EndFeatureMembership</b> in which the <b>Feature</b> is an <b>ownedMemberFeature</b> .
<code>oslc_sysmlv2:feature_FeaturingType</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	<b>Types</b> that feature this <b>Feature</b> , such that any instance in the domain of the <b>Feature</b> must be classified by all of these <b>Types</b> , including at least all the <b>featuringTypes</b> of its <b>typeFeaturings</b> . If the <b>Feature</b> is chained, then the <b>featuringTypes</b> of the first <b>Feature</b> in the chain are also <b>featuringTypes</b> of the chained <b>Feature</b> .
<code>oslc_sysmlv2:feature_IsComposite</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether the <b>Feature</b> is a composite <b>feature</b> of its <b>featuringType</b> . If so, the values of the <b>Feature</b> cannot exist after its featuring instance no longer does.
<code>oslc_sysmlv2:feature_IsDerived</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether the values of this <b>Feature</b> can always be computed from the values of other <b>Features</b> .
<code>oslc_sysmlv2:feature_IsEnd</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether or not the this <b>Feature</b> is an end <b>Feature</b> , requiring a different interpretation of the <b>multiplicity</b> of the <b>Feature</b> .
<code>oslc_sysmlv2:feature_IsNonunique</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	isNonunique.
<code>oslc_sysmlv2:feature_IsOrdered</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether an order exists for the values of this <b>Feature</b> or not.
<code>oslc_sysmlv2:feature_IsPortion</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether the values of this <b>Feature</b> are contained in the space and time of instances of the domain of the <b>Feature</b> and represent the same thing as those instances.

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:feature_IsReadOnly</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether the values of this <b>Feature</b> can change over the lifetime of an instance of the domain.
<code>oslc_sysmlv2:feature_IsUnique</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether or not values for this <b>Feature</b> must have no duplicates or not.
<code>oslc_sysmlv2:feature_OwnedFeatureChaining</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:FeatureChaining</code>	The <b>ownedRelationships</b> of this <b>Feature</b> that are <b>FeatureChainings</b> , for which the <b>Feature</b> will be the <b>featureChained</b> .
<code>oslc_sysmlv2:feature_OwnedFeatureInverting</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:FeatureInverting</code>	The <b>ownedRelationships</b> of this <b>Feature</b> that are <b>FeatureInvertings</b> and for which the <b>Feature</b> is the <b>featureInverted</b> .
<code>oslc_sysmlv2:feature_OwnedRedefinition</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Redefinition</code>	The <b>ownedSubsettings</b> of this <b>Feature</b> that are <b>Redefinitions</b> , for which the <b>Feature</b> is the <b>redefiningFeature</b> .
<code>oslc_sysmlv2:feature_OwnedReferenceSubsetting</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:ReferenceSubsetting</code>	The one <b>ownedSubsetting</b> of this <b>Feature</b> , if any, that is a <b>ReferenceSubsetting</b> , for which the <b>Feature</b> is the <b>referencingFeature</b> .
<code>oslc_sysmlv2:feature_OwnedSubsetting</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Subsetting</code>	The <b>ownedSpecializations</b> of this <b>Feature</b> that are <b>Subsettings</b> , for which the <b>Feature</b> is the <b>subsettingFeature</b> .
<code>oslc_sysmlv2:feature_OwnedTypeFeaturing</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:TypeFeaturing</code>	The <b>ownedRelationships</b> of this <b>Feature</b> that are <b>TypeFeaturings</b> and for which the <b>Feature</b> is the <b>featureOfType</b> .
<code>oslc_sysmlv2:feature_OwnedTyping</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:FeatureTyping</code>	The <b>ownedSpecializations</b> of this <b>Feature</b> that are <b>FeatureTypings</b> , for which the <b>Feature</b> is the <b>typedFeature</b> .
<code>oslc_sysmlv2:feature_OwningFeatureMembership</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:FeatureMembership</code>	The <b>FeatureMembership</b> that owns this <b>Feature</b> as an <b>ownedMemberFeature</b> , determining its <b>owningType</b> .
<code>oslc_sysmlv2:feature_OwningType</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The <b>Type</b> that is the <b>owningType</b> of the <b>owningFeatureMembership</b> of this <b>Feature</b> .
<code>oslc_sysmlv2:feature_Type</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	<b>Types</b> that restrict the values of this <b>Feature</b> , such that the values must be instances of all the <b>types</b> . The types of a <b>Feature</b> are derived from its <b>typings</b> and the <b>types</b> of its <b>subsettings</b> . If the <b>Feature</b> is chained, then the <b>types</b> of the last <b>Feature</b> in the chain are also <b>types</b> of the chained <b>Feature</b> .

Standards Track Work Product

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:invocationExpression_Argument</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Expression</code>	The value <b>Expressions</b> of the <b>FeatureValues</b> of the owned input parameters of the <b>InvocationExpression</b> .
<code>oslc_sysmlv2:invocationExpression_Operand</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Expression</code>	operand.
<code>oslc_sysmlv2:namespace_ImportedMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Membership</code>	The <b>Memberships</b> in this <b>Namespace</b> that result from the <b>ownedImports</b> of this <b>Namespace</b> .
<code>oslc_sysmlv2:namespace_Member</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The set of all member <b>Elements</b> of this <b>Namespace</b> , which are the <b>memberElements</b> of all <b>memberships</b> of the <b>Namespace</b> .
<code>oslc_sysmlv2:namespace_Membership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Membership</code>	All <b>Memberships</b> in this <b>Namespace</b> , including (at least) the union of <b>ownedMemberships</b> and <b>importedMemberships</b> .
<code>oslc_sysmlv2:namespace_OwnedImport</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Import</code>	The <b>ownedRelationships</b> of this <b>Namespace</b> that are <b>Imports</b> , for which the <b>Namespace</b> is the <b>importOwningNamespace</b> .
<code>oslc_sysmlv2:namespace_OwnedMember</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The owned <b>members</b> of this <b>Namespace</b> , which are the <b>ownedMemberElements</b> of the <b>ownedMemberships</b> of the ..
<code>oslc_sysmlv2:namespace_OwnedMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Membership</code>	The <b>ownedRelationships</b> of this <b>Namespace</b> that are <b>Memberships</b> , for which the <b>Namespace</b> is the <b>membershipOwningNamespace</b> .
<code>oslc_sysmlv2:step_Behavior</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Behavior</code>	The <b>Behaviors</b> that type this <b>Step</b> .
<code>oslc_sysmlv2:step_Parameter</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <b>parameters</b> of this <b>Step</b> , which are defined as its <b>directedFeatures</b> , whose values are passed into and/or out of a performance of the <b>Step</b> .

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:type_DifferencingType</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The interpretations of a <b>Type</b> with <b>differencingTypes</b> are asserted to be those of the first of those <b>Types</b> , but not including those of the remaining <b>Types</b> . For example, a <b>Classifier</b> might be the difference of a <b>Classifier</b> for people and another for people of a particular nationality, leaving people who are not of that nationality. Similarly, a feature of people might be the difference between a feature for their children and a <b>Classifier</b> for people of a particular sex, identifying their children not of that sex (because the interpretations of the children <b>Feature</b> that identify those of that sex are also interpretations of the <b>Classifier</b> for that sex).
<code>oslc_sysmlv2:type_DirectedFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <b>features</b> of this <b>Type</b> that have a non-null <b>direction</b> .
<code>oslc_sysmlv2:type_EndFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All <b>features</b> of this <b>Type</b> with <b>isEnd</b> = true.
<code>oslc_sysmlv2:type_Feature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <b>ownedMemberFeatures</b> of the <b>featureMemberships</b> of this <b>Type</b> .
<code>oslc_sysmlv2:type_FeatureMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:FeatureMembership</code>	The <b>FeatureMemberships</b> for <b>features</b> of this <b>Type</b> , which include all <b>ownedFeatureMemberships</b> and those <b>inheritedMemberships</b> that are <b>FeatureMemberships</b> (but does <i>not</i> include any <b>importedMemberships</b> ).
<code>oslc_sysmlv2:type_InheritedFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All the <b>memberFeatures</b> of the <b>inheritedMemberships</b> of this <b>Type</b> that are <b>FeatureMemberships</b> .
<code>oslc_sysmlv2:type_InheritedMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Membership</code>	All <b>Memberships</b> inherited by this <b>Type</b> via <b>Specialization</b> or <b>Conjugation</b> . These are included in the derived union for the <b>memberships</b> of the <b>Type</b> .
<code>oslc_sysmlv2:type_Input</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All <b>features</b> related to this <b>Type</b> by <b>FeatureMemberships</b> that have <b>direction in or inout..</b>

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:type_IntersectingType</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The interpretations of a <b>Type</b> with <b>intersectingTypes</b> are asserted to be those in common among the <b>intersectingTypes</b> , which are the <b>Types</b> derived from the <b>intersectingType</b> of the <b>ownedIntersectings</b> of this <b>Type</b> . For example, a <b>Classifier</b> might be an intersection of <b>Classifiers</b> for people of a particular sex and of a particular nationality. Similarly, a feature for people's children of a particular sex might be the intersection of a <b>Feature</b> for their children and a <b>Classifier</b> for people of that sex (because the interpretations of the children <b>Feature</b> that identify those of that sex are also interpretations of the <b>Classifier</b> for that sex).
<code>oslc_sysmlv2:type_IsAbstract</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Indicates whether instances of this <b>Type</b> must also be instances of at least one of its specialized <b>Types</b> .
<code>oslc_sysmlv2:type_IsConjugated</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Indicates whether this <b>Type</b> has an <b>ownedConjugator</b> .
<code>oslc_sysmlv2:type_IsSufficient</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether all things that meet the classification conditions of this <b>Type</b> must be classified by the <b>Type</b> .
<code>oslc_sysmlv2:type_Multiplicity</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Multiplicity</code>	An <b>ownedMember</b> of this <b>Type</b> that is a <b>Multiplicity</b> , which constrains the cardinality of the <b>Type</b> . If there is no such <b>ownedMember</b> , then the cardinality of this <b>Type</b> is constrained by all the <b>Multiplicity</b> constraints applicable to any direct supertypes.
<code>oslc_sysmlv2:type_Output</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All <b>features</b> related to this <b>Type</b> by <b>FeatureMemberships</b> that have <b>direction out or inout</b> .
<code>oslc_sysmlv2:type_OwnedConjugator</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Conjugation</code>	A <b>Conjugation</b> owned by this <b>Type</b> for which the <b>Type</b> is the <b>originalType</b> .
<code>oslc_sysmlv2:type_OwnedDifferencing</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Differencing</code>	The <b>ownedRelationships</b> of this <b>Type</b> that are <b>Differencings</b> , having this <b>Type</b> as their <b>typeDifferenced</b> .
<code>oslc_sysmlv2:type_OwnedDisjoining</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Disjoining</code>	The <b>ownedRelationships</b> of this <b>Type</b> that are <b>Disjoinings</b> , for which the <b>Type</b> is the <b>typeDisjoined Type</b> .
<code>oslc_sysmlv2:type_OwnedEndFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All <b>endFeatures</b> of this <b>Type</b> that are <b>ownedFeatures</b> .

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:type_OwnedFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <code>ownedMemberFeatures</code> of the <code>ownedFeatureMemberships</code> of this <code>Type</code> .
<code>oslc_sysmlv2:type_OwnedFeatureMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:FeatureMembership</code>	The <code>ownedMemberships</code> of this <code>Type</code> that are <code>FeatureMemberships</code> , for which the <code>Type</code> is the <code>owningType</code> . Each such <code>FeatureMembership</code> identifies an <code>ownedFeature</code> of the <code>Type</code> .
<code>oslc_sysmlv2:type_OwnedIntersecting</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Intersecting</code>	The <code>ownedRelationships</code> of this <code>Type</code> that are <code>Intersectings</code> , have the <code>Type</code> as their <code>typeIntersected</code> .
<code>oslc_sysmlv2:type_OwnedSpecialization</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Specialization</code>	The <code>ownedRelationships</code> of this <code>Type</code> that are <code>Specializations</code> , for which the <code>Type</code> is the <code>specific Type</code> .
<code>oslc_sysmlv2:type_OwnedUnioning</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Unioning</code>	The <code>ownedRelationships</code> of this <code>Type</code> that are <code>Unionings</code> , having the <code>Type</code> as their <code>typeUnioned</code> .
<code>oslc_sysmlv2:type_UnioningType</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The interpretations of a <code>Type</code> with <code>unioningTypes</code> are asserted to be the same as those of all the <code>unioningTypes</code> together, which are the <code>Types</code> derived from the <code>unioningType</code> of the <code>ownedUnionings</code> of this <code>Type</code> . For example, a <code>Classifier</code> for people might be the union of <code>Classifiers</code> for all the sexes. Similarly, a feature for people's children might be the union of features dividing them in the same ways as people in general.
<code>oslc:instanceShape</code>	Zero-or-one	false	Resource	Reference	<code>oslc:ResourceShape</code>	The URI of a Resource Shape that describes the possible properties, occurrence, value types, allowed values and labels. This shape information is useful in displaying the subject resource as well as guiding clients in performing modifications. Instance shapes may be specific to the authenticated user associated with the request that retrieved the resource, the current state of the resource and other factors and thus should not be cached.
<code>oslc:serviceProvider</code>	Zero-or-many	false	Resource	Reference	<code>oslc:ServiceProvider</code>	A link to the resource's OSLC Service Provider. There may be cases when the subject resource is available from a service provider that implements multiple domain specifications, which could result in multiple values for this property.
<code>oslc:shortTitle</code>	Zero-or-one	false	XMLLiteral	N/A	Unspecified	Short name identifying a resource, often used as an abbreviated identifier for presentation to end-users. <b>SHOULD</b> include only content that is valid inside an XHTML <code>&lt;span&gt;</code> element [sml-7].

<code>rdf:type</code>	Zero-or-many	false	Resource	Reference	<code>rdfs:Class</code>	The resource type URIs.

- **Describes:** <http://open-services.net/ns/sysmlv2#RequirementDefinition>
- **Summary:** RequirementDefinitionShape
- **Description:** A `RequirementDefinition` is a `ConstraintDefinition` that defines a requirement used in the context of a specification as a constraint that a valid solution must satisfy. The specification is relative to a specified subject, possibly in collaboration with one or more external actors.

#### RequirementDefinition Properties

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>dcterms:contributor</code>	Zero-or-many	false	AnyResource	Either	<code>oslc:Any</code>	Contributor or contributors to the resource. It is likely that the target resource will be a foaf:Person but that is not necessarily the case.
<code>dcterms:created</code>	Zero-or-one	false	dateTime	N/A	Unspecified	Timestamp of resource creation.
<code>dcterms:creator</code>	Zero-or-many	false	AnyResource	Either	<code>oslc:Any</code>	Creator or creators of the resource. It is likely that the target resource will be a foaf:Person but that is not necessarily the case.
<code>dcterms:description</code>	Zero-or-one	false	XMLLiteral	N/A	Unspecified	Descriptive text about resource represented as rich text in XHTML content.
<code>dcterms:identifier</code>	Exactly-one	true	string	N/A	Unspecified	A unique identifier for a resource. Typically read-only and assigned by the service provider when a resource is created. Not typically intended for end-user display.
<code>dcterms:modified</code>	Zero-or-one	false	dateTime	N/A	Unspecified	Timestamp of latest resource modification.
<code>dcterms:source</code>	Zero-or-one	false	Resource	Reference	<code>oslc:Any</code>	The resource URI a client can perform a get on to obtain the original non-OSLC AM formatted resource that was used to create this resource. The source resource is usually a binary or proprietary format that the service provider can consume and convert into an OSLC AM format. The service may use content negotiation with the Accept header to obtain the desired content type.

Standards Track Work Product

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>dcterms:title</code>	Exactly-one	false	XMLLiteral	N/A	Unspecified	Title of the resource represented as rich text in XHTML content.
<code>dcterms:type</code>	Zero-or-many	false	string	N/A	Unspecified	A short string representation for the type, for example 'Car'.
<code>jazz_am:derives</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The resource that derives from another resource originated from or is significantly influenced by the referenced resource. For example a model element derives from a requirement.
<code>jazz_am:elaborates</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	This resource elaborates the referenced resource.
<code>jazz_am:external</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	A generic link from a resource to an external web page.
<code>jazz_am:refine</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The target is a refinement of the source. (e.g. a use case scenario might be a refinement of a textual requirement that describes the interaction).
<code>jazz_am:satisfy</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The model element satisfies the requirement (e.g. The use case satisfies a functional requirement).
<code>jazz_am:trace</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The model element has a trace to the requirement (e.g. An attribute or its value are traced to a requirement).
<code>oslc_sysmlv2:behavior_Parameter</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The parameters of this <b>Behavior</b> , which are defined as its <b>directedFeatures</b> , whose values are passed into and/or out of a performance of the <b>Behavior</b> .
<code>oslc_sysmlv2:behavior_Step</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Step</code>	The <b>Steps</b> that make up this <b>Behavior</b> .
<code>oslc_sysmlv2:classifier_OwnedSubclassification</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Subclassification</code>	The <b>ownedSpecializations</b> of this <b>Classifier</b> that are <b>Subclassifications</b> , for which this <b>Classifier</b> is the <b>subclassifier</b> .

Standards Track Work Product

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:definition_DirectedUsage</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Usage</code>	The <code>usages</code> of this <code>Definition</code> that are <code>directedFeatures</code> .
<code>oslc_sysmlv2:definition_IsVariation</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether this <code>Definition</code> is for a variation point or not. If true, then all the <code>memberships</code> of the <code>Definition</code> must be <code>VariantMemberships</code> .
<code>oslc_sysmlv2:definition_OwnedAction</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:ActionUsage</code>	The <code>ActionUsages</code> that are <code>ownedUsages</code> of this <code>Definition</code> .
<code>oslc_sysmlv2:definition_OwnedAllocation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:AllocationUsage</code>	The <code>AllocationUsages</code> that are <code>ownedUsages</code> of this <code>Definition</code> .
<code>oslc_sysmlv2:definition_OwnedAnalysisCase</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:AnalysisCaseUsage</code>	The <code>AnalysisCaseUsages</code> that are <code>ownedUsages</code> of this <code>Definition</code> .
<code>oslc_sysmlv2:definition_OwnedAttribute</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:AttributeUsage</code>	The <code>AttributeUsages</code> that are <code>ownedUsages</code> of this <code>Definition</code> .
<code>oslc_sysmlv2:definition_OwnedCalculation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:CalculationUsage</code>	The <code>CalculationUsages</code> that are <code>ownedUsages</code> of this <code>Definition</code> .
<code>oslc_sysmlv2:definition_OwnedCase</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:CaseUsage</code>	The <code>code&gt;CaseUsages</code> that are <code>ownedUsages</code> of this <code>Definition</code> .
<code>oslc_sysmlv2:definition_OwnedConcern</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:ConcernUsage</code>	The <code>ConcernUsages</code> that are <code>ownedUsages</code> of this <code>Definition</code> .
<code>oslc_sysmlv2:definition_OwnedConnection</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:ConnectorAsUsage</code>	The <code>ConnectorAsUsages</code> that are <code>ownedUsages</code> of this <code>Definition</code> . Note that this list includes <code>BindingConnectorAsUsages</code> and <code>SuccessionAsUsages</code> , even though these are <code>ConnectorAsUsages</code> but not <code>ConnectionUsages</code> .
<code>oslc_sysmlv2:definition_OwnedConstraint</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:ConstraintUsage</code>	The <code>ConstraintUsages</code> that are <code>ownedUsages</code> of this <code>Definition</code> .

Standards Track Work Product

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:definition_OwnedEnumeration</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:EnumerationUsage</code>	The <code>EnumerationUsages</code> that are <code>ownedUsages</code> of this Definition.
<code>oslc_sysmlv2:definition_OwnedFlow</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:FlowConnectionUsage</code>	The <code>FlowConnectionUsages</code> that are <code>ownedUsages</code> of this Definition.
<code>oslc_sysmlv2:definition_OwnedInterface</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:InterfaceUsage</code>	The <code>InterfaceUsages</code> that are <code>ownedUsages</code> of this Definition.
<code>oslc_sysmlv2:definition_OwnedItem</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:ItemUsage</code>	The <code>ItemUsages</code> that are <code>ownedUsages</code> of this Definition.
<code>oslc_sysmlv2:definition_OwnedMetadata</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:MetadataUsage</code>	The <code>MetadataUsages</code> that are <code>ownedUsages</code> of this Definition.
<code>oslc_sysmlv2:definition_OwnedOccurrence</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:OccurrenceUsage</code>	The <code>OccurrenceUsages</code> that are <code>ownedUsages</code> of this Definition.
<code>oslc_sysmlv2:definition_OwnedPart</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:PartUsage</code>	The <code>PartUsages</code> that are <code>ownedUsages</code> of this Definition.
<code>oslc_sysmlv2:definition_OwnedPort</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:PortUsage</code>	The <code>PortUsages</code> that are <code>ownedUsages</code> of this Definition.
<code>oslc_sysmlv2:definition_OwnedReference</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:ReferenceUsage</code>	The <code>ReferenceUsages</code> that are <code>ownedUsages</code> of this Definition.
<code>oslc_sysmlv2:definition_OwnedRendering</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:RenderingUsage</code>	The <code>RenderingUsages</code> that are <code>ownedUsages</code> of this Definition.
<code>oslc_sysmlv2:definition_OwnedRequirement</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:RequirementUsage</code>	The <code>RequirementUsages</code> that are <code>ownedUsages</code> of this Definition.

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:definition_OwnedState</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:StateUsage</code>	The <code>StateUsages</code> that are <code>ownedUsages</code> of this <code>Definition</code> .
<code>oslc_sysmlv2:definition_OwnedTransition</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:TransitionUsage</code>	The <code>TransitionUsages</code> that are <code>ownedUsages</code> of this <code>Definition</code> .
<code>oslc_sysmlv2:definition_OwnedUsage</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Usage</code>	The <code>Usages</code> that are <code>ownedFeatures</code> of this <code>Definition</code> .
<code>oslc_sysmlv2:definition_OwnedUseCase</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:UseCaseUsage</code>	The <code>UseCaseUsages</code> that are <code>ownedUsages</code> of this <code>Definition</code> .
<code>oslc_sysmlv2:definition_OwnedVerificationCase</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:VerificationCaseUsage</code>	The <code>VerificationCaseUsages</code> that are <code>ownedUsages</code> of this <code>Definition</code> .
<code>oslc_sysmlv2:definition_OwnedView</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:ViewUsage</code>	The <code>ViewUsages</code> that are <code>ownedUsages</code> of this <code>Definition</code> .
<code>oslc_sysmlv2:definition_OwnedViewpoint</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:ViewpointUsage</code>	The <code>ViewpointUsages</code> that are <code>ownedUsages</code> of this <code>Definition</code> .
<code>oslc_sysmlv2:definition_Usage</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Usage</code>	The <code>Usages</code> that are <code>features</code> of this <code>Definition</code> (not necessarily owned).
<code>oslc_sysmlv2:definition_Variant</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Usage</code>	The <code>Usages</code> which represent the variants of this <code>Definition</code> as a variation point <code>Definition</code> , if <code>isVariation</code> = true. If <code>isVariation</code> = false, there must be no <code>variants</code> .
<code>oslc_sysmlv2:definition_VariantMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:VariantMembership</code>	The <code>ownedMemberships</code> of this <code>Definition</code> that are <code>VariantMemberships</code> . If <code>isVariation</code> = true, then this must be all <code>ownedMemberships</code> of the <code>Definition</code> . If <code>isVariation</code> = false, then <code>variantMembership</code> must be empty.
<code>oslc_sysmlv2:element_AliasIds</code>	Zero-or-many	false	unspecified	Either	<code>xsd:string</code>	Various alternative identifiers for this Element. Generally, these will be set by tools.

Standards Track Work Product

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:element_DeclaredName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The declared name of this <b>Element</b> .
<code>oslc_sysmlv2:element_DeclaredShortName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	An optional alternative name for the <b>Element</b> that is intended to be shorter or in some way more succinct than its primary <b>name</b> . It may act as a modeler-specified identifier for the <b>Element</b> , though it is then the responsibility of the modeler to maintain the uniqueness of this identifier within a model or relative to some other context.
<code>oslc_sysmlv2:element_Documentation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Documentation</code>	The Documentation owned by this Element.
<code>oslc_sysmlv2:element_ElementId</code>	Exactly-one	false	unspecified	Either	<code>xsd:string</code>	The globally unique identifier for this Element. This is intended to be set by tooling, and it must not change during the lifetime of the Element.
<code>oslc_sysmlv2:element_IsImpliedIncluded</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether all necessary implied Relationships have been included in the <b>ownedRelationships</b> of this Element. This property may be true, even if there are not actually any <b>ownedRelationships</b> with <b>isImplied = true</b> , meaning that no such Relationships are actually implied for this Element. However, if it is false, then <b>ownedRelationships</b> may <i>not</i> contain any implied Relationships. That is, either <i>all</i> required implied Relationships must be included, or none of them.
<code>oslc_sysmlv2:element_IsLibraryElement</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether this Element is contained in the ownership tree of a library model.
<code>oslc_sysmlv2:element_Name</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The name to be used for this <b>Element</b> during name resolution within its <b>owningNamespace</b> . This is derived using the <b>effectiveName()</b> operation. By default, it is the same as the <b>declaredName</b> , but this is overridden for certain kinds of <b>Elements</b> to compute a <b>name</b> even when the <b>declaredName</b> is null.

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:element_OwnedAnnotation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Annotation</code>	The <b>ownedRelationships</b> of this <b>Element</b> that are <b>Annotations</b> , for which this <b>Element</b> is the <b>annotatedElement</b> .
<code>oslc_sysmlv2:element_OwnedElement</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The Elements owned by this Element, derived as the <b>ownedRelatedElements</b> of the <b>ownedRelationships</b> of this Element.
<code>oslc_sysmlv2:element_OwnedRelationship</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Relationship</code>	The Relationships for which this Element is the <b>owningRelatedElement</b> .
<code>oslc_sysmlv2:element_Owner</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The owner of this Element, derived as the <b>owningRelatedElement</b> of the <b>owningRelationship</b> of this Element, if any.
<code>oslc_sysmlv2:element_OwningMembership</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:OwningMembership</code>	The <b>owningRelationship</b> of this <b>Element</b> , if that <b>Relationship</b> is a <b>Membership</b> .
<code>oslc_sysmlv2:element_OwningNamespace</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Namespace</code>	The <b>Namespace</b> that owns this <b>Element</b> , which is the <b>membershipOwningNamespace</b> of the <b>owningMembership</b> of this <b>Element</b> , if any.
<code>oslc_sysmlv2:element_OwningRelationship</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Relationship</code>	The Relationship for which this Element is an <b>ownedRelatedElement</b> , if any.
<code>oslc_sysmlv2:element_QualifiedName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The full ownership-qualified name of this <b>Element</b> , represented in a form that is valid according to the KerML textual concrete syntax for qualified names (including use of unrestricted name notation and escaped characters, as necessary). The <b>qualifiedName</b> is null if this <b>Element</b> has no <b>owningNamespace</b> or if there is not a complete ownership chain of named <b>Namespaces</b> from a root <b>Namespace</b> to this <b>Element</b> .
<code>oslc_sysmlv2:element_ShortName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The short name to be used for this <b>Element</b> during name resolution within its <b>owningNamespace</b> . This is derived using the <b>effectiveShortName()</b> operation. By default, it is the same as the <b>declaredShortName</b> , but this is overridden for certain kinds of <b>Elements</b> to compute a <b>shortName</b> even when the <b>declaredName</b> is null.
<code>oslc_sysmlv2:element_TextualRepresentation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:TextualRepresentation</code>	The <b>TextualRepresentations</b> that annotate this <b>Element</b> .

Standards Track Work Product

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:function_Expression</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Expression</code>	The <b>Expressions</b> that are <b>steps</b> in the calculation of the <b>result</b> of this <b>Function</b> .
<code>oslc_sysmlv2:function_IsModelLevelEvaluable</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether this <b>Function</b> can be used as the <b>function</b> of a model-level evaluable <b>InvocationExpression</b> . Certain <b>Functions</b> from the Kernel Functions Library are considered to have <code>isModelLevelEvaluable = true</code> . For all other <b>Functions</b> it is <code>false</code> .
<code>oslc_sysmlv2:function_Result</code>	Exactly-one	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <b>result</b> parameter of the <b>Function</b> , which is owned by the <b>Function</b> via a <b>ReturnParameterMembership</b> .
<code>oslc_sysmlv2:namespace_ImportedMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Membership</code>	The <b>Memberships</b> in this <b>Namespace</b> that result from the <b>ownedImports</b> of this <b>Namespace</b> .
<code>oslc_sysmlv2:namespace_Member</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The set of all member <b>Elements</b> of this <b>Namespace</b> , which are the <b>memberElements</b> of all <b>memberships</b> of the <b>Namespace</b> .
<code>oslc_sysmlv2:namespace_Membership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Membership</code>	All <b>Memberships</b> in this <b>Namespace</b> , including (at least) the union of <b>ownedMemberships</b> and <b>importedMemberships</b> .
<code>oslc_sysmlv2:namespace_OwnedImport</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Import</code>	The <b>ownedRelationships</b> of this <b>Namespace</b> that are <b>Imports</b> , for which the <b>Namespace</b> is the <b>importOwningNamespace</b> .
<code>oslc_sysmlv2:namespace_OwnedMember</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The owned <b>members</b> of this <b>Namespace</b> , which are the <b>ownedMemberElements</b> of the <b>ownedMemberships</b> of the ..
<code>oslc_sysmlv2:namespace_OwnedMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Membership</code>	The <b>ownedRelationships</b> of this <b>Namespace</b> that are <b>Memberships</b> , for which the <b>Namespace</b> is the <b>membershipOwningNamespace</b> .
<code>oslc_sysmlv2:occurrenceDefinition_IsIndividual</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether this <b>OccurrenceDefinition</b> is constrained to represent single individual.
<code>oslc_sysmlv2:occurrenceDefinition_LifeClass</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:LifeClass</code>	If <code>isIndividual</code> is true, a <b>LifeClass</b> that specializes this <b>OccurrenceDefinition</b> , restricting it to represent an individual.

Standards Track Work Product

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:requirementDefinition_ActorParameter</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:PartUsage</code>	The <b>parameters</b> of this <b>RequirementDefinition</b> that represent actors involved in the requirement.
<code>oslc_sysmlv2:requirementDefinition_AssumedConstraint</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:ConstraintUsage</code>	The owned <b>ConstraintUsages</b> that represent assumptions of this <b>RequirementDefinition</b> , which are the <b>ownedConstraints</b> of the <b>RequirementConstraintMemberships</b> of the <b>RequirementDefinition</b> with <b>kind = assumption</b> .
<code>oslc_sysmlv2:requirementDefinition_FramedConcern</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:ConcernUsage</code>	The <b>ConcernUsages</b> framed by this <b>RequirementDefinition</b> , which are the <b>ownedConcerns</b> of all <b>FramedConcernMemberships</b> of the <b>RequirementDefinition</b> .
<code>oslc_sysmlv2:requirementDefinition_ReqId</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	An optional modeler-specified identifier for this <b>RequirementDefinition</b> (used, e.g., to link it to an original requirement text in some source document), which is the <b>declaredShortName</b> for the <b>RequirementDefinition</b> .
<code>oslc_sysmlv2:requirementDefinition_RequiredConstraint</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:ConstraintUsage</code>	The owned <b>ConstraintUsages</b> that represent requirements of this <b>RequirementDefinition</b> , derived as the <b>ownedConstraints</b> of the <b>RequirementConstraintMemberships</b> of the <b>RequirementDefinition</b> with <b>kind = requirement</b> .
<code>oslc_sysmlv2:requirementDefinition_StakeholderParameter</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:PartUsage</code>	The <b>parameters</b> of this <b>RequirementDefinition</b> that represent stakeholders for th requirement.
<code>oslc_sysmlv2:requirementDefinition_SubjectParameter</code>	Exactly-one	false	Resource	Either	<code>oslc_sysmlv2:Usage</code>	The <b>parameter</b> of this <b>RequirementDefinition</b> that represents its subject.
<code>oslc_sysmlv2:requirementDefinition_Text</code>	Zero-or-many	false	unspecified	Either	<code>xsd:string</code>	An optional textual statement of the requirement represented by this <b>RequirementDefinition</b> , derived from the <b>bodies</b> of the <b>documentation</b> of the <b>RequirementDefinition</b> .

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:type_DifferencingType</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The interpretations of a <b>Type</b> with <b>differencingTypes</b> are asserted to be those of the first of those <b>Types</b> , but not including those of the remaining <b>Types</b> . For example, a <b>Classifier</b> might be the difference of a <b>Classifier</b> for people and another for people of a particular nationality, leaving people who are not of that nationality. Similarly, a feature of people might be the difference between a feature for their children and a <b>Classifier</b> for people of a particular sex, identifying their children not of that sex (because the interpretations of the children <b>Feature</b> that identify those of that sex are also interpretations of the <b>Classifier</b> for that sex).
<code>oslc_sysmlv2:type_DirectedFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <b>features</b> of this <b>Type</b> that have a non-null <b>direction</b> .
<code>oslc_sysmlv2:type_EndFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All <b>features</b> of this <b>Type</b> with <b>isEnd = true</b> .
<code>oslc_sysmlv2:type_Feature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <b>ownedMemberFeatures</b> of the <b>featureMemberships</b> of this <b>Type</b> .
<code>oslc_sysmlv2:type_FeatureMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:FeatureMembership</code>	The <b>FeatureMemberships</b> for <b>features</b> of this <b>Type</b> , which include all <b>ownedFeatureMemberships</b> and those <b>inheritedMemberships</b> that are <b>FeatureMemberships</b> (but does <i>not</i> include any <b>importedMemberships</b> ).
<code>oslc_sysmlv2:type_InheritedFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All the <b>memberFeatures</b> of the <b>inheritedMemberships</b> of this <b>Type</b> that are <b>FeatureMemberships</b> .
<code>oslc_sysmlv2:type_InheritedMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Membership</code>	All <b>Memberships</b> inherited by this <b>Type</b> via <b>Specialization</b> or <b>Conjugation</b> . These are included in the derived union for the <b>memberships</b> of the <b>Type</b> .
<code>oslc_sysmlv2:type_Input</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All <b>features</b> related to this <b>Type</b> by <b>FeatureMemberships</b> that have <b>direction in or inout..</b>

Standards Track Work Product

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:type_IntersectingType</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The interpretations of a <b>Type</b> with <b>intersectingTypes</b> are asserted to be those in common among the <b>intersectingTypes</b> , which are the <b>Types</b> derived from the <b>intersectingType</b> of the <b>ownedIntersectings</b> of this <b>Type</b> . For example, a <b>Classifier</b> might be an intersection of <b>Classifiers</b> for people of a particular sex and of a particular nationality. Similarly, a feature for people's children of a particular sex might be the intersection of a <b>Feature</b> for their children and a <b>Classifier</b> for people of that sex (because the interpretations of the children <b>Feature</b> that identify those of that sex are also interpretations of the Classifier for that sex).
<code>oslc_sysmlv2:type_IsAbstract</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Indicates whether instances of this <b>Type</b> must also be instances of at least one of its specialized <b>Types</b> .
<code>oslc_sysmlv2:type_IsConjugated</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Indicates whether this <b>Type</b> has an <b>ownedConjugator</b> .
<code>oslc_sysmlv2:type_IsSufficient</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether all things that meet the classification conditions of this <b>Type</b> must be classified by the <b>Type</b> .
<code>oslc_sysmlv2:type_Multiplicity</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Multiplicity</code>	An <b>ownedMember</b> of this <b>Type</b> that is a <b>Multiplicity</b> , which constrains the cardinality of the <b>Type</b> . If there is no such <b>ownedMember</b> , then the cardinality of this <b>Type</b> is constrained by all the <b>Multiplicity</b> constraints applicable to any direct supertypes.
<code>oslc_sysmlv2:type_Output</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All <b>features</b> related to this <b>Type</b> by <b>FeatureMemberships</b> that have <b>direction out or inout</b> .
<code>oslc_sysmlv2:type_OwnedConjugator</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Conjugation</code>	A <b>Conjugation</b> owned by this <b>Type</b> for which the <b>Type</b> is the <b>originalType</b> .
<code>oslc_sysmlv2:type_OwnedDifferencing</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Differencing</code>	The <b>ownedRelationships</b> of this <b>Type</b> that are <b>Differencings</b> , having this <b>Type</b> as their <b>typeDifferenced</b> .

Standards Track Work Product

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:type_OwnedDisjoining</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Disjoining</code>	The <code>ownedRelationships</code> of this <code>Type</code> that are <code>Disjoinings</code> , for which the <code>Type</code> is the <code>typeDisjoined Type</code> .
<code>oslc_sysmlv2:type_OwnedEndFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All <code>endFeatures</code> of this <code>Type</code> that are <code>ownedFeatures</code> .
<code>oslc_sysmlv2:type_OwnedFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <code>ownedMemberFeatures</code> of the <code>ownedFeatureMemberships</code> of this <code>Type</code> .
<code>oslc_sysmlv2:type_OwnedFeatureMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:FeatureMembership</code>	The <code>ownedMemberships</code> of this <code>Type</code> that are <code>FeatureMemberships</code> , for which the <code>Type</code> is the <code>owningType</code> . Each such <code>FeatureMembership</code> identifies an <code>ownedFeature</code> of the <code>Type</code> .
<code>oslc_sysmlv2:type_OwnedIntersecting</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Intersecting</code>	The <code>ownedRelationships</code> of this <code>Type</code> that are <code>Intersectings</code> , have the <code>Type</code> as their <code>typeIntersected</code> .
<code>oslc_sysmlv2:type_OwnedSpecialization</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Specialization</code>	The <code>ownedRelationships</code> of this <code>Type</code> that are <code>Specializations</code> , for which the <code>Type</code> is the <code>specific Type</code> .
<code>oslc_sysmlv2:type_OwnedUnioning</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Unioning</code>	The <code>ownedRelationships</code> of this <code>Type</code> that are <code>Unionings</code> , having the <code>Type</code> as their <code>typeUnioned</code> .
<code>oslc_sysmlv2:type_UnioningType</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The interpretations of a <code>Type</code> with <code>unioningTypes</code> are asserted to be the same as those of all the <code>unioningTypes</code> together, which are the <code>Types</code> derived from the <code>unioningType</code> of the <code>ownedUnionings</code> of this <code>Type</code> . For example, a <code>Classifier</code> for people might be the union of <code>Classifiers</code> for all the sexes. Similarly, a feature for people's children might be the union of features dividing them in the same ways as people in general.

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc:instanceShape</code>	Zero-or-one	false	Resource	Reference	<code>oslc:ResourceShape</code>	The URI of a Resource Shape that describes the possible properties, occurrence, value types, allowed values and labels. This shape information is useful in displaying the subject resource as well as guiding clients in performing modifications. Instance shapes may be specific to the authenticated user associated with the request that retrieved the resource, the current state of the resource and other factors and thus should not be cached.
<code>oslc:serviceProvider</code>	Zero-or-many	false	Resource	Reference	<code>oslc:ServiceProvider</code>	A link to the resource's OSLC Service Provider. There may be cases when the subject resource is available from a service provider that implements multiple domain specifications, which could result in multiple values for this property.
<code>oslc:shortTitle</code>	Zero-or-one	false	XMLLiteral	N/A	Unspecified	Short name identifying a resource, often used as an abbreviated identifier for presentation to end-users. <b>SHOULD</b> include only content that is valid inside an XHTML <code>&lt;span&gt;</code> element [sml-8].
<code>rdf:type</code>	Zero-or-many	false	Resource	Reference	<code>rdfs:Class</code>	The resource type URIs.

- **Describes:** <http://open-services.net/ns/sysmlv2#ItemFlowEnd>
- **Summary:** ItemFlowEndShape
- **Description:** An `ItemFlowEnd` is a `Feature` that is one of the `connectorEnds` giving the `source` or `target` of an `ItemFlow`. For `ItemFlows` typed by `FlowTransfer` or its specializations, `ItemFlowEnds` must have exactly one `ownedFeature`, which redefines `Transfer::source::sourceOutput` or `Transfer::target::targetInput` and redefines the corresponding feature of the `relatedElement` for its end.

ItemFlowEnd Properties

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>dcterms:contributor</code>	Zero-or-many	false	AnyResource	Either	<code>oslc:Any</code>	Contributor or contributors to the resource. It is likely that the target resource will be a foaf:Person but that is not necessarily the case.
<code>dcterms:created</code>	Zero-or-one	false	dateTime	N/A	Unspecified	Timestamp of resource creation.

Standards Track Work Product

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>dcterms:creator</code>	Zero-or-many	false	AnyResource	Either	<code>oslc:Any</code>	Creator or creators of the resource. It is likely that the target resource will be a foaf:Person but that is not necessarily the case.
<code>dcterms:description</code>	Zero-or-one	false	XMLLiteral	N/A	Unspecified	Descriptive text about resource represented as rich text in XHTML content.
<code>dcterms:identifier</code>	Exactly-one	true	string	N/A	Unspecified	A unique identifier for a resource. Typically read-only and assigned by the service provider when a resource is created. Not typically intended for end-user display.
<code>dcterms:modified</code>	Zero-or-one	false	dateTime	N/A	Unspecified	Timestamp of latest resource modification.
<code>dcterms:source</code>	Zero-or-one	false	Resource	Reference	<code>oslc:Any</code>	The resource URI a client can perform a get on to obtain the original non-OSLC AM formatted resource that was used to create this resource. The source resource is usually a binary or proprietary format that the service provider can consume and convert into an OSLC AM format. The service may use content negotiation with the Accept header to obtain the desired content type.
<code>dcterms:title</code>	Exactly-one	false	XMLLiteral	N/A	Unspecified	Title of the resource represented as rich text in XHTML content.
<code>dcterms:type</code>	Zero-or-many	false	string	N/A	Unspecified	A short string representation for the type, for example 'Car'.
<code>jazz_am:derives</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The resource that derives from another resource originated from or is significantly influenced by the referenced resource. For example a model element derives from a requirement.
<code>jazz_am:elaborates</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	This resource elaborates the referenced resource.
<code>jazz_am:external</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	A generic link from a resource to an external web page.
<code>jazz_am:refine</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The target is a refinement of the source. (e.g. a use case scenario might be a refinement of a textual requirement that describes the interaction).

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>jazz_am:satisfy</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The model element satisfies the requirement (e.g. The use case satisfies a functional requirement).
<code>jazz_am:trace</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The model element has a trace to the requirement (e.g. An attribute or its value are traced to a requirement).
<code>oslc_sysmlv2:element_AliasIds</code>	Zero-or-many	false	unspecified	Either	<code>xsd:string</code>	Various alternative identifiers for this Element. Generally, these will be set by tools.
<code>oslc_sysmlv2:element_DeclaredName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The declared name of this <b>Element</b> .
<code>oslc_sysmlv2:element_DeclaredShortName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	An optional alternative name for the <b>Element</b> that is intended to be shorter or in some way more succinct than its primary <b>name</b> . It may act as a modeler-specified identifier for the <b>Element</b> , though it is then the responsibility of the modeler to maintain the uniqueness of this identifier within a model or relative to some other context.
<code>oslc_sysmlv2:element_Documentation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Documentation</code>	The Documentation owned by this Element.
<code>oslc_sysmlv2:element_ElementId</code>	Exactly-one	false	unspecified	Either	<code>xsd:string</code>	The globally unique identifier for this Element. This is intended to be set by tooling, and it must not change during the lifetime of the Element.
<code>oslc_sysmlv2:element_IsImpliedIncluded</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether all necessary implied Relationships have been included in the <b>ownedRelationships</b> of this Element. This property may be true, even if there are not actually any <b>ownedRelationships</b> with <b>isImplied = true</b> , meaning that no such Relationships are actually implied for this Element. However, if it is false, then <b>ownedRelationships</b> may <i>not</i> contain any implied Relationships. That is, either <i>all</i> required implied Relationships must be included, or none of them.
<code>oslc_sysmlv2:element_IsLibraryElement</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether this Element is contained in the ownership tree of a library model.

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:element_Name</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The name to be used for this <b>Element</b> during name resolution within its <b>owningNamespace</b> . This is derived using the <code>effectiveName()</code> operation. By default, it is the same as the <b>declaredName</b> , but this is overridden for certain kinds of <b>Elements</b> to compute a <b>name</b> even when the <b>declaredName</b> is null.
<code>oslc_sysmlv2:element_OwnedAnnotation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Annotation</code>	The <b>ownedRelationships</b> of this <b>Element</b> that are <b>Annotations</b> , for which this <b>Element</b> is the <b>annotatedElement</b> .
<code>oslc_sysmlv2:element_OwnedElement</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The <b>Elements</b> owned by this <b>Element</b> , derived as the <b>ownedRelatedElements</b> of the <b>ownedRelationships</b> of this <b>Element</b> .
<code>oslc_sysmlv2:element_OwnedRelationship</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Relationship</code>	The <b>Relationships</b> for which this <b>Element</b> is the <b>owningRelatedElement</b> .
<code>oslc_sysmlv2:element_Owner</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The owner of this <b>Element</b> , derived as the <b>owningRelatedElement</b> of the <b>owningRelationship</b> of this <b>Element</b> , if any.
<code>oslc_sysmlv2:element_OwningMembership</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:OwningMembership</code>	The <b>owningRelationship</b> of this <b>Element</b> , if that <b>Relationship</b> is a <b>Membership</b> .
<code>oslc_sysmlv2:element_OwningNamespace</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Namespace</code>	The <b>Namespace</b> that owns this <b>Element</b> , which is the <b>membershipOwningNamespace</b> of the <b>owningMembership</b> of this <b>Element</b> , if any.
<code>oslc_sysmlv2:element_OwningRelationship</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Relationship</code>	The <b>Relationship</b> for which this <b>Element</b> is an <b>ownedRelatedElement</b> , if any.
<code>oslc_sysmlv2:element_QualifiedName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The full ownership-qualified name of this <b>Element</b> , represented in a form that is valid according to the KerML textual concrete syntax for qualified names (including use of unrestricted name notation and escaped characters, as necessary). The <b>qualifiedName</b> is null if this <b>Element</b> has no <b>owningNamespace</b> or if there is not a complete ownership chain of named <b>Namespaces</b> from a root <b>Namespace</b> to this <b>Element</b> .

## Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:element_ShortName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The short name to be used for this <b>Element</b> during name resolution within its <b>owningNamespace</b> . This is derived using the <code>effectiveShortName()</code> operation. By default, it is the same as the <code>declaredShortName</code> , but this is overridden for certain kinds of <b>Elements</b> to compute a <code>shortName</code> even when the <code>declaredName</code> is null.
<code>oslc_sysmlv2:element_TextualRepresentation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:TextualRepresentation</code>	The <b>TextualRepresentations</b> that annotate this <b>Element</b> .
<code>oslc_sysmlv2:feature_ChainingFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <b>Feature</b> that are chained together to determine the values of this <b>Feature</b> , derived from the <b>chainingFeatures</b> of the <b>ownedFeatureChainings</b> of this <b>Feature</b> , in the same order. The values of a <b>Feature</b> with <b>chainingFeatures</b> are the same as values of the last <b>Feature</b> in the chain, which can be found by starting with the values of the first <b>Feature</b> (for each instance of the domain of the original <b>Feature</b> ), then using each of those as domain instances to find the values of the second <b>Feature</b> in <b>chainingFeatures</b> , and so on, to values of the last <b>Feature</b> .
<code>oslc_sysmlv2:feature_Direction</code>	Zero-or-one	false	unspecified	Either	<code>oslc_sysmlv2:FeatureDirectionKind</code>	Indicates how values of this <b>Feature</b> are determined or used (as specified for the <b>FeatureDirectionKind</b> ).
<code>oslc_sysmlv2:feature_EndOwningType</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The <b>Type</b> that is related to this <b>Feature</b> by an <b>EndFeatureMembership</b> in which the <b>Feature</b> is an <b>ownedMemberFeature</b> .
<code>oslc_sysmlv2:feature_FeaturingType</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	<b>Types</b> that feature this <b>Feature</b> , such that any instance in the domain of the <b>Feature</b> must be classified by all of these <b>Types</b> , including at least all the <b>featuringTypes</b> of its <b>typeFeaturings</b> . If the <b>Feature</b> is chained, then the <b>featuringTypes</b> of the first <b>Feature</b> in the chain are also <b>featuringTypes</b> of the chained <b>Feature</b> .
<code>oslc_sysmlv2:feature_IsComposite</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether the <b>Feature</b> is a composite <b>feature</b> of its <b>featuringType</b> . If so, the values of the <b>Feature</b> cannot exist after its featuring instance no longer does.
<code>oslc_sysmlv2:feature_IsDerived</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether the values of this <b>Feature</b> can always be computed from the values of other <b>Features</b> .
<code>oslc_sysmlv2:feature_IsEnd</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether or not the this <b>Feature</b> is an end <b>Feature</b> , requiring a different interpretation of the <b>multiplicity</b> of the <b>Feature</b> .
<code>oslc_sysmlv2:feature_IsNonunique</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	isNonunique.

Standards Track Work Product

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:feature_IsOrdered</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether an order exists for the values of this <b>Feature</b> or not.
<code>oslc_sysmlv2:feature_IsPortion</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether the values of this <b>Feature</b> are contained in the space and time of instances of the domain of the <b>Feature</b> and represent the same thing as those instances.
<code>oslc_sysmlv2:feature_IsReadOnly</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether the values of this <b>Feature</b> can change over the lifetime of an instance of the domain.
<code>oslc_sysmlv2:feature_IsUnique</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether or not values for this <b>Feature</b> must have no duplicates or not.
<code>oslc_sysmlv2:feature_OwnedFeatureChaining</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:FeatureChaining</code>	The <b>ownedRelationships</b> of this <b>Feature</b> that are <b>FeatureChainings</b> , for which the <b>Feature</b> will be the <b>featureChained</b> .
<code>oslc_sysmlv2:feature_OwnedFeatureInverting</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:FeatureInverting</code>	The <b>ownedRelationships</b> of this <b>Feature</b> that are <b>FeatureInvertings</b> and for which the <b>Feature</b> is the <b>featureInverted</b> .
<code>oslc_sysmlv2:feature_OwnedRedefinition</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Redefinition</code>	The <b>ownedSubsettings</b> of this <b>Feature</b> that are <b>Redefinitions</b> , for which the <b>Feature</b> is the <b>redefiningFeature</b> .
<code>oslc_sysmlv2:feature_OwnedReferenceSubsetting</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:ReferenceSubsetting</code>	The one <b>ownedSubsetting</b> of this <b>Feature</b> , if any, that is a <b>ReferenceSubsetting</b> , for which the <b>Feature</b> is the <b>referencingFeature</b> .
<code>oslc_sysmlv2:feature_OwnedSubsetting</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Subsetting</code>	The <b>ownedSpecializations</b> of this <b>Feature</b> that are <b>Subsettings</b> , for which the <b>Feature</b> is the <b>subsettingFeature</b> .
<code>oslc_sysmlv2:feature_OwnedTypeFeaturing</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:TypeFeaturing</code>	The <b>ownedRelationships</b> of this <b>Feature</b> that are <b>TypeFeaturings</b> and for which the <b>Feature</b> is the <b>featureOfType</b> .
<code>oslc_sysmlv2:feature_OwnedTyping</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:FeatureTyping</code>	The <b>ownedSpecializations</b> of this <b>Feature</b> that are <b>FeatureTypings</b> , for which the <b>Feature</b> is the <b>typedFeature</b> .
<code>oslc_sysmlv2:feature_OwningFeatureMembership</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:FeatureMembership</code>	The <b>FeatureMembership</b> that owns this <b>Feature</b> as an <b>ownedMemberFeature</b> , determining its <b>owningType</b> .
<code>oslc_sysmlv2:feature_OwningType</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The <b>Type</b> that is the <b>owningType</b> of the <b>owningFeatureMembership</b> of this <b>Feature</b> .

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:feature_Type</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	<b>Types</b> that restrict the values of this <b>Feature</b> , such that the values must be instances of all the <b>types</b> . The types of a <b>Feature</b> are derived from its <b>typings</b> and the <b>types</b> of its <b>subsettings</b> . If the <b>Feature</b> is chained, then the <b>types</b> of the last <b>Feature</b> in the chain are also <b>types</b> of the chained <b>Feature</b> .
<code>oslc_sysmlv2:namespace_ImportedMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Membership</code>	The <b>Memberships</b> in this <b>Namespace</b> that result from the <b>ownedImports</b> of this <b>Namespace</b> .
<code>oslc_sysmlv2:namespace_Member</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The set of all member <b>Elements</b> of this <b>Namespace</b> , which are the <b>memberElements</b> of all <b>memberships</b> of the <b>Namespace</b> .
<code>oslc_sysmlv2:namespace_Membership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Membership</code>	All <b>Memberships</b> in this <b>Namespace</b> , including (at least) the union of <b>ownedMemberships</b> and <b>importedMemberships</b> .
<code>oslc_sysmlv2:namespace_OwnedImport</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Import</code>	The <b>ownedRelationships</b> of this <b>Namespace</b> that are <b>Imports</b> , for which the <b>Namespace</b> is the <b>importOwningNamespace</b> .
<code>oslc_sysmlv2:namespace_OwnedMember</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The owned <b>members</b> of this <b>Namespace</b> , which are the <b>ownedMemberElements</b> of the <b>ownedMemberships</b> of the ..
<code>oslc_sysmlv2:namespace_OwnedMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Membership</code>	The <b>ownedRelationships</b> of this <b>Namespace</b> that are <b>Memberships</b> , for which the <b>Namespace</b> is the <b>membershipOwningNamespace</b> .
<code>oslc_sysmlv2:type_DifferencingType</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The interpretations of a <b>Type</b> with <b>differencingTypes</b> are asserted to be those of the first of those <b>Types</b> , but not including those of the remaining <b>Types</b> . For example, a <b>Classifier</b> might be the difference of a <b>Classifier</b> for people and another for people of a particular nationality, leaving people who are not of that nationality. Similarly, a feature of people might be the difference between a feature for their children and a <b>Classifier</b> for people of a particular sex, identifying their children not of that sex (because the interpretations of the children <b>Feature</b> that identify those of that sex are also interpretations of the <b>Classifier</b> for that sex).
<code>oslc_sysmlv2:type_DirectedFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <b>features</b> of this <b>Type</b> that have a non-null <b>direction</b> .

Standards Track Work Product

<code>oslc_sysmlv2:type_OwnedFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <code>ownedMemberFeatures</code> of the <code>ownedFeatureMemberships</code> of this <code>Type</code> .
<code>oslc_sysmlv2:type_OwnedFeatureMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:FeatureMembership</code>	The <code>ownedMemberships</code> of this <code>Type</code> that are <code>FeatureMemberships</code> , for which the <code>Type</code> is the <code>owningType</code> . Each such <code>FeatureMembership</code> identifies an <code>ownedFeature</code> of the <code>Type</code> .
<code>oslc_sysmlv2:type_OwnedIntersecting</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Intersecting</code>	The <code>ownedRelationships</code> of this <code>Type</code> that are <code>Intersectings</code> , have the <code>Type</code> as their <code>typeIntersected</code> .
<code>oslc_sysmlv2:type_OwnedSpecialization</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Specialization</code>	The <code>ownedRelationships</code> of this <code>Type</code> that are <code>Specializations</code> , for which the <code>Type</code> is the <code>specific Type</code> .
<code>oslc_sysmlv2:type_OwnedUnioning</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Unioning</code>	The <code>ownedRelationships</code> of this <code>Type</code> that are <code>Unionings</code> , having the <code>Type</code> as their <code>typeUnioned</code> .

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:type_UnioningType</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The interpretations of a <b>Type</b> with <b>unioningTypes</b> are asserted to be the same as those of all the <b>unioningTypes</b> together, which are the <b>Types</b> derived from the <b>unioningType</b> of the <b>ownedUnionings</b> of this <b>Type</b> . For example, a <b>Classifier</b> for people might be the union of <b>Classifiers</b> for all the sexes. Similarly, a feature for people's children might be the union of features dividing them in the same ways as people in general.
<code>oslc:instanceShape</code>	Zero-or-one	false	Resource	Reference	<code>oslc:ResourceShape</code>	The URI of a Resource Shape that describes the possible properties, occurrence, value types, allowed values and labels. This shape information is useful in displaying the subject resource as well as guiding clients in performing modifications. Instance shapes may be specific to the authenticated user associated with the request that retrieved the resource, the current state of the resource and other factors and thus should not be cached.
<code>oslc:serviceProvider</code>	Zero-or-many	false	Resource	Reference	<code>oslc:ServiceProvider</code>	A link to the resource's OSLC Service Provider. There may be cases when the subject resource is available from a service provider that implements multiple domain specifications, which could result in multiple values for this property.
<code>oslc:shortTitle</code>	Zero-or-one	false	XMLLiteral	N/A	Unspecified	Short name identifying a resource, often used as an abbreviated identifier for presentation to end-users. <b>SHOULD</b> include only content that is valid inside an XHTML <code>&lt;span&gt;</code> element [sml-9].
<code>rdf:type</code>	Zero-or-many	false	Resource	Reference	<code>rdfs:Class</code>	The resource type URIs.

- **Describes:** <http://open-services.net/ns/sysmlv2#Connector>
- **Summary:** ConnectorShape
- **Description:** A **Connector** is a usage of **Associations**, with links restricted according to instances of the **Type** in which they are used (domain of the **Connector**). The **associations** of the **Connector** restrict what kinds of things might be linked. The **Connector** further restricts these links to be between values of **Features** on instances of its domain.

#### Connector Properties

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
---------------	--------	-----------	------------	----------------	-------	-------------

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>dcterms:contributor</code>	Zero-or-many	false	AnyResource	Either	<code>oslc:Any</code>	Contributor or contributors to the resource. It is likely that the target resource will be a foaf:Person but that is not necessarily the case.
<code>dcterms:created</code>	Zero-or-one	false	dateTime	N/A	Unspecified	Timestamp of resource creation.
<code>dcterms:creator</code>	Zero-or-many	false	AnyResource	Either	<code>oslc:Any</code>	Creator or creators of the resource. It is likely that the target resource will be a foaf:Person but that is not necessarily the case.
<code>dcterms:description</code>	Zero-or-one	false	XMLLiteral	N/A	Unspecified	Descriptive text about resource represented as rich text in XHTML content.
<code>dcterms:identifier</code>	Exactly-one	true	string	N/A	Unspecified	A unique identifier for a resource. Typically read-only and assigned by the service provider when a resource is created. Not typically intended for end-user display.
<code>dcterms:modified</code>	Zero-or-one	false	dateTime	N/A	Unspecified	Timestamp of latest resource modification.
<code>dcterms:source</code>	Zero-or-one	false	Resource	Reference	<code>oslc:Any</code>	The resource URI a client can perform a get on to obtain the original non-OSLC AM formatted resource that was used to create this resource. The source resource is usually a binary or proprietary format that the service provider can consume and convert into an OSLC AM format. The service may use content negotiation with the Accept header to obtain the desired content type.
<code>dcterms:title</code>	Exactly-one	false	XMLLiteral	N/A	Unspecified	Title of the resource represented as rich text in XHTML content.
<code>dcterms:type</code>	Zero-or-many	false	string	N/A	Unspecified	A short string representation for the type, for example 'Car'.
<code>jazz_am:derives</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The resource that derives from another resource originated from or is significantly influenced by the referenced resource. For example a model element derives from a requirement.
<code>jazz_am:elaborates</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	This resource elaborates the referenced resource.

Standards Track Work Product

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>jazz_am:external</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	A generic link from a resource to an external web page.
<code>jazz_am:refine</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The target is a refinement of the source. (e.g. a use case scenario might be a refinement of a textual requirement that describes the interaction).
<code>jazz_am:satisfy</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The model element satisfies the requirement (e.g. The use case satisfies a functional requirement).
<code>jazz_am:trace</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The model element has a trace to the requirement (e.g. An attribute or its value are traced to a requirement).
<code>oslc_sysmlv2:connector_Association</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Association</code>	The <b>Associations</b> that type the <b>Connector</b> .
<code>oslc_sysmlv2:connector_ConnectorEnd</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <b>endFeatures</b> of a <b>Connector</b> , which redefine the <b>endFeatures</b> of the <b>associations</b> of the <b>Connector</b> . The <b>connectorEnds</b> determine via <b>ReferenceSubsetting Relationships</b> which <b>Features</b> are related by the <b>Connector</b> .
<code>oslc_sysmlv2:connector_RelatedFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <b>Features</b> that are related by this <b>Connector</b> considered as a <b>Relationship</b> and that restrict the links it identifies, given by the referenced <b>Features</b> of the <b>connectorEnds</b> of the <b>Connector</b> .
<code>oslc_sysmlv2:connector_SourceFeature</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The source <b>relatedFeature</b> for this <b>Connector</b> . It is the first <b>relatedFeature</b> .
<code>oslc_sysmlv2:connector_TargetFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The target <b>relatedFeatures</b> for this <b>Connector</b> . This includes all the <b>relatedFeatures</b> other than the <b>sourceFeature</b> .
<code>oslc_sysmlv2:element_AliasIds</code>	Zero-or-many	false	unspecified	Either	<code>xsd:string</code>	Various alternative identifiers for this Element. Generally, these will be set by tools.
<code>oslc_sysmlv2:element_DeclaredName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The declared name of this <b>Element</b> .

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:element_DeclaredShortName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	An optional alternative name for the <b>Element</b> that is intended to be shorter or in some way more succinct than its primary <b>name</b> . It may act as a modeler-specified identifier for the <b>Element</b> , though it is then the responsibility of the modeler to maintain the uniqueness of this identifier within a model or relative to some other context.
<code>oslc_sysmlv2:element_Documentation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Documentation</code>	The Documentation owned by this Element.
<code>oslc_sysmlv2:element_ElementId</code>	Exactly-one	false	unspecified	Either	<code>xsd:string</code>	The globally unique identifier for this Element. This is intended to be set by tooling, and it must not change during the lifetime of the Element.
<code>oslc_sysmlv2:element_IsImpliedIncluded</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether all necessary implied Relationships have been included in the <b>ownedRelationships</b> of this Element. This property may be true, even if there are not actually any <b>ownedRelationships</b> with <code>isImplied = true</code> , meaning that no such Relationships are actually implied for this Element. However, if it is false, then <b>ownedRelationships</b> may <i>not</i> contain any implied Relationships. That is, either <i>all</i> required implied Relationships must be included, or none of them.
<code>oslc_sysmlv2:element_IsLibraryElement</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether this Element is contained in the ownership tree of a library model.
<code>oslc_sysmlv2:element_Name</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The name to be used for this <b>Element</b> during name resolution within its <b>owningNamespace</b> . This is derived using the <code>effectiveName()</code> operation. By default, it is the same as the <code>declaredName</code> , but this is overridden for certain kinds of <b>Elements</b> to compute a <b>name</b> even when the <code>declaredName</code> is null.
<code>oslc_sysmlv2:element_OwnedAnnotation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Annotation</code>	The <b>ownedRelationships</b> of this <b>Element</b> that are <b>Annotations</b> , for which this <b>Element</b> is the <b>annotatedElement</b> .
<code>oslc_sysmlv2:element_OwnedElement</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The Elements owned by this Element, derived as the <b>ownedRelatedElements</b> of the <b>ownedRelationships</b> of this Element.
<code>oslc_sysmlv2:element_OwnedRelationship</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Relationship</code>	The Relationships for which this Element is the <b>owningRelatedElement</b> .

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:element_Owner</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The owner of this Element, derived as the <code>owningRelatedElement</code> of the <code>owningRelationship</code> of this Element, if any.
<code>oslc_sysmlv2:element_OwningMembership</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:OwningMembership</code>	The <code>owningRelationship</code> of this Element, if that Relationship is a Membership.
<code>oslc_sysmlv2:element_OwningNamespace</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Namespace</code>	The Namespace that owns this Element, which is the <code>membershipOwningNamespace</code> of the <code>owningMembership</code> of this Element, if any.
<code>oslc_sysmlv2:element_OwningRelationship</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Relationship</code>	The Relationship for which this Element is an <code>ownedRelatedElement</code> , if any.
<code>oslc_sysmlv2:element_QualifiedName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The full ownership-qualified name of this Element, represented in a form that is valid according to the KerML textual concrete syntax for qualified names (including use of unrestricted name notation and escaped characters, as necessary). The <code>qualifiedName</code> is null if this Element has no <code>owningNamespace</code> or if there is not a complete ownership chain of named Namespaces from a root Namespace to this Element.
<code>oslc_sysmlv2:element_ShortName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The short name to be used for this Element during name resolution within its <code>owningNamespace</code> . This is derived using the <code>effectiveShortName()</code> operation. By default, it is the same as the <code>declaredShortName</code> , but this is overridden for certain kinds of Elements to compute a <code>shortName</code> even when the <code>declaredName</code> is null.
<code>oslc_sysmlv2:element_TextualRepresentation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:TextualRepresentation</code>	The <code>TextualRepresentations</code> that annotate this Element.
<code>oslc_sysmlv2:feature_ChainingFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The Feature that are chained together to determine the values of this Feature, derived from the <code>chainingFeatures</code> of the <code>ownedFeatureChainings</code> of this Feature, in the same order. The values of a Feature with <code>chainingFeatures</code> are the same as values of the last Feature in the chain, which can be found by starting with the values of the first Feature (for each instance of the domain of the original Feature), then using each of those as domain instances to find the values of the second Feature in <code>chainingFeatures</code> , and so on, to values of the last Feature.
<code>oslc_sysmlv2:feature_Direction</code>	Zero-or-one	false	unspecified	Either	<code>oslc_sysmlv2:FeatureDirectionKind</code>	Indicates how values of this Feature are determined or used (as specified for the <code>FeatureDirectionKind</code> ).

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:feature_EndOwningType</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The <b>Type</b> that is related to this <b>Feature</b> by an <b>EndFeatureMembership</b> in which the <b>Feature</b> is an <b>ownedMemberFeature</b> .
<code>oslc_sysmlv2:feature_FeaturingType</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	<b>Types</b> that feature this <b>Feature</b> , such that any instance in the domain of the <b>Feature</b> must be classified by all of these <b>Types</b> , including at least all the <b>featuringTypes</b> of its <b>typeFeaturings</b> . If the <b>Feature</b> is chained, then the <b>featuringTypes</b> of the first <b>Feature</b> in the chain are also <b>featuringTypes</b> of the chained <b>Feature</b> .
<code>oslc_sysmlv2:feature_IsComposite</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether the <b>Feature</b> is a composite <b>feature</b> of its <b>featuringType</b> . If so, the values of the <b>Feature</b> cannot exist after its featuring instance no longer does.
<code>oslc_sysmlv2:feature_IsDerived</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether the values of this <b>Feature</b> can always be computed from the values of other <b>Features</b> .
<code>oslc_sysmlv2:feature_IsEnd</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether or not the this <b>Feature</b> is an end <b>Feature</b> , requiring a different interpretation of the <b>multiplicity</b> of the <b>Feature</b> .
<code>oslc_sysmlv2:feature_IsNonunique</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	isNonunique.
<code>oslc_sysmlv2:feature_IsOrdered</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether an order exists for the values of this <b>Feature</b> or not.
<code>oslc_sysmlv2:feature_IsPortion</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether the values of this <b>Feature</b> are contained in the space and time of instances of the domain of the <b>Feature</b> and represent the same thing as those instances.
<code>oslc_sysmlv2:feature_IsReadOnly</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether the values of this <b>Feature</b> can change over the lifetime of an instance of the domain.
<code>oslc_sysmlv2:feature_IsUnique</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether or not values for this <b>Feature</b> must have no duplicates or not.
<code>oslc_sysmlv2:feature_OwnedFeatureChaining</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:FeatureChaining</code>	The <b>ownedRelationships</b> of this <b>Feature</b> that are <b>FeatureChainings</b> , for which the <b>Feature</b> will be the <b>featureChained</b> .
<code>oslc_sysmlv2:feature_OwnedFeatureInverting</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:FeatureInverting</code>	The <b>ownedRelationships</b> of this <b>Feature</b> that are <b>FeatureInvertings</b> and for which the <b>Feature</b> is the <b>featureInverted</b> .

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:feature_OwnedRedefinition</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Redefinition</code>	The <code>ownedSubsettings</code> of this <code>Feature</code> that are <code>Redefinitions</code> , for which the <code>Feature</code> is the <code>redefiningFeature</code> .
<code>oslc_sysmlv2:feature_OwnedReferenceSubsetting</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:ReferenceSubsetting</code>	The one <code>ownedSubsetting</code> of this <code>Feature</code> , if any, that is a <code>ReferenceSubsetting</code> , for which the <code>Feature</code> is the <code>referencingFeature</code> .
<code>oslc_sysmlv2:feature_OwnedSubsetting</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Subsetting</code>	The <code>ownedSpecializations</code> of this <code>Feature</code> that are <code>Subsettings</code> , for which the <code>Feature</code> is the <code>subsettingFeature</code> .
<code>oslc_sysmlv2:feature_OwnedTypeFeaturing</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:TypeFeaturing</code>	The <code>ownedRelationships</code> of this <code>Feature</code> that are <code>TypeFeaturings</code> and for which the <code>Feature</code> is the <code>featureOfType</code> .
<code>oslc_sysmlv2:feature_OwnedTyping</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:FeatureTyping</code>	The <code>ownedSpecializations</code> of this <code>Feature</code> that are <code>FeatureTypings</code> , for which the <code>Feature</code> is the <code>typedFeature</code> .
<code>oslc_sysmlv2:feature_OwningFeatureMembership</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:FeatureMembership</code>	The <code>FeatureMembership</code> that owns this <code>Feature</code> as an <code>ownedMemberFeature</code> , determining its <code>owningType</code> .
<code>oslc_sysmlv2:feature_OwningType</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The <code>Type</code> that is the <code>owningType</code> of the <code>owningFeatureMembership</code> of this <code>Feature</code> .
<code>oslc_sysmlv2:feature_Type</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	<code>Types</code> that restrict the values of this <code>Feature</code> , such that the values must be instances of all the <code>types</code> . The types of a <code>Feature</code> are derived from its <code>typings</code> and the <code>types</code> of its <code>subsettings</code> . If the <code>Feature</code> is chained, then the <code>types</code> of the last <code>Feature</code> in the chain are also <code>types</code> of the chained <code>Feature</code> .
<code>oslc_sysmlv2:namespace_ImportedMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Membership</code>	The <code>Memberships</code> in this <code>Namespace</code> that result from the <code>ownedImports</code> of this <code>Namespace</code> .
<code>oslc_sysmlv2:namespace_Member</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The set of all member <code>Elements</code> of this <code>Namespace</code> , which are the <code>memberElements</code> of all <code>memberships</code> of the <code>Namespace</code> .
<code>oslc_sysmlv2:namespace_Membership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Membership</code>	All <code>Memberships</code> in this <code>Namespace</code> , including (at least) the union of <code>ownedMemberships</code> and <code>importedMemberships</code> .

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:namespace_OwnedImport</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Import</code>	The <code>ownedRelationships</code> of this <code>Namespace</code> that are <code>Imports</code> , for which the <code>Namespace</code> is the <code>importOwningNamespace</code> .
<code>oslc_sysmlv2:namespace_OwnedMember</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The owned <code>members</code> of this <code>Namespace</code> , which are the <code>ownedMemberElements</code> of the <code>ownedMemberships</code> of the ..
<code>oslc_sysmlv2:namespace_OwnedMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Membership</code>	The <code>ownedRelationships</code> of this <code>Namespace</code> that are <code>Memberships</code> , for which the <code>Namespace</code> is the <code>membershipOwningNamespace</code> .
<code>oslc_sysmlv2:relationship_IsImplied</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether this Relationship was generated by tooling to meet semantic rules, rather than being directly created by a modeler.
<code>oslc_sysmlv2:relationship_OwnedRelatedElement</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The <code>relatedElements</code> of this Relationship that are owned by the Relationship.
<code>oslc_sysmlv2:relationship_OwningRelatedElement</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The <code>relatedElement</code> of this Relationship that owns the Relationship, if any.
<code>oslc_sysmlv2:relationship_RelatedElement</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The Elements that are related by this Relationship, derived as the union of the <code>source</code> and <code>target</code> Elements of the Relationship.
<code>oslc_sysmlv2:relationship_Source</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The <code>relatedElements</code> from which this Relationship is considered to be directed..
<code>oslc_sysmlv2:relationship_Target</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The <code>relatedElements</code> to which this Relationship is considered to be directed.
<code>oslc_sysmlv2:type_DifferencingType</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The interpretations of a <code>Type</code> with <code>differencingTypes</code> are asserted to be those of the first of those <code>Types</code> , but not including those of the remaining <code>Types</code> . For example, a <code>Classifier</code> might be the difference of a <code>Classifier</code> for people and another for people of a particular nationality, leaving people who are not of that nationality. Similarly, a feature of people might be the difference between a feature for their children and a <code>Classifier</code> for people of a particular sex, identifying their children not of that sex (because the interpretations of the children <code>Feature</code> that identify those of that sex are also interpretations of the <code>Classifier</code> for that sex).

Standards Track Work Product

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:type_DirectedFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <b>features</b> of this <b>Type</b> that have a non-null <b>direction</b> .
<code>oslc_sysmlv2:type_EndFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All <b>features</b> of this <b>Type</b> with <code>isEnd = true</code> .
<code>oslc_sysmlv2:type_Feature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <b>ownedMemberFeatures</b> of the <b>featureMemberships</b> of this <b>Type</b> .
<code>oslc_sysmlv2:type_FeatureMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:FeatureMembership</code>	The <b>FeatureMemberships</b> for <b>features</b> of this <b>Type</b> , which include all <b>ownedFeatureMemberships</b> and those <b>inheritedMemberships</b> that are <b>FeatureMemberships</b> (but does <i>not</i> include any <b>importedMemberships</b> ).
<code>oslc_sysmlv2:type_InheritedFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All the <b>memberFeatures</b> of the <b>inheritedMemberships</b> of this <b>Type</b> that are <b>FeatureMemberships</b> .
<code>oslc_sysmlv2:type_InheritedMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Membership</code>	All <b>Memberships</b> inherited by this <b>Type</b> via <b>Specialization</b> or <b>Conjugation</b> . These are included in the derived union for the <b>memberships</b> of the <b>Type</b> .
<code>oslc_sysmlv2:type_Input</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All <b>features</b> related to this <b>Type</b> by <b>FeatureMemberships</b> that have <b>direction in or inout..</b>
<code>oslc_sysmlv2:type_IntersectingType</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The interpretations of a <b>Type</b> with <b>intersectingTypes</b> are asserted to be those in common among the <b>intersectingTypes</b> , which are the <b>Types</b> derived from the <b>intersectingType</b> of the <b>ownedIntersectings</b> of this <b>Type</b> . For example, a <b>Classifier</b> might be an intersection of <b>Classifiers</b> for people of a particular sex and of a particular nationality. Similarly, a feature for people's children of a particular sex might be the intersection of a <b>Feature</b> for their children and a <b>Classifier</b> for people of that sex (because the interpretations of the children <b>Feature</b> that identify those of that sex are also interpretations of the Classifier for that sex).
<code>oslc_sysmlv2:type_IsAbstract</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Indicates whether instances of this <b>Type</b> must also be instances of at least one of its specialized <b>Types</b> .
<code>oslc_sysmlv2:type_IsConjugated</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Indicates whether this <b>Type</b> has an <b>ownedConjugator</b> .

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:type_IsSufficient</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether all things that meet the classification conditions of this <b>Type</b> must be classified by the <b>Type</b> .
<code>oslc_sysmlv2:type_Multiplicity</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Multiplicity</code>	An <b>ownedMember</b> of this <b>Type</b> that is a <b>Multiplicity</b> , which constrains the cardinality of the <b>Type</b> . If there is no such <b>ownedMember</b> , then the cardinality of this <b>Type</b> is constrained by all the <b>Multiplicity</b> constraints applicable to any direct supertypes.
<code>oslc_sysmlv2:type_Output</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All <b>features</b> related to this <b>Type</b> by <b>FeatureMemberships</b> that have <b>direction out or inout</b> .
<code>oslc_sysmlv2:type_OwnedConjugator</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Conjugation</code>	A <b>Conjugation</b> owned by this <b>Type</b> for which the <b>Type</b> is the <b>originalType</b> .
<code>oslc_sysmlv2:type_OwnedDifferencing</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Differencing</code>	The <b>ownedRelationships</b> of this <b>Type</b> that are <b>Differencings</b> , having this <b>Type</b> as their <b>typeDifferenced</b> .
<code>oslc_sysmlv2:type_OwnedDisjoining</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Disjoining</code>	The <b>ownedRelationships</b> of this <b>Type</b> that are <b>Disjoinings</b> , for which the <b>Type</b> is the <b>typeDisjoined Type</b> .
<code>oslc_sysmlv2:type_OwnedEndFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All <b>endFeatures</b> of this <b>Type</b> that are <b>ownedFeatures</b> .
<code>oslc_sysmlv2:type_OwnedFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <b>ownedMemberFeatures</b> of the <b>ownedFeatureMemberships</b> of this <b>Type</b> .
<code>oslc_sysmlv2:type_OwnedFeatureMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:FeatureMembership</code>	The <b>ownedMemberships</b> of this <b>Type</b> that are <b>FeatureMemberships</b> , for which the <b>Type</b> is the <b>owningType</b> . Each such <b>FeatureMembership</b> identifies an <b>ownedFeature</b> of the <b>Type</b> .
<code>oslc_sysmlv2:type_OwnedIntersecting</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Intersecting</code>	The <b>ownedRelationships</b> of this <b>Type</b> that are <b>Intersectings</b> , have the <b>Type</b> as their <b>typeIntersected</b> .
<code>oslc_sysmlv2:type_OwnedSpecialization</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Specialization</code>	The <b>ownedRelationships</b> of this <b>Type</b> that are <b>Specializations</b> , for which the <b>Type</b> is the <b>specific Type</b> .
<code>oslc_sysmlv2:type_OwnedUnioning</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Unioning</code>	The <b>ownedRelationships</b> of this <b>Type</b> that are <b>Unionings</b> , having the <b>Type</b> as their <b>typeUnioned</b> .

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:type_UnioningType</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The interpretations of a <b>Type</b> with <b>unioningTypes</b> are asserted to be the same as those of all the <b>unioningTypes</b> together, which are the <b>Types</b> derived from the <b>unioningType</b> of the <b>ownedUnionings</b> of this <b>Type</b> . For example, a <b>Classifier</b> for people might be the union of <b>Classifiers</b> for all the sexes. Similarly, a feature for people's children might be the union of features dividing them in the same ways as people in general.
<code>oslc:instanceShape</code>	Zero-or-one	false	Resource	Reference	<code>oslc:ResourceShape</code>	The URI of a Resource Shape that describes the possible properties, occurrence, value types, allowed values and labels. This shape information is useful in displaying the subject resource as well as guiding clients in performing modifications. Instance shapes may be specific to the authenticated user associated with the request that retrieved the resource, the current state of the resource and other factors and thus should not be cached.
<code>oslc:serviceProvider</code>	Zero-or-many	false	Resource	Reference	<code>oslc:ServiceProvider</code>	A link to the resource's OSLC Service Provider. There may be cases when the subject resource is available from a service provider that implements multiple domain specifications, which could result in multiple values for this property.
<code>oslc:shortTitle</code>	Zero-or-one	false	XMLLiteral	N/A	Unspecified	Short name identifying a resource, often used as an abbreviated identifier for presentation to end-users. <b>SHOULD</b> include only content that is valid inside an XHTML <code>&lt;span&gt;</code> element [sml-10].
<code>rdf:type</code>	Zero-or-many	false	Resource	Reference	<code>rdfs:Class</code>	The resource type URIs.

- **Describes:** <http://open-services.net/ns/sysmlv2#FlowConnectionDefinition>
- **Summary:** FlowConnectionDefinitionShape
- **Description:** A **FlowConnectionDefinition** is a **ConnectionDefinition** and **ActionDefinition** that is also an **Interaction** representing flows between **Usages**.

#### FlowConnectionDefinition Properties

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>dcterms:contributor</code>	Zero-or-many	false	AnyResource	Either	<code>oslc:Any</code>	Contributor or contributors to the resource. It is likely that the target resource will be a foaf:Person but that is not necessarily the case.

Standards Track Work Product

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>dcterms:created</code>	Zero-or-one	false	dateTime	N/A	Unspecified	Timestamp of resource creation.
<code>dcterms:creator</code>	Zero-or-many	false	AnyResource	Either	<code>oslc:Any</code>	Creator or creators of the resource. It is likely that the target resource will be a foaf:Person but that is not necessarily the case.
<code>dcterms:description</code>	Zero-or-one	false	XMLLiteral	N/A	Unspecified	Descriptive text about resource represented as rich text in XHTML content.
<code>dcterms:identifier</code>	Exactly-one	true	string	N/A	Unspecified	A unique identifier for a resource. Typically read-only and assigned by the service provider when a resource is created. Not typically intended for end-user display.
<code>dcterms:modified</code>	Zero-or-one	false	dateTime	N/A	Unspecified	Timestamp of latest resource modification.
<code>dcterms:source</code>	Zero-or-one	false	Resource	Reference	<code>oslc:Any</code>	The resource URI a client can perform a get on to obtain the original non-OSLC AM formatted resource that was used to create this resource. The source resource is usually a binary or proprietary format that the service provider can consume and convert into an OSLC AM format. The service may use content negotiation with the Accept header to obtain the desired content type.
<code>dcterms:title</code>	Exactly-one	false	XMLLiteral	N/A	Unspecified	Title of the resource represented as rich text in XHTML content.
<code>dcterms:type</code>	Zero-or-many	false	string	N/A	Unspecified	A short string representation for the type, for example 'Car'.
<code>jazz_am:derives</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The resource that derives from another resource originated from or is significantly influenced by the referenced resource. For example a model element derives from a requirement.
<code>jazz_am:elaborates</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	This resource elaborates the referenced resource.
<code>jazz_am:external</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	A generic link from a resource to an external web page.

Standards Track Work Product

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>jazz_am:refine</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The target is a refinement of the source. (e.g. a use case scenario might be a refinement of a textual requirement that describes the interaction).
<code>jazz_am:satisfy</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The model element satisfies the requirement (e.g. The use case satisfies a functional requirement).
<code>jazz_am:trace</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The model element has a trace to the requirement (e.g. An attribute or its value are traced to a requirement).
<code>oslc_sysmlv2:actionDefinition_Action</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:ActionUsage</code>	The <b>ActionUsages</b> that are <b>steps</b> in this <b>ActionDefinition</b> , which define the actions that specify the behavior of the <b>ActionDefinition</b> .
<code>oslc_sysmlv2:association_AssociationEnd</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <b>features</b> of the <b>Association</b> that identify the things that can be related by it. A concrete <b>Association</b> must have at least two <b>associationEnds</b> . When it has exactly two, the <b>Association</b> is called a <i>binary Association</i> .
<code>oslc_sysmlv2:association_RelatedType</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The <b>types</b> of the <b>associationEnds</b> of the <b>Association</b> , which are the <b>relatedElements</b> of the <b>Association</b> considered as a <b>Relationship</b> .
<code>oslc_sysmlv2:association_SourceType</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The source <b>relatedType</b> for this <b>Association</b> . It is the first <b>relatedType</b> of the <b>Association</b> .
<code>oslc_sysmlv2:association_TargetType</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The target <b>relatedTypes</b> for this <b>Association</b> . This includes all the <b>relatedTypes</b> other than the <b>sourceType</b> .
<code>oslc_sysmlv2:behavior_Parameter</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The parameters of this <b>Behavior</b> , which are defined as its <b>directedFeatures</b> , whose values are passed into and/or out of a performance of the <b>Behavior</b> .
<code>oslc_sysmlv2:behavior_Step</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Step</code>	The <b>Steps</b> that make up this <b>Behavior</b> .
<code>oslc_sysmlv2:classifier_OwnedSubclassification</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Subclassification</code>	The <b>ownedSpecializations</b> of this <b>Classifier</b> that are <b>Subclassifications</b> , for which this <b>Classifier</b> is the <b>subclassifier</b> .

Standards Track Work Product

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:connectionDefinition_ConnectionEnd</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Usage</code>	The <b>Usages</b> that define the things related by the <b>ConnectionDefinition</b> .
<code>oslc_sysmlv2:definition_DirectedUsage</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Usage</code>	The <b>usages</b> of this <b>Definition</b> that are <b>directedFeatures</b> .
<code>oslc_sysmlv2:definition_IsVariation</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether this <b>Definition</b> is for a variation point or not. If true, then all the <b>memberships</b> of the <b>Definition</b> must be <b>VariantMemberships</b> .
<code>oslc_sysmlv2:definition_OwnedAction</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:ActionUsage</code>	The <b>ActionUsages</b> that are <b>ownedUsages</b> of this <b>Definition</b> .
<code>oslc_sysmlv2:definition_OwnedAllocation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:AllocationUsage</code>	The <b>AllocationUsages</b> that are <b>ownedUsages</b> of this <b>Definition</b> .
<code>oslc_sysmlv2:definition_OwnedAnalysisCase</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:AnalysisCaseUsage</code>	The <b>AnalysisCaseUsages</b> that are <b>ownedUsages</b> of this <b>Definition</b> .
<code>oslc_sysmlv2:definition_OwnedAttribute</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:AttributeUsage</code>	The <b>AttributeUsages</b> that are <b>ownedUsages</b> of this <b>Definition</b> .
<code>oslc_sysmlv2:definition_OwnedCalculation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:CalculationUsage</code>	The <b>CalculationUsages</b> that are <b>ownedUsages</b> of this <b>Definition</b> .
<code>oslc_sysmlv2:definition_OwnedCase</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:CaseUsage</code>	The <b>CaseUsages</b> that are <b>ownedUsages</b> of this <b>Definition</b> .
<code>oslc_sysmlv2:definition_OwnedConcern</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:ConcernUsage</code>	The <b>ConcernUsages</b> that are <b>ownedUsages</b> of this <b>Definition</b> .
<code>oslc_sysmlv2:definition_OwnedConnection</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:ConnectorAsUsage</code>	The <b>ConnectorAsUsages</b> that are <b>ownedUsages</b> of this <b>Definition</b> . Note that this list includes <b>BindingConnectorAsUsages</b> and <b>SuccessionAsUsages</b> , even though these are <b>ConnectorAsUsages</b> but not <b>ConnectionUsages</b> .

Standards Track Work Product

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:definition_OwnedConstraint</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:ConstraintUsage</code>	The <code>ConstraintUsages</code> that are <code>ownedUsages</code> of this <code>Definition</code> .
<code>oslc_sysmlv2:definition_OwnedEnumeration</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:EnumerationUsage</code>	The <code>EnumerationUsages</code> that are <code>ownedUsages</code> of this <code>Definition</code> .
<code>oslc_sysmlv2:definition_OwnedFlow</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:FlowConnectionUsage</code>	The <code>FlowConnectionUsages</code> that are <code>ownedUsages</code> of this <code>Definition</code> .
<code>oslc_sysmlv2:definition_OwnedInterface</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:InterfaceUsage</code>	The <code>InterfaceUsages</code> that are <code>ownedUsages</code> of this <code>Definition</code> .
<code>oslc_sysmlv2:definition_OwnedItem</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:ItemUsage</code>	The <code>ItemUsages</code> that are <code>ownedUsages</code> of this <code>Definition</code> .
<code>oslc_sysmlv2:definition_OwnedMetadata</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:MetadataUsage</code>	The <code>MetadataUsages</code> that are <code>ownedUsages</code> of this <code>Definition</code> .
<code>oslc_sysmlv2:definition_OwnedOccurrence</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:OccurrenceUsage</code>	The <code>OccurrenceUsages</code> that are <code>ownedUsages</code> of this <code>Definition</code> .
<code>oslc_sysmlv2:definition_OwnedPart</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:PartUsage</code>	The <code>PartUsages</code> that are <code>ownedUsages</code> of this <code>Definition</code> .
<code>oslc_sysmlv2:definition_OwnedPort</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:PortUsage</code>	The <code>PortUsages</code> that are <code>ownedUsages</code> of this <code>Definition</code> .
<code>oslc_sysmlv2:definition_OwnedReference</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:ReferenceUsage</code>	The <code>ReferenceUsages</code> that are <code>ownedUsages</code> of this <code>Definition</code> .
<code>oslc_sysmlv2:definition_OwnedRendering</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:RenderingUsage</code>	The <code>RenderingUsages</code> that are <code>ownedUsages</code> of this <code>Definition</code> .

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:definition_OwnedRequirement</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:RequirementUsage</code>	The <code>RequirementUsages</code> that are <code>ownedUsages</code> of this <code>Definition</code> .
<code>oslc_sysmlv2:definition_OwnedState</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:StateUsage</code>	The <code>StateUsages</code> that are <code>ownedUsages</code> of this <code>Definition</code> .
<code>oslc_sysmlv2:definition_OwnedTransition</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:TransitionUsage</code>	The <code>TransitionUsages</code> that are <code>ownedUsages</code> of this <code>Definition</code> .
<code>oslc_sysmlv2:definition_OwnedUsage</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Usage</code>	The <code>Usages</code> that are <code>ownedFeatures</code> of this <code>Definition</code> .
<code>oslc_sysmlv2:definition_OwnedUseCase</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:UseCaseUsage</code>	The <code>UseCaseUsages</code> that are <code>ownedUsages</code> of this <code>Definition</code> .
<code>oslc_sysmlv2:definition_OwnedVerificationCase</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:VerificationCaseUsage</code>	The <code>VerificationCaseUsages</code> that are <code>ownedUsages</code> of this <code>Definition</code> .
<code>oslc_sysmlv2:definition_OwnedView</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:ViewUsage</code>	The <code>ViewUsages</code> that are <code>ownedUsages</code> of this <code>Definition</code> .
<code>oslc_sysmlv2:definition_OwnedViewpoint</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:ViewpointUsage</code>	The <code>ViewpointUsages</code> that are <code>ownedUsages</code> of this <code>Definition</code> .
<code>oslc_sysmlv2:definition_Usage</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Usage</code>	The <code>Usages</code> that are <code>features</code> of this <code>Definition</code> (not necessarily owned).
<code>oslc_sysmlv2:definition_Variant</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Usage</code>	The <code>Usages</code> which represent the variants of this <code>Definition</code> as a variation point <code>Definition</code> , if <code>isVariation</code> = true. If <code>isVariation</code> = false, the there must be no <code>variants</code> .
<code>oslc_sysmlv2:definition_VariantMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:VariantMembership</code>	The <code>ownedMemberships</code> of this <code>Definition</code> that are <code>VariantMemberships</code> . If <code>isVariation</code> = true, then this must be all <code>ownedMemberships</code> of the <code>Definition</code> . If <code>isVariation</code> = false, then <code>variantMembership</code> must be empty.

Standards Track Work Product

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:element_AliasIds</code>	Zero-or-many	false	unspecified	Either	<code>xsd:string</code>	Various alternative identifiers for this Element. Generally, these will be set by tools.
<code>oslc_sysmlv2:element_DeclaredName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The declared name of this Element.
<code>oslc_sysmlv2:element_DeclaredShortName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	An optional alternative name for the Element that is intended to be shorter or in some way more succinct than its primary name. It may act as a modeler-specified identifier for the Element, though it is then the responsibility of the modeler to maintain the uniqueness of this identifier within a model or relative to some other context.
<code>oslc_sysmlv2:element_Documentation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Documentation</code>	The Documentation owned by this Element.
<code>oslc_sysmlv2:element_ElementId</code>	Exactly-one	false	unspecified	Either	<code>xsd:string</code>	The globally unique identifier for this Element. This is intended to be set by tooling, and it must not change during the lifetime of the Element.
<code>oslc_sysmlv2:element_IsImpliedIncluded</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether all necessary implied Relationships have been included in the ownedRelationships of this Element. This property may be true, even if there are not actually any ownedRelationships with <code>isImplied = true</code> , meaning that no such Relationships are actually implied for this Element. However, if it is false, then ownedRelationships may <i>not</i> contain any implied Relationships. That is, either <i>all</i> required implied Relationships must be included, or none of them.
<code>oslc_sysmlv2:element_IsLibraryElement</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether this Element is contained in the ownership tree of a library model.
<code>oslc_sysmlv2:element_Name</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The name to be used for this Element during name resolution within its owningNamespace. This is derived using the <code>effectiveName()</code> operation. By default, it is the same as the <code>declaredName</code> , but this is overridden for certain kinds of Elements to compute a name even when the <code>declaredName</code> is null.
<code>oslc_sysmlv2:element_OwnedAnnotation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Annotation</code>	The ownedRelationships of this Element that are Annotations, for which this Element is the annotatedElement.

Standards Track Work Product

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:element_OwnedElement</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The Elements owned by this Element, derived as the <code>ownedRelatedElements</code> of the <code>ownedRelationships</code> of this Element.
<code>oslc_sysmlv2:element_OwnedRelationship</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Relationship</code>	The Relationships for which this Element is the <code>owningRelatedElement</code> .
<code>oslc_sysmlv2:element_Owner</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The owner of this Element, derived as the <code>owningRelatedElement</code> of the <code>owningRelationship</code> of this Element, if any.
<code>oslc_sysmlv2:element_OwningMembership</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:OwningMembership</code>	The <code>owningRelationship</code> of this Element, if that Relationship is a Membership.
<code>oslc_sysmlv2:element_OwningNamespace</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Namespace</code>	The Namespace that owns this Element, which is the <code>membershipOwningNamespace</code> of the <code>owningMembership</code> of this Element, if any.
<code>oslc_sysmlv2:element_OwningRelationship</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Relationship</code>	The Relationship for which this Element is an <code>ownedRelatedElement</code> , if any.
<code>oslc_sysmlv2:element_QualifiedName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The full ownership-qualified name of this Element, represented in a form that is valid according to the KerML textual concrete syntax for qualified names (including use of unrestricted name notation and escaped characters, as necessary). The <code>qualifiedName</code> is null if this Element has no <code>owningNamespace</code> or if there is not a complete ownership chain of named Namespaces from a root Namespace to this Element.
<code>oslc_sysmlv2:element_ShortName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The short name to be used for this Element during name resolution within its <code>owningNamespace</code> . This is derived using the <code>effectiveShortName()</code> operation. By default, it is the same as the <code>declaredShortName</code> , but this is overridden for certain kinds of Elements to compute a <code>shortName</code> even when the <code>declaredName</code> is null.
<code>oslc_sysmlv2:element_TextualRepresentation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:TextualRepresentation</code>	The <code>TextualRepresentations</code> that annotate this Element.
<code>oslc_sysmlv2:namespace_ImportedMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Membership</code>	The <code>Memberships</code> in this Namespace that result from the <code>ownedImports</code> of this Namespace.

Standards Track Work Product

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:namespace_Member</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The set of all member <b>Elements</b> of this <b>Namespace</b> , which are the <b>memberElements</b> of all <b>memberships</b> of the <b>Namespace</b> .
<code>oslc_sysmlv2:namespace_Membership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Membership</code>	All <b>Memberships</b> in this <b>Namespace</b> , including (at least) the union of <b>ownedMemberships</b> and <b>importedMemberships</b> .
<code>oslc_sysmlv2:namespace_OwnedImport</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Import</code>	The <b>ownedRelationships</b> of this <b>Namespace</b> that are <b>Imports</b> , for which the <b>Namespace</b> is the <b>importOwningNamespace</b> .
<code>oslc_sysmlv2:namespace_OwnedMember</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The owned <b>members</b> of this <b>Namespace</b> , which are the <b>ownedMemberElements</b> of the <b>ownedMemberships</b> of the ..
<code>oslc_sysmlv2:namespace_OwnedMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Membership</code>	The <b>ownedRelationships</b> of this <b>Namespace</b> that are <b>Memberships</b> , for which the <b>Namespace</b> is the <b>membershipOwningNamespace</b> .
<code>oslc_sysmlv2:occurrenceDefinition_IsIndividual</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether this <b>OccurrenceDefinition</b> is constrained to represent single individual.
<code>oslc_sysmlv2:occurrenceDefinition_LifeClass</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:LifeClass</code>	If <b>isIndividual</b> is true, a <b>LifeClass</b> that specializes this <b>OccurrenceDefinition</b> , restricting it to represent an individual.
<code>oslc_sysmlv2:relationship_IsImplied</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether this <b>Relationship</b> was generated by tooling to meet semantic rules, rather than being directly created by a modeler.
<code>oslc_sysmlv2:relationship_OwnedRelatedElement</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The <b>relatedElements</b> of this <b>Relationship</b> that are owned by the <b>Relationship</b> .
<code>oslc_sysmlv2:relationship_OwningRelatedElement</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The <b>relatedElement</b> of this <b>Relationship</b> that owns the <b>Relationship</b> , if any.
<code>oslc_sysmlv2:relationship_RelatedElement</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The <b>Elements</b> that are related by this <b>Relationship</b> , derived as the union of the <b>source</b> and <b>target</b> <b>Elements</b> of the <b>Relationship</b> .
<code>oslc_sysmlv2:relationship_Source</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The <b>relatedElements</b> from which this <b>Relationship</b> is considered to be directed..

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:relationship_Target</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The <code>relatedElements</code> to which this Relationship is considered to be directed.
<code>oslc_sysmlv2:type_DifferencingType</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The interpretations of a <code>Type</code> with <code>differencingTypes</code> are asserted to be those of the first of those <code>Types</code> , but not including those of the remaining <code>Types</code> . For example, a <code>Classifier</code> might be the difference of a <code>Classifier</code> for people and another for people of a particular nationality, leaving people who are not of that nationality. Similarly, a feature of people might be the difference between a feature for their children and a <code>Classifier</code> for people of a particular sex, identifying their children not of that sex (because the interpretations of the children <code>Feature</code> that identify those of that sex are also interpretations of the <code>Classifier</code> for that sex).
<code>oslc_sysmlv2:type_DirectedFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <code>features</code> of this <code>Type</code> that have a non-null <code>direction</code> .
<code>oslc_sysmlv2:type_EndFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All <code>features</code> of this <code>Type</code> with <code>isEnd = true</code> .
<code>oslc_sysmlv2:type_Feature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <code>ownedMemberFeatures</code> of the <code>featureMemberships</code> of this <code>Type</code> .
<code>oslc_sysmlv2:type_FeatureMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:FeatureMembership</code>	The <code>FeatureMemberships</code> for <code>features</code> of this <code>Type</code> , which include all <code>ownedFeatureMemberships</code> and those <code>inheritedMemberships</code> that are <code>FeatureMemberships</code> (but does <i>not</i> include any <code>importedMemberships</code> ).
<code>oslc_sysmlv2:type_InheritedFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All the <code>memberFeatures</code> of the <code>inheritedMemberships</code> of this <code>Type</code> that are <code>FeatureMemberships</code> .
<code>oslc_sysmlv2:type_InheritedMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Membership</code>	All <code>Memberships</code> inherited by this <code>Type</code> via <code>Specialization</code> or <code>Conjugation</code> . These are included in the derived union for the <code>memberships</code> of the <code>Type</code> .
<code>oslc_sysmlv2:type_Input</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All <code>features</code> related to this <code>Type</code> by <code>FeatureMemberships</code> that have <code>direction in or inout..</code>

Standards Track Work Product

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:type_IntersectingType</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The interpretations of a <b>Type</b> with <b>intersectingTypes</b> are asserted to be those in common among the <b>intersectingTypes</b> , which are the <b>Types</b> derived from the <b>intersectingType</b> of the <b>ownedIntersectings</b> of this <b>Type</b> . For example, a <b>Classifier</b> might be an intersection of <b>Classifiers</b> for people of a particular sex and of a particular nationality. Similarly, a feature for people's children of a particular sex might be the intersection of a <b>Feature</b> for their children and a <b>Classifier</b> for people of that sex (because the interpretations of the children <b>Feature</b> that identify those of that sex are also interpretations of the <b>Classifier</b> for that sex).
<code>oslc_sysmlv2:type_IsAbstract</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Indicates whether instances of this <b>Type</b> must also be instances of at least one of its specialized <b>Types</b> .
<code>oslc_sysmlv2:type_IsConjugated</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Indicates whether this <b>Type</b> has an <b>ownedConjugator</b> .
<code>oslc_sysmlv2:type_IsSufficient</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether all things that meet the classification conditions of this <b>Type</b> must be classified by the <b>Type</b> .
<code>oslc_sysmlv2:type_Multiplicity</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Multiplicity</code>	An <b>ownedMember</b> of this <b>Type</b> that is a <b>Multiplicity</b> , which constraints the cardinality of the <b>Type</b> . If there is no such <b>ownedMember</b> , then the cardinality of this <b>Type</b> is constrained by all the <b>Multiplicity</b> constraints applicable to any direct supertypes.
<code>oslc_sysmlv2:type_Output</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All <b>features</b> related to this <b>Type</b> by <b>FeatureMemberships</b> that have <b>direction out or inout</b> .
<code>oslc_sysmlv2:type_OwnedConjugator</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Conjugation</code>	A <b>Conjugation</b> owned by this <b>Type</b> for which the <b>Type</b> is the <b>originalType</b> .
<code>oslc_sysmlv2:type_OwnedDifferencing</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Differencing</code>	The <b>ownedRelationships</b> of this <b>Type</b> that are <b>Differencings</b> , having this <b>Type</b> as their <b>typeDifferenced</b> .
<code>oslc_sysmlv2:type_OwnedDisjoining</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Disjoining</code>	The <b>ownedRelationships</b> of this <b>Type</b> that are <b>Disjoinings</b> , for which the <b>Type</b> is the <b>typeDisjoined Type</b> .
<code>oslc_sysmlv2:type_OwnedEndFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All <b>endFeatures</b> of this <b>Type</b> that are <b>ownedFeatures</b> .

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:type_OwnedFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <code>ownedMemberFeatures</code> of the <code>ownedFeatureMemberships</code> of this <code>Type</code> .
<code>oslc_sysmlv2:type_OwnedFeatureMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:FeatureMembership</code>	The <code>ownedMemberships</code> of this <code>Type</code> that are <code>FeatureMemberships</code> , for which the <code>Type</code> is the <code>owningType</code> . Each such <code>FeatureMembership</code> identifies an <code>ownedFeature</code> of the <code>Type</code> .
<code>oslc_sysmlv2:type_OwnedIntersecting</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Intersecting</code>	The <code>ownedRelationships</code> of this <code>Type</code> that are <code>Intersectings</code> , have the <code>Type</code> as their <code>typeIntersected</code> .
<code>oslc_sysmlv2:type_OwnedSpecialization</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Specialization</code>	The <code>ownedRelationships</code> of this <code>Type</code> that are <code>Specializations</code> , for which the <code>Type</code> is the <code>specific Type</code> .
<code>oslc_sysmlv2:type_OwnedUnioning</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Unioning</code>	The <code>ownedRelationships</code> of this <code>Type</code> that are <code>Unionings</code> , having the <code>Type</code> as their <code>typeUnioned</code> .
<code>oslc_sysmlv2:type_UnioningType</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The interpretations of a <code>Type</code> with <code>unioningTypes</code> are asserted to be the same as those of all the <code>unioningTypes</code> together, which are the <code>Types</code> derived from the <code>unioningType</code> of the <code>ownedUnionings</code> of this <code>Type</code> . For example, a <code>Classifier</code> for people might be the union of <code>Classifiers</code> for all the sexes. Similarly, a feature for people's children might be the union of features dividing them in the same ways as people in general.
<code>oslc:instanceShape</code>	Zero-or-one	false	Resource	Reference	<code>oslc:ResourceShape</code>	The URI of a Resource Shape that describes the possible properties, occurrence, value types, allowed values and labels. This shape information is useful in displaying the subject resource as well as guiding clients in performing modifications. Instance shapes may be specific to the authenticated user associated with the request that retrieved the resource, the current state of the resource and other factors and thus should not be cached.
<code>oslc:serviceProvider</code>	Zero-or-many	false	Resource	Reference	<code>oslc:ServiceProvider</code>	A link to the resource's OSLC Service Provider. There may be cases when the subject resource is available from a service provider that implements multiple domain specifications, which could result in multiple values for this property.
<code>oslc:shortTitle</code>	Zero-or-one	false	XMLLiteral	N/A	Unspecified	Short name identifying a resource, often used as an abbreviated identifier for presentation to end-users. <b>SHOULD</b> include only content that is valid inside an XHTML <code>&lt;span&gt;</code> element [sml-11].

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>rdf:type</code>	Zero-or-many	false	Resource	Reference	<code>rdfs:Class</code>	The resource type URIs.

- **Describes:** <http://open-services.net/ns/sysmlv2#VariantMembership>
- **Summary:** VariantMembershipShape
- **Description:** A `VariantMembership` is a `Membership` between a variation point `Definition` or `Usage` and a `Usage` that represents a variant in the context of that variation. The `membershipOwningNamespace` for the `VariantMembership` must be either a `Definition` or a `Usage` with `isVariation = true`.

#### VariantMembership Properties

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>dcterms:contributor</code>	Zero-or-many	false	AnyResource	Either	<code>oslc:Any</code>	Contributor or contributors to the resource. It is likely that the target resource will be a foaf:Person but that is not necessarily the case.
<code>dcterms:created</code>	Zero-or-one	false	dateTime	N/A	Unspecified	Timestamp of resource creation.
<code>dcterms:creator</code>	Zero-or-many	false	AnyResource	Either	<code>oslc:Any</code>	Creator or creators of the resource. It is likely that the target resource will be a foaf:Person but that is not necessarily the case.
<code>dcterms:description</code>	Zero-or-one	false	XMLLiteral	N/A	Unspecified	Descriptive text about resource represented as rich text in XHTML content.
<code>dcterms:identifier</code>	Exactly-one	true	string	N/A	Unspecified	A unique identifier for a resource. Typically read-only and assigned by the service provider when a resource is created. Not typically intended for end-user display.
<code>dcterms:modified</code>	Zero-or-one	false	dateTime	N/A	Unspecified	Timestamp of latest resource modification.
<code>dcterms:source</code>	Zero-or-one	false	Resource	Reference	<code>oslc:Any</code>	The resource URI a client can perform a get on to obtain the original non-OSLC AM formatted resource that was used to create this resource. The source resource is usually a binary or proprietary format that the service provider can consume and convert into an OSLC AM format. The service may use content negotiation with the Accept header to obtain the desired content type.

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>dcterms:title</code>	Exactly-one	false	XMLLiteral	N/A	Unspecified	Title of the resource represented as rich text in XHTML content.
<code>dcterms:type</code>	Zero-or-many	false	string	N/A	Unspecified	A short string representation for the type, for example 'Car'.
<code>jazz_am:derives</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The resource that derives from another resource originated from or is significantly influenced by the referenced resource. For example a model element derives from a requirement.
<code>jazz_am:elaborates</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	This resource elaborates the referenced resource.
<code>jazz_am:external</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	A generic link from a resource to an external web page.
<code>jazz_am:refine</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The target is a refinement of the source. (e.g. a use case scenario might be a refinement of a textual requirement that describes the interaction).
<code>jazz_am:satisfy</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The model element satisfies the requirement (e.g. The use case satisfies a functional requirement).
<code>jazz_am:trace</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The model element has a trace to the requirement (e.g. An attribute or its value are traced to a requirement).
<code>oslc_sysmlv2:element_AliasIds</code>	Zero-or-many	false	unspecified	Either	<code>xsd:string</code>	Various alternative identifiers for this Element. Generally, these will be set by tools.
<code>oslc_sysmlv2:element_DeclaredName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The declared name of this <b>Element</b> .
<code>oslc_sysmlv2:element_DeclaredShortName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	An optional alternative name for the <b>Element</b> that is intended to be shorter or in some way more succinct than its primary <b>name</b> . It may act as a modeler-specified identifier for the <b>Element</b> , though it is then the responsibility of the modeler to maintain the uniqueness of this identifier within a model or relative to some other context.

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:element_Documentation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Documentation</code>	The Documentation owned by this Element.
<code>oslc_sysmlv2:element_ElementId</code>	Exactly-one	false	unspecified	Either	<code>xsd:string</code>	The globally unique identifier for this Element. This is intended to be set by tooling, and it must not change during the lifetime of the Element.
<code>oslc_sysmlv2:element_IsImpliedIncluded</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether all necessary implied Relationships have been included in the <code>ownedRelationships</code> of this Element. This property may be true, even if there are not actually any <code>ownedRelationships</code> with <code>isImplied = true</code> , meaning that no such Relationships are actually implied for this Element. However, if it is false, then <code>ownedRelationships</code> may <i>not</i> contain any implied Relationships. That is, either <i>all</i> required implied Relationships must be included, or none of them.
<code>oslc_sysmlv2:element_IsLibraryElement</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether this Element is contained in the ownership tree of a library model.
<code>oslc_sysmlv2:element_Name</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The name to be used for this <code>Element</code> during name resolution within its <code>owningNamespace</code> . This is derived using the <code>effectiveName()</code> operation. By default, it is the same as the <code>declaredName</code> , but this is overridden for certain kinds of <code>Elements</code> to compute a <code>name</code> even when the <code>declaredName</code> is null.
<code>oslc_sysmlv2:element_OwnedAnnotation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Annotation</code>	The <code>ownedRelationships</code> of this <code>Element</code> that are <code>Annotations</code> , for which this <code>Element</code> is the <code>annotatedElement</code> .
<code>oslc_sysmlv2:element_OwnedElement</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The Elements owned by this Element, derived as the <code>ownedRelatedElements</code> of the <code>ownedRelationships</code> of this Element.
<code>oslc_sysmlv2:element_OwnedRelationship</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Relationship</code>	The Relationships for which this Element is the <code>owningRelatedElement</code> .
<code>oslc_sysmlv2:element_Owner</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The owner of this Element, derived as the <code>owningRelatedElement</code> of the <code>owningRelationship</code> of this Element, if any.
<code>oslc_sysmlv2:element_OwningMembership</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:OwningMembership</code>	The <code>owningRelationship</code> of this <code>Element</code> , if that <code>Relationship</code> is a <code>Membership</code> .

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:element_OwningNamespace</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Namespace</code>	The <b>Namespace</b> that owns this <b>Element</b> , which is the <b>membershipOwningNamespace</b> of the <b>owningMembership</b> of this <b>Element</b> , if any.
<code>oslc_sysmlv2:element_OwningRelationship</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Relationship</code>	The <b>Relationship</b> for which this <b>Element</b> is an <b>ownedRelatedElement</b> , if any.
<code>oslc_sysmlv2:element_QualifiedName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The full ownership-qualified name of this <b>Element</b> , represented in a form that is valid according to the KerML textual concrete syntax for qualified names (including use of unrestricted name notation and escaped characters, as necessary). The <b>qualifiedName</b> is null if this <b>Element</b> has no <b>owningNamespace</b> or if there is not a complete ownership chain of named <b>Namespaces</b> from a root <b>Namespace</b> to this <b>Element</b> .
<code>oslc_sysmlv2:element_ShortName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The short name to be used for this <b>Element</b> during name resolution within its <b>owningNamespace</b> . This is derived using the <b>effectiveShortName()</b> operation. By default, it is the same as the <b>declaredShortName</b> , but this is overridden for certain kinds of <b>Elements</b> to compute a <b>shortName</b> even when the <b>declaredName</b> is null.
<code>oslc_sysmlv2:element_TextualRepresentation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:TextualRepresentation</code>	The <b>TextualRepresentations</b> that annotate this <b>Element</b> .
<code>oslc_sysmlv2:membership_MemberElement</code>	Exactly-one	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The <b>Element</b> that becomes a <b>member</b> of the <b>membershipOwningNamespace</b> due to this <b>Membership</b> .
<code>oslc_sysmlv2:membership_MemberElementId</code>	Exactly-one	false	unspecified	Either	<code>xsd:string</code>	The <b>elementId</b> of the <b>memberElement</b> .
<code>oslc_sysmlv2:membership_MemberName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The name of the <b>memberElement</b> relative to the <b>membershipOwningNamespace</b> .
<code>oslc_sysmlv2:membership_MembershipOwningNamespace</code>	Exactly-one	false	Resource	Either	<code>oslc_sysmlv2:Namespace</code>	The <b>Namespace</b> of which the <b>memberElement</b> becomes a member due to this <b>Membership</b> .
<code>oslc_sysmlv2:membership_MemberShortName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The short name of the <b>memberElement</b> relative to the <b>membershipOwningNamespace</b> .
<code>oslc_sysmlv2:membership_Visibility</code>	Exactly-one	false	unspecified	Either	<code>oslc_sysmlv2:VisibilityKind</code>	Whether or not the <b>Membership</b> of the <b>memberElement</b> in the <b>membershipOwningNamespace</b> is publicly visible outside that <b>Namespace</b> .

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:feature_ChainingFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <b>Feature</b> that are chained together to determine the values of this <b>Feature</b> , derived from the <b>chainingFeatures</b> of the <b>ownedFeatureChainings</b> of this <b>Feature</b> , in the same order. The values of a <b>Feature</b> with <b>chainingFeatures</b> are the same as values of the last <b>Feature</b> in the chain, which can be found by starting with the values of the first <b>Feature</b> (for each instance of the domain of the original <b>Feature</b> ), then using each of those as domain instances to find the values of the second <b>Feature</b> in <b>chainingFeatures</b> , and so on, to values of the last <b>Feature</b> .
<code>oslc_sysmlv2:feature_Direction</code>	Zero-or-one	false	unspecified	Either	<code>oslc_sysmlv2:FeatureDirectionKind</code>	Indicates how values of this <b>Feature</b> are determined or used (as specified for the <b>FeatureDirectionKind</b> ).
<code>oslc_sysmlv2:feature_EndOwningType</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The <b>Type</b> that is related to this <b>Feature</b> by an <b>EndFeatureMembership</b> in which the <b>Feature</b> is an <b>ownedMemberFeature</b> .
<code>oslc_sysmlv2:feature_FeaturingType</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	<b>Types</b> that feature this <b>Feature</b> , such that any instance in the domain of the <b>Feature</b> must be classified by all of these <b>Types</b> , including at least all the <b>featuringTypes</b> of its <b>typeFeaturings</b> . If the <b>Feature</b> is chained, then the <b>featuringTypes</b> of the first <b>Feature</b> in the chain are also <b>featuringTypes</b> of the chained <b>Feature</b> .
<code>oslc_sysmlv2:feature_IsComposite</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether the <b>Feature</b> is a composite <b>feature</b> of its <b>featuringType</b> . If so, the values of the <b>Feature</b> cannot exist after its featuring instance no longer does.
<code>oslc_sysmlv2:feature_IsDerived</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether the values of this <b>Feature</b> can always be computed from the values of other <b>Features</b> .
<code>oslc_sysmlv2:feature_IsEnd</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether or not the this <b>Feature</b> is an end <b>Feature</b> , requiring a different interpretation of the <b>multiplicity</b> of the <b>Feature</b> .
<code>oslc_sysmlv2:feature_IsNonunique</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	isNonunique.
<code>oslc_sysmlv2:feature_IsOrdered</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether an order exists for the values of this <b>Feature</b> or not.
<code>oslc_sysmlv2:feature_IsPortion</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether the values of this <b>Feature</b> are contained in the space and time of instances of the domain of the <b>Feature</b> and represent the same thing as those instances.
<code>oslc_sysmlv2:feature_IsReadOnly</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether the values of this <b>Feature</b> can change over the lifetime of an instance of the domain.

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:type_EndFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All <b>features</b> of this <b>Type</b> with <code>isEnd = true</code> .
<code>oslc_sysmlv2:type_Feature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <b>ownedMemberFeatures</b> of the <b>featureMemberships</b> of this <b>Type</b> .
<code>oslc_sysmlv2:type_FeatureMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:FeatureMembership</code>	The <b>FeatureMemberships</b> for <b>features</b> of this <b>Type</b> , which include all <b>ownedFeatureMemberships</b> and those <b>inheritedMemberships</b> that are <b>FeatureMemberships</b> (but does <i>not</i> include any <b>importedMemberships</b> ).
<code>oslc_sysmlv2:type_InheritedFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All the <b>memberFeatures</b> of the <b>inheritedMemberships</b> of this <b>Type</b> that are <b>FeatureMemberships</b> .
<code>oslc_sysmlv2:type_InheritedMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Membership</code>	All <b>Memberships</b> inherited by this <b>Type</b> via <b>Specialization</b> or <b>Conjugation</b> . These are included in the derived union for the <b>memberships</b> of the <b>Type</b> .
<code>oslc_sysmlv2:type_Input</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All <b>features</b> related to this <b>Type</b> by <b>FeatureMemberships</b> that have <b>direction in or inout..</b>
<code>oslc_sysmlv2:type_IntersectingType</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The interpretations of a <b>Type</b> with <b>intersectingTypes</b> are asserted to be those in common among the <b>intersectingTypes</b> , which are the <b>Types</b> derived from the <b>intersectingType</b> of the <b>ownedIntersectings</b> of this <b>Type</b> . For example, a <b>Classifier</b> might be an intersection of <b>Classifiers</b> for people of a particular sex and of a particular nationality. Similarly, a feature for people's children of a particular sex might be the intersection of a <b>Feature</b> for their children and a <b>Classifier</b> for people of that sex (because the interpretations of the children <b>Feature</b> that identify those of that sex are also interpretations of the Classifier for that sex).
<code>oslc_sysmlv2:type_IsAbstract</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Indicates whether instances of this <b>Type</b> must also be instances of at least one of its specialized <b>Types</b> .
<code>oslc_sysmlv2:type_IsConjugated</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Indicates whether this <b>Type</b> has an <b>ownedConjugator</b> .
<code>oslc_sysmlv2:type_IsSufficient</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether all things that meet the classification conditions of this <b>Type</b> must be classified by the <b>Type</b> .

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:type_Multiplicity</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Multiplicity</code>	An <code>ownedMember</code> of this <code>Type</code> that is a <code>Multiplicity</code> , which constrains the cardinality of the <code>Type</code> . If there is no such <code>ownedMember</code> , then the cardinality of this <code>Type</code> is constrained by all the <code>Multiplicity</code> constraints applicable to any direct supertypes.
<code>oslc_sysmlv2:type_Output</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All <code>features</code> related to this <code>Type</code> by <code>FeatureMemberships</code> that have <code>direction out or inout</code> .
<code>oslc_sysmlv2:type_OwnedConjugator</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Conjugation</code>	A <code>Conjugation</code> owned by this <code>Type</code> for which the <code>Type</code> is the <code>originalType</code> .
<code>oslc_sysmlv2:type_OwnedDifferencing</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Differencing</code>	The <code>ownedRelationships</code> of this <code>Type</code> that are <code>Differencings</code> , having this <code>Type</code> as their <code>typeDifferenced</code> .
<code>oslc_sysmlv2:type_OwnedDisjoining</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Disjoining</code>	The <code>ownedRelationships</code> of this <code>Type</code> that are <code>Disjoinings</code> , for which the <code>Type</code> is the <code>typeDisjoined Type</code> .
<code>oslc_sysmlv2:type_OwnedEndFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All <code>endFeatures</code> of this <code>Type</code> that are <code>ownedFeatures</code> .
<code>oslc_sysmlv2:type_OwnedFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <code>ownedMemberFeatures</code> of the <code>ownedFeatureMemberships</code> of this <code>Type</code> .
<code>oslc_sysmlv2:type_OwnedFeatureMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:FeatureMembership</code>	The <code>ownedMemberships</code> of this <code>Type</code> that are <code>FeatureMemberships</code> , for which the <code>Type</code> is the <code>owningType</code> . Each such <code>FeatureMembership</code> identifies an <code>ownedFeature</code> of the <code>Type</code> .
<code>oslc_sysmlv2:type_OwnedIntersecting</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Intersecting</code>	The <code>ownedRelationships</code> of this <code>Type</code> that are <code>Intersectings</code> , have the <code>Type</code> as their <code>typeIntersected</code> .
<code>oslc_sysmlv2:type_OwnedSpecialization</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Specialization</code>	The <code>ownedRelationships</code> of this <code>Type</code> that are <code>Specializations</code> , for which the <code>Type</code> is the <code>specific Type</code> .
<code>oslc_sysmlv2:type_OwnedUnioning</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Unioning</code>	The <code>ownedRelationships</code> of this <code>Type</code> that are <code>Unionings</code> , having the <code>Type</code> as their <code>typeUnioned</code> .

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:type_UnioningType</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The interpretations of a <b>Type</b> with <b>unioningTypes</b> are asserted to be the same as those of all the <b>unioningTypes</b> together, which are the <b>Types</b> derived from the <b>unioningType</b> of the <b>ownedUnionings</b> of this <b>Type</b> . For example, a <b>Classifier</b> for people might be the union of <b>Classifiers</b> for all the sexes. Similarly, a feature for people's children might be the union of features dividing them in the same ways as people in general.
<code>oslc:instanceShape</code>	Zero-or-one	false	Resource	Reference	<code>oslc:ResourceShape</code>	The URI of a Resource Shape that describes the possible properties, occurrence, value types, allowed values and labels. This shape information is useful in displaying the subject resource as well as guiding clients in performing modifications. Instance shapes may be specific to the authenticated user associated with the request that retrieved the resource, the current state of the resource and other factors and thus should not be cached.
<code>oslc:serviceProvider</code>	Zero-or-many	false	Resource	Reference	<code>oslc:ServiceProvider</code>	A link to the resource's OSLC Service Provider. There may be cases when the subject resource is available from a service provider that implements multiple domain specifications, which could result in multiple values for this property.
<code>oslc:shortTitle</code>	Zero-or-one	false	XMLLiteral	N/A	Unspecified	Short name identifying a resource, often used as an abbreviated identifier for presentation to end-users. <b>SHOULD</b> include only content that is valid inside an XHTML <code>&lt;span&gt;</code> element [sml-13].
<code>rdf:type</code>	Zero-or-many	false	Resource	Reference	<code>rdfs:Class</code>	The resource type URIs.

- **Describes:** <http://open-services.net/ns/sysmlv2#LiteralString>
- **Summary:** LiteralStringShape
- **Description:** A **LiteralString** is a **LiteralExpression** that provides a **String** value as a result. Its **result parameter** must have the type **String**.

#### LiteralString Properties

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>dcterms:contributor</code>	Zero-or-many	false	AnyResource	Either	<code>oslc:Any</code>	Contributor or contributors to the resource. It is likely that the target resource will be a foaf:Person but that is not necessarily the case.

Standards Track Work Product

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>dcterms:created</code>	Zero-or-one	false	dateTime	N/A	Unspecified	Timestamp of resource creation.
<code>dcterms:creator</code>	Zero-or-many	false	AnyResource	Either	<code>oslc:Any</code>	Creator or creators of the resource. It is likely that the target resource will be a foaf:Person but that is not necessarily the case.
<code>dcterms:description</code>	Zero-or-one	false	XMLLiteral	N/A	Unspecified	Descriptive text about resource represented as rich text in XHTML content.
<code>dcterms:identifier</code>	Exactly-one	true	string	N/A	Unspecified	A unique identifier for a resource. Typically read-only and assigned by the service provider when a resource is created. Not typically intended for end-user display.
<code>dcterms:modified</code>	Zero-or-one	false	dateTime	N/A	Unspecified	Timestamp of latest resource modification.
<code>dcterms:source</code>	Zero-or-one	false	Resource	Reference	<code>oslc:Any</code>	The resource URI a client can perform a get on to obtain the original non-OSLC AM formatted resource that was used to create this resource. The source resource is usually a binary or proprietary format that the service provider can consume and convert into an OSLC AM format. The service may use content negotiation with the Accept header to obtain the desired content type.
<code>dcterms:title</code>	Exactly-one	false	XMLLiteral	N/A	Unspecified	Title of the resource represented as rich text in XHTML content.
<code>dcterms:type</code>	Zero-or-many	false	string	N/A	Unspecified	A short string representation for the type, for example 'Car'.
<code>jazz_am:derives</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The resource that derives from another resource originated from or is significantly influenced by the referenced resource. For example a model element derives from a requirement.
<code>jazz_am:elaborates</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	This resource elaborates the referenced resource.
<code>jazz_am:external</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	A generic link from a resource to an external web page.
<code>jazz_am:refine</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The target is a refinement of the source. (e.g. a use case scenario might be a refinement of a textual requirement that describes the interaction).

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>jazz_am:satisfy</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The model element satisfies the requirement (e.g. The use case satisfies a functional requirement).
<code>jazz_am:trace</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The model element has a trace to the requirement (e.g. An attribute or its value are traced to a requirement).
<code>oslc_sysmlv2:element_AliasIds</code>	Zero-or-many	false	unspecified	Either	<code>xsd:string</code>	Various alternative identifiers for this Element. Generally, these will be set by tools.
<code>oslc_sysmlv2:element_DeclaredName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The declared name of this <b>Element</b> .
<code>oslc_sysmlv2:element_DeclaredShortName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	An optional alternative name for the <b>Element</b> that is intended to be shorter or in some way more succinct than its primary <b>name</b> . It may act as a modeler-specified identifier for the <b>Element</b> , though it is then the responsibility of the modeler to maintain the uniqueness of this identifier within a model or relative to some other context.
<code>oslc_sysmlv2:element_Documentation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Documentation</code>	The Documentation owned by this Element.
<code>oslc_sysmlv2:element_ElementId</code>	Exactly-one	false	unspecified	Either	<code>xsd:string</code>	The globally unique identifier for this Element. This is intended to be set by tooling, and it must not change during the lifetime of the Element.
<code>oslc_sysmlv2:element_IsImpliedIncluded</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether all necessary implied Relationships have been included in the <b>ownedRelationships</b> of this Element. This property may be true, even if there are not actually any <b>ownedRelationships</b> with <b>isImplied = true</b> , meaning that no such Relationships are actually implied for this Element. However, if it is false, then <b>ownedRelationships</b> may <i>not</i> contain any implied Relationships. That is, either <i>all</i> required implied Relationships must be included, or none of them.
<code>oslc_sysmlv2:element_IsLibraryElement</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether this Element is contained in the ownership tree of a library model.

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:element_Name</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The name to be used for this <b>Element</b> during name resolution within its <b>owningNamespace</b> . This is derived using the <code>effectiveName()</code> operation. By default, it is the same as the <b>declaredName</b> , but this is overridden for certain kinds of <b>Elements</b> to compute a <b>name</b> even when the <b>declaredName</b> is null.
<code>oslc_sysmlv2:element_OwnedAnnotation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Annotation</code>	The <b>ownedRelationships</b> of this <b>Element</b> that are <b>Annotations</b> , for which this <b>Element</b> is the <b>annotatedElement</b> .
<code>oslc_sysmlv2:element_OwnedElement</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The <b>Elements</b> owned by this <b>Element</b> , derived as the <b>ownedRelatedElements</b> of the <b>ownedRelationships</b> of this <b>Element</b> .
<code>oslc_sysmlv2:element_OwnedRelationship</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Relationship</code>	The <b>Relationships</b> for which this <b>Element</b> is the <b>owningRelatedElement</b> .
<code>oslc_sysmlv2:element_Owner</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The owner of this <b>Element</b> , derived as the <b>owningRelatedElement</b> of the <b>owningRelationship</b> of this <b>Element</b> , if any.
<code>oslc_sysmlv2:element_OwningMembership</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:OwningMembership</code>	The <b>owningRelationship</b> of this <b>Element</b> , if that <b>Relationship</b> is a <b>Membership</b> .
<code>oslc_sysmlv2:element_OwningNamespace</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Namespace</code>	The <b>Namespace</b> that owns this <b>Element</b> , which is the <b>membershipOwningNamespace</b> of the <b>owningMembership</b> of this <b>Element</b> , if any.
<code>oslc_sysmlv2:element_OwningRelationship</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Relationship</code>	The <b>Relationship</b> for which this <b>Element</b> is an <b>ownedRelatedElement</b> , if any.
<code>oslc_sysmlv2:element_QualifiedName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The full ownership-qualified name of this <b>Element</b> , represented in a form that is valid according to the KerML textual concrete syntax for qualified names (including use of unrestricted name notation and escaped characters, as necessary). The <b>qualifiedName</b> is null if this <b>Element</b> has no <b>owningNamespace</b> or if there is not a complete ownership chain of named <b>Namespaces</b> from a root <b>Namespace</b> to this <b>Element</b> .
<code>oslc_sysmlv2:element_ShortName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The short name to be used for this <b>Element</b> during name resolution within its <b>owningNamespace</b> . This is derived using the <code>effectiveShortName()</code> operation. By default, it is the same as the <b>declaredShortName</b> , but this is overridden for certain kinds of <b>Elements</b> to compute a <b>shortName</b> even when the <b>declaredName</b> is null.

<code>oslc_sysmlv2:step_Parameter</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <b>parameters</b> of this <b>Step</b> , which are defined as its <b>directedFeatures</b> , whose values are passed into and/or out of a performance of the <b>Step</b> .

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:type_DifferencingType</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The interpretations of a <b>Type</b> with <b>differencingTypes</b> are asserted to be those of the first of those <b>Types</b> , but not including those of the remaining <b>Types</b> . For example, a <b>Classifier</b> might be the difference of a <b>Classifier</b> for people and another for people of a particular nationality, leaving people who are not of that nationality. Similarly, a feature of people might be the difference between a feature for their children and a <b>Classifier</b> for people of a particular sex, identifying their children not of that sex (because the interpretations of the children <b>Feature</b> that identify those of that sex are also interpretations of the <b>Classifier</b> for that sex).
<code>oslc_sysmlv2:type_DirectedFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <b>features</b> of this <b>Type</b> that have a non-null <b>direction</b> .
<code>oslc_sysmlv2:type_EndFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All <b>features</b> of this <b>Type</b> with <b>isEnd</b> = <b>true</b> .
<code>oslc_sysmlv2:type_Feature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <b>ownedMemberFeatures</b> of the <b>featureMemberships</b> of this <b>Type</b> .
<code>oslc_sysmlv2:type_FeatureMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:FeatureMembership</code>	The <b>FeatureMemberships</b> for <b>features</b> of this <b>Type</b> , which include all <b>ownedFeatureMemberships</b> and those <b>inheritedMemberships</b> that are <b>FeatureMemberships</b> (but does <i>not</i> include any <b>importedMemberships</b> ).
<code>oslc_sysmlv2:type_InheritedFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All the <b>memberFeatures</b> of the <b>inheritedMemberships</b> of this <b>Type</b> that are <b>FeatureMemberships</b> .
<code>oslc_sysmlv2:type_InheritedMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Membership</code>	All <b>Memberships</b> inherited by this <b>Type</b> via <b>Specialization</b> or <b>Conjugation</b> . These are included in the derived union for the <b>memberships</b> of the <b>Type</b> .
<code>oslc_sysmlv2:type_Input</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All <b>features</b> related to this <b>Type</b> by <b>FeatureMemberships</b> that have <b>direction</b> in or inout..

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:type_IntersectingType</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The interpretations of a <b>Type</b> with <b>intersectingTypes</b> are asserted to be those in common among the <b>intersectingTypes</b> , which are the <b>Types</b> derived from the <b>intersectingType</b> of the <b>ownedIntersectings</b> of this <b>Type</b> . For example, a <b>Classifier</b> might be an intersection of <b>Classifiers</b> for people of a particular sex and of a particular nationality. Similarly, a feature for people's children of a particular sex might be the intersection of a <b>Feature</b> for their children and a <b>Classifier</b> for people of that sex (because the interpretations of the children <b>Feature</b> that identify those of that sex are also interpretations of the <b>Classifier</b> for that sex).
<code>oslc_sysmlv2:type_IsAbstract</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Indicates whether instances of this <b>Type</b> must also be instances of at least one of its specialized <b>Types</b> .
<code>oslc_sysmlv2:type_IsConjugated</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Indicates whether this <b>Type</b> has an <b>ownedConjugator</b> .
<code>oslc_sysmlv2:type_IsSufficient</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether all things that meet the classification conditions of this <b>Type</b> must be classified by the <b>Type</b> .
<code>oslc_sysmlv2:type_Multiplicity</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Multiplicity</code>	An <b>ownedMember</b> of this <b>Type</b> that is a <b>Multiplicity</b> , which constrains the cardinality of the <b>Type</b> . If there is no such <b>ownedMember</b> , then the cardinality of this <b>Type</b> is constrained by all the <b>Multiplicity</b> constraints applicable to any direct supertypes.
<code>oslc_sysmlv2:type_Output</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All <b>features</b> related to this <b>Type</b> by <b>FeatureMemberships</b> that have <b>direction out or inout</b> .
<code>oslc_sysmlv2:type_OwnedConjugator</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Conjugation</code>	A <b>Conjugation</b> owned by this <b>Type</b> for which the <b>Type</b> is the <b>originalType</b> .
<code>oslc_sysmlv2:type_OwnedDifferencing</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Differencing</code>	The <b>ownedRelationships</b> of this <b>Type</b> that are <b>Differencings</b> , having this <b>Type</b> as their <b>typeDifferenced</b> .
<code>oslc_sysmlv2:type_OwnedDisjoining</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Disjoining</code>	The <b>ownedRelationships</b> of this <b>Type</b> that are <b>Disjoinings</b> , for which the <b>Type</b> is the <b>typeDisjoinedType</b> .
<code>oslc_sysmlv2:type_OwnedEndFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All <b>endFeatures</b> of this <b>Type</b> that are <b>ownedFeatures</b> .

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:type_OwnedFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <code>ownedMemberFeatures</code> of the <code>ownedFeatureMemberships</code> of this <code>Type</code> .
<code>oslc_sysmlv2:type_OwnedFeatureMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:FeatureMembership</code>	The <code>ownedMemberships</code> of this <code>Type</code> that are <code>FeatureMemberships</code> , for which the <code>Type</code> is the <code>owningType</code> . Each such <code>FeatureMembership</code> identifies an <code>ownedFeature</code> of the <code>Type</code> .
<code>oslc_sysmlv2:type_OwnedIntersecting</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Intersecting</code>	The <code>ownedRelationships</code> of this <code>Type</code> that are <code>Intersectings</code> , have the <code>Type</code> as their <code>typeIntersected</code> .
<code>oslc_sysmlv2:type_OwnedSpecialization</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Specialization</code>	The <code>ownedRelationships</code> of this <code>Type</code> that are <code>Specializations</code> , for which the <code>Type</code> is the <code>specific Type</code> .
<code>oslc_sysmlv2:type_OwnedUnioning</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Unioning</code>	The <code>ownedRelationships</code> of this <code>Type</code> that are <code>Unionings</code> , having the <code>Type</code> as their <code>typeUnioned</code> .
<code>oslc_sysmlv2:type_UnioningType</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The interpretations of a <code>Type</code> with <code>unioningTypes</code> are asserted to be the same as those of all the <code>unioningTypes</code> together, which are the <code>Types</code> derived from the <code>unioningType</code> of the <code>ownedUnionings</code> of this <code>Type</code> . For example, a <code>Classifier</code> for people might be the union of <code>Classifiers</code> for all the sexes. Similarly, a feature for people's children might be the union of features dividing them in the same ways as people in general.
<code>oslc:instanceShape</code>	Zero-or-one	false	Resource	Reference	<code>oslc:ResourceShape</code>	The URI of a Resource Shape that describes the possible properties, occurrence, value types, allowed values and labels. This shape information is useful in displaying the subject resource as well as guiding clients in performing modifications. Instance shapes may be specific to the authenticated user associated with the request that retrieved the resource, the current state of the resource and other factors and thus should not be cached.
<code>oslc:serviceProvider</code>	Zero-or-many	false	Resource	Reference	<code>oslc:ServiceProvider</code>	A link to the resource's OSLC Service Provider. There may be cases when the subject resource is available from a service provider that implements multiple domain specifications, which could result in multiple values for this property.
<code>oslc:shortTitle</code>	Zero-or-one	false	XMLLiteral	N/A	Unspecified	Short name identifying a resource, often used as an abbreviated identifier for presentation to end-users. <b>SHOULD</b> include only content that is valid inside an XHTML <code>&lt;span&gt;</code> element [sml-14].

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>rdf:type</code>	Zero-or-many	false	Resource	Reference	<code>rdfs:Class</code>	The resource type URIs.

- **Describes:** <http://open-services.net/ns/sysmlv2#EnumerationUsage>
- **Summary:** EnumerationUsageShape
- **Description:** An `EnumerationUsage` is an `AttributeUsage` whose `attributeDefinition` is an `EnumerationDefinition`.

#### EnumerationUsage Properties

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>dcterms:contributor</code>	Zero-or-many	false	AnyResource	Either	<code>oslc:Any</code>	Contributor or contributors to the resource. It is likely that the target resource will be a foaf:Person but that is not necessarily the case.
<code>dcterms:created</code>	Zero-or-one	false	dateTime	N/A	Unspecified	Timestamp of resource creation.
<code>dcterms:creator</code>	Zero-or-many	false	AnyResource	Either	<code>oslc:Any</code>	Creator or creators of the resource. It is likely that the target resource will be a foaf:Person but that is not necessarily the case.
<code>dcterms:description</code>	Zero-or-one	false	XMLLiteral	N/A	Unspecified	Descriptive text about resource represented as rich text in XHTML content.
<code>dcterms:identifier</code>	Exactly-one	true	string	N/A	Unspecified	A unique identifier for a resource. Typically read-only and assigned by the service provider when a resource is created. Not typically intended for end-user display.
<code>dcterms:modified</code>	Zero-or-one	false	dateTime	N/A	Unspecified	Timestamp of latest resource modification.
<code>dcterms:source</code>	Zero-or-one	false	Resource	Reference	<code>oslc:Any</code>	The resource URI a client can perform a get on to obtain the original non-OSLC AM formatted resource that was used to create this resource. The source resource is usually a binary or proprietary format that the service provider can consume and convert into an OSLC AM format. The service may use content negotiation with the Accept header to obtain the desired content type.
<code>dcterms:title</code>	Exactly-one	false	XMLLiteral	N/A	Unspecified	Title of the resource represented as rich text in XHTML content.

Standards Track Work Product

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
dcterms:type	Zero-or-many	false	string	N/A	Unspecified	A short string representation for the type, for example 'Car'.
jazz_am:derives	Zero-or-many	false	Resource	Reference	oslc:Any	The resource that derives from another resource originated from or is significantly influenced by the referenced resource. For example a model element derives from a requirement.
jazz_am:elaborates	Zero-or-many	false	Resource	Reference	oslc:Any	This resource elaborates the referenced resource.
jazz_am:external	Zero-or-many	false	Resource	Reference	oslc:Any	A generic link from a resource to an external web page.
jazz_am:refine	Zero-or-many	false	Resource	Reference	oslc:Any	The target is a refinement of the source. (e.g. a use case scenario might be a refinement of a textual requirement that describes the interaction).
jazz_am:satisfy	Zero-or-many	false	Resource	Reference	oslc:Any	The model element satisfies the requirement (e.g. The use case satisfies a functional requirement).
jazz_am:trace	Zero-or-many	false	Resource	Reference	oslc:Any	The model element has a trace to the requirement (e.g. An attribute or its value are traced to a requirement).
oslc_sysmlv2:attributeUsage_AttributeDefinition	Zero-or-many	false	Resource	Either	oslc_sysmlv2:DataType	The <b>DataTypes</b> that are the types of this <b>AttributeUsage</b> . Nominally, these are <b>AttributeDefinitions</b> , but other kinds of kernel <b>DataTypes</b> are also allowed, to permit use of <b>DataTypes</b> from the Kernel Model Libraries.
oslc_sysmlv2:element_AliasIds	Zero-or-many	false	unspecified	Either	xsd:string	Various alternative identifiers for this Element. Generally, these will be set by tools.
oslc_sysmlv2:element_DeclaredName	Zero-or-one	false	unspecified	Either	xsd:string	The declared name of this <b>Element</b> .

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:element_DeclaredShortName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	An optional alternative name for the <b>Element</b> that is intended to be shorter or in some way more succinct than its primary <b>name</b> . It may act as a modeler-specified identifier for the <b>Element</b> , though it is then the responsibility of the modeler to maintain the uniqueness of this identifier within a model or relative to some other context.
<code>oslc_sysmlv2:element_Documentation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Documentation</code>	The Documentation owned by this Element.
<code>oslc_sysmlv2:element_ElementId</code>	Exactly-one	false	unspecified	Either	<code>xsd:string</code>	The globally unique identifier for this Element. This is intended to be set by tooling, and it must not change during the lifetime of the Element.
<code>oslc_sysmlv2:element_IsImpliedIncluded</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether all necessary implied Relationships have been included in the <b>ownedRelationships</b> of this Element. This property may be true, even if there are not actually any <b>ownedRelationships</b> with <b>isImplied = true</b> , meaning that no such Relationships are actually implied for this Element. However, if it is false, then <b>ownedRelationships</b> may <i>not</i> contain any implied Relationships. That is, either <i>all</i> required implied Relationships must be included, or none of them.
<code>oslc_sysmlv2:element_IsLibraryElement</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether this Element is contained in the ownership tree of a library model.
<code>oslc_sysmlv2:element_Name</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The name to be used for this <b>Element</b> during name resolution within its <b>owningNamespace</b> . This is derived using the <b>effectiveName()</b> operation. By default, it is the same as the <b>declaredName</b> , but this is overridden for certain kinds of <b>Elements</b> to compute a <b>name</b> even when the <b>declaredName</b> is null.
<code>oslc_sysmlv2:element_OwnedAnnotation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Annotation</code>	The <b>ownedRelationships</b> of this <b>Element</b> that are <b>Annotations</b> , for which this <b>Element</b> is the <b>annotatedElement</b> .
<code>oslc_sysmlv2:element_OwnedElement</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The Elements owned by this Element, derived as the <b>ownedRelatedElements</b> of the <b>ownedRelationships</b> of this Element.

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:element_OwnedRelationship</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Relationship</code>	The Relationships for which this Element is the <code>owningRelatedElement</code> .
<code>oslc_sysmlv2:element_Owner</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The owner of this Element, derived as the <code>owningRelatedElement</code> of the <code>owningRelationship</code> of this Element, if any.
<code>oslc_sysmlv2:element_OwningMembership</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:OwningMembership</code>	The <code>owningRelationship</code> of this <code>Element</code> , if that <code>Relationship</code> is a <code>Membership</code> .
<code>oslc_sysmlv2:element_OwningNamespace</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Namespace</code>	The <code>Namespace</code> that owns this <code>Element</code> , which is the <code>membershipOwningNamespace</code> of the <code>owningMembership</code> of this <code>Element</code> , if any.
<code>oslc_sysmlv2:element_OwningRelationship</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Relationship</code>	The Relationship for which this Element is an <code>ownedRelatedElement</code> , if any.
<code>oslc_sysmlv2:element_QualifiedName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The full ownership-qualified name of this <code>Element</code> , represented in a form that is valid according to the KerML textual concrete syntax for qualified names (including use of unrestricted name notation and escaped characters, as necessary). The <code>qualifiedName</code> is null if this <code>Element</code> has no <code>owningNamespace</code> or if there is not a complete ownership chain of named <code>Namespaces</code> from a root <code>Namespace</code> to this <code>Element</code> .
<code>oslc_sysmlv2:element_ShortName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The short name to be used for this <code>Element</code> during name resolution within its <code>owningNamespace</code> . This is derived using the <code>effectiveShortName()</code> operation. By default, it is the same as the <code>declaredShortName</code> , but this is overridden for certain kinds of <code>Elements</code> to compute a <code>shortName</code> even when the <code>declaredName</code> is null.
<code>oslc_sysmlv2:element_TextualRepresentation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:TextualRepresentation</code>	The <code>TextualRepresentations</code> that annotate this <code>Element</code> .
<code>oslc_sysmlv2:enumerationUsage_EnumerationDefinition</code>	Exactly-one	false	Resource	Either	<code>oslc_sysmlv2:EnumerationDefinition</code>	The single <code>EnumerationDefinition</code> that is the type of this <code>EnumerationUsage</code> .

Standards Track Work Product

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:feature_ChainingFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <b>Feature</b> that are chained together to determine the values of this <b>Feature</b> , derived from the <b>chainingFeatures</b> of the <b>ownedFeatureChainings</b> of this <b>Feature</b> , in the same order. The values of a <b>Feature</b> with <b>chainingFeatures</b> are the same as values of the last <b>Feature</b> in the chain, which can be found by starting with the values of the first <b>Feature</b> (for each instance of the domain of the original <b>Feature</b> ), then using each of those as domain instances to find the values of the second <b>Feature</b> in <b>chainingFeatures</b> , and so on, to values of the last <b>Feature</b> .
<code>oslc_sysmlv2:feature_Direction</code>	Zero-or-one	false	unspecified	Either	<code>oslc_sysmlv2:FeatureDirectionKind</code>	Indicates how values of this <b>Feature</b> are determined or used (as specified for the <b>FeatureDirectionKind</b> ).
<code>oslc_sysmlv2:feature_EndOwningType</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The <b>Type</b> that is related to this <b>Feature</b> by an <b>EndFeatureMembership</b> in which the <b>Feature</b> is an <b>ownedMemberFeature</b> .
<code>oslc_sysmlv2:feature_FeaturingType</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	<b>Types</b> that feature this <b>Feature</b> , such that any instance in the domain of the <b>Feature</b> must be classified by all of these <b>Types</b> , including at least all the <b>featuringTypes</b> of its <b>typeFeaturings</b> . If the <b>Feature</b> is chained, then the <b>featuringTypes</b> of the first <b>Feature</b> in the chain are also <b>featuringTypes</b> of the chained <b>Feature</b> .
<code>oslc_sysmlv2:feature_IsComposite</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether the <b>Feature</b> is a composite <b>feature</b> of its <b>featuringType</b> . If so, the values of the <b>Feature</b> cannot exist after its featuring instance no longer does.
<code>oslc_sysmlv2:feature_IsDerived</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether the values of this <b>Feature</b> can always be computed from the values of other <b>Features</b> .
<code>oslc_sysmlv2:feature_IsEnd</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether or not the this <b>Feature</b> is an end <b>Feature</b> , requiring a different interpretation of the <b>multiplicity</b> of the <b>Feature</b> .
<code>oslc_sysmlv2:feature_IsNonunique</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	isNonunique.
<code>oslc_sysmlv2:feature_IsOrdered</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether an order exists for the values of this <b>Feature</b> or not.
<code>oslc_sysmlv2:feature_IsPortion</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether the values of this <b>Feature</b> are contained in the space and time of instances of the domain of the <b>Feature</b> and represent the same thing as those instances.

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:type_Multiplicity</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Multiplicity</code>	An <b>ownedMember</b> of this <b>Type</b> that is a <b>Multiplicity</b> , which constrains the cardinality of the <b>Type</b> . If there is no such <b>ownedMember</b> , then the cardinality of this <b>Type</b> is constrained by all the <b>Multiplicity</b> constraints applicable to any direct supertypes.
<code>oslc_sysmlv2:type_Output</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All <b>features</b> related to this <b>Type</b> by <b>FeatureMemberships</b> that have <b>direction out or inout</b> ..
<code>oslc_sysmlv2:type_OwnedConjugator</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Conjugation</code>	A <b>Conjugation</b> owned by this <b>Type</b> for which the <b>Type</b> is the <b>originalType</b> .
<code>oslc_sysmlv2:type_OwnedDifferencing</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Differencing</code>	The <b>ownedRelationships</b> of this <b>Type</b> that are <b>Differencings</b> , having this <b>Type</b> as their <b>typeDifferenced</b> .
<code>oslc_sysmlv2:type_OwnedDisjoining</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Disjoining</code>	The <b>ownedRelationships</b> of this <b>Type</b> that are <b>Disjoinings</b> , for which the <b>Type</b> is the <b>typeDisjoined Type</b> .
<code>oslc_sysmlv2:type_OwnedEndFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All <b>endFeatures</b> of this <b>Type</b> that are <b>ownedFeatures</b> .
<code>oslc_sysmlv2:type_OwnedFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <b>ownedMemberFeatures</b> of the <b>ownedFeatureMemberships</b> of this <b>Type</b> .
<code>oslc_sysmlv2:type_OwnedFeatureMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:FeatureMembership</code>	The <b>ownedMemberships</b> of this <b>Type</b> that are <b>FeatureMemberships</b> , for which the <b>Type</b> is the <b>owningType</b> . Each such <b>FeatureMembership</b> identifies an <b>ownedFeature</b> of the <b>Type</b> .
<code>oslc_sysmlv2:type_OwnedIntersecting</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Intersecting</code>	The <b>ownedRelationships</b> of this <b>Type</b> that are <b>Intersectings</b> , have the <b>Type</b> as their <b>typeIntersected</b> .
<code>oslc_sysmlv2:type_OwnedSpecialization</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Specialization</code>	The <b>ownedRelationships</b> of this <b>Type</b> that are <b>Specializations</b> , for which the <b>Type</b> is the <b>specific Type</b> .
<code>oslc_sysmlv2:type_OwnedUnioning</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Unioning</code>	The <b>ownedRelationships</b> of this <b>Type</b> that are <b>Unionings</b> , having the <b>Type</b> as their <b>typeUnioned</b> .

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:type_UnioningType</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The interpretations of a <b>Type</b> with <b>unioningTypes</b> are asserted to be the same as those of all the <b>unioningTypes</b> together, which are the <b>Types</b> derived from the <b>unioningType</b> of the <b>ownedUnionings</b> of this <b>Type</b> . For example, a <b>Classifier</b> for people might be the union of <b>Classifiers</b> for all the sexes. Similarly, a feature for people's children might be the union of features dividing them in the same ways as people in general.
<code>oslc_sysmlv2:usage_Definition</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Classifier</code>	The <b>Classifiers</b> that are the types of this <b>Usage</b> . Nominally, these are <b>Definitions</b> , but other kinds of Kernel <b>Classifiers</b> are also allowed, to permit use of <b>Classifiers</b> from the Kernel Model Libraries.
<code>oslc_sysmlv2:usage_DirectedUsage</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Usage</code>	The <b>usages</b> of this <b>Usage</b> that are <b>directedFeatures</b> .
<code>oslc_sysmlv2:usage_IsReference</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether this <b>Usage</b> is a referential <b>Usage</b> , that is, it has <b>isComposite = false</b> .
<code>oslc_sysmlv2:usage_IsVariation</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether this <b>Usage</b> is for a variation point or not. If true, then all the <b>memberships</b> of the <b>Usage</b> must be <b>VariantMemberships</b> .
<code>oslc_sysmlv2:usage_NestedAction</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:ActionUsage</code>	The <b>ActionUsages</b> that are <b>nestedUsages</b> of this <b>Usage</b> .
<code>oslc_sysmlv2:usage_NestedAllocation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:AllocationUsage</code>	The <b>AllocationUsages</b> that are <b>nestedUsages</b> of this <b>Usage</b> .
<code>oslc_sysmlv2:usage_NestedAnalysisCase</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:AnalysisCaseUsage</code>	The <b>AnalysisCaseUsages</b> that are <b>nestedUsages</b> of this <b>Usage</b> .
<code>oslc_sysmlv2:usage_NestedAttribute</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:AttributeUsage</code>	The <b>code&gt;AttributeUsages</b> that are <b>nestedUsages</b> of this <b>Usage</b> .
<code>oslc_sysmlv2:usage_NestedCalculation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:CalculationUsage</code>	The <b>CalculationUsage</b> that are <b>nestedUsages</b> of this <b>Usage</b> .

Standards Track Work Product

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:usage_NestedCase</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:CaseUsage</code>	The <code>CaseUsages</code> that are <code>nestedUsages</code> of this <code>Usage</code> .
<code>oslc_sysmlv2:usage_NestedConcern</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:ConcernUsage</code>	The <code>ConcernUsages</code> that are <code>nestedUsages</code> of this <code>Usage</code> .
<code>oslc_sysmlv2:usage_NestedConnection</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:ConnectorAsUsage</code>	The <code>ConnectorAsUsages</code> that are <code>nestedUsages</code> of this <code>Usage</code> . Note that this list includes <code>BindingConnectorAsUsages</code> and <code>SuccessionAsUsages</code> , even though these are <code>ConnectorAsUsages</code> but not <code>ConnectionUsages</code> .
<code>oslc_sysmlv2:usage_NestedConstraint</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:ConstraintUsage</code>	The <code>ConstraintUsages</code> that are <code>nestedUsages</code> of this <code>Usage</code> .
<code>oslc_sysmlv2:usage_NestedEnumeration</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:EnumerationUsage</code>	The <code>EnumerationUsages</code> that are <code>nestedUsages</code> of this <code>Usage</code> .
<code>oslc_sysmlv2:usage_NestedFlow</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:FlowConnectionUsage</code>	The <code>FlowConnectionUsages</code> that are <code>nestedUsages</code> of this <code>Usage</code> .
<code>oslc_sysmlv2:usage_NestedInterface</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:InterfaceUsage</code>	The <code>InterfaceUsages</code> that are <code>nestedUsages</code> of this <code>Usage</code> .
<code>oslc_sysmlv2:usage_NestedItem</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:ItemUsage</code>	The <code>ItemUsages</code> that are <code>nestedUsages</code> of this <code>Usage</code> .

<code>oslc_sysmlv2:usage_NestedReference</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:ReferenceUsage</code>	The <code>ReferenceUsages</code> that are <code>nestedUsages</code> of this <code>Usage</code> .
<code>oslc_sysmlv2:usage_NestedRendering</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:RenderingUsage</code>	The <code>RenderingUsages</code> that are <code>nestedUsages</code> of this <code>Usage</code> .
<code>oslc_sysmlv2:usage_NestedRequirement</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:RequirementUsage</code>	The <code>RequirementUsages</code> that are <code>nestedUsages</code> of this <code>Usage</code> .
<code>oslc_sysmlv2:usage_NestedState</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:StateUsage</code>	The <code>StateUsages</code> that are <code>nestedUsages</code> of this <code>Usage</code> .
<code>oslc_sysmlv2:usage_NestedTransition</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:TransitionUsage</code>	The <code>TransitionUsages</code> that are <code>nestedUsages</code> of this <code>Usage</code> .
<code>oslc_sysmlv2:usage_NestedUsage</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Usage</code>	The <code>Usages</code> that are <code>ownedFeatures</code> of this <code>Usage</code> .
<code>oslc_sysmlv2:usage_NestedUseCase</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:UseCaseUsage</code>	The <code>UseCaseUsages</code> that are <code>nestedUsages</code> of this <code>Usage</code> .
<code>oslc_sysmlv2:usage_NestedVerificationCase</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:VerificationCaseUsage</code>	The <code>VerificationCaseUsages</code> that are <code>nestedUsages</code> of this <code>Usage</code> .
<code>oslc_sysmlv2:usage_NestedView</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:ViewUsage</code>	The <code>ViewUsages</code> that are <code>nestedUsages</code> of this <code>Usage</code> .
<code>oslc_sysmlv2:usage_NestedViewpoint</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:ViewpointUsage</code>	The <code>ViewpointUsages</code> that are <code>nestedUsages</code> of this <code>Usage</code> .
<code>oslc_sysmlv2:usage_OwningDefinition</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Definition</code>	The <code>Definition</code> that owns this <code>Usage</code> (if any).

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:usage_OwningUsage</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Usage</code>	The <b>Usage</b> in which this <b>Usage</b> is nested (if any).
<code>oslc_sysmlv2:usage_Usage</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Usage</code>	The <b>Usages</b> that are <b>features</b> of this <b>Usage</b> (not necessarily owned).
<code>oslc_sysmlv2:usage_Variant</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Usage</code>	The <b>Usages</b> which represent the variants of this <b>Usage</b> as a variation point <b>Usage</b> , if <b>isVariation = true</b> . If <b>isVariation = false</b> , then there must be no <b>variants</b> .
<code>oslc_sysmlv2:usage_VariantMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:VariantMembership</code>	The <b>ownedMemberships</b> of this <b>Usage</b> that are <b>VariantMemberships</b> . If <b>isVariation = true</b> , then this must be all <b>memberships</b> of the <b>Usage</b> . If <b>isVariation = false</b> , then <b>variantMembership</b> must be empty.
<code>oslc:instanceShape</code>	Zero-or-one	false	Resource	Reference	<code>oslc:ResourceShape</code>	The URI of a Resource Shape that describes the possible properties, occurrence, value types, allowed values and labels. This shape information is useful in displaying the subject resource as well as guiding clients in performing modifications. Instance shapes may be specific to the authenticated user associated with the request that retrieved the resource, the current state of the resource and other factors and thus should not be cached.
<code>oslc:serviceProvider</code>	Zero-or-many	false	Resource	Reference	<code>oslc:ServiceProvider</code>	A link to the resource's OSLC Service Provider. There may be cases when the subject resource is available from a service provider that implements multiple domain specifications, which could result in multiple values for this property.
<code>oslc:shortTitle</code>	Zero-or-one	false	XMLLiteral	N/A	Unspecified	Short name identifying a resource, often used as an abbreviated identifier for presentation to end-users. <b>SHOULD</b> include only content that is valid inside an XHTML <code>&lt;span&gt;</code> element [sml-15].
<code>rdf:type</code>	Zero-or-many	false	Resource	Reference	<code>rdfs:Class</code>	The resource type URIs.

- **Describes:** <http://open-services.net/ns/sysmlv2#OperatorExpression>
- **Summary:** OperatorExpressionShape
- **Description:** An **OperatorExpression** is an **InvocationExpression** whose **function** is determined by resolving its **operator** in the context of one of the standard packages from the Kernel Function Library.

## OperatorExpression Properties

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>dcterms:contributor</code>	Zero-or-many	false	AnyResource	Either	<code>oslc:Any</code>	Contributor or contributors to the resource. It is likely that the target resource will be a foaf:Person but that is not necessarily the case.
<code>dcterms:created</code>	Zero-or-one	false	dateTime	N/A	Unspecified	Timestamp of resource creation.
<code>dcterms:creator</code>	Zero-or-many	false	AnyResource	Either	<code>oslc:Any</code>	Creator or creators of the resource. It is likely that the target resource will be a foaf:Person but that is not necessarily the case.
<code>dcterms:description</code>	Zero-or-one	false	XMLLiteral	N/A	Unspecified	Descriptive text about resource represented as rich text in XHTML content.
<code>dcterms:identifier</code>	Exactly-one	true	string	N/A	Unspecified	A unique identifier for a resource. Typically read-only and assigned by the service provider when a resource is created. Not typically intended for end-user display.
<code>dcterms:modified</code>	Zero-or-one	false	dateTime	N/A	Unspecified	Timestamp of latest resource modification.
<code>dcterms:source</code>	Zero-or-one	false	Resource	Reference	<code>oslc:Any</code>	The resource URI a client can perform a get on to obtain the original non-OSLC AM formatted resource that was used to create this resource. The source resource is usually a binary or proprietary format that the service provider can consume and convert into an OSLC AM format. The service may use content negotiation with the Accept header to obtain the desired content type.
<code>dcterms:title</code>	Exactly-one	false	XMLLiteral	N/A	Unspecified	Title of the resource represented as rich text in XHTML content.
<code>dcterms:type</code>	Zero-or-many	false	string	N/A	Unspecified	A short string representation for the type, for example 'Car'.
<code>jazz_am:derives</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The resource that derives from another resource originated from or is significantly influenced by the referenced resource. For example a model element derives from a requirement.
<code>jazz_am:elaborates</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	This resource elaborates the referenced resource.

Standards Track Work Product

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>jazz_am:external</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	A generic link from a resource to an external web page.
<code>jazz_am:refine</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The target is a refinement of the source. (e.g. a use case scenario might be a refinement of a textual requirement that describes the interaction).
<code>jazz_am:satisfy</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The model element satisfies the requirement (e.g. The use case satisfies a functional requirement).
<code>jazz_am:trace</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The model element has a trace to the requirement (e.g. An attribute or its value are traced to a requirement).
<code>oslc_sysmlv2:element_AliasIds</code>	Zero-or-many	false	unspecified	Either	<code>xsd:string</code>	Various alternative identifiers for this Element. Generally, these will be set by tools.
<code>oslc_sysmlv2:element_DeclaredName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The declared name of this <b>Element</b> .
<code>oslc_sysmlv2:element_DeclaredShortName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	An optional alternative name for the <b>Element</b> that is intended to be shorter or in some way more succinct than its primary <b>name</b> . It may act as a modeler-specified identifier for the <b>Element</b> , though it is then the responsibility of the modeler to maintain the uniqueness of this identifier within a model or relative to some other context.
<code>oslc_sysmlv2:element_Documentation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Documentation</code>	The Documentation owned by this Element.
<code>oslc_sysmlv2:element_ElementId</code>	Exactly-one	false	unspecified	Either	<code>xsd:string</code>	The globally unique identifier for this Element. This is intended to be set by tooling, and it must not change during the lifetime of the Element.
<code>oslc_sysmlv2:element_IsImpliedIncluded</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether all necessary implied Relationships have been included in the <b>ownedRelationships</b> of this Element. This property may be true, even if there are not actually any <b>ownedRelationships</b> with <b>isImplied = true</b> , meaning that no such Relationships are actually implied for this Element. However, if it is false, then <b>ownedRelationships</b> may <i>not</i> contain any implied Relationships. That is, either <i>all</i> required implied Relationships must be included, or none of them.

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:element_IsLibraryElement</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether this Element is contained in the ownership tree of a library model.
<code>oslc_sysmlv2:element_Name</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The name to be used for this Element during name resolution within its <code>owningNamespace</code> . This is derived using the <code>effectiveName()</code> operation. By default, it is the same as the <code>declaredName</code> , but this is overridden for certain kinds of Elements to compute a <code>name</code> even when the <code>declaredName</code> is null.
<code>oslc_sysmlv2:element_OwnedAnnotation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Annotation</code>	The <code>ownedRelationships</code> of this Element that are Annotations, for which this Element is the <code>annotatedElement</code> .
<code>oslc_sysmlv2:element_OwnedElement</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The Elements owned by this Element, derived as the <code>ownedRelatedElements</code> of the <code>ownedRelationships</code> of this Element.
<code>oslc_sysmlv2:element_OwnedRelationship</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Relationship</code>	The Relationships for which this Element is the <code>owningRelatedElement</code> .
<code>oslc_sysmlv2:element_Owner</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The owner of this Element, derived as the <code>owningRelatedElement</code> of the <code>owningRelationship</code> of this Element, if any.
<code>oslc_sysmlv2:element_OwningMembership</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:OwningMembership</code>	The <code>owningRelationship</code> of this Element, if that Relationship is a Membership.
<code>oslc_sysmlv2:element_OwningNamespace</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Namespace</code>	The Namespace that owns this Element, which is the <code>membershipOwningNamespace</code> of the <code>owningMembership</code> of this Element, if any.
<code>oslc_sysmlv2:element_OwningRelationship</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Relationship</code>	The Relationship for which this Element is an <code>ownedRelatedElement</code> , if any.
<code>oslc_sysmlv2:element_QualifiedName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The full ownership-qualified name of this Element, represented in a form that is valid according to the KerML textual concrete syntax for qualified names (including use of unrestricted name notation and escaped characters, as necessary). The <code>qualifiedName</code> is null if this Element has no <code>owningNamespace</code> or if there is not a complete ownership chain of named Namespaces from a root Namespace to this Element.

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:element_ShortName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The short name to be used for this <b>Element</b> during name resolution within its <b>owningNamespace</b> . This is derived using the <code>effectiveShortName()</code> operation. By default, it is the same as the <code>declaredShortName</code> , but this is overridden for certain kinds of <b>Elements</b> to compute a <code>shortName</code> even when the <code>declaredName</code> is null.
<code>oslc_sysmlv2:element_TextualRepresentation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:TextualRepresentation</code>	The <b>TextualRepresentations</b> that annotate this <b>Element</b> .
<code>oslc_sysmlv2:expression_Function</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Function</code>	The <b>Function</b> that types this <b>Expression</b> .
<code>oslc_sysmlv2:expression_IsModelLevelEvaluable</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether this <b>Expression</b> meets the constraints necessary to be evaluated at <i>model level</i> , that is, using metadata within the model.
<code>oslc_sysmlv2:expression_Result</code>	Exactly-one	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	.
<code>oslc_sysmlv2:feature_ChainingFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <b>Feature</b> that are chained together to determine the values of this <b>Feature</b> , derived from the <b>chainingFeatures</b> of the <b>ownedFeatureChainings</b> of this <b>Feature</b> , in the same order. The values of a <b>Feature</b> with <b>chainingFeatures</b> are the same as values of the last <b>Feature</b> in the chain, which can be found by starting with the values of the first <b>Feature</b> (for each instance of the domain of the original <b>Feature</b> ), then using each of those as domain instances to find the values of the second <b>Feature</b> in <b>chainingFeatures</b> , and so on, to values of the last <b>Feature</b> .
<code>oslc_sysmlv2:feature_Direction</code>	Zero-or-one	false	unspecified	Either	<code>oslc_sysmlv2:FeatureDirectionKind</code>	Indicates how values of this <b>Feature</b> are determined or used (as specified for the <b>FeatureDirectionKind</b> ).
<code>oslc_sysmlv2:feature_EndOwningType</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The <b>Type</b> that is related to this <b>Feature</b> by an <b>EndFeatureMembership</b> in which the <b>Feature</b> is an <b>ownedMemberFeature</b> .
<code>oslc_sysmlv2:feature_FeaturingType</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	<b>Types</b> that feature this <b>Feature</b> , such that any instance in the domain of the <b>Feature</b> must be classified by all of these <b>Types</b> , including at least all the <b>featuringTypes</b> of its <b>typeFeaturings</b> . If the <b>Feature</b> is chained, then the <b>featuringTypes</b> of the first <b>Feature</b> in the chain are also <b>featuringTypes</b> of the chained <b>Feature</b> .

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:feature_IsComposite</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether the <b>Feature</b> is a composite <b>feature</b> of its <b>featuringType</b> . If so, the values of the <b>Feature</b> cannot exist after its featuring instance no longer does.
<code>oslc_sysmlv2:feature_IsDerived</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether the values of this <b>Feature</b> can always be computed from the values of other <b>Features</b> .
<code>oslc_sysmlv2:feature_IsEnd</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether or not the this <b>Feature</b> is an end <b>Feature</b> , requiring a different interpretation of the <b>multiplicity</b> of the <b>Feature</b> .
<code>oslc_sysmlv2:feature_IsNonunique</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	isNonunique.
<code>oslc_sysmlv2:feature_IsOrdered</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether an order exists for the values of this <b>Feature</b> or not.
<code>oslc_sysmlv2:feature_IsPortion</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether the values of this <b>Feature</b> are contained in the space and time of instances of the domain of the <b>Feature</b> and represent the same thing as those instances.
<code>oslc_sysmlv2:feature_IsReadOnly</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether the values of this <b>Feature</b> can change over the lifetime of an instance of the domain.
<code>oslc_sysmlv2:feature_IsUnique</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether or not values for this <b>Feature</b> must have no duplicates or not.
<code>oslc_sysmlv2:feature_OwnedFeatureChaining</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:FeatureChaining</code>	The <b>ownedRelationships</b> of this <b>Feature</b> that are <b>FeatureChainings</b> , for which the <b>Feature</b> will be the <b>featureChained</b> .
<code>oslc_sysmlv2:feature_OwnedFeatureInverting</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:FeatureInverting</code>	The <b>ownedRelationships</b> of this <b>Feature</b> that are <b>FeatureInvertings</b> and for which the <b>Feature</b> is the <b>featureInverted</b> .
<code>oslc_sysmlv2:feature_OwnedRedefinition</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Redefinition</code>	The <b>ownedSubsettings</b> of this <b>Feature</b> that are <b>Redefinitions</b> , for which the <b>Feature</b> is the <b>redefiningFeature</b> .
<code>oslc_sysmlv2:feature_OwnedReferenceSubsetting</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:ReferenceSubsetting</code>	The one <b>ownedSubsetting</b> of this <b>Feature</b> , if any, that is a <b>ReferenceSubsetting</b> , for which the <b>Feature</b> is the <b>referencingFeature</b> .
<code>oslc_sysmlv2:feature_OwnedSubsetting</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Subsetting</code>	The <b>ownedSpecializations</b> of this <b>Feature</b> that are <b>Subsettings</b> , for which the <b>Feature</b> is the <b>subsettingFeature</b> .

Standards Track Work Product

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:feature_OwnedTypeFeaturing</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:TypeFeaturing</code>	The <code>ownedRelationships</code> of this <code>Feature</code> that are <code>TypeFeaturings</code> and for which the <code>Feature</code> is the <code>featureOfType</code> .
<code>oslc_sysmlv2:feature_OwnedTyping</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:FeatureTyping</code>	The <code>ownedSpecializations</code> of this <code>Feature</code> that are <code>FeatureTypings</code> , for which the <code>Feature</code> is the <code>typedFeature</code> .
<code>oslc_sysmlv2:feature_OwningFeatureMembership</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:FeatureMembership</code>	The <code>FeatureMembership</code> that owns this <code>Feature</code> as an <code>ownedMemberFeature</code> , determining its <code>owningType</code> .
<code>oslc_sysmlv2:feature_OwningType</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The <code>Type</code> that is the <code>owningType</code> of the <code>owningFeatureMembership</code> of this <code>Feature</code> .
<code>oslc_sysmlv2:feature_Type</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	<code>Types</code> that restrict the values of this <code>Feature</code> , such that the values must be instances of all the <code>types</code> . The types of a <code>Feature</code> are derived from its <code>typings</code> and the <code>types</code> of its <code>subsettings</code> . If the <code>Feature</code> is chained, then the <code>types</code> of the last <code>Feature</code> in the chain are also <code>types</code> of the chained <code>Feature</code> .
<code>oslc_sysmlv2:invocationExpression_Argument</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Expression</code>	The <code>value Expressions</code> of the <code>FeatureValues</code> of the owned input parameters of the <code>InvocationExpression</code> .
<code>oslc_sysmlv2:invocationExpression_Operand</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Expression</code>	operand.
<code>oslc_sysmlv2:namespace_ImportedMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Membership</code>	The <code>Memberships</code> in this <code>Namespace</code> that result from the <code>ownedImports</code> of this <code>Namespace</code> .
<code>oslc_sysmlv2:namespace_Member</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The set of all member <code>Elements</code> of this <code>Namespace</code> , which are the <code>memberElements</code> of all <code>memberships</code> of the <code>Namespace</code> .
<code>oslc_sysmlv2:namespace_Membership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Membership</code>	All <code>Memberships</code> in this <code>Namespace</code> , including (at least) the union of <code>ownedMemberships</code> and <code>importedMemberships</code> .
<code>oslc_sysmlv2:namespace_OwnedImport</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Import</code>	The <code>ownedRelationships</code> of this <code>Namespace</code> that are <code>Imports</code> , for which the <code>Namespace</code> is the <code>importOwningNamespace</code> .

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:namespace_OwnedMember</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The owned <b>members</b> of this <b>Namespace</b> , which are the <b>ownedMemberElements</b> of the <b>ownedMemberships</b> of the ..
<code>oslc_sysmlv2:namespace_OwnedMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Membership</code>	The <b>ownedRelationships</b> of this <b>Namespace</b> that are <b>Memberships</b> , for which the <b>Namespace</b> is the <b>membershipOwningNamespace</b> .
<code>oslc_sysmlv2:operatorExpression_Operator</code>	Exactly-one	false	unspecified	Either	<code>xsd:string</code>	An <b>operator</b> symbol that names a corresponding <b>Function</b> from one of the standard packages from the Kernel Function Library .
<code>oslc_sysmlv2:step_Behavior</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Behavior</code>	The <b>Behaviors</b> that type this <b>Step</b> .
<code>oslc_sysmlv2:step_Parameter</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <b>parameters</b> of this <b>Step</b> , which are defined as its <b>directedFeatures</b> , whose values are passed into and/or out of a performance of the <b>Step</b> .
<code>oslc_sysmlv2:type_DifferencingType</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The interpretations of a <b>Type</b> with <b>differencingTypes</b> are asserted to be those of the first of those <b>Types</b> , but not including those of the remaining <b>Types</b> . For example, a <b>Classifier</b> might be the difference of a <b>Classifier</b> for people and another for people of a particular nationality, leaving people who are not of that nationality. Similarly, a feature of people might be the difference between a feature for their children and a <b>Classifier</b> for people of a particular sex, identifying their children not of that sex (because the interpretations of the children <b>Feature</b> that identify those of that sex are also interpretations of the <b>Classifier</b> for that sex).
<code>oslc_sysmlv2:type_DirectedFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <b>features</b> of this <b>Type</b> that have a non-null <b>direction</b> .
<code>oslc_sysmlv2:type_EndFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All <b>features</b> of this <b>Type</b> with <b>isEnd = true</b> .
<code>oslc_sysmlv2:type_Feature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <b>ownedMemberFeatures</b> of the <b>featureMemberships</b> of this <b>Type</b> .

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:type_FeatureMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:FeatureMembership</code>	The <b>FeatureMemberships</b> for <b>features</b> of this <b>Type</b> , which include all <b>ownedFeatureMemberships</b> and those <b>inheritedMemberships</b> that are <b>FeatureMemberships</b> (but does <i>not</i> include any <b>importedMemberships</b> ).
<code>oslc_sysmlv2:type_InheritedFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All the <b>memberFeatures</b> of the <b>inheritedMemberships</b> of this <b>Type</b> that are <b>FeatureMemberships</b> .
<code>oslc_sysmlv2:type_InheritedMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Membership</code>	All <b>Memberships</b> inherited by this <b>Type</b> via <b>Specialization</b> or <b>Conjugation</b> . These are included in the derived union for the <b>memberships</b> of the <b>Type</b> .
<code>oslc_sysmlv2:type_Input</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All <b>features</b> related to this <b>Type</b> by <b>FeatureMemberships</b> that have <b>direction in or inout..</b>
<code>oslc_sysmlv2:type_IntersectingType</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The interpretations of a <b>Type</b> with <b>intersectingTypes</b> are asserted to be those in common among the <b>intersectingTypes</b> , which are the <b>Types</b> derived from the <b>intersectingType</b> of the <b>ownedIntersectings</b> of this <b>Type</b> . For example, a <b>Classifier</b> might be an intersection of <b>Classifiers</b> for people of a particular sex and of a particular nationality. Similarly, a feature for people's children of a particular sex might be the intersection of a <b>Feature</b> for their children and a <b>Classifier</b> for people of that sex (because the interpretations of the children <b>Feature</b> that identify those of that sex are also interpretations of the Classifier for that sex).
<code>oslc_sysmlv2:type_IsAbstract</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Indicates whether instances of this <b>Type</b> must also be instances of at least one of its specialized <b>Types</b> .
<code>oslc_sysmlv2:type_IsConjugated</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Indicates whether this <b>Type</b> has an <b>ownedConjugator</b> .
<code>oslc_sysmlv2:type_IsSufficient</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether all things that meet the classification conditions of this <b>Type</b> must be classified by the <b>Type</b> .
<code>oslc_sysmlv2:type_Multiplicity</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Multiplicity</code>	An <b>ownedMember</b> of this <b>Type</b> that is a <b>Multiplicity</b> , which constrains the cardinality of the <b>Type</b> . If there is no such <b>ownedMember</b> , then the cardinality of this <b>Type</b> is constrained by all the <b>Multiplicity</b> constraints applicable to any direct supertypes.

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:type_Output</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All <b>features</b> related to this <b>Type</b> by <b>FeatureMemberships</b> that have <b>direction out or inout</b> ..
<code>oslc_sysmlv2:type_OwnedConjugator</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Conjugation</code>	A <b>Conjugation</b> owned by this <b>Type</b> for which the <b>Type</b> is the <b>originalType</b> .
<code>oslc_sysmlv2:type_OwnedDifferencing</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Differencing</code>	The <b>ownedRelationships</b> of this <b>Type</b> that are <b>Differencings</b> , having this <b>Type</b> as their <b>typeDifferenced</b> .
<code>oslc_sysmlv2:type_OwnedDisjoining</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Disjoining</code>	The <b>ownedRelationships</b> of this <b>Type</b> that are <b>Disjoinings</b> , for which the <b>Type</b> is the <b>typeDisjoined Type</b> .
<code>oslc_sysmlv2:type_OwnedEndFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All <b>endFeatures</b> of this <b>Type</b> that are <b>ownedFeatures</b> .
<code>oslc_sysmlv2:type_OwnedFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <b>ownedMemberFeatures</b> of the <b>ownedFeatureMemberships</b> of this <b>Type</b> .
<code>oslc_sysmlv2:type_OwnedFeatureMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:FeatureMembership</code>	The <b>ownedMemberships</b> of this <b>Type</b> that are <b>FeatureMemberships</b> , for which the <b>Type</b> is the <b>owningType</b> . Each such <b>FeatureMembership</b> identifies an <b>ownedFeature</b> of the <b>Type</b> .
<code>oslc_sysmlv2:type_OwnedIntersecting</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Intersecting</code>	The <b>ownedRelationships</b> of this <b>Type</b> that are <b>Intersectings</b> , have the <b>Type</b> as their <b>typeIntersected</b> .
<code>oslc_sysmlv2:type_OwnedSpecialization</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Specialization</code>	The <b>ownedRelationships</b> of this <b>Type</b> that are <b>Specializations</b> , for which the <b>Type</b> is the <b>specific Type</b> .
<code>oslc_sysmlv2:type_OwnedUnioning</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Unioning</code>	The <b>ownedRelationships</b> of this <b>Type</b> that are <b>Unionings</b> , having the <b>Type</b> as their <b>typeUnioned</b> .

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:type_UnioningType</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The interpretations of a <b>Type</b> with <b>unioningTypes</b> are asserted to be the same as those of all the <b>unioningTypes</b> together, which are the <b>Types</b> derived from the <b>unioningType</b> of the <b>ownedUnionings</b> of this <b>Type</b> . For example, a <b>Classifier</b> for people might be the union of <b>Classifiers</b> for all the sexes. Similarly, a feature for people's children might be the union of features dividing them in the same ways as people in general.
<code>oslc:instanceShape</code>	Zero-or-one	false	Resource	Reference	<code>oslc:ResourceShape</code>	The URI of a Resource Shape that describes the possible properties, occurrence, value types, allowed values and labels. This shape information is useful in displaying the subject resource as well as guiding clients in performing modifications. Instance shapes may be specific to the authenticated user associated with the request that retrieved the resource, the current state of the resource and other factors and thus should not be cached.
<code>oslc:serviceProvider</code>	Zero-or-many	false	Resource	Reference	<code>oslc:ServiceProvider</code>	A link to the resource's OSLC Service Provider. There may be cases when the subject resource is available from a service provider that implements multiple domain specifications, which could result in multiple values for this property.
<code>oslc:shortTitle</code>	Zero-or-one	false	XMLLiteral	N/A	Unspecified	Short name identifying a resource, often used as an abbreviated identifier for presentation to end-users. <b>SHOULD</b> include only content that is valid inside an XHTML <code>&lt;span&gt;</code> element [sml-16].
<code>rdf:type</code>	Zero-or-many	false	Resource	Reference	<code>rdfs:Class</code>	The resource type URIs.

- **Describes:** <http://open-services.net/ns/sysmlv2#BooleanExpression>
- **Summary:** BooleanExpressionShape
- **Description:** A **BooleanExpression** is a **Boolean**-valued **Expression** whose type is a **Predicate**. It represents a logical condition resulting from the evaluation of the **Predicate**.

#### BooleanExpression Properties

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>dcterms:contributor</code>	Zero-or-many	false	AnyResource	Either	<code>oslc:Any</code>	Contributor or contributors to the resource. It is likely that the target resource will be a foaf:Person but that is not necessarily the case.

Standards Track Work Product

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>dcterms:created</code>	Zero-or-one	false	dateTime	N/A	Unspecified	Timestamp of resource creation.
<code>dcterms:creator</code>	Zero-or-many	false	AnyResource	Either	<code>oslc:Any</code>	Creator or creators of the resource. It is likely that the target resource will be a foaf:Person but that is not necessarily the case.
<code>dcterms:description</code>	Zero-or-one	false	XMLLiteral	N/A	Unspecified	Descriptive text about resource represented as rich text in XHTML content.
<code>dcterms:identifier</code>	Exactly-one	true	string	N/A	Unspecified	A unique identifier for a resource. Typically read-only and assigned by the service provider when a resource is created. Not typically intended for end-user display.
<code>dcterms:modified</code>	Zero-or-one	false	dateTime	N/A	Unspecified	Timestamp of latest resource modification.
<code>dcterms:source</code>	Zero-or-one	false	Resource	Reference	<code>oslc:Any</code>	The resource URI a client can perform a get on to obtain the original non-OSLC AM formatted resource that was used to create this resource. The source resource is usually a binary or proprietary format that the service provider can consume and convert into an OSLC AM format. The service may use content negotiation with the Accept header to obtain the desired content type.
<code>dcterms:title</code>	Exactly-one	false	XMLLiteral	N/A	Unspecified	Title of the resource represented as rich text in XHTML content.
<code>dcterms:type</code>	Zero-or-many	false	string	N/A	Unspecified	A short string representation for the type, for example 'Car'.
<code>jazz_am:derives</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The resource that derives from another resource originated from or is significantly influenced by the referenced resource. For example a model element derives from a requirement.
<code>jazz_am:elaborates</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	This resource elaborates the referenced resource.
<code>jazz_am:external</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	A generic link from a resource to an external web page.
<code>jazz_am:refine</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The target is a refinement of the source. (e.g. a use case scenario might be a refinement of a textual requirement that describes the interaction).

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>jazz_am:satisfy</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The model element satisfies the requirement (e.g. The use case satisfies a functional requirement).
<code>jazz_am:trace</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The model element has a trace to the requirement (e.g. An attribute or its value are traced to a requirement).
<code>oslc_sysmlv2:booleanExpression_Predicate</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Predicate</code>	The <b>Predicate</b> that types this <b>BooleanExpression</b> .
<code>oslc_sysmlv2:element_AliasIds</code>	Zero-or-many	false	unspecified	Either	<code>xsd:string</code>	Various alternative identifiers for this Element. Generally, these will be set by tools.
<code>oslc_sysmlv2:element_DeclaredName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The declared name of this <b>Element</b> .
<code>oslc_sysmlv2:element_DeclaredShortName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	An optional alternative name for the <b>Element</b> that is intended to be shorter or in some way more succinct than its primary <b>name</b> . It may act as a modeler-specified identifier for the <b>Element</b> , though it is then the responsibility of the modeler to maintain the uniqueness of this identifier within a model or relative to some other context.
<code>oslc_sysmlv2:element_Documentation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Documentation</code>	The Documentation owned by this Element.
<code>oslc_sysmlv2:element_ElementId</code>	Exactly-one	false	unspecified	Either	<code>xsd:string</code>	The globally unique identifier for this Element. This is intended to be set by tooling, and it must not change during the lifetime of the Element.
<code>oslc_sysmlv2:element_IsImpliedIncluded</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether all necessary implied Relationships have been included in the <b>ownedRelationships</b> of this Element. This property may be true, even if there are not actually any <b>ownedRelationships</b> with <b>isImplied = true</b> , meaning that no such Relationships are actually implied for this Element. However, if it is false, then <b>ownedRelationships</b> may <i>not</i> contain any implied Relationships. That is, either <i>all</i> required implied Relationships must be included, or none of them.
<code>oslc_sysmlv2:element_IsLibraryElement</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether this Element is contained in the ownership tree of a library model.

Standards Track Work Product

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:element_Name</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The name to be used for this <b>Element</b> during name resolution within its <code>owningNamespace</code> . This is derived using the <code>effectiveName()</code> operation. By default, it is the same as the <code>declaredName</code> , but this is overridden for certain kinds of <b>Elements</b> to compute a <code>name</code> even when the <code>declaredName</code> is null.
<code>oslc_sysmlv2:element_OwnedAnnotation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Annotation</code>	The <code>ownedRelationships</code> of this <b>Element</b> that are <b>Annotations</b> , for which this <b>Element</b> is the <code>annotatedElement</code> .
<code>oslc_sysmlv2:element_OwnedElement</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The <b>Elements</b> owned by this <b>Element</b> , derived as the <code>ownedRelatedElements</code> of the <code>ownedRelationships</code> of this <b>Element</b> .
<code>oslc_sysmlv2:element_OwnedRelationship</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Relationship</code>	The <b>Relationships</b> for which this <b>Element</b> is the <code>owningRelatedElement</code> .
<code>oslc_sysmlv2:element_Owner</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The owner of this <b>Element</b> , derived as the <code>owningRelatedElement</code> of the <code>owningRelationship</code> of this <b>Element</b> , if any.
<code>oslc_sysmlv2:element_OwningMembership</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:OwningMembership</code>	The <code>owningRelationship</code> of this <b>Element</b> , if that <b>Relationship</b> is a <b>Membership</b> .
<code>oslc_sysmlv2:element_OwningNamespace</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Namespace</code>	The <b>Namespace</b> that owns this <b>Element</b> , which is the <code>membershipOwningNamespace</code> of the <code>owningMembership</code> of this <b>Element</b> , if any.
<code>oslc_sysmlv2:element_OwningRelationship</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Relationship</code>	The <b>Relationship</b> for which this <b>Element</b> is an <code>ownedRelatedElement</code> , if any.
<code>oslc_sysmlv2:element_QualifiedName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The full ownership-qualified name of this <b>Element</b> , represented in a form that is valid according to the KerML textual concrete syntax for qualified names (including use of unrestricted name notation and escaped characters, as necessary). The <code>qualifiedName</code> is null if this <b>Element</b> has no <code>owningNamespace</code> or if there is not a complete ownership chain of named <b>Namespaces</b> from a root <b>Namespace</b> to this <b>Element</b> .

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:element_ShortName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The short name to be used for this <b>Element</b> during name resolution within its <b>owningNamespace</b> . This is derived using the <code>effectiveShortName()</code> operation. By default, it is the same as the <code>declaredShortName</code> , but this is overridden for certain kinds of <b>Elements</b> to compute a <code>shortName</code> even when the <code>declaredName</code> is null.
<code>oslc_sysmlv2:element_TextualRepresentation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:TextualRepresentation</code>	The <b>TextualRepresentations</b> that annotate this <b>Element</b> .
<code>oslc_sysmlv2:expression_Function</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Function</code>	The <b>Function</b> that types this <b>Expression</b> .
<code>oslc_sysmlv2:expression_IsModelLevelEvaluable</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether this <b>Expression</b> meets the constraints necessary to be evaluated at <i>model level</i> , that is, using metadata within the model.
<code>oslc_sysmlv2:expression_Result</code>	Exactly-one	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	.
<code>oslc_sysmlv2:feature_ChainingFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <b>Feature</b> that are chained together to determine the values of this <b>Feature</b> , derived from the <b>chainingFeatures</b> of the <b>ownedFeatureChainings</b> of this <b>Feature</b> , in the same order. The values of a <b>Feature</b> with <b>chainingFeatures</b> are the same as values of the last <b>Feature</b> in the chain, which can be found by starting with the values of the first <b>Feature</b> (for each instance of the domain of the original <b>Feature</b> ), then using each of those as domain instances to find the values of the second <b>Feature</b> in <b>chainingFeatures</b> , and so on, to values of the last <b>Feature</b> .
<code>oslc_sysmlv2:feature_Direction</code>	Zero-or-one	false	unspecified	Either	<code>oslc_sysmlv2:FeatureDirectionKind</code>	Indicates how values of this <b>Feature</b> are determined or used (as specified for the <b>FeatureDirectionKind</b> ).
<code>oslc_sysmlv2:feature_EndOwningType</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The <b>Type</b> that is related to this <b>Feature</b> by an <b>EndFeatureMembership</b> in which the <b>Feature</b> is an <b>ownedMemberFeature</b> .
<code>oslc_sysmlv2:feature_FeaturingType</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	<b>Types</b> that feature this <b>Feature</b> , such that any instance in the domain of the <b>Feature</b> must be classified by all of these <b>Types</b> , including at least all the <b>featuringTypes</b> of its <b>typeFeaturings</b> . If the <b>Feature</b> is chained, then the <b>featuringTypes</b> of the first <b>Feature</b> in the chain are also <b>featuringTypes</b> of the chained <b>Feature</b> .

## Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:feature_IsComposite</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether the <b>Feature</b> is a composite <b>feature</b> of its <b>featuringType</b> . If so, the values of the <b>Feature</b> cannot exist after its featuring instance no longer does.
<code>oslc_sysmlv2:feature_IsDerived</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether the values of this <b>Feature</b> can always be computed from the values of other <b>Features</b> .
<code>oslc_sysmlv2:feature_IsEnd</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether or not the this <b>Feature</b> is an end <b>Feature</b> , requiring a different interpretation of the <b>multiplicity</b> of the <b>Feature</b> .
<code>oslc_sysmlv2:feature_IsNonunique</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	isNonunique.
<code>oslc_sysmlv2:feature_IsOrdered</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether an order exists for the values of this <b>Feature</b> or not.
<code>oslc_sysmlv2:feature_IsPortion</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether the values of this <b>Feature</b> are contained in the space and time of instances of the domain of the <b>Feature</b> and represent the same thing as those instances.
<code>oslc_sysmlv2:feature_IsReadOnly</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether the values of this <b>Feature</b> can change over the lifetime of an instance of the domain.
<code>oslc_sysmlv2:feature_IsUnique</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether or not values for this <b>Feature</b> must have no duplicates or not.
<code>oslc_sysmlv2:feature_OwnedFeatureChaining</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:FeatureChaining</code>	The <b>ownedRelationships</b> of this <b>Feature</b> that are <b>FeatureChainings</b> , for which the <b>Feature</b> will be the <b>featureChained</b> .
<code>oslc_sysmlv2:feature_OwnedFeatureInverting</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:FeatureInverting</code>	The <b>ownedRelationships</b> of this <b>Feature</b> that are <b>FeatureInvertings</b> and for which the <b>Feature</b> is the <b>featureInverted</b> .
<code>oslc_sysmlv2:feature_OwnedRedefinition</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Redefinition</code>	The <b>ownedSubsettings</b> of this <b>Feature</b> that are <b>Redefinitions</b> , for which the <b>Feature</b> is the <b>redefiningFeature</b> .
<code>oslc_sysmlv2:feature_OwnedReferenceSubsetting</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:ReferenceSubsetting</code>	The one <b>ownedSubsetting</b> of this <b>Feature</b> , if any, that is a <b>ReferenceSubsetting</b> , for which the <b>Feature</b> is the <b>referencingFeature</b> .
<code>oslc_sysmlv2:feature_OwnedSubsetting</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Subsetting</code>	The <b>ownedSpecializations</b> of this <b>Feature</b> that are <b>Subsettings</b> , for which the <b>Feature</b> is the <b>subsettingFeature</b> .

<code>oslc_sysmlv2:type_OwnedEndFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All <code>endFeatures</code> of this <code>Type</code> that are <code>ownedFeatures</code> .
<code>oslc_sysmlv2:type_OwnedFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <code>ownedMemberFeatures</code> of the <code>ownedFeatureMemberships</code> of this <code>Type</code> .
<code>oslc_sysmlv2:type_OwnedFeatureMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:FeatureMembership</code>	The <code>ownedMemberships</code> of this <code>Type</code> that are <code>FeatureMemberships</code> , for which the <code>Type</code> is the <code>owningType</code> . Each such <code>FeatureMembership</code> identifies an <code>ownedFeature</code> of the <code>Type</code> .
<code>oslc_sysmlv2:type_OwnedIntersecting</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Intersecting</code>	The <code>ownedRelationships</code> of this <code>Type</code> that are <code>Intersectings</code> , have the <code>Type</code> as their <code>typeIntersected</code> .
<code>oslc_sysmlv2:type_OwnedSpecialization</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Specialization</code>	The <code>ownedRelationships</code> of this <code>Type</code> that are <code>Specializations</code> , for which the <code>Type</code> is the <code>specific Type</code> .
<code>oslc_sysmlv2:type_OwnedUnioning</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Unioning</code>	The <code>ownedRelationships</code> of this <code>Type</code> that are <code>Unionings</code> , having the <code>Type</code> as their <code>typeUnioned</code> .
<code>oslc_sysmlv2:type_UnioningType</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The interpretations of a <code>Type</code> with <code>unioningTypes</code> are asserted to be the same as those of all the <code>unioningTypes</code> together, which are the <code>Types</code> derived from the <code>unioningType</code> of the <code>ownedUnionings</code> of this <code>Type</code> . For example, a <code>Classifier</code> for people might be the union of <code>Classifiers</code> for all the sexes. Similarly, a feature for people's children might be the union of features dividing them in the same ways as people in general.
<code>oslc:instanceShape</code>	Zero-or-one	false	Resource	Reference	<code>oslc:ResourceShape</code>	The URI of a Resource Shape that describes the possible properties, occurrence, value types, allowed values and labels. This shape information is useful in displaying the subject resource as well as guiding clients in performing modifications. Instance shapes may be specific to the authenticated user associated with the request that retrieved the resource, the current state of the resource and other factors and thus should not be cached.
<code>oslc:serviceProvider</code>	Zero-or-many	false	Resource	Reference	<code>oslc:ServiceProvider</code>	A link to the resource's OSLC Service Provider. There may be cases when the subject resource is available from a service provider that implements multiple domain specifications, which could result in multiple values for this property.

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc:shortTitle</code>	Zero-or-one	false	XMLLiteral	N/A	Unspecified	Short name identifying a resource, often used as an abbreviated identifier for presentation to end-users. <b>SHOULD</b> include only content that is valid inside an XHTML <code>&lt;span&gt;</code> element [sml-17].
<code>rdf:type</code>	Zero-or-many	false	Resource	Reference	<code>rdfs:Class</code>	The resource type URIs.

- **Describes:** <http://open-services.net/ns/sysmlv2#StateDefinition>
- **Summary:** StateDefinitionShape
- **Description:** A `StateDefinition` is the `Definition` of the Behavior of a system or part of a system in a certain state condition.

#### StateDefinition Properties

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>dcterms:contributor</code>	Zero-or-many	false	AnyResource	Either	<code>oslc:Any</code>	Contributor or contributors to the resource. It is likely that the target resource will be a foaf:Person but that is not necessarily the case.
<code>dcterms:created</code>	Zero-or-one	false	dateTime	N/A	Unspecified	Timestamp of resource creation.
<code>dcterms:creator</code>	Zero-or-many	false	AnyResource	Either	<code>oslc:Any</code>	Creator or creators of the resource. It is likely that the target resource will be a foaf:Person but that is not necessarily the case.
<code>dcterms:description</code>	Zero-or-one	false	XMLLiteral	N/A	Unspecified	Descriptive text about resource represented as rich text in XHTML content.
<code>dcterms:identifier</code>	Exactly-one	true	string	N/A	Unspecified	A unique identifier for a resource. Typically read-only and assigned by the service provider when a resource is created. Not typically intended for end-user display.
<code>dcterms:modified</code>	Zero-or-one	false	dateTime	N/A	Unspecified	Timestamp of latest resource modification.
<code>dcterms:source</code>	Zero-or-one	false	Resource	Reference	<code>oslc:Any</code>	The resource URI a client can perform a get on to obtain the original non-OSLC AM formatted resource that was used to create this resource. The source resource is usually a binary or proprietary format that the service provider can consume and convert into an OSLC AM format. The service may use content negotiation with the Accept header to obtain the desired content type.

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:element_DeclaredName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The declared name of this <b>Element</b> .
<code>oslc_sysmlv2:element_DeclaredShortName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	An optional alternative name for the <b>Element</b> that is intended to be shorter or in some way more succinct than its primary <b>name</b> . It may act as a modeler-specified identifier for the <b>Element</b> , though it is then the responsibility of the modeler to maintain the uniqueness of this identifier within a model or relative to some other context.
<code>oslc_sysmlv2:element_Documentation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Documentation</code>	The Documentation owned by this Element.
<code>oslc_sysmlv2:element_ElementId</code>	Exactly-one	false	unspecified	Either	<code>xsd:string</code>	The globally unique identifier for this Element. This is intended to be set by tooling, and it must not change during the lifetime of the Element.
<code>oslc_sysmlv2:element_IsImpliedIncluded</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether all necessary implied Relationships have been included in the <b>ownedRelationships</b> of this Element. This property may be true, even if there are not actually any <b>ownedRelationships</b> with <b>isImplied = true</b> , meaning that no such Relationships are actually implied for this Element. However, if it is false, then <b>ownedRelationships</b> may <i>not</i> contain any implied Relationships. That is, either <i>all</i> required implied Relationships must be included, or none of them.
<code>oslc_sysmlv2:element_IsLibraryElement</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether this Element is contained in the ownership tree of a library model.
<code>oslc_sysmlv2:element_Name</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The name to be used for this <b>Element</b> during name resolution within its <b>owningNamespace</b> . This is derived using the <b>effectiveName()</b> operation. By default, it is the same as the <b>declaredName</b> , but this is overridden for certain kinds of <b>Elements</b> to compute a <b>name</b> even when the <b>declaredName</b> is null.
<code>oslc_sysmlv2:element_OwnedAnnotation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Annotation</code>	The <b>ownedRelationships</b> of this <b>Element</b> that are <b>Annotations</b> , for which this <b>Element</b> is the <b>annotatedElement</b> .
<code>oslc_sysmlv2:element_OwnedElement</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The Elements owned by this Element, derived as the <b>ownedRelatedElements</b> of the <b>ownedRelationships</b> of this Element.

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:element_OwnedRelationship</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Relationship</code>	The Relationships for which this Element is the <code>owningRelatedElement</code> .
<code>oslc_sysmlv2:element_Owner</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The owner of this Element, derived as the <code>owningRelatedElement</code> of the <code>owningRelationship</code> of this Element, if any.
<code>oslc_sysmlv2:element_OwningMembership</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:OwningMembership</code>	The <code>owningRelationship</code> of this <code>Element</code> , if that <code>Relationship</code> is a <code>Membership</code> .
<code>oslc_sysmlv2:element_OwningNamespace</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Namespace</code>	The <code>Namespace</code> that owns this <code>Element</code> , which is the <code>membershipOwningNamespace</code> of the <code>owningMembership</code> of this <code>Element</code> , if any.
<code>oslc_sysmlv2:element_OwningRelationship</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Relationship</code>	The Relationship for which this Element is an <code>ownedRelatedElement</code> , if any.
<code>oslc_sysmlv2:element_QualifiedName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The full ownership-qualified name of this <code>Element</code> , represented in a form that is valid according to the KerML textual concrete syntax for qualified names (including use of unrestricted name notation and escaped characters, as necessary). The <code>qualifiedName</code> is null if this <code>Element</code> has no <code>owningNamespace</code> or if there is not a complete ownership chain of named <code>Namespaces</code> from a root <code>Namespace</code> to this <code>Element</code> .
<code>oslc_sysmlv2:element_ShortName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The short name to be used for this <code>Element</code> during name resolution within its <code>owningNamespace</code> . This is derived using the <code>effectiveShortName()</code> operation. By default, it is the same as the <code>declaredShortName</code> , but this is overridden for certain kinds of <code>Elements</code> to compute a <code>shortName</code> even when the <code>declaredName</code> is null.
<code>oslc_sysmlv2:element_TextualRepresentation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:TextualRepresentation</code>	The <code>TextualRepresentations</code> that annotate this <code>Element</code> .
<code>oslc_sysmlv2:namespace_ImportedMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Membership</code>	The <code>Memberships</code> in this <code>Namespace</code> that result from the <code>ownedImports</code> of this <code>Namespace</code> .
<code>oslc_sysmlv2:namespace_Member</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The set of all member <code>Elements</code> of this <code>Namespace</code> , which are the <code>memberElements</code> of all <code>memberships</code> of the <code>Namespace</code> .

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:namespace_Membership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Membership</code>	All <b>Memberships</b> in this <b>Namespace</b> , including (at least) the union of <b>ownedMemberships</b> and <b>importedMemberships</b> .
<code>oslc_sysmlv2:namespace_OwnedImport</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Import</code>	The <b>ownedRelationships</b> of this <b>Namespace</b> that are <b>Imports</b> , for which the <b>Namespace</b> is the <b>importOwningNamespace</b> .
<code>oslc_sysmlv2:namespace_OwnedMember</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The owned <b>members</b> of this <b>Namespace</b> , which are the <b>ownedMemberElements</b> of the <b>ownedMemberships</b> of the ..
<code>oslc_sysmlv2:namespace_OwnedMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Membership</code>	The <b>ownedRelationships</b> of this <b>Namespace</b> that are <b>Memberships</b> , for which the <b>Namespace</b> is the <b>membershipOwningNamespace</b> .
<code>oslc_sysmlv2:occurrenceDefinition_IsIndividual</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether this <b>OccurrenceDefinition</b> is constrained to represent single individual.
<code>oslc_sysmlv2:occurrenceDefinition_LifeClass</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:LifeClass</code>	If <b>isIndividual</b> is true, a <b>LifeClass</b> that specializes this <b>OccurrenceDefinition</b> , restricting it to represent an individual.
<code>oslc_sysmlv2:stateDefinition_DoAction</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:ActionUsage</code>	The <b>ActionUsage</b> of this <b>StateDefinition</b> to be performed while in the state defined by the <b>StateDefinition</b> . It is the owned <b>ActionUsage</b> related to the <b>StateDefinition</b> by a <b>StateSubactionMembership</b> with <b>kind = do</b> .
<code>oslc_sysmlv2:stateDefinition_EntryAction</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:ActionUsage</code>	The <b>ActionUsage</b> of this <b>StateDefinition</b> to be performed on entry to the state defined by the <b>StateDefinition</b> . It is the owned <b>ActionUsage</b> related to the <b>StateDefinition</b> by a <b>StateSubactionMembership</b> with <b>kind = entry</b> .
<code>oslc_sysmlv2:stateDefinition_ExitAction</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:ActionUsage</code>	The <b>ActionUsage</b> of this <b>StateDefinition</b> to be performed on exit to the state defined by the <b>StateDefinition</b> . It is the owned <b>ActionUsage</b> related to the <b>StateDefinition</b> by a <b>StateSubactionMembership</b> with <b>kind = exit</b> .
<code>oslc_sysmlv2:stateDefinition_IsParallel</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether the <b>ownedStates</b> of this <b>StateDefinition</b> are to all be performed in parallel. If true, none of the <b>ownedActions</b> (which includes <b>ownedStates</b> ) may have any incoming or outgoing <b>Transitions</b> . If false, only one <b>ownedState</b> may be performed at a time.

Standards Track Work Product

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:stateDefinition_State</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:StateUsage</code>	The <code>StateUsages</code> , which are <code>actions</code> in the <code>StateDefinition</code> , that specify the discrete states in the behavior defined by the <code>StateDefinition</code> .
<code>oslc_sysmlv2:type_DifferencingType</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The interpretations of a <code>Type</code> with <code>differencingTypes</code> are asserted to be those of the first of those <code>Types</code> , but not including those of the remaining <code>Types</code> . For example, a <code>Classifier</code> might be the difference of a <code>Classifier</code> for people and another for people of a particular nationality, leaving people who are not of that nationality. Similarly, a feature of people might be the difference between a feature for their children and a <code>Classifier</code> for people of a particular sex, identifying their children not of that sex (because the interpretations of the children <code>Feature</code> that identify those of that sex are also interpretations of the <code>Classifier</code> for that sex).
<code>oslc_sysmlv2:type_DirectedFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <code>features</code> of this <code>Type</code> that have a non-null <code>direction</code> .
<code>oslc_sysmlv2:type_EndFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All <code>features</code> of this <code>Type</code> with <code>isEnd = true</code> .
<code>oslc_sysmlv2:type_Feature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <code>ownedMemberFeatures</code> of the <code>featureMemberships</code> of this <code>Type</code> .
<code>oslc_sysmlv2:type_FeatureMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:FeatureMembership</code>	The <code>FeatureMemberships</code> for <code>features</code> of this <code>Type</code> , which include all <code>ownedFeatureMemberships</code> and those <code>inheritedMemberships</code> that are <code>FeatureMemberships</code> (but does <i>not</i> include any <code>importedMemberships</code> ).
<code>oslc_sysmlv2:type_InheritedFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All the <code>memberFeatures</code> of the <code>inheritedMemberships</code> of this <code>Type</code> that are <code>FeatureMemberships</code> .
<code>oslc_sysmlv2:type_InheritedMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Membership</code>	All <code>Memberships</code> inherited by this <code>Type</code> via <code>Specialization</code> or <code>Conjugation</code> . These are included in the derived union for the <code>memberships</code> of the <code>Type</code> .
<code>oslc_sysmlv2:type_Input</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All <code>features</code> related to this <code>Type</code> by <code>FeatureMemberships</code> that have <code>direction in or inout..</code>

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:type_IntersectingType</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The interpretations of a <b>Type</b> with <b>intersectingTypes</b> are asserted to be those in common among the <b>intersectingTypes</b> , which are the <b>Types</b> derived from the <b>intersectingType</b> of the <b>ownedIntersectings</b> of this <b>Type</b> . For example, a <b>Classifier</b> might be an intersection of <b>Classifiers</b> for people of a particular sex and of a particular nationality. Similarly, a feature for people's children of a particular sex might be the intersection of a <b>Feature</b> for their children and a <b>Classifier</b> for people of that sex (because the interpretations of the children <b>Feature</b> that identify those of that sex are also interpretations of the <b>Classifier</b> for that sex).
<code>oslc_sysmlv2:type_IsAbstract</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Indicates whether instances of this <b>Type</b> must also be instances of at least one of its specialized <b>Types</b> .
<code>oslc_sysmlv2:type_IsConjugated</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Indicates whether this <b>Type</b> has an <b>ownedConjugator</b> .
<code>oslc_sysmlv2:type_IsSufficient</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether all things that meet the classification conditions of this <b>Type</b> must be classified by the <b>Type</b> .
<code>oslc_sysmlv2:type_Multiplicity</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Multiplicity</code>	An <b>ownedMember</b> of this <b>Type</b> that is a <b>Multiplicity</b> , which constrains the cardinality of the <b>Type</b> . If there is no such <b>ownedMember</b> , then the cardinality of this <b>Type</b> is constrained by all the <b>Multiplicity</b> constraints applicable to any direct supertypes.
<code>oslc_sysmlv2:type_Output</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All <b>features</b> related to this <b>Type</b> by <b>FeatureMemberships</b> that have <b>direction out or inout</b> .
<code>oslc_sysmlv2:type_OwnedConjugator</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Conjugation</code>	A <b>Conjugation</b> owned by this <b>Type</b> for which the <b>Type</b> is the <b>originalType</b> .
<code>oslc_sysmlv2:type_OwnedDifferencing</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Differencing</code>	The <b>ownedRelationships</b> of this <b>Type</b> that are <b>Differencings</b> , having this <b>Type</b> as their <b>typeDifferenced</b> .
<code>oslc_sysmlv2:type_OwnedDisjoining</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Disjoining</code>	The <b>ownedRelationships</b> of this <b>Type</b> that are <b>Disjoinings</b> , for which the <b>Type</b> is the <b>typeDisjoined Type</b> .
<code>oslc_sysmlv2:type_OwnedEndFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All <b>endFeatures</b> of this <b>Type</b> that are <b>ownedFeatures</b> .

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:type_OwnedFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <code>ownedMemberFeatures</code> of the <code>ownedFeatureMemberships</code> of this <code>Type</code> .
<code>oslc_sysmlv2:type_OwnedFeatureMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:FeatureMembership</code>	The <code>ownedMemberships</code> of this <code>Type</code> that are <code>FeatureMemberships</code> , for which the <code>Type</code> is the <code>owningType</code> . Each such <code>FeatureMembership</code> identifies an <code>ownedFeature</code> of the <code>Type</code> .
<code>oslc_sysmlv2:type_OwnedIntersecting</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Intersecting</code>	The <code>ownedRelationships</code> of this <code>Type</code> that are <code>Intersectings</code> , have the <code>Type</code> as their <code>typeIntersected</code> .
<code>oslc_sysmlv2:type_OwnedSpecialization</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Specialization</code>	The <code>ownedRelationships</code> of this <code>Type</code> that are <code>Specializations</code> , for which the <code>Type</code> is the <code>specific Type</code> .
<code>oslc_sysmlv2:type_OwnedUnioning</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Unioning</code>	The <code>ownedRelationships</code> of this <code>Type</code> that are <code>Unionings</code> , having the <code>Type</code> as their <code>typeUnioned</code> .
<code>oslc_sysmlv2:type_UnioningType</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The interpretations of a <code>Type</code> with <code>unioningTypes</code> are asserted to be the same as those of all the <code>unioningTypes</code> together, which are the <code>Types</code> derived from the <code>unioningType</code> of the <code>ownedUnionings</code> of this <code>Type</code> . For example, a <code>Classifier</code> for people might be the union of <code>Classifiers</code> for all the sexes. Similarly, a feature for people's children might be the union of features dividing them in the same ways as people in general.
<code>oslc:instanceShape</code>	Zero-or-one	false	Resource	Reference	<code>oslc:ResourceShape</code>	The URI of a Resource Shape that describes the possible properties, occurrence, value types, allowed values and labels. This shape information is useful in displaying the subject resource as well as guiding clients in performing modifications. Instance shapes may be specific to the authenticated user associated with the request that retrieved the resource, the current state of the resource and other factors and thus should not be cached.
<code>oslc:serviceProvider</code>	Zero-or-many	false	Resource	Reference	<code>oslc:ServiceProvider</code>	A link to the resource's OSLC Service Provider. There may be cases when the subject resource is available from a service provider that implements multiple domain specifications, which could result in multiple values for this property.
<code>oslc:shortTitle</code>	Zero-or-one	false	XMLLiteral	N/A	Unspecified	Short name identifying a resource, often used as an abbreviated identifier for presentation to end-users. <b>SHOULD</b> include only content that is valid inside an XHTML <code>&lt;span&gt;</code> element [sml-18].

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>rdf:type</code>	Zero-or-many	false	Resource	Reference	<code>rdfs:Class</code>	The resource type URIs.

- **Describes:** <http://open-services.net/ns/sysmlv2#NamespaceExpose>
- **Summary:** NamespaceExposeShape
- **Description:** A `NamespaceExpose` is an `Expose Relationship` that exposes the `Memberships` of a specific `importedNamespace` and, if `isRecursive = true`, additional `Memberships` recursively.

#### NamespaceExpose Properties

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>dcterms:contributor</code>	Zero-or-many	false	AnyResource	Either	<code>oslc:Any</code>	Contributor or contributors to the resource. It is likely that the target resource will be a foaf:Person but that is not necessarily the case.
<code>dcterms:created</code>	Zero-or-one	false	dateTime	N/A	Unspecified	Timestamp of resource creation.
<code>dcterms:creator</code>	Zero-or-many	false	AnyResource	Either	<code>oslc:Any</code>	Creator or creators of the resource. It is likely that the target resource will be a foaf:Person but that is not necessarily the case.
<code>dcterms:description</code>	Zero-or-one	false	XMLLiteral	N/A	Unspecified	Descriptive text about resource represented as rich text in XHTML content.
<code>dcterms:identifier</code>	Exactly-one	true	string	N/A	Unspecified	A unique identifier for a resource. Typically read-only and assigned by the service provider when a resource is created. Not typically intended for end-user display.
<code>dcterms:modified</code>	Zero-or-one	false	dateTime	N/A	Unspecified	Timestamp of latest resource modification.
<code>dcterms:source</code>	Zero-or-one	false	Resource	Reference	<code>oslc:Any</code>	The resource URI a client can perform a get on to obtain the original non-OSLC AM formatted resource that was used to create this resource. The source resource is usually a binary or proprietary format that the service provider can consume and convert into an OSLC AM format. The service may use content negotiation with the Accept header to obtain the desired content type.
<code>dcterms:title</code>	Exactly-one	false	XMLLiteral	N/A	Unspecified	Title of the resource represented as rich text in XHTML content.

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>dcterms:type</code>	Zero-or-many	false	string	N/A	Unspecified	A short string representation for the type, for example 'Car'.
<code>jazz_am:derives</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The resource that derives from another resource originated from or is significantly influenced by the referenced resource. For example a model element derives from a requirement.
<code>jazz_am:elaborates</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	This resource elaborates the referenced resource.
<code>jazz_am:external</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	A generic link from a resource to an external web page.
<code>jazz_am:refine</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The target is a refinement of the source. (e.g. a use case scenario might be a refinement of a textual requirement that describes the interaction).
<code>jazz_am:satisfy</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The model element satisfies the requirement (e.g. The use case satisfies a functional requirement).
<code>jazz_am:trace</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The model element has a trace to the requirement (e.g. An attribute or its value are traced to a requirement).
<code>oslc_sysmlv2:element_AliasIds</code>	Zero-or-many	false	unspecified	Either	<code>xsd:string</code>	Various alternative identifiers for this Element. Generally, these will be set by tools.
<code>oslc_sysmlv2:element_DeclaredName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The declared name of this <b>Element</b> .
<code>oslc_sysmlv2:element_DeclaredShortName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	An optional alternative name for the <b>Element</b> that is intended to be shorter or in some way more succinct than its primary <b>name</b> . It may act as a modeler-specified identifier for the <b>Element</b> , though it is then the responsibility of the modeler to maintain the uniqueness of this identifier within a model or relative to some other context.
<code>oslc_sysmlv2:element_Documentation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Documentation</code>	The Documentation owned by this Element.

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:element_ElementId</code>	Exactly-one	false	unspecified	Either	<code>xsd:string</code>	The globally unique identifier for this Element. This is intended to be set by tooling, and it must not change during the lifetime of the Element.
<code>oslc_sysmlv2:element_IsImpliedIncluded</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether all necessary implied Relationships have been included in the <code>ownedRelationships</code> of this Element. This property may be true, even if there are not actually any <code>ownedRelationships</code> with <code>isImplied = true</code> , meaning that no such Relationships are actually implied for this Element. However, if it is false, then <code>ownedRelationships</code> may <i>not</i> contain any implied Relationships. That is, either <i>all</i> required implied Relationships must be included, or none of them.
<code>oslc_sysmlv2:element_IsLibraryElement</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether this Element is contained in the ownership tree of a library model.
<code>oslc_sysmlv2:element_Name</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The name to be used for this <code>Element</code> during name resolution within its <code>owningNamespace</code> . This is derived using the <code>effectiveName()</code> operation. By default, it is the same as the <code>declaredName</code> , but this is overridden for certain kinds of <code>Elements</code> to compute a <code>name</code> even when the <code>declaredName</code> is null.
<code>oslc_sysmlv2:element_OwnedAnnotation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Annotation</code>	The <code>ownedRelationships</code> of this <code>Element</code> that are <code>Annotations</code> , for which this <code>Element</code> is the <code>annotatedElement</code> .
<code>oslc_sysmlv2:element_OwnedElement</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The Elements owned by this Element, derived as the <code>ownedRelatedElements</code> of the <code>ownedRelationships</code> of this Element.
<code>oslc_sysmlv2:element_OwnedRelationship</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Relationship</code>	The Relationships for which this Element is the <code>owningRelatedElement</code> .
<code>oslc_sysmlv2:element_Owner</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The owner of this Element, derived as the <code>owningRelatedElement</code> of the <code>owningRelationship</code> of this Element, if any.
<code>oslc_sysmlv2:element_OwningMembership</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:OwningMembership</code>	The <code>owningRelationship</code> of this <code>Element</code> , if that <code>Relationship</code> is a <code>Membership</code> .
<code>oslc_sysmlv2:element_OwningNamespace</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Namespace</code>	The <code>Namespace</code> that owns this <code>Element</code> , which is the <code>membershipOwningNamespace</code> of the <code>owningMembership</code> of this <code>Element</code> , if any.

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:element_OwningRelationship</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Relationship</code>	The Relationship for which this Element is an <code>ownedRelatedElement</code> , if any.
<code>oslc_sysmlv2:element_QualifiedName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The full ownership-qualified name of this <b>Element</b> , represented in a form that is valid according to the KerML textual concrete syntax for qualified names (including use of unrestricted name notation and escaped characters, as necessary). The <code>qualifiedName</code> is null if this <b>Element</b> has no <code>owningNamespace</code> or if there is not a complete ownership chain of named <b>Namespaces</b> from a root <b>Namespace</b> to this <b>Element</b> .
<code>oslc_sysmlv2:element_ShortName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The short name to be used for this <b>Element</b> during name resolution within its <code>owningNamespace</code> . This is derived using the <code>effectiveShortName()</code> operation. By default, it is the same as the <code>declaredShortName</code> , but this is overridden for certain kinds of <b>Elements</b> to compute a <code>shortName</code> even when the <code>declaredName</code> is null.
<code>oslc_sysmlv2:element_TextualRepresentation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:TextualRepresentation</code>	The <b>TextualRepresentations</b> that annotate this <b>Element</b> .
<code>oslc_sysmlv2:import_ImportedElement</code>	Exactly-one	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The effectively imported <b>Element</b> for this Import. For a <b>MembershipImport</b> , this is the <code>memberElement</code> of the <code>importedMembership</code> . For a <b>NamespaceImport</b> , it is the <code>importedNamespace</code> .
<code>oslc_sysmlv2:import_ImportOwningNamespace</code>	Exactly-one	false	Resource	Either	<code>oslc_sysmlv2:Namespace</code>	The <b>Namespace</b> into which Memberships are imported by this Import, which must be the <code>owningRelatedElement</code> of the Import.
<code>oslc_sysmlv2:import_IsImportAll</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether to import memberships without regard to declared visibility.
<code>oslc_sysmlv2:import_IsRecursive</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether to recursively import Memberships from visible, owned sub-Namespaces.
<code>oslc_sysmlv2:import_Visibility</code>	Exactly-one	false	unspecified	Either	<code>oslc_sysmlv2:VisibilityKind</code>	The visibility level of the imported <b>members</b> from this Import relative to the <code>importOwningNamespace</code> .
<code>oslc_sysmlv2:namespaceImport_ImportedNamespace</code>	Exactly-one	false	Resource	Either	<code>oslc_sysmlv2:Namespace</code>	The <b>Namespace</b> whose visible <b>Memberships</b> are imported by this <b>NamespaceImport</b> .
<code>oslc_sysmlv2:relationship_IsImplied</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether this Relationship was generated by tooling to meet semantic rules, rather than being directly created by a modeler.

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:relationship_OwnedRelatedElement</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The <code>relatedElements</code> of this Relationship that are owned by the Relationship.
<code>oslc_sysmlv2:relationship_OwningRelatedElement</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The <code>relatedElement</code> of this Relationship that owns the Relationship, if any.
<code>oslc_sysmlv2:relationship_RelatedElement</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The Elements that are related by this Relationship, derived as the union of the <code>source</code> and <code>target</code> Elements of the Relationship.
<code>oslc_sysmlv2:relationship_Source</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The <code>relatedElements</code> from which this Relationship is considered to be directed..
<code>oslc_sysmlv2:relationship_Target</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The <code>relatedElements</code> to which this Relationship is considered to be directed.
<code>oslc:instanceShape</code>	Zero-or-one	false	Resource	Reference	<code>oslc:ResourceShape</code>	The URI of a Resource Shape that describes the possible properties, occurrence, value types, allowed values and labels. This shape information is useful in displaying the subject resource as well as guiding clients in performing modifications. Instance shapes may be specific to the authenticated user associated with the request that retrieved the resource, the current state of the resource and other factors and thus should not be cached.
<code>oslc:serviceProvider</code>	Zero-or-many	false	Resource	Reference	<code>oslc:ServiceProvider</code>	A link to the resource's OSLC Service Provider. There may be cases when the subject resource is available from a service provider that implements multiple domain specifications, which could result in multiple values for this property.
<code>oslc:shortTitle</code>	Zero-or-one	false	XMLLiteral	N/A	Unspecified	Short name identifying a resource, often used as an abbreviated identifier for presentation to end-users. <b>SHOULD</b> include only content that is valid inside an XHTML <code>&lt;span&gt;</code> element [sml-19].
<code>rdf:type</code>	Zero-or-many	false	Resource	Reference	<code>rdfs:Class</code>	The resource type URIs.

- **Describes:** <http://open-services.net/ns/sysmlv2#Specialization>
- **Summary:** SpecializationShape
- **Description:** `Specialization` is a `Relationship` between two `Types` that requires all instances of the `specific` type to also be instances of the `general` Type (i.e., the set of instances of the `specific` Type is a *subset*

of those of the **general** Type, which might be the same set).

### Specialization Properties

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>dcterms:contributor</code>	Zero-or-many	false	AnyResource	Either	<code>oslc:Any</code>	Contributor or contributors to the resource. It is likely that the target resource will be a foaf:Person but that is not necessarily the case.
<code>dcterms:created</code>	Zero-or-one	false	dateTime	N/A	Unspecified	Timestamp of resource creation.
<code>dcterms:creator</code>	Zero-or-many	false	AnyResource	Either	<code>oslc:Any</code>	Creator or creators of the resource. It is likely that the target resource will be a foaf:Person but that is not necessarily the case.
<code>dcterms:description</code>	Zero-or-one	false	XMLLiteral	N/A	Unspecified	Descriptive text about resource represented as rich text in XHTML content.
<code>dcterms:identifier</code>	Exactly-one	true	string	N/A	Unspecified	A unique identifier for a resource. Typically read-only and assigned by the service provider when a resource is created. Not typically intended for end-user display.
<code>dcterms:modified</code>	Zero-or-one	false	dateTime	N/A	Unspecified	Timestamp of latest resource modification.
<code>dcterms:source</code>	Zero-or-one	false	Resource	Reference	<code>oslc:Any</code>	The resource URI a client can perform a get on to obtain the original non-OSLC AM formatted resource that was used to create this resource. The source resource is usually a binary or proprietary format that the service provider can consume and convert into an OSLC AM format. The service may use content negotiation with the Accept header to obtain the desired content type.
<code>dcterms:title</code>	Exactly-one	false	XMLLiteral	N/A	Unspecified	Title of the resource represented as rich text in XHTML content.
<code>dcterms:type</code>	Zero-or-many	false	string	N/A	Unspecified	A short string representation for the type, for example 'Car'.
<code>jazz_am:derives</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The resource that derives from another resource originated from or is significantly influenced by the referenced resource. For example a model element derives from a requirement.
<code>jazz_am:elaborates</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	This resource elaborates the referenced resource.

Standards Track Work Product

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>jazz_am:external</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	A generic link from a resource to an external web page.
<code>jazz_am:refine</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The target is a refinement of the source. (e.g. a use case scenario might be a refinement of a textual requirement that describes the interaction).
<code>jazz_am:satisfy</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The model element satisfies the requirement (e.g. The use case satisfies a functional requirement).
<code>jazz_am:trace</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The model element has a trace to the requirement (e.g. An attribute or its value are traced to a requirement).
<code>oslc_sysmlv2:element_AliasIds</code>	Zero-or-many	false	unspecified	Either	<code>xsd:string</code>	Various alternative identifiers for this Element. Generally, these will be set by tools.
<code>oslc_sysmlv2:element_DeclaredName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The declared name of this <b>Element</b> .
<code>oslc_sysmlv2:element_DeclaredShortName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	An optional alternative name for the <b>Element</b> that is intended to be shorter or in some way more succinct than its primary <b>name</b> . It may act as a modeler-specified identifier for the <b>Element</b> , though it is then the responsibility of the modeler to maintain the uniqueness of this identifier within a model or relative to some other context.
<code>oslc_sysmlv2:element_Documentation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Documentation</code>	The Documentation owned by this Element.
<code>oslc_sysmlv2:element_ElementId</code>	Exactly-one	false	unspecified	Either	<code>xsd:string</code>	The globally unique identifier for this Element. This is intended to be set by tooling, and it must not change during the lifetime of the Element.

## Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:element_IsImpliedIncluded</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether all necessary implied Relationships have been included in the <code>ownedRelationships</code> of this Element. This property may be true, even if there are not actually any <code>ownedRelationships</code> with <code>isImplied = true</code> , meaning that no such Relationships are actually implied for this Element. However, if it is false, then <code>ownedRelationships</code> may <i>not</i> contain any implied Relationships. <code>oslc_sysmlv2:element_OwningRelationship</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Relationship</code>	The <code>Relationship</code> for which this <code>Element</code> is an <code>ownedRelatedElement</code> , if any.
<code>oslc_sysmlv2:element_QualifiedName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The full ownership-qualified name of this <code>Element</code> , represented in a form that is valid according to the KerML textual concrete syntax for qualified names (including use of unrestricted name notation and escaped characters, as necessary). The <code>qualifiedName</code> is null if this <code>Element</code> has no <code>owningNamespace</code> or if there is not a complete ownership chain of named <code>Namespaces</code> from a root <code>Namespace</code> to this <code>Element</code> .
<code>oslc_sysmlv2:element_ShortName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The short name to be used for this <code>Element</code> during name resolution within its <code>owningNamespace</code> . This is derived using the <code>effectiveShortName()</code> operation. By default, it is the same as the <code>declaredShortName</code> , but this is overridden for certain kinds of <code>Elements</code> to compute a <code>shortName</code> even when the <code>declaredName</code> is null.
<code>oslc_sysmlv2:element_TextualRepresentation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:TextualRepresentation</code>	The <code>TextualRepresentations</code> that annotate this <code>Element</code> .
<code>oslc_sysmlv2:libraryPackage_IsStandard</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether this <code>LibraryPackage</code> contains a standard library model. This should only be set to true for <code>LibraryPackages</code> in the standard Kernel Model Libraries or in normative model libraries for a language built on KerML.

Standards Track Work Product

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:namespace_ImportedMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Membership</code>	The <b>Memberships</b> in this <b>Namespace</b> that result from the <b>ownedImports</b> of this <b>Namespace</b> .
<code>oslc_sysmlv2:namespace_Member</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The set of all member <b>Elements</b> of this <b>Namespace</b> , which are the <b>memberElements</b> of all <b>memberships</b> of the <b>Namespace</b> .
<code>oslc_sysmlv2:namespace_Membership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Membership</code>	All <b>Memberships</b> in this <b>Namespace</b> , including (at least) the union of <b>ownedMemberships</b> and <b>importedMemberships</b> .
<code>oslc_sysmlv2:namespace_OwnedImport</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Import</code>	The <b>ownedRelationships</b> of this <b>Namespace</b> that are <b>Imports</b> , for which the <b>Namespace</b> is the <b>importOwningNamespace</b> .
<code>oslc_sysmlv2:namespace_OwnedMember</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The owned <b>members</b> of this <b>Namespace</b> , which are the <b>ownedMemberElements</b> of the <b>ownedMemberships</b> of the ..
<code>oslc_sysmlv2:namespace_OwnedMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Membership</code>	The <b>ownedRelationships</b> of this <b>Namespace</b> that are <b>Memberships</b> , for which the <b>Namespace</b> is the <b>membershipOwningNamespace</b> .
<code>oslc_sysmlv2:package_FilterCondition</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Expression</code>	The model-level evaluable <b>Boolean</b> -valued <b>Expression</b> used to filter the <b>members</b> of this <b>Package</b> , which are owned by the <b>Package</b> are via <b>ElementFilterMemberships</b> .
<code>oslc:instanceShape</code>	Zero-or-one	false	Resource	Reference	<code>oslc:ResourceShape</code>	The URI of a Resource Shape that describes the possible properties, occurrence, value types, allowed values and labels. This shape information is useful in displaying the subject resource as well as guiding clients in performing modifications. Instance shapes may be specific to the authenticated user associated with the request that retrieved the resource, the current state of the resource and other factors and thus should not be cached.

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc:serviceProvider</code>	Zero-or-many	false	Resource	Reference	<code>oslc:ServiceProvider</code>	A link to the resource's OSLC Service Provider. There may be cases when the subject resource is available from a service provider that implements multiple domain specifications, which could result in multiple values for this property.
<code>oslc:shortTitle</code>	Zero-or-one	false	XMLLiteral	N/A	Unspecified	Short name identifying a resource, often used as an abbreviated identifier for presentation to end-users. <b>SHOULD</b> include only content that is valid inside an XHTML <code>&lt;span&gt;</code> element [sml-21].
<code>rdf:type</code>	Zero-or-many	false	Resource	Reference	<code>rdfs:Class</code>	The resource type URIs.

- **Describes:** <http://open-services.net/ns/sysmlv2#ViewpointUsage>
- **Summary:** ViewpointUsageShape
- **Description:** A **ViewpointUsage** is a **Usage** of a **ViewpointDefinition**.

#### ViewpointUsage Properties

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>dcterms:contributor</code>	Zero-or-many	false	AnyResource	Either	<code>oslc:Any</code>	Contributor or contributors to the resource. It is likely that the target resource will be a foaf:Person but that is not necessarily the case.
<code>dcterms:created</code>	Zero-or-one	false	dateTime	N/A	Unspecified	Timestamp of resource creation.
<code>dcterms:creator</code>	Zero-or-many	false	AnyResource	Either	<code>oslc:Any</code>	Creator or creators of the resource. It is likely that the target resource will be a foaf:Person but that is not necessarily the case.
<code>dcterms:description</code>	Zero-or-one	false	XMLLiteral	N/A	Unspecified	Descriptive text about resource represented as rich text in XHTML content.
<code>dcterms:identifier</code>	Exactly-one	true	string	N/A	Unspecified	A unique identifier for a resource. Typically read-only and assigned by the service provider when a resource is created. Not typically intended for end-user display.
<code>dcterms:modified</code>	Zero-or-one	false	dateTime	N/A	Unspecified	Timestamp of latest resource modification.

Standards Track Work Product

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>dcterms:source</code>	Zero-or-one	false	Resource	Reference	<code>oslc:Any</code>	The resource URI a client can perform a get on to obtain the original non-OSLC AM formatted resource that was used to create this resource. The source resource is usually a binary or proprietary format that the service provider can consume and convert into an OSLC AM format. The service may use content negotiation with the Accept header to obtain the desired content type.
<code>dcterms:title</code>	Exactly-one	false	XMLLiteral	N/A	Unspecified	Title of the resource represented as rich text in XHTML content.
<code>dcterms:type</code>	Zero-or-many	false	string	N/A	Unspecified	A short string representation for the type, for example 'Car'.
<code>jazz_am:derives</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The resource that derives from another resource originated from or is significantly influenced by the referenced resource. For example a model element derives from a requirement.
<code>jazz_am:elaborates</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	This resource elaborates the referenced resource.
<code>jazz_am:external</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	A generic link from a resource to an external web page.
<code>jazz_am:refine</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The target is a refinement of the source. (e.g. a use case scenario might be a refinement of a textual requirement that describes the interaction).
<code>jazz_am:satisfy</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The model element satisfies the requirement (e.g. The use case satisfies a functional requirement).
<code>jazz_am:trace</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The model element has a trace to the requirement (e.g. An attribute or its value are traced to a requirement).
<code>oslc_sysmlv2:booleanExpression_Predicate</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Predicate</code>	The <b>Predicate</b> that types this <b>BooleanExpression</b> .

Standards Track Work Product

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:constraintUsage_ConstraintDefinition</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Predicate</code>	The (single) <b>Predicate</b> that is the type of this <b>ConstraintUsage</b> . Nominally, this will be a <b>ConstraintDefinition</b> , but other kinds of <b>Predicates</b> are also allowed, to permit use of <b>Predicates</b> from the Kernel Model Libraries.
<code>oslc_sysmlv2:element_AliasIds</code>	Zero-or-many	false	unspecified	Either	<code>xsd:string</code>	Various alternative identifiers for this Element. Generally, these will be set by tools.
<code>oslc_sysmlv2:element_DeclaredName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The declared name of this <b>Element</b> .
<code>oslc_sysmlv2:element_DeclaredShortName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	An optional alternative name for the <b>Element</b> that is intended to be shorter or in some way more succinct than its primary <b>name</b> . It may act as a modeler-specified identifier for the <b>Element</b> , though it is then the responsibility of the modeler to maintain the uniqueness of this identifier within a model or relative to some other context.
<code>oslc_sysmlv2:element_Documentation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Documentation</code>	The Documentation owned by this Element.
<code>oslc_sysmlv2:element_ElementId</code>	Exactly-one	false	unspecified	Either	<code>xsd:string</code>	The globally unique identifier for this Element. This is intended to be set by tooling, and it must not change during the lifetime of the Element.
<code>oslc_sysmlv2:element_IsImpliedIncluded</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether all necessary implied Relationships have been included in the <b>ownedRelationships</b> of this Element. This property may be true, even if there are not actually any <b>ownedRelationships</b> with <b>isImplied = true</b> , meaning that no such Relationships are actually implied for this Element. However, if it is false, then <b>ownedRelationships</b> may <i>not</i> contain any implied Relationships. That is, either <i>all</i> required implied Relationships must be included, or none of them.
<code>oslc_sysmlv2:element_IsLibraryElement</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether this Element is contained in the ownership tree of a library model.

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:element_Name</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The name to be used for this <b>Element</b> during name resolution within its <b>owningNamespace</b> . This is derived using the <b>effectiveName()</b> operation. By default, it is the same as the <b>declaredName</b> , but this is overridden for certain kinds of <b>Elements</b> to compute a <b>name</b> even when the <b>declaredName</b> is null.
<code>oslc_sysmlv2:element_OwnedAnnotation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Annotation</code>	The <b>ownedRelationships</b> of this <b>Element</b> that are <b>Annotations</b> , for which this <b>Element</b> is the <b>annotatedElement</b> .
<code>oslc_sysmlv2:element_OwnedElement</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The <b>Elements</b> owned by this <b>Element</b> , derived as the <b>ownedRelatedElements</b> of the <b>ownedRelationships</b> of this <b>Element</b> .
<code>oslc_sysmlv2:element_OwnedRelationship</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Relationship</code>	The <b>Relationships</b> for which this <b>Element</b> is the <b>owningRelatedElement</b> .
<code>oslc_sysmlv2:element_Owner</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The owner of this <b>Element</b> , derived as the <b>owningRelatedElement</b> of the <b>owningRelationship</b> of this <b>Element</b> , if any.
<code>oslc_sysmlv2:element_OwningMembership</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:OwningMembership</code>	The <b>owningRelationship</b> of this <b>Element</b> , if that <b>Relationship</b> is a <b>Membership</b> .
<code>oslc_sysmlv2:element_OwningNamespace</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Namespace</code>	The <b>Namespace</b> that owns this <b>Element</b> , which is the <b>membershipOwningNamespace</b> of the <b>owningMembership</b> of this <b>Element</b> , if any.
<code>oslc_sysmlv2:element_OwningRelationship</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Relationship</code>	The <b>Relationship</b> for which this <b>Element</b> is an <b>ownedRelatedElement</b> , if any.
<code>oslc_sysmlv2:element_QualifiedName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The full ownership-qualified name of this <b>Element</b> , represented in a form that is valid according to the KerML textual concrete syntax for qualified names (including use of unrestricted name notation and escaped characters, as necessary). The <b>qualifiedName</b> is null if this <b>Element</b> has no <b>owningNamespace</b> or if there is not a complete ownership chain of named <b>Namespaces</b> from a root <b>Namespace</b> to this <b>Element</b> .

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:element_ShortName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The short name to be used for this <b>Element</b> during name resolution within its <b>owningNamespace</b> . This is derived using the <code>effectiveShortName()</code> operation. By default, it is the same as the <code>declaredShortName</code> , but this is overridden for certain kinds of <b>Elements</b> to compute a <code>shortName</code> even when the <code>declaredName</code> is null.
<code>oslc_sysmlv2:element_TextualRepresentation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:TextualRepresentation</code>	The <b>TextualRepresentations</b> that annotate this <b>Element</b> .
<code>oslc_sysmlv2:expression_Function</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Function</code>	The <b>Function</b> that types this <b>Expression</b> .
<code>oslc_sysmlv2:expression_IsModelLevelEvaluable</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether this <b>Expression</b> meets the constraints necessary to be evaluated at <i>model level</i> , that is, using metadata within the model.
<code>oslc_sysmlv2:expression_Result</code>	Exactly-one	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	.
<code>oslc_sysmlv2:feature_ChainingFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <b>Feature</b> that are chained together to determine the values of this <b>Feature</b> , derived from the <b>chainingFeatures</b> of the <b>ownedFeatureChainings</b> of this <b>Feature</b> , in the same order. The values of a <b>Feature</b> with <b>chainingFeatures</b> are the same as values of the last <b>Feature</b> in the chain, which can be found by starting with the values of the first <b>Feature</b> (for each instance of the domain of the original <b>Feature</b> ), then using each of those as domain instances to find the values of the second <b>Feature</b> in <b>chainingFeatures</b> , and so on, to values of the last <b>Feature</b> .
<code>oslc_sysmlv2:feature_Direction</code>	Zero-or-one	false	unspecified	Either	<code>oslc_sysmlv2:FeatureDirectionKind</code>	Indicates how values of this <b>Feature</b> are determined or used (as specified for the <b>FeatureDirectionKind</b> ).
<code>oslc_sysmlv2:feature_EndOwningType</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The <b>Type</b> that is related to this <b>Feature</b> by an <b>EndFeatureMembership</b> in which the <b>Feature</b> is an <b>ownedMemberFeature</b> .

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:feature_FeaturingType</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	<b>Types</b> that feature this <b>Feature</b> , such that any instance in the domain of the <b>Feature</b> must be classified by all of these <b>Types</b> , including at least all the <b>featuringTypes</b> of its <b>typeFeaturings</b> . If the <b>Feature</b> is chained, then the <b>featuringTypes</b> of the first <b>Feature</b> in the chain are also <b>featuringTypes</b> of the chained <b>Feature</b> .
<code>oslc_sysmlv2:feature_IsComposite</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether the <b>Feature</b> is a composite <b>feature</b> of its <b>featuringType</b> . If so, the values of the <b>Feature</b> cannot exist after its featuring instance no longer does.
<code>oslc_sysmlv2:feature_IsDerived</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether the values of this <b>Feature</b> can always be computed from the values of other <b>Features</b> .
<code>oslc_sysmlv2:feature_IsEnd</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether or not the this <b>Feature</b> is an end <b>Feature</b> , requiring a different interpretation of the <b>multiplicity</b> of the <b>Feature</b> .
<code>oslc_sysmlv2:feature_IsNonunique</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	isNonunique.
<code>oslc_sysmlv2:feature_IsOrdered</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether an order exists for the values of this <b>Feature</b> or not.
<code>oslc_sysmlv2:feature_IsPortion</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether the values of this <b>Feature</b> are contained in the space and time of instances of the domain of the <b>Feature</b> and represent the same thing as those instances.
<code>oslc_sysmlv2:feature_IsReadOnly</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether the values of this <b>Feature</b> can change over the lifetime of an instance of the domain.
<code>oslc_sysmlv2:feature_IsUnique</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether or not values for this <b>Feature</b> must have no duplicates or not.
<code>oslc_sysmlv2:feature_OwnedFeatureChaining</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:FeatureChaining</code>	The <b>ownedRelationships</b> of this <b>Feature</b> that are <b>FeatureChainings</b> , for which the <b>Feature</b> will be the <b>featureChained</b> .
<code>oslc_sysmlv2:feature_OwnedFeatureInverting</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:FeatureInverting</code>	The <b>ownedRelationships</b> of this <b>Feature</b> that are <b>FeatureInvertings</b> and for which the <b>Feature</b> is the <b>featureInverted</b> .
<code>oslc_sysmlv2:feature_OwnedRedefinition</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Redefinition</code>	The <b>ownedSubsettings</b> of this <b>Feature</b> that are <b>Redefinitions</b> , for which the <b>Feature</b> is the <b>redefiningFeature</b> .

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:feature_OwnedReferenceSubsetting</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:ReferenceSubsetting</code>	The one <code>ownedSubsetting</code> of this <code>Feature</code> , if any, that is a <code>ReferenceSubsetting</code> , for which the <code>Feature</code> is the <code>referencingFeature</code> .
<code>oslc_sysmlv2:feature_OwnedSubsetting</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Subsetting</code>	The <code>ownedSpecializations</code> of this <code>Feature</code> that are <code>Subsettings</code> , for which the <code>Feature</code> is the <code>subsettingFeature</code> .
<code>oslc_sysmlv2:feature_OwnedTypeFeaturing</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:TypeFeaturing</code>	The <code>ownedRelationships</code> of this <code>Feature</code> that are <code>TypeFeaturings</code> and for which the <code>Feature</code> is the <code>featureOfType</code> .
<code>oslc_sysmlv2:feature_OwnedTyping</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:FeatureTyping</code>	The <code>ownedSpecializations</code> of this <code>Feature</code> that are <code>FeatureTypings</code> , for which the <code>Feature</code> is the <code>typedFeature</code> .
<code>oslc_sysmlv2:feature_OwningFeatureMembership</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:FeatureMembership</code>	The <code>FeatureMembership</code> that owns this <code>Feature</code> as an <code>ownedMemberFeature</code> , determining its <code>owningType</code> .
<code>oslc_sysmlv2:feature_OwningType</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The <code>Type</code> that is the <code>owningType</code> of the <code>owningFeatureMembership</code> of this <code>Feature</code> .
<code>oslc_sysmlv2:feature_Type</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	<code>Types</code> that restrict the values of this <code>Feature</code> , such that the values must be instances of all the <code>types</code> . The <code>types</code> of a <code>Feature</code> are derived from its <code>typings</code> and the <code>types</code> of its <code>subsettings</code> . If the <code>Feature</code> is chained, then the <code>types</code> of the last <code>Feature</code> in the chain are also <code>types</code> of the chained <code>Feature</code> .
<code>oslc_sysmlv2:namespace_ImportedMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Membership</code>	The <code>Memberships</code> in this <code>Namespace</code> that result from the <code>ownedImports</code> of this <code>Namespace</code> .
<code>oslc_sysmlv2:namespace_Member</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The set of all member <code>Elements</code> of this <code>Namespace</code> , which are the <code>memberElements</code> of all <code>memberships</code> of the <code>Namespace</code> .
<code>oslc_sysmlv2:namespace_Membership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Membership</code>	All <code>Memberships</code> in this <code>Namespace</code> , including (at least) the union of <code>ownedMemberships</code> and <code>importedMemberships</code> .
<code>oslc_sysmlv2:namespace_OwnedImport</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Import</code>	The <code>ownedRelationships</code> of this <code>Namespace</code> that are <code>Imports</code> , for which the <code>Namespace</code> is the <code>importOwningNamespace</code> .

<code>oslc_sysmlv2:namespace_OwnedMember</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The owned <b>members</b> of this <b>Namespace</b> , which are the <b>ownedMemberElements</b> of the <b>ownedMemberships</b> of the ..
<code>oslc_sysmlv2:namespace_OwnedMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Membership</code>	The <b>ownedRelationships</b> of this <b>Namespace</b> that are <b>Memberships</b> , for which the <b>Namespace</b> is the <b>membershipOwningNamespace</b> .
<code>oslc_sysmlv2:occurrenceUsage_IndividualDefinition</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:OccurrenceDefinition</code>	The at most one <b>occurrenceDefinition</b> that has <b>isIndividual = true</b> .
<code>oslc_sysmlv2:occurrenceUsage_IsIndividual</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether this <b>OccurrenceUsage</b> represents the usage of the specific individual (or portion of it) represented by its <b>individualDefinition</b> .
<code>oslc_sysmlv2:occurrenceUsage_OccurrenceDefinition</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Class</code>	The <b>Classes</b> that are the types of this <b>OccurrenceUsage</b> . Nominally, these are <b>OccurrenceDefinitions</b> , but other kinds of kernel <b>Classes</b> are also allowed, to permit use of <b>Classes</b> from the Kernel Model Libraries.
<code>oslc_sysmlv2:occurrenceUsage_PortionKind</code>	Zero-or-one	false	unspecified	Either	<code>oslc_sysmlv2:PortionKind</code>	The kind of (temporal) portion of the life of the <b>occurrenceDefinition</b> represented by this <b>OccurrenceUsage</b> , if it is so restricted.
<code>oslc_sysmlv2:requirementUsage_ActorParameter</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:PartUsage</code>	The <b>parameters</b> of this <b>RequirementUsage</b> that represent actors involved in the requirement.
<code>oslc_sysmlv2:requirementUsage_AssumedConstraint</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:ConstraintUsage</code>	The owned <b>ConstraintUsages</b> that represent assumptions of this <b>RequirementUsage</b> , derived as the <b>ownedConstraints</b> of the <b>RequirementConstraintMemberships</b> of the <b>RequirementUsage</b> with <b>kind = assumption</b> .
<code>oslc_sysmlv2:requirementUsage_FramedConcern</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:ConcernUsage</code>	The <b>ConcernUsages</b> framed by this <b>RequirementUsage</b> , which are the <b>ownedConcerns</b> of all <b>FramedConcernMemberships</b> of the <b>RequirementUsage</b> .
<code>oslc_sysmlv2:requirementUsage_ReqId</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	An optional modeler-specified identifier for this <b>RequirementUsage</b> (used, e.g., to link it to an original requirement text in some source document), which is the <b>declaredShortName</b> for the <b>RequirementUsage</b> .
<code>oslc_sysmlv2:requirementUsage_RequiredConstraint</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:ConstraintUsage</code>	The owned <b>ConstraintUsages</b> that represent requirements of this <b>RequirementUsage</b> , which are the <b>ownedConstraints</b> of the <b>RequirementConstraintMemberships</b> of the <b>RequirementUsage</b> with <b>kind = requirement</b> .

Standards Track Work Product

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:requirementUsage_RequirementDefinition</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:RequirementDefinition</code>	The <b>RequirementDefinition</b> that is the single <b>definition</b> of this <b>RequirementUsage</b> .
<code>oslc_sysmlv2:requirementUsage_StakeholderParameter</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:PartUsage</code>	The <b>parameters</b> of this <b>RequirementUsage</b> that represent stakeholders for the requirement.
<code>oslc_sysmlv2:requirementUsage_SubjectParameter</code>	Exactly-one	false	Resource	Either	<code>oslc_sysmlv2:Usage</code>	The <b>parameter</b> of this <b>RequirementUsage</b> that represents its subject.
<code>oslc_sysmlv2:requirementUsage_Text</code>	Zero-or-many	false	unspecified	Either	<code>xsd:string</code>	An optional textual statement of the requirement represented by this <b>RequirementUsage</b> , derived from the <b>bodies of the documentation of the RequirementUsage..</b>
<code>oslc_sysmlv2:step_Behavior</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Behavior</code>	The <b>Behaviors</b> that type this <b>Step</b> .
<code>oslc_sysmlv2:step_Parameter</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <b>parameters</b> of this <b>Step</b> , which are defined as its <b>directedFeatures</b> , whose values are passed into and/or out of a performance of the <b>Step</b> .
<code>oslc_sysmlv2:type_DifferencingType</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The interpretations of a <b>Type</b> with <b>differencingTypes</b> are asserted to be those of the first of those <b>Types</b> , but not including those of the remaining <b>Types</b> . For example, a <b>Classifier</b> might be the difference of a <b>Classifier</b> for people and another for people of a particular nationality, leaving people who are not of that nationality. Similarly, a feature of people might be the difference between a feature for their children and a <b>Classifier</b> for people of a particular sex, identifying their children not of that sex (because the interpretations of the children <b>Feature</b> that identify those of that sex are also interpretations of the <b>Classifier</b> for that sex).
<code>oslc_sysmlv2:type_DirectedFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <b>features</b> of this <b>Type</b> that have a non-null <b>direction</b> .

<code>oslc_sysmlv2:type_EndFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All <b>features</b> of this <b>Type</b> with <code>isEnd = true</code> .
<code>oslc_sysmlv2:type_Feature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <code>ownedMemberFeatures</code> of the <code>featureMemberships</code> of this <b>Type</b> .
<code>oslc_sysmlv2:type_FeatureMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:FeatureMembership</code>	The <code>FeatureMemberships</code> for <b>features</b> of this <b>Type</b> , which include all <code>ownedFeatureMemberships</code> and those <code>inheritedMemberships</code> that are <code>FeatureMemberships</code> (but does <i>not</i> include any <code>importedMemberships</code> ).
<code>oslc_sysmlv2:type_InheritedFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All the <code>memberFeatures</code> of the <code>inheritedMemberships</code> of this <b>Type</b> that are <code>FeatureMemberships</code> .
<code>oslc_sysmlv2:type_InheritedMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Membership</code>	All <code>Memberships</code> inherited by this <b>Type</b> via <code>Specialization</code> or <code>Conjugation</code> . These are included in the derived union for the <code>memberships</code> of the <b>Type</b> .
<code>oslc_sysmlv2:type_Input</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All <b>features</b> related to this <b>Type</b> by <code>FeatureMemberships</code> that have <code>direction in or inout..</code>
<code>oslc_sysmlv2:type_IntersectingType</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The interpretations of a <b>Type</b> with <code>intersectingTypes</code> are asserted to be those in common among the <code>intersectingTypes</code> , which are the <b>Types</b> derived from the <code>intersectingType</code> of the <code>ownedIntersectings</code> of this <b>Type</b> . For example, a <code>Classifier</code> might be an intersection of <code>Classifiers</code> for people of a particular sex and of a particular nationality. Similarly, a feature for people's children of a particular sex might be the intersection of a <code>Feature</code> for their children and a <code>Classifier</code> for people of that sex (because the interpretations of the children <code>Feature</code> that identify those of that sex are also interpretations of the <code>Classifier</code> for that sex).
<code>oslc_sysmlv2:type_IsAbstract</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Indicates whether instances of this <b>Type</b> must also be instances of at least one of its specialized <b>Types</b> .
<code>oslc_sysmlv2:type_IsConjugated</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Indicates whether this <b>Type</b> has an <code>ownedConjugator</code> .

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:type_IsSufficient</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether all things that meet the classification conditions of this <b>Type</b> must be classified by the <b>Type</b> .
<code>oslc_sysmlv2:type_Multiplicity</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Multiplicity</code>	An <b>ownedMember</b> of this <b>Type</b> that is a <b>Multiplicity</b> , which constrains the cardinality of the <b>Type</b> . If there is no such <b>ownedMember</b> , then the cardinality of this <b>Type</b> is constrained by all the <b>Multiplicity</b> constraints applicable to any direct supertypes.
<code>oslc_sysmlv2:type_Output</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All <b>features</b> related to this <b>Type</b> by <b>FeatureMemberships</b> that have <b>direction out or inout</b> ..
<code>oslc_sysmlv2:type_OwnedConjugator</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Conjugation</code>	A <b>Conjugation</b> owned by this <b>Type</b> for which the <b>Type</b> is the <b>originalType</b> .
<code>oslc_sysmlv2:type_OwnedDifferencing</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Differencing</code>	The <b>ownedRelationships</b> of this <b>Type</b> that are <b>Differencings</b> , having this <b>Type</b> as their <b>typeDifferenced</b> .
<code>oslc_sysmlv2:type_OwnedDisjoining</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Disjoining</code>	The <b>ownedRelationships</b> of this <b>Type</b> that are <b>Disjoinings</b> , for which the <b>Type</b> is the <b>typeDisjoined Type</b> .
<code>oslc_sysmlv2:type_OwnedEndFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All <b>endFeatures</b> of this <b>Type</b> that are <b>ownedFeatures</b> .
<code>oslc_sysmlv2:type_OwnedFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <b>ownedMemberFeatures</b> of the <b>ownedFeatureMemberships</b> of this <b>Type</b> .
<code>oslc_sysmlv2:type_OwnedFeatureMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:FeatureMembership</code>	The <b>ownedMemberships</b> of this <b>Type</b> that are <b>FeatureMemberships</b> , for which the <b>Type</b> is the <b>owningType</b> . Each such <b>FeatureMembership</b> identifies an <b>ownedFeature</b> of the <b>Type</b> .
<code>oslc_sysmlv2:type_OwnedIntersecting</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Intersecting</code>	The <b>ownedRelationships</b> of this <b>Type</b> that are <b>Intersectings</b> , have the <b>Type</b> as their <b>typeIntersected</b> .
<code>oslc_sysmlv2:type_OwnedSpecialization</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Specialization</code>	The <b>ownedRelationships</b> of this <b>Type</b> that are <b>Specializations</b> , for which the <b>Type</b> is the <b>specific Type</b> .

<code>oslc_sysmlv2:usage_NestedView</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:ViewUsage</code>	The <code>ViewUsages</code> that are <code>nestedUsages</code> of this <code>Usage</code> .

Standards Track Work Product

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:usage_NestedViewpoint</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:ViewpointUsage</code>	The <code>ViewpointUsages</code> that are <code>nestedUsages</code> of this <code>Usage</code> .
<code>oslc_sysmlv2:usage_OwningDefinition</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Definition</code>	The <code>Definition</code> that owns this <code>Usage</code> (if any).
<code>oslc_sysmlv2:usage_OwningUsage</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Usage</code>	The <code>Usage</code> in which this <code>Usage</code> is nested (if any).
<code>oslc_sysmlv2:usage_Usage</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Usage</code>	The <code>Usages</code> that are <code>features</code> of this <code>Usage</code> (not necessarily owned).
<code>oslc_sysmlv2:usage_Variant</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Usage</code>	The <code>Usages</code> which represent the variants of this <code>Usage</code> as a variation point <code>Usage</code> , if <code>isVariation = true</code> . If <code>isVariation = false</code> , then there must be no <code>variants</code> .
<code>oslc_sysmlv2:usage_VariantMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:VariantMembership</code>	The <code>ownedMemberships</code> of this <code>Usage</code> that are <code>VariantMemberships</code> . If <code>isVariation = true</code> , then this must be all <code>memberships</code> of the <code>Usage</code> . If <code>isVariation = false</code> , then <code>variantMembership</code> must be empty.
<code>oslc_sysmlv2:viewpointUsage_ViewpointDefinition</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:ViewpointDefinition</code>	The <code>ViewpointDefinition</code> that is the <code>definition</code> of this <code>ViewpointUsage</code> .
<code>oslc_sysmlv2:viewpointUsage_ViewpointStakeholder</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:PartUsage</code>	The <code>PartUsages</code> that identify the stakeholders with concerns framed by this <code>ViewpointUsage</code> , which are the owned and inherited <code>stakeholderParameters</code> of the <code>framedConcerns</code> of this <code>ViewpointUsage</code> .
<code>oslc:instanceShape</code>	Zero-or-one	false	Resource	Reference	<code>oslc:ResourceShape</code>	The URI of a Resource Shape that describes the possible properties, occurrence, value types, allowed values and labels. This shape information is useful in displaying the subject resource as well as guiding clients in performing modifications. Instance shapes may be specific to the authenticated user associated with the request that retrieved the resource, the current state of the resource and other factors and thus should not be cached.

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc:serviceProvider</code>	Zero-or-many	false	Resource	Reference	<code>oslc:ServiceProvider</code>	A link to the resource's OSLC Service Provider. There may be cases when the subject resource is available from a service provider that implements multiple domain specifications, which could result in multiple values for this property.
<code>oslc:shortTitle</code>	Zero-or-one	false	XMLLiteral	N/A	Unspecified	Short name identifying a resource, often used as an abbreviated identifier for presentation to end-users. <b>SHOULD</b> include only content that is valid inside an XHTML <code>&lt;span&gt;</code> element [sml-22].
<code>rdf:type</code>	Zero-or-many	false	Resource	Reference	<code>rdfs:Class</code>	The resource type URIs.

- **Describes:** <http://open-services.net/ns/sysmlv2#ConnectionDefinition>
- **Summary:** ConnectionDefinitionShape
- **Description:** A `ConnectionDefinition` is a `PartDefinition` that is also an `AssociationStructure`. The end `Features` of a `ConnectionDefinition` must be `Usages`.

#### ConnectionDefinition Properties

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>dcterms:contributor</code>	Zero-or-many	false	AnyResource	Either	<code>oslc:Any</code>	Contributor or contributors to the resource. It is likely that the target resource will be a foaf:Person but that is not necessarily the case.
<code>dcterms:created</code>	Zero-or-one	false	dateTime	N/A	Unspecified	Timestamp of resource creation.
<code>dcterms:creator</code>	Zero-or-many	false	AnyResource	Either	<code>oslc:Any</code>	Creator or creators of the resource. It is likely that the target resource will be a foaf:Person but that is not necessarily the case.
<code>dcterms:description</code>	Zero-or-one	false	XMLLiteral	N/A	Unspecified	Descriptive text about resource represented as rich text in XHTML content.
<code>dcterms:identifier</code>	Exactly-one	true	string	N/A	Unspecified	A unique identifier for a resource. Typically read-only and assigned by the service provider when a resource is created. Not typically intended for end-user display.

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>dcterms:modified</code>	Zero-or-one	false	dateTime	N/A	Unspecified	Timestamp of latest resource modification.
<code>dcterms:source</code>	Zero-or-one	false	Resource	Reference	<code>oslc:Any</code>	The resource URI a client can perform a get on to obtain the original non-OSLC AM formatted resource that was used to create this resource. The source resource is usually a binary or proprietary format that the service provider can consume and convert into an OSLC AM format. The service may use content negotiation with the Accept header to obtain the desired content type.
<code>dcterms:title</code>	Exactly-one	false	XMLLiteral	N/A	Unspecified	Title of the resource represented as rich text in XHTML content.
<code>dcterms:type</code>	Zero-or-many	false	string	N/A	Unspecified	A short string representation for the type, for example 'Car'.
<code>jazz_am:derives</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The resource that derives from another resource originated from or is significantly influenced by the referenced resource. For example a model element derives from a requirement.
<code>jazz_am:elaborates</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	This resource elaborates the referenced resource.
<code>jazz_am:external</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	A generic link from a resource to an external web page.
<code>jazz_am:refine</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The target is a refinement of the source. (e.g. a use case scenario might be a refinement of a textual requirement that describes the interaction).
<code>jazz_am:satisfy</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The model element satisfies the requirement (e.g. The use case satisfies a functional requirement).
<code>jazz_am:trace</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The model element has a trace to the requirement (e.g. An attribute or its value are traced to a requirement).

Standards Track Work Product

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:association_AssociationEnd</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <b>features</b> of the <b>Association</b> that identify the things that can be related by it. A concrete <b>Association</b> must have at least two <b>associationEnds</b> . When it has exactly two, the <b>Association</b> is called a <i>binary Association</i> .
<code>oslc_sysmlv2:association_RelatedType</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The <b>types</b> of the <b>associationEnds</b> of the <b>Association</b> , which are the <b>relatedElements</b> of the <b>Association</b> considered as a <b>Relationship</b> .
<code>oslc_sysmlv2:association_SourceType</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The source <b>relatedType</b> for this <b>Association</b> . It is the first <b>relatedType</b> of the <b>Association</b> .
<code>oslc_sysmlv2:association_TargetType</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The target <b>relatedTypes</b> for this <b>Association</b> . This includes all the <b>relatedTypes</b> other than the <b>sourceType</b> .
<code>oslc_sysmlv2:classifier_OwnedSubclassification</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Subclassification</code>	The <b>ownedSpecializations</b> of this <b>Classifier</b> that are <b>Subclassifications</b> , for which this <b>Classifier</b> is the <b>subclassifier</b> .
<code>oslc_sysmlv2:connectionDefinition_ConnectionEnd</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Usage</code>	The <b>Usages</b> that define the things related by the <b>ConnectionDefinition</b> .
<code>oslc_sysmlv2:definition_DirectedUsage</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Usage</code>	The <b>usages</b> of this <b>Definition</b> that are <b>directedFeatures</b> .
<code>oslc_sysmlv2:definition_IsVariation</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether this <b>Definition</b> is for a variation point or not. If true, then all the <b>memberships</b> of the <b>Definition</b> must be <b>VariantMemberships</b> .
<code>oslc_sysmlv2:definition_OwnedAction</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:ActionUsage</code>	The <b>ActionUsages</b> that are <b>ownedUsages</b> of this <b>Definition</b> .
<code>oslc_sysmlv2:definition_OwnedAllocation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:AllocationUsage</code>	The <b>AllocationUsages</b> that are <b>ownedUsages</b> of this <b>Definition</b> .
<code>oslc_sysmlv2:definition_OwnedAnalysisCase</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:AnalysisCaseUsage</code>	The <b>AnalysisCaseUsages</b> that are <b>ownedUsages</b> of this <b>Definition</b> .

<code>oslc_sysmlv2:definition_OwnedView</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:ViewUsage</code>	The <code>ViewUsages</code> that are <code>ownedUsages</code> of this <code>Definition</code> .
<code>oslc_sysmlv2:definition_OwnedViewpoint</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:ViewpointUsage</code>	The <code>ViewpointUsages</code> that are <code>ownedUsages</code> of this <code>Definition</code> .
<code>oslc_sysmlv2:definition_Usage</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Usage</code>	The <code>Usages</code> that are <code>features</code> of this <code>Definition</code> (not necessarily owned).
<code>oslc_sysmlv2:definition_Variant</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Usage</code>	The <code>Usages</code> which represent the variants of this <code>Definition</code> as a variation point <code>Definition</code> , if <code>isVariation</code> = true. If <code>isVariation</code> = false, there must be no <code>variants</code> .
<code>oslc_sysmlv2:definition_VariantMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:VariantMembership</code>	The <code>ownedMemberships</code> of this <code>Definition</code> that are <code>VariantMemberships</code> . If <code>isVariation</code> = true, then this must be all <code>ownedMemberships</code> of the <code>Definition</code> . If <code>isVariation</code> = false, then <code>variantMembership</code> must be empty.
<code>oslc_sysmlv2:element_AliasIds</code>	Zero-or-many	false	unspecified	Either	<code>xsd:string</code>	Various alternative identifiers for this <code>Element</code> . Generally, these will be set by tools.
<code>oslc_sysmlv2:element_DeclaredName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The declared name of this <code>Element</code> .
<code>oslc_sysmlv2:element_DeclaredShortName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	An optional alternative name for the <code>Element</code> that is intended to be shorter or in some way more succinct than its primary <code>name</code> . It may act as a modeler-specified identifier for the <code>Element</code> , though it is then the responsibility of the modeler to maintain the uniqueness of this identifier within a model or relative to some other context.
<code>oslc_sysmlv2:element_Documentation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Documentation</code>	The <code>Documentation</code> owned by this <code>Element</code> .
<code>oslc_sysmlv2:element_ElementId</code>	Exactly-one	false	unspecified	Either	<code>xsd:string</code>	The globally unique identifier for this <code>Element</code> . This is intended to be set by tooling, and it must not change during the lifetime of the <code>Element</code> .

## Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:element_IsImpliedIncluded</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether all necessary implied Relationships have been included in the <code>ownedRelationships</code> of this Element. This property may be true, even if there are not actually any <code>ownedRelationships</code> with <code>isImplied = true</code> , meaning that no such Relationships are actually implied for this Element. However, if it is false, then <code>ownedRelationships</code> may <i>not</i> contain any implied Relationships. That is, either <i>all</i> required implied Relationships must be included, or none of them.
<code>oslc_sysmlv2:element_IsLibraryElement</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether this Element is contained in the ownership tree of a library model.
<code>oslc_sysmlv2:element_Name</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The name to be used for this <code>Element</code> during name resolution within its <code>owningNamespace</code> . This is derived using the <code>effectiveName()</code> operation. By default, it is the same as the <code>declaredName</code> , but this is overridden for certain kinds of <code>Elements</code> to compute a <code>name</code> even when the <code>declaredName</code> is null.
<code>oslc_sysmlv2:element_OwnedAnnotation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Annotation</code>	The <code>ownedRelationships</code> of this <code>Element</code> that are <code>Annotations</code> , for which this <code>Element</code> is the <code>annotatedElement</code> .
<code>oslc_sysmlv2:element_OwnedElement</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The Elements owned by this Element, derived as the <code>ownedRelatedElements</code> of the <code>ownedRelationships</code> of this Element.
<code>oslc_sysmlv2:element_OwnedRelationship</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Relationship</code>	The Relationships for which this Element is the <code>owningRelatedElement</code> .
<code>oslc_sysmlv2:element_Owner</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The owner of this Element, derived as the <code>owningRelatedElement</code> of the <code>owningRelationship</code> of this Element, if any.
<code>oslc_sysmlv2:element_OwningMembership</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:OwningMembership</code>	The <code>owningRelationship</code> of this <code>Element</code> , if that <code>Relationship</code> is a <code>Membership</code> .
<code>oslc_sysmlv2:element_OwningNamespace</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Namespace</code>	The <code>Namespace</code> that owns this <code>Element</code> , which is the <code>membershipOwningNamespace</code> of the <code>owningMembership</code> of this <code>Element</code> , if any.
<code>oslc_sysmlv2:element_OwningRelationship</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Relationship</code>	The Relationship for which this Element is an <code>ownedRelatedElement</code> , if any.

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:element_QualifiedName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The full ownership-qualified name of this <b>Element</b> , represented in a form that is valid according to the KerML textual concrete syntax for qualified names (including use of unrestricted name notation and escaped characters, as necessary). The <code>qualifiedName</code> is null if this <b>Element</b> has no <code>owningNamespace</code> or if there is not a complete ownership chain of named <b>Namespaces</b> from a root <b>Namespace</b> to this <b>Element</b> .
<code>oslc_sysmlv2:element_ShortName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The short name to be used for this <b>Element</b> during name resolution within its <code>owningNamespace</code> . This is derived using the <code>effectiveShortName()</code> operation. By default, it is the same as the <code>declaredShortName</code> , but this is overridden for certain kinds of <b>Elements</b> to compute a <code>shortName</code> even when the <code>declaredName</code> is null.
<code>oslc_sysmlv2:element_TextualRepresentation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:TextualRepresentation</code>	The <b>TextualRepresentations</b> that annotate this <b>Element</b> .
<code>oslc_sysmlv2:namespace_ImportedMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Membership</code>	The <b>Memberships</b> in this <b>Namespace</b> that result from the <code>ownedImports</code> of this <b>Namespace</b> .
<code>oslc_sysmlv2:namespace_Member</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The set of all member <b>Elements</b> of this <b>Namespace</b> , which are the <code>memberElements</code> of all <code>memberships</code> of the <b>Namespace</b> .
<code>oslc_sysmlv2:namespace_Membership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Membership</code>	All <b>Memberships</b> in this <b>Namespace</b> , including (at least) the union of <code>ownedMemberships</code> and <code>importedMemberships</code> .
<code>oslc_sysmlv2:namespace_OwnedImport</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Import</code>	The <code>ownedRelationships</code> of this <b>Namespace</b> that are <b>Imports</b> , for which the <b>Namespace</b> is the <code>importOwningNamespace</code> .
<code>oslc_sysmlv2:namespace_OwnedMember</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The owned <code>members</code> of this <b>Namespace</b> , which are the <code>ownedMemberElements</code> of the <code>ownedMemberships</code> of the ..
<code>oslc_sysmlv2:namespace_OwnedMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Membership</code>	The <code>ownedRelationships</code> of this <b>Namespace</b> that are <b>Memberships</b> , for which the <b>Namespace</b> is the <code>membershipOwningNamespace</code> .
<code>oslc_sysmlv2:occurrenceDefinition_IsIndividual</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether this <b>OccurrenceDefinition</b> is constrained to represent single individual.

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:occurrenceDefinition_LifeClass</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:LifeClass</code>	If <code>isIndividual</code> is true, a <code>LifeClass</code> that specializes this <code>OccurrenceDefinition</code> , restricting it to represent an individual.
<code>oslc_sysmlv2:relationship_IsImplied</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether this Relationship was generated by tooling to meet semantic rules, rather than being directly created by a modeler.
<code>oslc_sysmlv2:relationship_OwnedRelatedElement</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The <code>relatedElements</code> of this Relationship that are owned by the Relationship.
<code>oslc_sysmlv2:relationship_OwningRelatedElement</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The <code>relatedElement</code> of this Relationship that owns the Relationship, if any.
<code>oslc_sysmlv2:relationship_RelatedElement</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The Elements that are related by this Relationship, derived as the union of the <code>source</code> and <code>target</code> Elements of the Relationship.
<code>oslc_sysmlv2:relationship_Source</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The <code>relatedElements</code> from which this Relationship is considered to be directed..
<code>oslc_sysmlv2:relationship_Target</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The <code>relatedElements</code> to which this Relationship is considered to be directed.
<code>oslc_sysmlv2:type_DifferencingType</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The interpretations of a <code>Type</code> with <code>differencingTypes</code> are asserted to be those of the first of those <code>Types</code> , but not including those of the remaining <code>Types</code> . For example, a <code>Classifier</code> might be the difference of a <code>Classifier</code> for people and another for people of a particular nationality, leaving people who are not of that nationality. Similarly, a feature of people might be the difference between a feature for their children and a <code>Classifier</code> for people of a particular sex, identifying their children not of that sex (because the interpretations of the children <code>Feature</code> that identify those of that sex are also interpretations of the <code>Classifier</code> for that sex).
<code>oslc_sysmlv2:type_DirectedFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <code>features</code> of this <code>Type</code> that have a non-null <code>direction</code> .
<code>oslc_sysmlv2:type_EndFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All <code>features</code> of this <code>Type</code> with <code>isEnd = true</code> .

Standards Track Work Product

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:type_Feature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <code>ownedMemberFeatures</code> of the <code>featureMemberships</code> of this <code>Type</code> .
<code>oslc_sysmlv2:type_FeatureMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:FeatureMembership</code>	The <code>FeatureMemberships</code> for <code>features</code> of this <code>Type</code> , which include all <code>ownedFeatureMemberships</code> and those <code>inheritedMemberships</code> that are <code>FeatureMemberships</code> (but does <i>not</i> include any <code>importedMemberships</code> ).
<code>oslc_sysmlv2:type_InheritedFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All the <code>memberFeatures</code> of the <code>inheritedMemberships</code> of this <code>Type</code> that are <code>FeatureMemberships</code> .
<code>oslc_sysmlv2:type_InheritedMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Membership</code>	All <code>Memberships</code> inherited by this <code>Type</code> via <code>Specialization</code> or <code>Conjugation</code> . These are included in the derived union for the <code>memberships</code> of the <code>Type</code> .
<code>oslc_sysmlv2:type_Input</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All <code>features</code> related to this <code>Type</code> by <code>FeatureMemberships</code> that have <code>direction in or inout..</code>
<code>oslc_sysmlv2:type_IntersectingType</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The interpretations of a <code>Type</code> with <code>intersectingTypes</code> are asserted to be those in common among the <code>intersectingTypes</code> , which are the <code>Types</code> derived from the <code>intersectingType</code> of the <code>ownedIntersectings</code> of this <code>Type</code> . For example, a <code>Classifier</code> might be an intersection of <code>Classifiers</code> for people of a particular sex and of a particular nationality. Similarly, a feature for people's children of a particular sex might be the intersection of a <code>Feature</code> for their children and a <code>Classifier</code> for people of that sex (because the interpretations of the children <code>Feature</code> that identify those of that sex are also interpretations of the <code>Classifier</code> for that sex).
<code>oslc_sysmlv2:type_IsAbstract</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Indicates whether instances of this <code>Type</code> must also be instances of at least one of its specialized <code>Types</code> .
<code>oslc_sysmlv2:type_IsConjugated</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Indicates whether this <code>Type</code> has an <code>ownedConjugator</code> .
<code>oslc_sysmlv2:type_IsSufficient</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether all things that meet the classification conditions of this <code>Type</code> must be classified by the <code>Type</code> .

Standards Track Work Product

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:type_Multiplicity</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Multiplicity</code>	An <code>ownedMember</code> of this <code>Type</code> that is a <code>Multiplicity</code> , which constrains the cardinality of the <code>Type</code> . If there is no such <code>ownedMember</code> , then the cardinality of this <code>Type</code> is constrained by all the <code>Multiplicity</code> constraints applicable to any direct supertypes.
<code>oslc_sysmlv2:type_Output</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All <code>features</code> related to this <code>Type</code> by <code>FeatureMemberships</code> that have <code>direction out or inout..</code>
<code>oslc_sysmlv2:type_OwnedConjugator</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Conjugation</code>	A <code>Conjugation</code> owned by this <code>Type</code> for which the <code>Type</code> is the <code>originalType</code> .
<code>oslc_sysmlv2:type_OwnedDifferencing</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Differencing</code>	The <code>ownedRelationships</code> of this <code>Type</code> that are <code>Differencings</code> , having this <code>Type</code> as their <code>typeDifferenced</code> .
<code>oslc_sysmlv2:type_OwnedDisjoining</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Disjoining</code>	The <code>ownedRelationships</code> of this <code>Type</code> that are <code>Disjoinings</code> , for which the <code>Type</code> is the <code>typeDisjoined Type</code> .
<code>oslc_sysmlv2:type_OwnedEndFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All <code>endFeatures</code> of this <code>Type</code> that are <code>ownedFeatures</code> .
<code>oslc_sysmlv2:type_OwnedFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <code>ownedMemberFeatures</code> of the <code>ownedFeatureMemberships</code> of this <code>Type</code> .
<code>oslc_sysmlv2:type_OwnedFeatureMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:FeatureMembership</code>	The <code>ownedMemberships</code> of this <code>Type</code> that are <code>FeatureMemberships</code> , for which the <code>Type</code> is the <code>owningType</code> . Each such <code>FeatureMembership</code> identifies an <code>ownedFeature</code> of the <code>Type</code> .
<code>oslc_sysmlv2:type_OwnedIntersecting</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Intersecting</code>	The <code>ownedRelationships</code> of this <code>Type</code> that are <code>Intersectings</code> , have the <code>Type</code> as their <code>typeIntersected</code> .
<code>oslc_sysmlv2:type_OwnedSpecialization</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Specialization</code>	The <code>ownedRelationships</code> of this <code>Type</code> that are <code>Specializations</code> , for which the <code>Type</code> is the <code>specific Type</code> .
<code>oslc_sysmlv2:type_OwnedUnioning</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Unioning</code>	The <code>ownedRelationships</code> of this <code>Type</code> that are <code>Unionings</code> , having the <code>Type</code> as their <code>typeUnioned</code> .

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:type_UnioningType</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The interpretations of a <b>Type</b> with <b>unioningTypes</b> are asserted to be the same as those of all the <b>unioningTypes</b> together, which are the <b>Types</b> derived from the <b>unioningType</b> of the <b>ownedUnionings</b> of this <b>Type</b> . For example, a <b>Classifier</b> for people might be the union of <b>Classifiers</b> for all the sexes. Similarly, a feature for people's children might be the union of features dividing them in the same ways as people in general.
<code>oslc:instanceShape</code>	Zero-or-one	false	Resource	Reference	<code>oslc:ResourceShape</code>	The URI of a Resource Shape that describes the possible properties, occurrence, value types, allowed values and labels. This shape information is useful in displaying the subject resource as well as guiding clients in performing modifications. Instance shapes may be specific to the authenticated user associated with the request that retrieved the resource, the current state of the resource and other factors and thus should not be cached.
<code>oslc:serviceProvider</code>	Zero-or-many	false	Resource	Reference	<code>oslc:ServiceProvider</code>	A link to the resource's OSLC Service Provider. There may be cases when the subject resource is available from a service provider that implements multiple domain specifications, which could result in multiple values for this property.
<code>oslc:shortTitle</code>	Zero-or-one	false	XMLLiteral	N/A	Unspecified	Short name identifying a resource, often used as an abbreviated identifier for presentation to end-users. <b>SHOULD</b> include only content that is valid inside an XHTML <code>&lt;span&gt;</code> element [sml-23].
<code>rdf:type</code>	Zero-or-many	false	Resource	Reference	<code>rdfs:Class</code>	The resource type URIs.

- **Describes:** <http://open-services.net/ns/sysmlv2#Relationship>
- **Summary:** RelationshipShape
- **Description:** A **Relationship** is an **Element** that relates other **Element**. Some of its **relatedElements** may be owned, in which case those **ownedRelatedElements** will be deleted from a model if their **owningRelationship** is. A **Relationship** may also be owned by another **Element**, in which case the **ownedRelatedElements** of the **Relationship** are also considered to be transitively owned by the **owningRelatedElement** of the **Relationship**.

**Relationship Properties**

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>dcterms:contributor</code>	Zero-or-many	false	AnyResource	Either	<code>oslc:Any</code>	Contributor or contributors to the resource. It is likely that the target resource will be a foaf:Person but that is not necessarily the case.
<code>dcterms:created</code>	Zero-or-one	false	dateTime	N/A	Unspecified	Timestamp of resource creation.
<code>dcterms:creator</code>	Zero-or-many	false	AnyResource	Either	<code>oslc:Any</code>	Creator or creators of the resource. It is likely that the target resource will be a foaf:Person but that is not necessarily the case.
<code>dcterms:description</code>	Zero-or-one	false	XMLLiteral	N/A	Unspecified	Descriptive text about resource represented as rich text in XHTML content.
<code>dcterms:identifier</code>	Exactly-one	true	string	N/A	Unspecified	A unique identifier for a resource. Typically read-only and assigned by the service provider when a resource is created. Not typically intended for end-user display.
<code>dcterms:modified</code>	Zero-or-one	false	dateTime	N/A	Unspecified	Timestamp of latest resource modification.
<code>dcterms:source</code>	Zero-or-one	false	Resource	Reference	<code>oslc:Any</code>	The resource URI a client can perform a get on to obtain the original non-OSLC AM formatted resource that was used to create this resource. The source resource is usually a binary or proprietary format that the service provider can consume and convert into an OSLC AM format. The service may use content negotiation with the Accept header to obtain the desired content type.
<code>dcterms:title</code>	Exactly-one	false	XMLLiteral	N/A	Unspecified	Title of the resource represented as rich text in XHTML content.
<code>dcterms:type</code>	Zero-or-many	false	string	N/A	Unspecified	A short string representation for the type, for example 'Car'.
<code>jazz_am:derives</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The resource that derives from another resource originated from or is significantly influenced by the referenced resource. For example a model element derives from a requirement.
<code>jazz_am:elaborates</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	This resource elaborates the referenced resource.

<code>oslc_sysmlv2:relationship_OwnedRelatedElement</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The <code>relatedElements</code> of this Relationship that are owned by the Relationship.
<code>oslc_sysmlv2:relationship_OwningRelatedElement</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The <code>relatedElement</code> of this Relationship that owns the Relationship, if any.
<code>oslc_sysmlv2:relationship_RelatedElement</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The <b>Elements</b> that are related by this Relationship, derived as the union of the <code>source</code> and <code>target</code> <b>Elements</b> of the Relationship.
<code>oslc_sysmlv2:relationship_Source</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The <code>relatedElements</code> from which this Relationship is considered to be directed..
<code>oslc_sysmlv2:relationship_Target</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The <code>relatedElements</code> to which this Relationship is considered to be directed.

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc:instanceShape</code>	Zero-or-one	false	Resource	Reference	<code>oslc:ResourceShape</code>	The URI of a Resource Shape that describes the possible properties, occurrence, value types, allowed values and labels. This shape information is useful in displaying the subject resource as well as guiding clients in performing modifications. Instance shapes may be specific to the authenticated user associated with the request that retrieved the resource, the current state of the resource and other factors and thus should not be cached.
<code>oslc:serviceProvider</code>	Zero-or-many	false	Resource	Reference	<code>oslc:ServiceProvider</code>	A link to the resource's OSLC Service Provider. There may be cases when the subject resource is available from a service provider that implements multiple domain specifications, which could result in multiple values for this property.
<code>oslc:shortTitle</code>	Zero-or-one	false	XMLLiteral	N/A	Unspecified	Short name identifying a resource, often used as an abbreviated identifier for presentation to end-users. <b>SHOULD</b> include only content that is valid inside an XHTML <code>&lt;span&gt;</code> element [sml-24].
<code>rdf:type</code>	Zero-or-many	false	Resource	Reference	<code>rdfs:Class</code>	The resource type URIs.

- **Describes:** <http://open-services.net/ns/sysmlv2#Intersecting>
- **Summary:** IntersectingShape
- **Description:** `Intersecting` is a `Relationship` that makes its `intersectingType` one of the `intersectingTypes` of its `typeIntersected`.

#### Intersecting Properties

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>dcterms:contributor</code>	Zero-or-many	false	AnyResource	Either	<code>oslc:Any</code>	Contributor or contributors to the resource. It is likely that the target resource will be a foaf:Person but that is not necessarily the case.
<code>dcterms:created</code>	Zero-or-one	false	dateTime	N/A	Unspecified	Timestamp of resource creation.
<code>dcterms:creator</code>	Zero-or-many	false	AnyResource	Either	<code>oslc:Any</code>	Creator or creators of the resource. It is likely that the target resource will be a foaf:Person but that is not necessarily the case.
<code>dcterms:description</code>	Zero-or-one	false	XMLLiteral	N/A	Unspecified	Descriptive text about resource represented as rich text in XHTML content.

Standards Track Work Product

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>dcterms:identifier</code>	Exactly-one	true	string	N/A	Unspecified	A unique identifier for a resource. Typically read-only and assigned by the service provider when a resource is created. Not typically intended for end-user display.
<code>dcterms:modified</code>	Zero-or-one	false	dateTime	N/A	Unspecified	Timestamp of latest resource modification.
<code>dcterms:source</code>	Zero-or-one	false	Resource	Reference	<code>oslc:Any</code>	The resource URI a client can perform a get on to obtain the original non-OSLC AM formatted resource that was used to create this resource. The source resource is usually a binary or proprietary format that the service provider can consume and convert into an OSLC AM format. The service may use content negotiation with the Accept header to obtain the desired content type.
<code>dcterms:title</code>	Exactly-one	false	XMLLiteral	N/A	Unspecified	Title of the resource represented as rich text in XHTML content.
<code>dcterms:type</code>	Zero-or-many	false	string	N/A	Unspecified	A short string representation for the type, for example 'Car'.
<code>jazz_am:derives</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The resource that derives from another resource originated from or is significantly influenced by the referenced resource. For example a model element derives from a requirement.
<code>jazz_am:elaborates</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	This resource elaborates the referenced resource.
<code>jazz_am:external</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	A generic link from a resource to an external web page.
<code>jazz_am:refine</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The target is a refinement of the source. (e.g. a use case scenario might be a refinement of a textual requirement that describes the interaction).
<code>jazz_am:satisfy</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The model element satisfies the requirement (e.g. The use case satisfies a functional requirement).
<code>jazz_am:trace</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The model element has a trace to the requirement (e.g. An attribute or its value are traced to a requirement).

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:element_AliasIds</code>	Zero-or-many	false	unspecified	Either	<code>xsd:string</code>	Various alternative identifiers for this Element. Generally, these will be set by tools.
<code>oslc_sysmlv2:element_DeclaredName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The declared name of this Element.
<code>oslc_sysmlv2:element_DeclaredShortName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	An optional alternative name for the Element that is intended to be shorter or in some way more succinct than its primary name. It may act as a modeler-specified identifier for the Element, though it is then the responsibility of the modeler to maintain the uniqueness of this identifier within a model or relative to some other context.
<code>oslc_sysmlv2:element_Documentation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Documentation</code>	The Documentation owned by this Element.
<code>oslc_sysmlv2:element_ElementId</code>	Exactly-one	false	unspecified	Either	<code>xsd:string</code>	The globally unique identifier for this Element. This is intended to be set by tooling, and it must not change during the lifetime of the Element.
<code>oslc_sysmlv2:element_IsImpliedIncluded</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether all necessary implied Relationships have been included in the <code>ownedRelationships</code> of this Element. This property may be true, even if there are not actually any <code>ownedRelationships</code> with <code>isImplied = true</code> , meaning that no such Relationships are actually implied for this Element. However, if it is false, then <code>ownedRelationships</code> may <i>not</i> contain any implied Relationships. That is, either <i>all</i> required implied Relationships must be included, or none of them.
<code>oslc_sysmlv2:element_IsLibraryElement</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether this Element is contained in the ownership tree of a library model.
<code>oslc_sysmlv2:element_Name</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The name to be used for this Element during name resolution within its <code>owningNamespace</code> . This is derived using the <code>effectiveName()</code> operation. By default, it is the same as the <code>declaredName</code> , but this is overridden for certain kinds of Elements to compute a name even when the <code>declaredName</code> is null.
<code>oslc_sysmlv2:element_OwnedAnnotation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Annotation</code>	The <code>ownedRelationships</code> of this Element that are Annotations, for which this Element is the <code>annotatedElement</code> .

Standards Track Work Product

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:element_OwnedElement</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The Elements owned by this Element, derived as the <code>ownedRelatedElements</code> of the <code>ownedRelationships</code> of this Element.
<code>oslc_sysmlv2:element_OwnedRelationship</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Relationship</code>	The Relationships for which this Element is the <code>owningRelatedElement</code> .
<code>oslc_sysmlv2:element_Owner</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The owner of this Element, derived as the <code>owningRelatedElement</code> of the <code>owningRelationship</code> of this Element, if any.
<code>oslc_sysmlv2:element_OwningMembership</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:OwningMembership</code>	The <code>owningRelationship</code> of this Element, if that Relationship is a Membership.
<code>oslc_sysmlv2:element_OwningNamespace</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Namespace</code>	The Namespace that owns this Element, which is the <code>membershipOwningNamespace</code> of the <code>owningMembership</code> of this Element, if any.
<code>oslc_sysmlv2:element_OwningRelationship</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Relationship</code>	The Relationship for which this Element is an <code>ownedRelatedElement</code> , if any.
<code>oslc_sysmlv2:element_QualifiedName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The full ownership-qualified name of this Element, represented in a form that is valid according to the KerML textual concrete syntax for qualified names (including use of unrestricted name notation and escaped characters, as necessary). The <code>qualifiedName</code> is null if this Element has no <code>owningNamespace</code> or if there is not a complete ownership chain of named Namespaces from a root Namespace to this Element.
<code>oslc_sysmlv2:element_ShortName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The short name to be used for this Element during name resolution within its <code>owningNamespace</code> . This is derived using the <code>effectiveShortName()</code> operation. By default, it is the same as the <code>declaredShortName</code> , but this is overridden for certain kinds of Elements to compute a <code>shortName</code> even when the <code>declaredName</code> is null.
<code>oslc_sysmlv2:element_TextualRepresentation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:TextualRepresentation</code>	The <code>TextualRepresentations</code> that annotate this Element.
<code>oslc_sysmlv2:intersecting_IntersectingType</code>	Exactly-one	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	Type that partly determines interpretations of <code>typeIntersected</code> , as described in <code>Type::intersectingType</code> .
<code>oslc_sysmlv2:intersecting_TypeIntersected</code>	Exactly-one	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	Type with interpretations partly determined by <code>intersectingType</code> , as described in <code>Type::intersectingType</code> .

Standards Track Work Product

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:relationship_IsImplied</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether this Relationship was generated by tooling to meet semantic rules, rather than being directly created by a modeler.
<code>oslc_sysmlv2:relationship_OwnedRelatedElement</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The <code>relatedElements</code> of this Relationship that are owned by the Relationship.
<code>oslc_sysmlv2:relationship_OwningRelatedElement</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The <code>relatedElement</code> of this Relationship that owns the Relationship, if any.
<code>oslc_sysmlv2:relationship_RelatedElement</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The Elements that are related by this Relationship, derived as the union of the <code>source</code> and <code>target</code> Elements of the Relationship.
<code>oslc_sysmlv2:relationship_Source</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The <code>relatedElements</code> from which this Relationship is considered to be directed..
<code>oslc_sysmlv2:relationship_Target</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The <code>relatedElements</code> to which this Relationship is considered to be directed.
<code>oslc:instanceShape</code>	Zero-or-one	false	Resource	Reference	<code>oslc:ResourceShape</code>	The URI of a Resource Shape that describes the possible properties, occurrence, value types, allowed values and labels. This shape information is useful in displaying the subject resource as well as guiding clients in performing modifications. Instance shapes may be specific to the authenticated user associated with the request that retrieved the resource, the current state of the resource and other factors and thus should not be cached.
<code>oslc:serviceProvider</code>	Zero-or-many	false	Resource	Reference	<code>oslc:ServiceProvider</code>	A link to the resource's OSLC Service Provider. There may be cases when the subject resource is available from a service provider that implements multiple domain specifications, which could result in multiple values for this property.
<code>oslc:shortTitle</code>	Zero-or-one	false	XMLLiteral	N/A	Unspecified	Short name identifying a resource, often used as an abbreviated identifier for presentation to end-users. <b>SHOULD</b> include only content that is valid inside an XHTML <code>&lt;span&gt;</code> element [sml-25].
<code>rdf:type</code>	Zero-or-many	false	Resource	Reference	<code>rdfs:Class</code>	The resource type URIs.

- **Describes:** <http://open-services.net/ns/sysmlv2#ParameterMembership>

## Standards Track Work Product

- **Summary:** ParameterMembershipShape
- **Description:** A **ParameterMembership** is a **FeatureMembership** that identifies its **memberFeature** as a parameter, which is always owned, and must have a **direction**. A **ParameterMembership** must be owned by a **Behavior** or a **Step**.

### ParameterMembership Properties

## Standards Track Work Product

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>dcterms:creator</code>	Zero-or-many	false	AnyResource	Either	<code>oslc:Any</code>	Creator or creators of the resource. It is likely that the target resource will be a foaf:Person but that is not necessarily the case.
<code>dcterms:description</code>	Zero-or-one	false	XMLLiteral	N/A	Unspecified	Descriptive text about resource represented as rich text in XHTML content.
<code>dcterms:identifier</code>	Exactly-one	true	string	N/A	Unspecified	A unique identifier for a resource. Typically read-only and assigned by the service provider when a resource is created. Not typically intended for end-user display.
<code>dcterms:modified</code>	Zero-or-one	false	dateTime	N/A	Unspecified	Timestamp of latest resource modification.
<code>dcterms:source</code>	Zero-or-one	false	Resource	Reference	<code>oslc:Any</code>	The resource URI a client can perform a get on to obtain the original non-OSLC AM formatted resource that was used to create this resource. The source resource is usually a binary or proprietary format that the service provider can consume and convert into an OSLC AM format. The service may use content negotiation with the Accept header to obtain the desired content type.
<code>dcterms:title</code>	Exactly-one	false	XMLLiteral	N/A	Unspecified	Title of the resource represented as rich text in XHTML content.
<code>dcterms:type</code>	Zero-or-many	false	string	N/A	Unspecified	A short string representation for the type, for example 'Car'.
<code>jazz_am:derives</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The resource that derives from another resource originated from or is significantly influenced by the referenced resource. For example a model element derives from a requirement.
<code>jazz_am:elaborates</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	This resource elaborates the referenced resource.
<code>jazz_am:external</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	A generic link from a resource to an external web page.
<code>jazz_am:refine</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The target is a refinement of the source. (e.g. a use case scenario might be a refinement of a textual requirement that describes the interaction).

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>jazz_am:satisfy</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The model element satisfies the requirement (e.g. The use case satisfies a functional requirement).
<code>jazz_am:trace</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The model element has a trace to the requirement (e.g. An attribute or its value are traced to a requirement).
<code>oslc_sysmlv2:classifier_OwnedSubclassification</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Subclassification</code>	The <code>ownedSpecializations</code> of this <code>Classifier</code> that are <code>Subclassifications</code> , for which this <code>Classifier</code> is the <code>subclassifier</code> .
<code>oslc_sysmlv2:element_AliasIds</code>	Zero-or-many	false	unspecified	Either	<code>xsd:string</code>	Various alternative identifiers for this Element. Generally, these will be set by tools.
<code>oslc_sysmlv2:element_DeclaredName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The declared name of this <code>Element</code> .
<code>oslc_sysmlv2:element_DeclaredShortName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	An optional alternative name for the <code>Element</code> that is intended to be shorter or in some way more succinct than its primary <code>name</code> . It may act as a modeler-specified identifier for the <code>Element</code> , though it is then the responsibility of the modeler to maintain the uniqueness of this identifier within a model or relative to some other context.
<code>oslc_sysmlv2:element_Documentation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Documentation</code>	The Documentation owned by this Element.
<code>oslc_sysmlv2:element_ElementId</code>	Exactly-one	false	unspecified	Either	<code>xsd:string</code>	The globally unique identifier for this Element. This is intended to be set by tooling, and it must not change during the lifetime of the Element.
<code>oslc_sysmlv2:element_IsImpliedIncluded</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether all necessary implied Relationships have been included in the <code>ownedRelationships</code> of this Element. This property may be true, even if there are not actually any <code>ownedRelationships</code> with <code>isImplied = true</code> , meaning that no such Relationships are actually implied for this Element. However, if it is false, then <code>ownedRelationships</code> may <i>not</i> contain any implied Relationships. That is, either <i>all</i> required implied Relationships must be included, or none of them.
<code>oslc_sysmlv2:element_IsLibraryElement</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether this Element is contained in the ownership tree of a library model.

Standards Track Work Product

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:element_Name</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The name to be used for this <b>Element</b> during name resolution within its <b>owningNamespace</b> . This is derived using the <code>effectiveName()</code> operation. By default, it is the same as the <b>declaredName</b> , but this is overridden for certain kinds of <b>Elements</b> to compute a <b>name</b> even when the <b>declaredName</b> is null.
<code>oslc_sysmlv2:element_OwnedAnnotation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Annotation</code>	The <b>ownedRelationships</b> of this <b>Element</b> that are <b>Annotations</b> , for which this <b>Element</b> is the <b>annotatedElement</b> .
<code>oslc_sysmlv2:element_OwnedElement</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The <b>Elements</b> owned by this <b>Element</b> , derived as the <b>ownedRelatedElements</b> of the <b>ownedRelationships</b> of this <b>Element</b> .
<code>oslc_sysmlv2:element_OwnedRelationship</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Relationship</code>	The <b>Relationships</b> for which this <b>Element</b> is the <b>owningRelatedElement</b> .
<code>oslc_sysmlv2:element_Owner</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The owner of this <b>Element</b> , derived as the <b>owningRelatedElement</b> of the <b>owningRelationship</b> of this <b>Element</b> , if any.
<code>oslc_sysmlv2:element_OwningMembership</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:OwningMembership</code>	The <b>owningRelationship</b> of this <b>Element</b> , if that <b>Relationship</b> is a <b>Membership</b> .
<code>oslc_sysmlv2:element_OwningNamespace</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Namespace</code>	The <b>Namespace</b> that owns this <b>Element</b> , which is the <b>membershipOwningNamespace</b> of the <b>owningMembership</b> of this <b>Element</b> , if any.
<code>oslc_sysmlv2:element_OwningRelationship</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Relationship</code>	The <b>Relationship</b> for which this <b>Element</b> is an <b>ownedRelatedElement</b> , if any.
<code>oslc_sysmlv2:element_QualifiedName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The full ownership-qualified name of this <b>Element</b> , represented in a form that is valid according to the KerML textual concrete syntax for qualified names (including use of unrestricted name notation and escaped characters, as necessary). The <b>qualifiedName</b> is null if this <b>Element</b> has no <b>owningNamespace</b> or if there is not a complete ownership chain of named <b>Namespaces</b> from a root <b>Namespace</b> to this <b>Element</b> .

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:element_ShortName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The short name to be used for this <b>Element</b> during name resolution within its <b>owningNamespace</b> . This is derived using the <code>effectiveShortName()</code> operation. By default, it is the same as the <code>declaredShortName</code> , but this is overridden for certain kinds of <b>Elements</b> to compute a <code>shortName</code> even when the <code>declaredName</code> is null.
<code>oslc_sysmlv2:element_TextualRepresentation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:TextualRepresentation</code>	The <b>TextualRepresentations</b> that annotate this <b>Element</b> .
<code>oslc_sysmlv2:namespace_ImportedMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Membership</code>	The <b>Memberships</b> in this <b>Namespace</b> that result from the <b>ownedImports</b> of this <b>Namespace</b> .
<code>oslc_sysmlv2:namespace_Member</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The set of all member <b>Elements</b> of this <b>Namespace</b> , which are the <b>memberElements</b> of all <b>memberships</b> of the <b>Namespace</b> .
<code>oslc_sysmlv2:namespace_Membership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Membership</code>	All <b>Memberships</b> in this <b>Namespace</b> , including (at least) the union of <b>ownedMemberships</b> and <b>importedMemberships</b> .
<code>oslc_sysmlv2:namespace_OwnedImport</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Import</code>	The <b>ownedRelationships</b> of this <b>Namespace</b> that are <b>Imports</b> , for which the <b>Namespace</b> is the <b>importOwningNamespace</b> .
<code>oslc_sysmlv2:namespace_OwnedMember</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The owned <b>members</b> of this <b>Namespace</b> , which are the <b>ownedMemberElements</b> of the <b>ownedMemberships</b> of the ..
<code>oslc_sysmlv2:namespace_OwnedMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Membership</code>	The <b>ownedRelationships</b> of this <b>Namespace</b> that are <b>Memberships</b> , for which the <b>Namespace</b> is the <b>membershipOwningNamespace</b> .

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:type_DifferencingType</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The interpretations of a <b>Type</b> with <b>differencingTypes</b> are asserted to be those of the first of those <b>Types</b> , but not including those of the remaining <b>Types</b> . For example, a <b>Classifier</b> might be the difference of a <b>Classifier</b> for people and another for people of a particular nationality, leaving people who are not of that nationality. Similarly, a feature of people might be the difference between a feature for their children and a <b>Classifier</b> for people of a particular sex, identifying their children not of that sex (because the interpretations of the children <b>Feature</b> that identify those of that sex are also interpretations of the <b>Classifier</b> for that sex).
<code>oslc_sysmlv2:type_DirectedFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <b>features</b> of this <b>Type</b> that have a non-null <b>direction</b> .
<code>oslc_sysmlv2:type_EndFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All <b>features</b> of this <b>Type</b> with <b>isEnd</b> = <b>true</b> .
<code>oslc_sysmlv2:type_Feature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <b>ownedMemberFeatures</b> of the <b>featureMemberships</b> of this <b>Type</b> .
<code>oslc_sysmlv2:type_FeatureMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:FeatureMembership</code>	The <b>FeatureMemberships</b> for <b>features</b> of this <b>Type</b> , which include all <b>ownedFeatureMemberships</b> and those <b>inheritedMemberships</b> that are <b>FeatureMemberships</b> (but does <i>not</i> include any <b>importedMemberships</b> ).
<code>oslc_sysmlv2:type_InheritedFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All the <b>memberFeatures</b> of the <b>inheritedMemberships</b> of this <b>Type</b> that are <b>FeatureMemberships</b> .
<code>oslc_sysmlv2:type_InheritedMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Membership</code>	All <b>Memberships</b> inherited by this <b>Type</b> via <b>Specialization</b> or <b>Conjugation</b> . These are included in the derived union for the <b>memberships</b> of the <b>Type</b> .
<code>oslc_sysmlv2:type_Input</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All <b>features</b> related to this <b>Type</b> by <b>FeatureMemberships</b> that have <b>direction</b> <b>in</b> or <b>inout</b> ..

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:type_IntersectingType</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The interpretations of a <b>Type</b> with <b>intersectingTypes</b> are asserted to be those in common among the <b>intersectingTypes</b> , which are the <b>Types</b> derived from the <b>intersectingType</b> of the <b>ownedIntersectings</b> of this <b>Type</b> . For example, a <b>Classifier</b> might be an intersection of <b>Classifiers</b> for people of a particular sex and of a particular nationality. Similarly, a feature for people's children of a particular sex might be the intersection of a <b>Feature</b> for their children and a <b>Classifier</b> for people of that sex (because the interpretations of the children <b>Feature</b> that identify those of that sex are also interpretations of the <b>Classifier</b> for that sex).
<code>oslc_sysmlv2:type_IsAbstract</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Indicates whether instances of this <b>Type</b> must also be instances of at least one of its specialized <b>Types</b> .
<code>oslc_sysmlv2:type_IsConjugated</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Indicates whether this <b>Type</b> has an <b>ownedConjugator</b> .
<code>oslc_sysmlv2:type_IsSufficient</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether all things that meet the classification conditions of this <b>Type</b> must be classified by the <b>Type</b> .
<code>oslc_sysmlv2:type_Multiplicity</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Multiplicity</code>	An <b>ownedMember</b> of this <b>Type</b> that is a <b>Multiplicity</b> , which constrains the cardinality of the <b>Type</b> . If there is no such <b>ownedMember</b> , then the cardinality of this <b>Type</b> is constrained by all the <b>Multiplicity</b> constraints applicable to any direct supertypes.
<code>oslc_sysmlv2:type_Output</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All <b>features</b> related to this <b>Type</b> by <b>FeatureMemberships</b> that have <b>direction out or inout</b> .
<code>oslc_sysmlv2:type_OwnedConjugator</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Conjugation</code>	A <b>Conjugation</b> owned by this <b>Type</b> for which the <b>Type</b> is the <b>originalType</b> .
<code>oslc_sysmlv2:type_OwnedDifferencing</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Differencing</code>	The <b>ownedRelationships</b> of this <b>Type</b> that are <b>Differencings</b> , having this <b>Type</b> as their <b>typeDifferenced</b> .
<code>oslc_sysmlv2:type_OwnedDisjoining</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Disjoining</code>	The <b>ownedRelationships</b> of this <b>Type</b> that are <b>Disjoinings</b> , for which the <b>Type</b> is the <b>typeDisjoined Type</b> .
<code>oslc_sysmlv2:type_OwnedEndFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All <b>endFeatures</b> of this <b>Type</b> that are <b>ownedFeatures</b> .

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:type_OwnedFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <code>ownedMemberFeatures</code> of the <code>ownedFeatureMemberships</code> of this <code>Type</code> .
<code>oslc_sysmlv2:type_OwnedFeatureMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:FeatureMembership</code>	The <code>ownedMemberships</code> of this <code>Type</code> that are <code>FeatureMemberships</code> , for which the <code>Type</code> is the <code>owningType</code> . Each such <code>FeatureMembership</code> identifies an <code>ownedFeature</code> of the <code>Type</code> .
<code>oslc_sysmlv2:type_OwnedIntersecting</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Intersecting</code>	The <code>ownedRelationships</code> of this <code>Type</code> that are <code>Intersectings</code> , have the <code>Type</code> as their <code>typeIntersected</code> .
<code>oslc_sysmlv2:type_OwnedSpecialization</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Specialization</code>	The <code>ownedRelationships</code> of this <code>Type</code> that are <code>Specializations</code> , for which the <code>Type</code> is the <code>specific Type</code> .
<code>oslc_sysmlv2:type_OwnedUnioning</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Unioning</code>	The <code>ownedRelationships</code> of this <code>Type</code> that are <code>Unionings</code> , having the <code>Type</code> as their <code>typeUnioned</code> .
<code>oslc_sysmlv2:type_UnioningType</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The interpretations of a <code>Type</code> with <code>unioningTypes</code> are asserted to be the same as those of all the <code>unioningTypes</code> together, which are the <code>Types</code> derived from the <code>unioningType</code> of the <code>ownedUnionings</code> of this <code>Type</code> . For example, a <code>Classifier</code> for people might be the union of <code>Classifiers</code> for all the sexes. Similarly, a feature for people's children might be the union of features dividing them in the same ways as people in general.
<code>oslc:instanceShape</code>	Zero-or-one	false	Resource	Reference	<code>oslc:ResourceShape</code>	The URI of a Resource Shape that describes the possible properties, occurrence, value types, allowed values and labels. This shape information is useful in displaying the subject resource as well as guiding clients in performing modifications. Instance shapes may be specific to the authenticated user associated with the request that retrieved the resource, the current state of the resource and other factors and thus should not be cached.
<code>oslc:serviceProvider</code>	Zero-or-many	false	Resource	Reference	<code>oslc:ServiceProvider</code>	A link to the resource's OSLC Service Provider. There may be cases when the subject resource is available from a service provider that implements multiple domain specifications, which could result in multiple values for this property.

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc:shortTitle</code>	Zero-or-one	false	XMLLiteral	N/A	Unspecified	Short name identifying a resource, often used as an abbreviated identifier for presentation to end-users. <b>SHOULD</b> include only content that is valid inside an XHTML <code>&lt;span&gt;</code> element [sml-27].
<code>rdf:type</code>	Zero-or-many	false	Resource	Reference	<code>rdfs:Class</code>	The resource type URIs.

- **Describes:** <http://open-services.net/ns/sysmlv2#Subclassification>
- **Summary:** SubclassificationShape
- **Description:** Subclassification is **Specialization** in which both the **specific** and **general Types** are **Classifier**. This means all instances of the specific **Classifier** are also instances of the general **Classifier**.

#### Subclassification Properties

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>dcterms:contributor</code>	Zero-or-many	false	AnyResource	Either	<code>oslc:Any</code>	Contributor or contributors to the resource. It is likely that the target resource will be a foaf:Person but that is not necessarily the case.
<code>dcterms:created</code>	Zero-or-one	false	dateTime	N/A	Unspecified	Timestamp of resource creation.
<code>dcterms:creator</code>	Zero-or-many	false	AnyResource	Either	<code>oslc:Any</code>	Creator or creators of the resource. It is likely that the target resource will be a foaf:Person but that is not necessarily the case.
<code>dcterms:description</code>	Zero-or-one	false	XMLLiteral	N/A	Unspecified	Descriptive text about resource represented as rich text in XHTML content.
<code>dcterms:identifier</code>	Exactly-one	true	string	N/A	Unspecified	A unique identifier for a resource. Typically read-only and assigned by the service provider when a resource is created. Not typically intended for end-user display.
<code>dcterms:modified</code>	Zero-or-one	false	dateTime	N/A	Unspecified	Timestamp of latest resource modification.

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>dcterms:source</code>	Zero-or-one	false	Resource	Reference	<code>oslc:Any</code>	The resource URI a client can perform a get on to obtain the original non-OSLC AM formatted resource that was used to create this resource. The source resource is usually a binary or proprietary format that the service provider can consume and convert into an OSLC AM format. The service may use content negotiation with the Accept header to obtain the desired content type.
<code>dcterms:title</code>	Exactly-one	false	XMLLiteral	N/A	Unspecified	Title of the resource represented as rich text in XHTML content.
<code>dcterms:type</code>	Zero-or-many	false	string	N/A	Unspecified	A short string representation for the type, for example 'Car'.
<code>jazz_am:derives</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The resource that derives from another resource originated from or is significantly influenced by the referenced resource. For example a model element derives from a requirement.
<code>jazz_am:elaborates</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	This resource elaborates the referenced resource.
<code>jazz_am:external</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	A generic link from a resource to an external web page.
<code>jazz_am:refine</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The target is a refinement of the source. (e.g. a use case scenario might be a refinement of a textual requirement that describes the interaction).
<code>jazz_am:satisfy</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The model element satisfies the requirement (e.g. The use case satisfies a functional requirement).
<code>jazz_am:trace</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The model element has a trace to the requirement (e.g. An attribute or its value are traced to a requirement).
<code>oslc_sysmlv2:element_AliasIds</code>	Zero-or-many	false	unspecified	Either	<code>xsd:string</code>	Various alternative identifiers for this Element. Generally, these will be set by tools.
<code>oslc_sysmlv2:element_DeclaredName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The declared name of this <b>Element</b> .

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:element_DeclaredShortName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	An optional alternative name for the <b>Element</b> that is intended to be shorter or in some way more succinct than its primary <b>name</b> . It may act as a modeler-specified identifier for the <b>Element</b> , though it is then the responsibility of the modeler to maintain the uniqueness of this identifier within a model or relative to some other context.
<code>oslc_sysmlv2:element_Documentation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Documentation</code>	The Documentation owned by this Element.
<code>oslc_sysmlv2:element_ElementId</code>	Exactly-one	false	unspecified	Either	<code>xsd:string</code>	The globally unique identifier for this Element. This is intended to be set by tooling, and it must not change during the lifetime of the Element.
<code>oslc_sysmlv2:element_IsImpliedIncluded</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether all necessary implied Relationships have been included in the <b>ownedRelationships</b> of this Element. This property may be true, even if there are not actually any <b>ownedRelationships</b> with <b>isImplied = true</b> , meaning that no such Relationships are actually implied for this Element. However, if it is false, then <b>ownedRelationships</b> may <i>not</i> contain any implied Relationships. That is, either <i>all</i> required implied Relationships must be included, or none of them.
<code>oslc_sysmlv2:element_IsLibraryElement</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether this Element is contained in the ownership tree of a library model.
<code>oslc_sysmlv2:element_Name</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The name to be used for this <b>Element</b> during name resolution within its <b>owningNamespace</b> . This is derived using the <b>effectiveName()</b> operation. By default, it is the same as the <b>declaredName</b> , but this is overridden for certain kinds of <b>Elements</b> to compute a <b>name</b> even when the <b>declaredName</b> is null.
<code>oslc_sysmlv2:element_OwnedAnnotation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Annotation</code>	The <b>ownedRelationships</b> of this <b>Element</b> that are <b>Annotations</b> , for which this <b>Element</b> is the <b>annotatedElement</b> .
<code>oslc_sysmlv2:element_OwnedElement</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The Elements owned by this Element, derived as the <b>ownedRelatedElements</b> of the <b>ownedRelationships</b> of this Element.
<code>oslc_sysmlv2:element_OwnedRelationship</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Relationship</code>	The Relationships for which this Element is the <b>owningRelatedElement</b> .

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:element_Owner</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The owner of this Element, derived as the <code>owningRelatedElement</code> of the <code>owningRelationship</code> of this Element, if any.
<code>oslc_sysmlv2:element_OwningMembership</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:OwningMembership</code>	The <code>owningRelationship</code> of this Element, if that Relationship is a Membership.
<code>oslc_sysmlv2:element_OwningNamespace</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Namespace</code>	The Namespace that owns this Element, which is the <code>membershipOwningNamespace</code> of the <code>owningMembership</code> of this Element, if any.
<code>oslc_sysmlv2:element_OwningRelationship</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Relationship</code>	The Relationship for which this Element is an <code>ownedRelatedElement</code> , if any.
<code>oslc_sysmlv2:element_QualifiedName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The full ownership-qualified name of this Element, represented in a form that is valid according to the KerML textual concrete syntax for qualified names (including use of unrestricted name notation and escaped characters, as necessary). The <code>qualifiedName</code> is null if this Element has no <code>owningNamespace</code> or if there is not a complete ownership chain of named Namespaces from a root Namespace to this Element.
<code>oslc_sysmlv2:element_ShortName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The short name to be used for this Element during name resolution within its <code>owningNamespace</code> . This is derived using the <code>effectiveShortName()</code> operation. By default, it is the same as the <code>declaredShortName</code> , but this is overridden for certain kinds of Elements to compute a <code>shortName</code> even when the <code>declaredName</code> is null.
<code>oslc_sysmlv2:element_TextualRepresentation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:TextualRepresentation</code>	The <code>TextualRepresentations</code> that annotate this Element.
<code>oslc_sysmlv2:relationship_IsImplied</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether this Relationship was generated by tooling to meet semantic rules, rather than being directly created by a modeler.
<code>oslc_sysmlv2:relationship_OwnedRelatedElement</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The <code>relatedElements</code> of this Relationship that are owned by the Relationship.
<code>oslc_sysmlv2:relationship_OwningRelatedElement</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The <code>relatedElement</code> of this Relationship that owns the Relationship, if any.
<code>oslc_sysmlv2:relationship_RelatedElement</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The Elements that are related by this Relationship, derived as the union of the <code>source</code> and <code>target</code> Elements of the Relationship.

Standards Track Work Product

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:relationship_Source</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The <code>relatedElements</code> from which this Relationship is considered to be directed..
<code>oslc_sysmlv2:relationship_Target</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The <code>relatedElements</code> to which this Relationship is considered to be directed.
<code>oslc_sysmlv2:specialization_General</code>	Exactly-one	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	A <code>Type</code> with a superset of all instances of the <code>specific Type</code> , which might be the same set.
<code>oslc_sysmlv2:specialization_OwningType</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The <code>Type</code> that is the <code>specific Type</code> of this <code>Specialization</code> and owns it as its <code>owningRelatedElement</code> .
<code>oslc_sysmlv2:specialization_Specific</code>	Exactly-one	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	A <code>Type</code> with a subset of all instances of the <code>general Type</code> , which might be the same set.
<code>oslc_sysmlv2:subclassification_OwningClassifier</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Classifier</code>	The <code>Classifier</code> that owns this <code>Subclassification</code> relationship, which must also be its <code>subclassifier</code> .
<code>oslc_sysmlv2:subclassification_Subclassifier</code>	Exactly-one	false	Resource	Either	<code>oslc_sysmlv2:Classifier</code>	The more specific <code>Classifier</code> in this <code>Subclassification</code> .
<code>oslc_sysmlv2:subclassification_Superclassifier</code>	Exactly-one	false	Resource	Either	<code>oslc_sysmlv2:Classifier</code>	The more <code>general</code> <code>Classifier</code> in this <code>Subclassification</code> .
<code>oslc:instanceShape</code>	Zero-or-one	false	Resource	Reference	<code>oslc:ResourceShape</code>	The URI of a Resource Shape that describes the possible properties, occurrence, value types, allowed values and labels. This shape information is useful in displaying the subject resource as well as guiding clients in performing modifications. Instance shapes may be specific to the authenticated user associated with the request that retrieved the resource, the current state of the resource and other factors and thus should not be cached.
<code>oslc:serviceProvider</code>	Zero-or-many	false	Resource	Reference	<code>oslc:ServiceProvider</code>	A link to the resource's OSLC Service Provider. There may be cases when the subject resource is available from a service provider that implements multiple domain specifications, which could result in multiple values for this property.
<code>oslc:shortTitle</code>	Zero-or-one	false	XMLLiteral	N/A	Unspecified	Short name identifying a resource, often used as an abbreviated identifier for presentation to end-users. <b>SHOULD</b> include only content that is valid inside an XHTML <code>&lt;span&gt;</code> element [sml-28].

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>rdf:type</code>	Zero-or-many	false	Resource	Reference	<code>rdfs:Class</code>	The resource type URIs.

- **Describes:** <http://open-services.net/ns/sysmlv2#Element>
- **Summary:** ElementShape
- **Description:** An **Element** is a constituent of a model that is uniquely identified relative to all other **Elements**. It can have **Relationships** with other **Elements**. Some of these **Relationships** might imply ownership of other **Elements**, which means that if an **Element** is deleted from a model, then so are all the **Elements** that it owns.

### Element Properties

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>dcterms:contributor</code>	Zero-or-many	false	AnyResource	Either	<code>oslc:Any</code>	Contributor or contributors to the resource. It is likely that the target resource will be a foaf:Person but that is not necessarily the case.
<code>dcterms:created</code>	Zero-or-one	false	dateTime	N/A	Unspecified	Timestamp of resource creation.
<code>dcterms:creator</code>	Zero-or-many	false	AnyResource	Either	<code>oslc:Any</code>	Creator or creators of the resource. It is likely that the target resource will be a foaf:Person but that is not necessarily the case.
<code>dcterms:description</code>	Zero-or-one	false	XMLLiteral	N/A	Unspecified	Descriptive text about resource represented as rich text in XHTML content.
<code>dcterms:identifier</code>	Exactly-one	true	string	N/A	Unspecified	A unique identifier for a resource. Typically read-only and assigned by the service provider when a resource is created. Not typically intended for end-user display.
<code>dcterms:modified</code>	Zero-or-one	false	dateTime	N/A	Unspecified	Timestamp of latest resource modification.
<code>dcterms:source</code>	Zero-or-one	false	Resource	Reference	<code>oslc:Any</code>	The resource URI a client can perform a get on to obtain the original non-OSLC AM formatted resource that was used to create this resource. The source resource is usually a binary or proprietary format that the service provider can consume and convert into an OSLC AM format. The service may use content negotiation with the Accept header to obtain the desired content type.
<code>dcterms:title</code>	Exactly-one	false	XMLLiteral	N/A	Unspecified	Title of the resource represented as rich text in XHTML content.

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>dcterms:type</code>	Zero-or-many	false	string	N/A	Unspecified	A short string representation for the type, for example 'Car'.
<code>jazz_am:derives</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The resource that derives from another resource originated from or is significantly influenced by the referenced resource. For example a model element derives from a requirement.
<code>jazz_am:elaborates</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	This resource elaborates the referenced resource.
<code>jazz_am:external</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	A generic link from a resource to an external web page.
<code>jazz_am:refine</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The target is a refinement of the source. (e.g. a use case scenario might be a refinement of a textual requirement that describes the interaction).
<code>jazz_am:satisfy</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The model element satisfies the requirement (e.g. The use case satisfies a functional requirement).
<code>jazz_am:trace</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The model element has a trace to the requirement (e.g. An attribute or its value are traced to a requirement).
<code>oslc_sysmlv2:element_AliasIds</code>	Zero-or-many	false	unspecified	Either	<code>xsd:string</code>	Various alternative identifiers for this Element. Generally, these will be set by tools.
<code>oslc_sysmlv2:element_DeclaredName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The declared name of this <b>Element</b> .
<code>oslc_sysmlv2:element_DeclaredShortName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	An optional alternative name for the <b>Element</b> that is intended to be shorter or in some way more succinct than its primary <b>name</b> . It may act as a modeler-specified identifier for the <b>Element</b> , though it is then the responsibility of the modeler to maintain the uniqueness of this identifier within a model or relative to some other context.
<code>oslc_sysmlv2:element_Documentation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Documentation</code>	The Documentation owned by this Element.

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:element_ElementId</code>	Exactly-one	false	unspecified	Either	<code>xsd:string</code>	The globally unique identifier for this Element. This is intended to be set by tooling, and it must not change during the lifetime of the Element.
<code>oslc_sysmlv2:element_IsImpliedIncluded</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether all necessary implied Relationships have been included in the <code>ownedRelationships</code> of this Element. This property may be true, even if there are not actually any <code>ownedRelationships</code> with <code>isImplied = true</code> , meaning that no such Relationships are actually implied for this Element. However, if it is false, then <code>ownedRelationships</code> may <i>not</i> contain any implied Relationships. That is, either <i>all</i> required implied Relationships must be included, or none of them.
<code>oslc_sysmlv2:element_IsLibraryElement</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether this Element is contained in the ownership tree of a library model.
<code>oslc_sysmlv2:element_Name</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The name to be used for this <code>Element</code> during name resolution within its <code>owningNamespace</code> . This is derived using the <code>effectiveName()</code> operation. By default, it is the same as the <code>declaredName</code> , but this is overridden for certain kinds of <code>Elements</code> to compute a <code>name</code> even when the <code>declaredName</code> is null.
<code>oslc_sysmlv2:element_OwnedAnnotation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Annotation</code>	The <code>ownedRelationships</code> of this <code>Element</code> that are <code>Annotations</code> , for which this <code>Element</code> is the <code>annotatedElement</code> .
<code>oslc_sysmlv2:element_OwnedElement</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The Elements owned by this Element, derived as the <code>ownedRelatedElements</code> of the <code>ownedRelationships</code> of this Element.
<code>oslc_sysmlv2:element_OwnedRelationship</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Relationship</code>	The Relationships for which this Element is the <code>owningRelatedElement</code> .
<code>oslc_sysmlv2:element_Owner</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The owner of this Element, derived as the <code>owningRelatedElement</code> of the <code>owningRelationship</code> of this Element, if any.
<code>oslc_sysmlv2:element_OwningMembership</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:OwningMembership</code>	The <code>owningRelationship</code> of this <code>Element</code> , if that <code>Relationship</code> is a <code>Membership</code> .
<code>oslc_sysmlv2:element_OwningNamespace</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Namespace</code>	The <code>Namespace</code> that owns this <code>Element</code> , which is the <code>membershipOwningNamespace</code> of the <code>owningMembership</code> of this <code>Element</code> , if any.
<code>oslc_sysmlv2:element_OwningRelationship</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Relationship</code>	The Relationship for which this Element is an <code>ownedRelatedElement</code> , if any.

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:element_QualifiedName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The full ownership-qualified name of this <b>Element</b> , represented in a form that is valid according to the KerML textual concrete syntax for qualified names (including use of unrestricted name notation and escaped characters, as necessary). The <code>qualifiedName</code> is null if this <b>Element</b> has no <code>owningNamespace</code> or if there is not a complete ownership chain of named <b>Namespaces</b> from a root <b>Namespace</b> to this <b>Element</b> .
<code>oslc_sysmlv2:element_ShortName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The short name to be used for this <b>Element</b> during name resolution within its <code>owningNamespace</code> . This is derived using the <code>effectiveShortName()</code> operation. By default, it is the same as the <code>declaredShortName</code> , but this is overridden for certain kinds of <b>Elements</b> to compute a <code>shortName</code> even when the <code>declaredName</code> is null.
<code>oslc_sysmlv2:element_TextualRepresentation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:TextualRepresentation</code>	The <b>TextualRepresentations</b> that annotate this <b>Element</b> .
<code>oslc:instanceShape</code>	Zero-or-one	false	Resource	Reference	<code>oslc:ResourceShape</code>	The URI of a Resource Shape that describes the possible properties, occurrence, value types, allowed values and labels. This shape information is useful in displaying the subject resource as well as guiding clients in performing modifications. Instance shapes may be specific to the authenticated user associated with the request that retrieved the resource, the current state of the resource and other factors and thus should not be cached.
<code>oslc:serviceProvider</code>	Zero-or-many	false	Resource	Reference	<code>oslc:ServiceProvider</code>	A link to the resource's OSLC Service Provider. There may be cases when the subject resource is available from a service provider that implements multiple domain specifications, which could result in multiple values for this property.
<code>oslc:shortTitle</code>	Zero-or-one	false	XMLLiteral	N/A	Unspecified	Short name identifying a resource, often used as an abbreviated identifier for presentation to end-users. <b>SHOULD</b> include only content that is valid inside an XHTML <code>&lt;span&gt;</code> element [sml-29].
<code>rdf:type</code>	Zero-or-many	false	Resource	Reference	<code>rdfs:Class</code>	The resource type URIs.

- **Describes:** <http://open-services.net/ns/sysmlv2#TransitionFeatureMembership>
- **Summary:** TransitionFeatureMembershipShape
- **Description:** A **TransitionFeatureMembership** is a **FeatureMembership** for a trigger, guard or effect of a **TransitionUsage**, whose `transitionFeature` is a **AcceptActionUsage**, **Boolean**-valued **Expression** or

*ActionUsage*, depending on its *kind*..

### TransitionFeatureMembership Properties

<code>dcterms:description</code>	Zero-or-one	false	XMLLiteral	N/A	Unspecified	Descriptive text about resource represented as rich text in XHTML content.
<code>dcterms:identifier</code>	Exactly-one	true	string	N/A	Unspecified	A unique identifier for a resource. Typically read-only and assigned by the service provider when a resource is created. Not typically intended for end-user display.
<code>dcterms:modified</code>	Zero-or-one	false	dateTime	N/A	Unspecified	Timestamp of latest resource modification.
<code>dcterms:source</code>	Zero-or-one	false	Resource	Reference	<code>oslc:Any</code>	The resource URI a client can perform a get on to obtain the original non-OSLC AM formatted resource that was used to create this resource. The source resource is usually a binary or proprietary format that the service provider can consume and convert into an OSLC AM format. The service may use content negotiation with the Accept header to obtain the desired content type.
<code>dcterms:title</code>	Exactly-one	false	XMLLiteral	N/A	Unspecified	Title of the resource represented as rich text in XHTML content.
<code>dcterms:type</code>	Zero-or-many	false	string	N/A	Unspecified	A short string representation for the type, for example 'Car'.
<code>jazz_am:derives</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The resource that derives from another resource originated from or is significantly influenced by the referenced resource. For example a model element derives from a requirement.
<code>jazz_am:elaborates</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	This resource elaborates the referenced resource.

Standards Track Work Product

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>jazz_am:external</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	A generic link from a resource to an external web page.
<code>jazz_am:refine</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The target is a refinement of the source. (e.g. a use case scenario might be a refinement of a textual requirement that describes the interaction).
<code>jazz_am:satisfy</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The model element satisfies the requirement (e.g. The use case satisfies a functional requirement).
<code>jazz_am:trace</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The model element has a trace to the requirement (e.g. An attribute or its value are traced to a requirement).
<code>oslc_sysmlv2:element_AliasIds</code>	Zero-or-many	false	unspecified	Either	<code>xsd:string</code>	Various alternative identifiers for this Element. Generally, these will be set by tools.
<code>oslc_sysmlv2:element_DeclaredName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The declared name of this <b>Element</b> .
<code>oslc_sysmlv2:element_DeclaredShortName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	An optional alternative name for the <b>Element</b> that is intended to be shorter or in some way more succinct than its primary <b>name</b> . It may act as a modeler-specified identifier for the <b>Element</b> , though it is then the responsibility of the modeler to maintain the uniqueness of this identifier within a model or relative to some other context.
<code>oslc_sysmlv2:element_Documentation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Documentation</code>	The Documentation owned by this Element.
<code>oslc_sysmlv2:element_ElementId</code>	Exactly-one	false	unspecified	Either	<code>xsd:string</code>	The globally unique identifier for this Element. This is intended to be set by tooling, and it must not change during the lifetime of the Element.

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:element_IsImpliedIncluded</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether all necessary implied Relationships have been included in the <code>ownedRelationships</code> of this Element. This property may be true, even if there are not actually any <code>ownedRelationships</code> with <code>isImplied = true</code> , meaning that no such Relationships are actually implied for this Element. However, if it is false, then <code>ownedRelationships</code> may <i>not</i> contain any implied Relationships. That is, either <i>all</i> required implied Relationships must be included, or none of them.
<code>oslc_sysmlv2:element_IsLibraryElement</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether this Element is contained in the ownership tree of a library model.
<code>oslc_sysmlv2:element_Name</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The name to be used for this <code>Element</code> during name resolution within its <code>owningNamespace</code> . This is derived using the <code>effectiveName()</code> operation. By default, it is the same as the <code>declaredName</code> , but this is overridden for certain kinds of <code>Elements</code> to compute a <code>name</code> even when the <code>declaredName</code> is null.
<code>oslc_sysmlv2:element_OwnedAnnotation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Annotation</code>	The <code>ownedRelationships</code> of this <code>Element</code> that are <code>Annotations</code> , for which this <code>Element</code> is the <code>annotatedElement</code> .
<code>oslc_sysmlv2:element_OwnedElement</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The Elements owned by this Element, derived as the <code>ownedRelatedElements</code> of the <code>ownedRelationships</code> of this Element.
<code>oslc_sysmlv2:element_OwnedRelationship</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Relationship</code>	The Relationships for which this Element is the <code>owningRelatedElement</code> .
<code>oslc_sysmlv2:element_Owner</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The owner of this Element, derived as the <code>owningRelatedElement</code> of the <code>owningRelationship</code> of this Element, if any.
<code>oslc_sysmlv2:element_OwningMembership</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:OwningMembership</code>	The <code>owningRelationship</code> of this <code>Element</code> , if that <code>Relationship</code> is a <code>Membership</code> .
<code>oslc_sysmlv2:element_OwningNamespace</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Namespace</code>	The <code>Namespace</code> that owns this <code>Element</code> , which is the <code>membershipOwningNamespace</code> of the <code>owningMembership</code> of this <code>Element</code> , if any.

It may act as a modeler-specified identifier for the <b>Element</b> , though it is then the responsibility of the modeler to maintain the uniqueness of this identifier within a model or relative to some other context.
<code>oslc_sysmlv2:element_Documentation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Documentation</code>	The Documentation owned by this Element.
<code>oslc_sysmlv2:element_ElementId</code>	Exactly-one	false	unspecified	Either	<code>xsd:string</code>	The globally unique identifier for this Element. This is intended to be set by tooling, and it must not change during the lifetime of the Element.
<code>oslc_sysmlv2:element_IsImpliedIncluded</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether all necessary implied Relationships have been included in the <b>ownedRelationships</b> of this Element. This property may be true, even if there are not actually any <b>ownedRelationships</b> with <b>isImplied = true</b> , meaning that no such Relationships are actually implied for this Element. However, if it is false, then <b>ownedRelationships</b> may <i>not</i> contain any implied Relationships. That is, either <i>all</i> required implied Relationships must be included, or none of them.
<code>oslc_sysmlv2:element_IsLibraryElement</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether this Element is contained in the ownership tree of a library model.

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:element_Name</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The name to be used for this <b>Element</b> during name resolution within its <b>owningNamespace</b> . This is derived using the <b>effectiveName()</b> operation. By default, it is the same as the <b>declaredName</b> , but this is overridden for certain kinds of <b>Elements</b> to compute a <b>name</b> even when the <b>declaredName</b> is null.
<code>oslc_sysmlv2:element_OwnedAnnotation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Annotation</code>	The <b>ownedRelationships</b> of this <b>Element</b> that are <b>Annotations</b> , for which this <b>Element</b> is the <b>annotatedElement</b> .
<code>oslc_sysmlv2:element_OwnedElement</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The <b>Elements</b> owned by this <b>Element</b> , derived as the <b>ownedRelatedElements</b> of the <b>ownedRelationships</b> of this <b>Element</b> .
<code>oslc_sysmlv2:element_OwnedRelationship</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Relationship</code>	The <b>Relationships</b> for which this <b>Element</b> is the <b>owningRelatedElement</b> .
<code>oslc_sysmlv2:element_Owner</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The owner of this <b>Element</b> , derived as the <b>owningRelatedElement</b> of the <b>owningRelationship</b> of this <b>Element</b> , if any.
<code>oslc_sysmlv2:element_OwningMembership</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:OwningMembership</code>	The <b>owningRelationship</b> of this <b>Element</b> , if that <b>Relationship</b> is a <b>Membership</b> .
<code>oslc_sysmlv2:element_OwningNamespace</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Namespace</code>	The <b>Namespace</b> that owns this <b>Element</b> , which is the <b>membershipOwningNamespace</b> of the <b>owningMembership</b> of this <b>Element</b> , if any.
<code>oslc_sysmlv2:element_OwningRelationship</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Relationship</code>	The <b>Relationship</b> for which this <b>Element</b> is an <b>ownedRelatedElement</b> , if any.
<code>oslc_sysmlv2:element_QualifiedName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The full ownership-qualified name of this <b>Element</b> , represented in a form that is valid according to the KerML textual concrete syntax for qualified names (including use of unrestricted name notation and escaped characters, as necessary). The <b>qualifiedName</b> is null if this <b>Element</b> has no <b>owningNamespace</b> or if there is not a complete ownership chain of named <b>Namespaces</b> from a root <b>Namespace</b> to this <b>Element</b> .

Standards Track Work Product

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:element_ShortName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The short name to be used for this <b>Element</b> during name resolution within its <b>owningNamespace</b> . This is derived using the <code>effectiveShortName()</code> operation. By default, it is the same as the <code>declaredShortName</code> , but this is overridden for certain kinds of <b>Elements</b> to compute a <code>shortName</code> even when the <code>declaredName</code> is null.
<code>oslc_sysmlv2:element_TextualRepresentation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:TextualRepresentation</code>	The <b>TextualRepresentations</b> that annotate this <b>Element</b> .
<code>oslc_sysmlv2:expression_Function</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Function</code>	The <b>Function</b> that types this <b>Expression</b> .
<code>oslc_sysmlv2:expression_IsModelLevelEvaluable</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether this <b>Expression</b> meets the constraints necessary to be evaluated at <i>model level</i> , that is, using metadata within the model.
<code>oslc_sysmlv2:expression_Result</code>	Exactly-one	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	.
<code>oslc_sysmlv2:feature_ChainingFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <b>Feature</b> that are chained together to determine the values of this <b>Feature</b> , derived from the <b>chainingFeatures</b> of the <b>ownedFeatureChainings</b> of this <b>Feature</b> , in the same order. The values of a <b>Feature</b> with <b>chainingFeatures</b> are the same as values of the last <b>Feature</b> in the chain, which can be found by starting with the values of the first <b>Feature</b> (for each instance of the domain of the original <b>Feature</b> ), then using each of those as domain instances to find the values of the second <b>Feature</b> in <b>chainingFeatures</b> , and so on, to values of the last <b>Feature</b> .
<code>oslc_sysmlv2:feature_Direction</code>	Zero-or-one	false	unspecified	Either	<code>oslc_sysmlv2:FeatureDirectionKind</code>	Indicates how values of this <b>Feature</b> are determined or used (as specified for the <b>FeatureDirectionKind</b> ).
<code>oslc_sysmlv2:feature_EndOwningType</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The <b>Type</b> that is related to this <b>Feature</b> by an <b>EndFeatureMembership</b> in which the <b>Feature</b> is an <b>ownedMemberFeature</b> .
<code>oslc_sysmlv2:feature_FeaturingType</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	<b>Types</b> that feature this <b>Feature</b> , such that any instance in the domain of the <b>Feature</b> must be classified by all of these <b>Types</b> , including at least all the <b>featuringTypes</b> of its <b>typeFeaturings</b> . If the <b>Feature</b> is chained, then the <b>featuringTypes</b> of the first <b>Feature</b> in the chain are also <b>featuringTypes</b> of the chained <b>Feature</b> .

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:type_Multiplicity</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Multiplicity</code>	An <b>ownedMember</b> of this <b>Type</b> that is a <b>Multiplicity</b> , which constrains the cardinality of the <b>Type</b> . If there is no such <b>ownedMember</b> , then the cardinality of this <b>Type</b> is constrained by all the <b>Multiplicity</b> constraints applicable to any direct supertypes.
<code>oslc_sysmlv2:type_Output</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All <b>features</b> related to this <b>Type</b> by <b>FeatureMemberships</b> that have <b>direction out or inout</b> ..
<code>oslc_sysmlv2:type_OwnedConjugator</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Conjugation</code>	A <b>Conjugation</b> owned by this <b>Type</b> for which the <b>Type</b> is the <b>originalType</b> .
<code>oslc_sysmlv2:type_OwnedDifferencing</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Differencing</code>	The <b>ownedRelationships</b> of this <b>Type</b> that are <b>Differencings</b> , having this <b>Type</b> as their <b>typeDifferenced</b> .
<code>oslc_sysmlv2:type_OwnedDisjoining</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Disjoining</code>	The <b>ownedRelationships</b> of this <b>Type</b> that are <b>Disjoinings</b> , for which the <b>Type</b> is the <b>typeDisjoined Type</b> .
<code>oslc_sysmlv2:type_OwnedEndFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All <b>endFeatures</b> of this <b>Type</b> that are <b>ownedFeatures</b> .
<code>oslc_sysmlv2:type_OwnedFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <b>ownedMemberFeatures</b> of the <b>ownedFeatureMemberships</b> of this <b>Type</b> .
<code>oslc_sysmlv2:type_OwnedFeatureMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:FeatureMembership</code>	The <b>ownedMemberships</b> of this <b>Type</b> that are <b>FeatureMemberships</b> , for which the <b>Type</b> is the <b>owningType</b> . Each such <b>FeatureMembership</b> identifies an <b>ownedFeature</b> of the <b>Type</b> .
<code>oslc_sysmlv2:type_OwnedIntersecting</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Intersecting</code>	The <b>ownedRelationships</b> of this <b>Type</b> that are <b>Intersectings</b> , have the <b>Type</b> as their <b>typeIntersected</b> .
<code>oslc_sysmlv2:type_OwnedSpecialization</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Specialization</code>	The <b>ownedRelationships</b> of this <b>Type</b> that are <b>Specializations</b> , for which the <b>Type</b> is the <b>specific Type</b> .
<code>oslc_sysmlv2:type_OwnedUnioning</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Unioning</code>	The <b>ownedRelationships</b> of this <b>Type</b> that are <b>Unionings</b> , having the <b>Type</b> as their <b>typeUnioned</b> .

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:type_UnioningType</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The interpretations of a <b>Type</b> with <b>unioningTypes</b> are asserted to be the same as those of all the <b>unioningTypes</b> together, which are the <b>Types</b> derived from the <b>unioningType</b> of the <b>ownedUnionings</b> of this <b>Type</b> . For example, a <b>Classifier</b> for people might be the union of <b>Classifiers</b> for all the sexes. Similarly, a feature for people's children might be the union of features dividing them in the same ways as people in general.
<code>oslc:instanceShape</code>	Zero-or-one	false	Resource	Reference	<code>oslc:ResourceShape</code>	The URI of a Resource Shape that describes the possible properties, occurrence, value types, allowed values and labels. This shape information is useful in displaying the subject resource as well as guiding clients in performing modifications. Instance shapes may be specific to the authenticated user associated with the request that retrieved the resource, the current state of the resource and other factors and thus should not be cached.
<code>oslc:serviceProvider</code>	Zero-or-many	false	Resource	Reference	<code>oslc:ServiceProvider</code>	A link to the resource's OSLC Service Provider. There may be cases when the subject resource is available from a service provider that implements multiple domain specifications, which could result in multiple values for this property.
<code>oslc:shortTitle</code>	Zero-or-one	false	XMLLiteral	N/A	Unspecified	Short name identifying a resource, often used as an abbreviated identifier for presentation to end-users. <b>SHOULD</b> include only content that is valid inside an XHTML <code>&lt;span&gt;</code> element [sml-33].
<code>rdf:type</code>	Zero-or-many	false	Resource	Reference	<code>rdfs:Class</code>	The resource type URIs.

- **Describes:** <http://open-services.net/ns/sysmlv2#UseCaseUsage>
- **Summary:** UseCaseUsageShape
- **Description:** A **UseCaseUsage** is a **Usage** of a **UseCaseDefinition**.

UseCaseUsage Properties

---------------	--------	-----------	------------	----------------	-------	-------------

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>dcterms:contributor</code>	Zero-or-many	false	AnyResource	Either	<code>oslc:Any</code>	Contributor or contributors to the resource. It is likely that the target resource will be a foaf:Person but that is not necessarily the case.
<code>dcterms:created</code>	Zero-or-one	false	dateTime	N/A	Unspecified	Timestamp of resource creation.
<code>dcterms:creator</code>	Zero-or-many	false	AnyResource	Either	<code>oslc:Any</code>	Creator or creators of the resource. It is likely that the target resource will be a foaf:Person but that is not necessarily the case.
<code>dcterms:description</code>	Zero-or-one	false	XMLLiteral	N/A	Unspecified	Descriptive text about resource represented as rich text in XHTML content.
<code>dcterms:identifier</code>	Exactly-one	true	string	N/A	Unspecified	A unique identifier for a resource. Typically read-only and assigned by the service provider when a resource is created. Not typically intended for end-user display.
<code>dcterms:modified</code>	Zero-or-one	false	dateTime	N/A	Unspecified	Timestamp of latest resource modification.
<code>dcterms:source</code>	Zero-or-one	false	Resource	Reference	<code>oslc:Any</code>	The resource URI a client can perform a get on to obtain the original non-OSLC AM formatted resource that was used to create this resource. The source resource is usually a binary or proprietary format that the service provider can consume and convert into an OSLC AM format. The service may use content negotiation with the Accept header to obtain the desired content type.
<code>dcterms:title</code>	Exactly-one	false	XMLLiteral	N/A	Unspecified	Title of the resource represented as rich text in XHTML content.
<code>dcterms:type</code>	Zero-or-many	false	string	N/A	Unspecified	A short string representation for the type, for example 'Car'.
<code>jazz_am:derives</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The resource that derives from another resource originated from or is significantly influenced by the referenced resource. For example a model element derives from a requirement.
<code>jazz_am:elaborates</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	This resource elaborates the referenced resource.

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>jazz_am:external</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	A generic link from a resource to an external web page.
<code>jazz_am:refine</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The target is a refinement of the source. (e.g. a use case scenario might be a refinement of a textual requirement that describes the interaction).
<code>jazz_am:satisfy</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The model element satisfies the requirement (e.g. The use case satisfies a functional requirement).
<code>jazz_am:trace</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The model element has a trace to the requirement (e.g. An attribute or its value are traced to a requirement).
<code>oslc_sysmlv2:actionUsage_ActionDefinition</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Behavior</code>	The <b>Behaviors</b> that are the <b>types</b> of this <b>ActionUsage</b> . Nominally, these would be <b>ActionDefinitions</b> , but other kinds of Kernel <b>Behaviors</b> are also allowed, to permit use of <b>Behaviors</b> from the Kernel Model Libraries.
<code>oslc_sysmlv2:calculationUsage_CalculationDefinition</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Function</code>	The Function that is the <b>type</b> of this <b>CalculationUsage</b> . Nominally, this would be a <b>CalculationDefinition</b> , but a kernel <b>Function</b> is also allowed, to permit use of <b>Functions</b> from the Kernel Model Libraries..
<code>oslc_sysmlv2:caseUsage_ActorParameter</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:PartUsage</code>	The <b>parameters</b> of this <b>CaseUsage</b> that represent actors involved in the case.
<code>oslc_sysmlv2:caseUsage_CaseDefinition</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:CaseDefinition</code>	The <b>CaseDefinition</b> that is the type of this <b>CaseUsage</b> .
<code>oslc_sysmlv2:caseUsage_ObjectiveRequirement</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:RequirementUsage</code>	The <b>RequirementUsage</b> representing the objective of this <b>CaseUsage</b> .
<code>oslc_sysmlv2:caseUsage_SubjectParameter</code>	Exactly-one	false	Resource	Either	<code>oslc_sysmlv2:Usage</code>	The <b>parameter</b> of this <b>CaseUsage</b> that represents its subject.
<code>oslc_sysmlv2:element_AliasIds</code>	Zero-or-many	false	unspecified	Either	<code>xsd:string</code>	Various alternative identifiers for this Element. Generally, these will be set by tools.
<code>oslc_sysmlv2:element_DeclaredName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The declared name of this <b>Element</b> .

Standards Track Work Product

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:element_DeclaredShortName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	An optional alternative name for the <b>Element</b> that is intended to be shorter or in some way more succinct than its primary <b>name</b> . It may act as a modeler-specified identifier for the <b>Element</b> , though it is then the responsibility of the modeler to maintain the uniqueness of this identifier within a model or relative to some other context.
<code>oslc_sysmlv2:element_Documentation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Documentation</code>	The Documentation owned by this Element.
<code>oslc_sysmlv2:element_ElementId</code>	Exactly-one	false	unspecified	Either	<code>xsd:string</code>	The globally unique identifier for this Element. This is intended to be set by tooling, and it must not change during the lifetime of the Element.
<code>oslc_sysmlv2:element_IsImpliedIncluded</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether all necessary implied Relationships have been included in the <b>ownedRelationships</b> of this Element. This property may be true, even if there are not actually any <b>ownedRelationships</b> with <b>isImplied = true</b> , meaning that no such Relationships are actually implied for this Element. However, if it is false, then <b>ownedRelationships</b> may <i>not</i> contain any implied Relationships. That is, either <i>all</i> required implied Relationships must be included, or none of them.
<code>oslc_sysmlv2:element_IsLibraryElement</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether this Element is contained in the ownership tree of a library model.
<code>oslc_sysmlv2:element_Name</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The name to be used for this <b>Element</b> during name resolution within its <b>owningNamespace</b> . This is derived using the <b>effectiveName()</b> operation. By default, it is the same as the <b>declaredName</b> , but this is overridden for certain kinds of <b>Elements</b> to compute a <b>name</b> even when the <b>declaredName</b> is null.
<code>oslc_sysmlv2:element_OwnedAnnotation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Annotation</code>	The <b>ownedRelationships</b> of this <b>Element</b> that are <b>Annotations</b> , for which this <b>Element</b> is the <b>annotatedElement</b> .
<code>oslc_sysmlv2:element_OwnedElement</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The Elements owned by this Element, derived as the <b>ownedRelatedElements</b> of the <b>ownedRelationships</b> of this Element.

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:element_OwnedRelationship</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Relationship</code>	The Relationships for which this Element is the <code>owningRelatedElement</code> .
<code>oslc_sysmlv2:element_Owner</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The owner of this Element, derived as the <code>owningRelatedElement</code> of the <code>owningRelationship</code> of this Element, if any.
<code>oslc_sysmlv2:element_OwningMembership</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:OwningMembership</code>	The <code>owningRelationship</code> of this <code>Element</code> , if that <code>Relationship</code> is a <code>Membership</code> .
<code>oslc_sysmlv2:element_OwningNamespace</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Namespace</code>	The <code>Namespace</code> that owns this <code>Element</code> , which is the <code>membershipOwningNamespace</code> of the <code>owningMembership</code> of this <code>Element</code> , if any.
<code>oslc_sysmlv2:element_OwningRelationship</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Relationship</code>	The Relationship for which this Element is an <code>ownedRelatedElement</code> , if any.
<code>oslc_sysmlv2:element_QualifiedName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The full ownership-qualified name of this <code>Element</code> , represented in a form that is valid according to the KerML textual concrete syntax for qualified names (including use of unrestricted name notation and escaped characters, as necessary). The <code>qualifiedName</code> is null if this <code>Element</code> has no <code>owningNamespace</code> or if there is not a complete ownership chain of named <code>Namespace</code> s from a root <code>Namespace</code> to this <code>Element</code> .
<code>oslc_sysmlv2:element_ShortName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The short name to be used for this <code>Element</code> during name resolution within its <code>owningNamespace</code> . This is derived using the <code>effectiveShortName()</code> operation. By default, it is the same as the <code>declaredShortName</code> , but this is overridden for certain kinds of <code>Elements</code> to compute a <code>shortName</code> even when the <code>declaredName</code> is null.
<code>oslc_sysmlv2:element_TextualRepresentation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:TextualRepresentation</code>	The <code>TextualRepresentations</code> that annotate this <code>Element</code> .
<code>oslc_sysmlv2:expression_Function</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Function</code>	The <code>Function</code> that types this <code>Expression</code> .
<code>oslc_sysmlv2:expression_IsModelLevelEvaluable</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether this <code>Expression</code> meets the constraints necessary to be evaluated at <i>model level</i> , that is, using metadata within the model.

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:expression_Result</code>	Exactly-one	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	.
<code>oslc_sysmlv2:feature_ChainingFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <b>Feature</b> that are chained together to determine the values of this <b>Feature</b> , derived from the <b>chainingFeatures</b> of the <b>ownedFeatureChainings</b> of this <b>Feature</b> , in the same order. The values of a <b>Feature</b> with <b>chainingFeatures</b> are the same as values of the last <b>Feature</b> in the chain, which can be found by starting with the values of the first <b>Feature</b> (for each instance of the domain of the original <b>Feature</b> ), then using each of those as domain instances to find the values of the second <b>Feature</b> in <b>chainingFeatures</b> , and so on, to values of the last <b>Feature</b> .
<code>oslc_sysmlv2:feature_Direction</code>	Zero-or-one	false	unspecified	Either	<code>oslc_sysmlv2:FeatureDirectionKind</code>	Indicates how values of this <b>Feature</b> are determined or used (as specified for the <b>FeatureDirectionKind</b> ).
<code>oslc_sysmlv2:feature_EndOwningType</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The <b>Type</b> that is related to this <b>Feature</b> by an <b>EndFeatureMembership</b> in which the <b>Feature</b> is an <b>ownedMemberFeature</b> .
<code>oslc_sysmlv2:feature_FeaturingType</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	<b>Types</b> that feature this <b>Feature</b> , such that any instance in the domain of the <b>Feature</b> must be classified by all of these <b>Types</b> , including at least all the <b>featuringTypes</b> of its <b>typeFeaturings</b> . If the <b>Feature</b> is chained, then the <b>featuringTypes</b> of the first <b>Feature</b> in the chain are also <b>featuringTypes</b> of the chained <b>Feature</b> .
<code>oslc_sysmlv2:feature_IsComposite</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether the <b>Feature</b> is a composite <b>feature</b> of its <b>featuringType</b> . If so, the values of the <b>Feature</b> cannot exist after its featuring instance no longer does.
<code>oslc_sysmlv2:feature_IsDerived</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether the values of this <b>Feature</b> can always be computed from the values of other <b>Features</b> .
<code>oslc_sysmlv2:feature_IsEnd</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether or not the this <b>Feature</b> is an end <b>Feature</b> , requiring a different interpretation of the <b>multiplicity</b> of the <b>Feature</b> .
<code>oslc_sysmlv2:feature_IsNonunique</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	isNonunique.
<code>oslc_sysmlv2:feature_IsOrdered</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether an order exists for the values of this <b>Feature</b> or not.

Standards Track Work Product

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:feature_IsPortion</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether the values of this <b>Feature</b> are contained in the space and time of instances of the domain of the <b>Feature</b> and represent the same thing as those instances.
<code>oslc_sysmlv2:feature_IsReadOnly</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether the values of this <b>Feature</b> can change over the lifetime of an instance of the domain.
<code>oslc_sysmlv2:feature_IsUnique</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether or not values for this <b>Feature</b> must have no duplicates or not.
<code>oslc_sysmlv2:feature_OwnedFeatureChaining</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:FeatureChaining</code>	The <b>ownedRelationships</b> of this <b>Feature</b> that are <b>FeatureChainings</b> , for which the <b>Feature</b> will be the <b>featureChained</b> .
<code>oslc_sysmlv2:feature_OwnedFeatureInverting</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:FeatureInverting</code>	The <b>ownedRelationships</b> of this <b>Feature</b> that are <b>FeatureInvertings</b> and for which the <b>Feature</b> is the <b>featureInverted</b> .
<code>oslc_sysmlv2:feature_OwnedRedefinition</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Redefinition</code>	The <b>ownedSubsettings</b> of this <b>Feature</b> that are <b>Redefinitions</b> , for which the <b>Feature</b> is the <b>redefiningFeature</b> .
<code>oslc_sysmlv2:feature_OwnedReferenceSubsetting</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:ReferenceSubsetting</code>	The one <b>ownedSubsetting</b> of this <b>Feature</b> , if any, that is a <b>ReferenceSubsetting</b> , for which the <b>Feature</b> is the <b>referencingFeature</b> .
<code>oslc_sysmlv2:feature_OwnedSubsetting</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Subsetting</code>	The <b>ownedSpecializations</b> of this <b>Feature</b> that are <b>Subsettings</b> , for which the <b>Feature</b> is the <b>subsettingFeature</b> .
<code>oslc_sysmlv2:feature_OwnedTypeFeaturing</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:TypeFeaturing</code>	The <b>ownedRelationships</b> of this <b>Feature</b> that are <b>TypeFeaturings</b> and for which the <b>Feature</b> is the <b>featureOfType</b> .
<code>oslc_sysmlv2:feature_OwnedTyping</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:FeatureTyping</code>	The <b>ownedSpecializations</b> of this <b>Feature</b> that are <b>FeatureTypings</b> , for which the <b>Feature</b> is the <b>typedFeature</b> .
<code>oslc_sysmlv2:feature_OwningFeatureMembership</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:FeatureMembership</code>	The <b>FeatureMembership</b> that owns this <b>Feature</b> as an <b>ownedMemberFeature</b> , determining its <b>owningType</b> .
<code>oslc_sysmlv2:feature_OwningType</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The <b>Type</b> that is the <b>owningType</b> of the <b>owningFeatureMembership</b> of this <b>Feature</b> .

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:feature_Type</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	<b>Types</b> that restrict the values of this <b>Feature</b> , such that the values must be instances of all the <b>types</b> . The types of a <b>Feature</b> are derived from its <b>typings</b> and the <b>types</b> of its <b>subsettings</b> . If the <b>Feature</b> is chained, then the <b>types</b> of the last <b>Feature</b> in the chain are also <b>types</b> of the chained <b>Feature</b> .
<code>oslc_sysmlv2:namespace_ImportedMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Membership</code>	The <b>Memberships</b> in this <b>Namespace</b> that result from the <b>ownedImports</b> of this <b>Namespace</b> .
<code>oslc_sysmlv2:namespace_Member</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The set of all member <b>Elements</b> of this <b>Namespace</b> , which are the <b>memberElements</b> of all <b>memberships</b> of the <b>Namespace</b> .
<code>oslc_sysmlv2:namespace_Membership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Membership</code>	All <b>Memberships</b> in this <b>Namespace</b> , including (at least) the union of <b>ownedMemberships</b> and <b>importedMemberships</b> .
<code>oslc_sysmlv2:namespace_OwnedImport</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Import</code>	The <b>ownedRelationships</b> of this <b>Namespace</b> that are <b>Imports</b> , for which the <b>Namespace</b> is the <b>importOwningNamespace</b> .
<code>oslc_sysmlv2:namespace_OwnedMember</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The owned <b>members</b> of this <b>Namespace</b> , which are the <b>ownedMemberElements</b> of the <b>ownedMemberships</b> of the ..
<code>oslc_sysmlv2:namespace_OwnedMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Membership</code>	The <b>ownedRelationships</b> of this <b>Namespace</b> that are <b>Memberships</b> , for which the <b>Namespace</b> is the <b>membershipOwningNamespace</b> .
<code>oslc_sysmlv2:occurrenceUsage_IndividualDefinition</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:OccurrenceDefinition</code>	The at most one <b>occurrenceDefinition</b> that has <b>isIndividual = true</b> .
<code>oslc_sysmlv2:occurrenceUsage_IsIndividual</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether this <b>OccurrenceUsage</b> represents the usage of the specific individual (or portion of it) represented by its <b>individualDefinition</b> .
<code>oslc_sysmlv2:occurrenceUsage_OccurrenceDefinition</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Class</code>	The <b>Classes</b> that are the types of this <b>OccurrenceUsage</b> . Nominally, these are <b>OccurrenceDefinitions</b> , but other kinds of kernel <b>Classes</b> are also allowed, to permit use of <b>Classes</b> from the Kernel Model Libraries.

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:occurrenceUsage_PortionKind</code>	Zero-or-one	false	unspecified	Either	<code>oslc_sysmlv2:PortionKind</code>	The kind of (temporal) portion of the life of the <code>occurrenceDefinition</code> represented by this <code>OccurrenceUsage</code> , if it is so restricted.
<code>oslc_sysmlv2:step_Behavior</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Behavior</code>	The <code>Behaviors</code> that type this <code>Step</code> .
<code>oslc_sysmlv2:step_Parameter</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <code>parameters</code> of this <code>Step</code> , which are defined as its <code>directedFeatures</code> , whose values are passed into and/or out of a performance of the <code>Step</code> .
<code>oslc_sysmlv2:type_DifferencingType</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The interpretations of a <code>Type</code> with <code>differencingTypes</code> are asserted to be those of the first of those <code>Types</code> , but not including those of the remaining <code>Types</code> . For example, a <code>Classifier</code> might be the difference of a <code>Classifier</code> for people and another for people of a particular nationality, leaving people who are not of that nationality. Similarly, a feature of people might be the difference between a feature for their children and a <code>Classifier</code> for people of a particular sex, identifying their children not of that sex (because the interpretations of the children <code>Feature</code> that identify those of that sex are also interpretations of the <code>Classifier</code> for that sex).
<code>oslc_sysmlv2:type_DirectedFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <code>features</code> of this <code>Type</code> that have a non-null <code>direction</code> .
<code>oslc_sysmlv2:type_EndFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All <code>features</code> of this <code>Type</code> with <code>isEnd = true</code> .
<code>oslc_sysmlv2:type_Feature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <code>ownedMemberFeatures</code> of the <code>featureMemberships</code> of this <code>Type</code> .
<code>oslc_sysmlv2:type_FeatureMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:FeatureMembership</code>	The <code>FeatureMemberships</code> for <code>features</code> of this <code>Type</code> , which include all <code>ownedFeatureMemberships</code> and those <code>inheritedMemberships</code> that are <code>FeatureMemberships</code> (but does <i>not</i> include any <code>importedMemberships</code> ).

Standards Track Work Product

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:type_InheritedFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All the <code>memberFeatures</code> of the <code>inheritedMemberships</code> of this <code>Type</code> that are <code>FeatureMemberships</code> .
<code>oslc_sysmlv2:type_InheritedMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Membership</code>	All <code>Memberships</code> inherited by this <code>Type</code> via <code>Specialization</code> or <code>Conjugation</code> . These are included in the derived union for the <code>memberships</code> of the <code>Type</code> .
<code>oslc_sysmlv2:type_Input</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All <code>features</code> related to this <code>Type</code> by <code>FeatureMemberships</code> that have <code>direction in or inout..</code>
<code>oslc_sysmlv2:type_IntersectingType</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The interpretations of a <code>Type</code> with <code>intersectingTypes</code> are asserted to be those in common among the <code>intersectingTypes</code> , which are the <code>Types</code> derived from the <code>intersectingType</code> of the <code>ownedIntersectings</code> of this <code>Type</code> . For example, a <code>Classifier</code> might be an intersection of <code>Classifiers</code> for people of a particular sex and of a particular nationality. Similarly, a feature for people's children of a particular sex might be the intersection of a <code>Feature</code> for their children and a <code>Classifier</code> for people of that sex (because the interpretations of the children <code>Feature</code> that identify those of that sex are also interpretations of the <code>Classifier</code> for that sex).
<code>oslc_sysmlv2:type_IsAbstract</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Indicates whether instances of this <code>Type</code> must also be instances of at least one of its specialized <code>Types</code> .
<code>oslc_sysmlv2:type_IsConjugated</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Indicates whether this <code>Type</code> has an <code>ownedConjugator</code> .
<code>oslc_sysmlv2:type_IsSufficient</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether all things that meet the classification conditions of this <code>Type</code> must be classified by the <code>Type</code> .
<code>oslc_sysmlv2:type_Multiplicity</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Multiplicity</code>	An <code>ownedMember</code> of this <code>Type</code> that is a <code>Multiplicity</code> , which constrains the cardinality of the <code>Type</code> . If there is no such <code>ownedMember</code> , then the cardinality of this <code>Type</code> is constrained by all the <code>Multiplicity</code> constraints applicable to any direct supertypes.
<code>oslc_sysmlv2:type_Output</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All <code>features</code> related to this <code>Type</code> by <code>FeatureMemberships</code> that have <code>direction out or inout..</code>

Standards Track Work Product

<code>oslc_sysmlv2:usage_Variant</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Usage</code>	The <b>Usages</b> which represent the variants of this <b>Usage</b> as a variation point <b>Usage</b> , if <code>isVariation = true</code> . If <code>isVariation = false</code> , then there must be no <b>variants</b> .
<code>oslc_sysmlv2:usage_VariantMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:VariantMembership</code>	The <b>ownedMemberships</b> of this <b>Usage</b> that are <b>VariantMemberships</b> . If <code>isVariation = true</code> , then this must be all <b>memberships</b> of the <b>Usage</b> . If <code>isVariation = false</code> , then <b>variantMembership</b> must be empty.
<code>oslc_sysmlv2:useCaseUsage_IncludedUseCase</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:UseCaseUsage</code>	The <b>UseCaseUsages</b> that are included by this <b>UseCaseUse</b> , which are the <b>useCaseIncluded</b> s of the <b>IncludeUseCaseUsages</b> owned by this <b>UseCaseUsage</b> .
<code>oslc_sysmlv2:useCaseUsage_UseCaseDefinition</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:UseCaseDefinition</code>	The <b>UseCaseDefinition</b> that is the <b>definition</b> of this <b>UseCaseUsage</b> .
<code>oslc:instanceShape</code>	Zero-or-one	false	Resource	Reference	<code>oslc:ResourceShape</code>	The URI of a Resource Shape that describes the possible properties, occurrence, value types, allowed values and labels. This shape information is useful in displaying the subject resource as well as guiding clients in performing modifications. Instance shapes may be specific to the authenticated user associated with the request that retrieved the resource, the current state of the resource and other factors and thus should not be cached.
<code>oslc:serviceProvider</code>	Zero-or-many	false	Resource	Reference	<code>oslc:ServiceProvider</code>	A link to the resource's OSLC Service Provider. There may be cases when the subject resource is available from a service provider that implements multiple domain specifications, which could result in multiple values for this property.
<code>oslc:shortTitle</code>	Zero-or-one	false	XMLLiteral	N/A	Unspecified	Short name identifying a resource, often used as an abbreviated identifier for presentation to end-users. <b>SHOULD</b> include only content that is valid inside an XHTML <code>&lt;span&gt;</code> element [sml-34].
<code>rdf:type</code>	Zero-or-many	false	Resource	Reference	<code>rdfs:Class</code>	The resource type URIs.

- **Describes:** <http://open-services.net/ns/sysmlv2#DataType>
- **Summary:** `DataShape`
- **Description:** A **DataType** is a **Classifier** of things (in the universe) that can only be distinguished by how they are related to other things (via **Features**). This means multiple things classified by the same **DataType**.

## DataType Properties

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>dcterms:contributor</code>	Zero-or-many	false	AnyResource	Either	<code>oslc:Any</code>	Contributor or contributors to the resource. It is likely that the target resource will be a foaf:Person but that is not necessarily the case.
<code>dcterms:created</code>	Zero-or-one	false	dateTime	N/A	Unspecified	Timestamp of resource creation.
<code>dcterms:creator</code>	Zero-or-many	false	AnyResource	Either	<code>oslc:Any</code>	Creator or creators of the resource. It is likely that the target resource will be a foaf:Person but that is not necessarily the case.
<code>dcterms:description</code>	Zero-or-one	false	XMLLiteral	N/A	Unspecified	Descriptive text about resource represented as rich text in XHTML content.
<code>dcterms:identifier</code>	Exactly-one	true	string	N/A	Unspecified	A unique identifier for a resource. Typically read-only and assigned by the service provider when a resource is created. Not typically intended for end-user display.
<code>dcterms:modified</code>	Zero-or-one	false	dateTime	N/A	Unspecified	Timestamp of latest resource modification.
<code>dcterms:source</code>	Zero-or-one	false	Resource	Reference	<code>oslc:Any</code>	The resource URI a client can perform a get on to obtain the original non-OSLC AM formatted resource that was used to create this resource. The source resource is usually a binary or proprietary format that the service provider can consume and convert into an OSLC AM format. The service may use content negotiation with the Accept header to obtain the desired content type.
<code>dcterms:title</code>	Exactly-one	false	XMLLiteral	N/A	Unspecified	Title of the resource represented as rich text in XHTML content.
<code>dcterms:type</code>	Zero-or-many	false	string	N/A	Unspecified	A short string representation for the type, for example 'Car'.
<code>jazz_am:derives</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The resource that derives from another resource originated from or is significantly influenced by the referenced resource. For example a model element derives from a requirement.
<code>jazz_am:elaborates</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	This resource elaborates the referenced resource.

Standards Track Work Product

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>jazz_am:external</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	A generic link from a resource to an external web page.
<code>jazz_am:refine</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The target is a refinement of the source. (e.g. a use case scenario might be a refinement of a textual requirement that describes the interaction).
<code>jazz_am:satisfy</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The model element satisfies the requirement (e.g. The use case satisfies a functional requirement).
<code>jazz_am:trace</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The model element has a trace to the requirement (e.g. An attribute or its value are traced to a requirement).
<code>oslc_sysmlv2:classifier_OwnedSubclassification</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Subclassification</code>	The <code>ownedSpecializations</code> of this <code>Classifier</code> that are <code>Subclassifications</code> , for which this <code>Classifier</code> is the <code>subclassifier</code> .
<code>oslc_sysmlv2:element_AliasIds</code>	Zero-or-many	false	unspecified	Either	<code>xsd:string</code>	Various alternative identifiers for this <code>Element</code> . Generally, these will be set by tools.
<code>oslc_sysmlv2:element_DeclaredName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The declared name of this <code>Element</code> .
<code>oslc_sysmlv2:element_DeclaredShortName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	An optional alternative name for the <code>Element</code> that is intended to be shorter or in some way more succinct than its primary <code>name</code> . It may act as a modeler-specified identifier for the <code>Element</code> , though it is then the responsibility of the modeler to maintain the uniqueness of this identifier within a model or relative to some other context.
<code>oslc_sysmlv2:element_Documentation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Documentation</code>	The Documentation owned by this <code>Element</code> .
<code>oslc_sysmlv2:element_ElementId</code>	Exactly-one	false	unspecified	Either	<code>xsd:string</code>	The globally unique identifier for this <code>Element</code> . This is intended to be set by tooling, and it must not change during the lifetime of the <code>Element</code> .

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:element_IsImpliedIncluded</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether all necessary implied Relationships have been included in the <code>ownedRelationships</code> of this Element. This property may be true, even if there are not actually any <code>ownedRelationships</code> with <code>isImplied = true</code> , meaning that no such Relationships are actually implied for this Element. However, if it is false, then <code>ownedRelationships</code> may <i>not</i> contain any implied Relationships. That is, either <i>all</i> required implied Relationships must be included, or none of them.
<code>oslc_sysmlv2:element_IsLibraryElement</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether this Element is contained in the ownership tree of a library model.
<code>oslc_sysmlv2:element_Name</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The name to be used for this Element during name resolution within its <code>owningNamespace</code> . This is derived using the <code>effectiveName()</code> operation. By default, it is the same as the <code>declaredName</code> , but this is overridden for certain kinds of Elements to compute a name even when the <code>declaredName</code> is null.
<code>oslc_sysmlv2:element_OwnedAnnotation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Annotation</code>	The <code>ownedRelationships</code> of this Element that are Annotations, for which this Element is the <code>annotatedElement</code> .
<code>oslc_sysmlv2:element_OwnedElement</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The Elements owned by this Element, derived as the <code>ownedRelatedElements</code> of the <code>ownedRelationships</code> of this Element.
<code>oslc_sysmlv2:element_OwnedRelationship</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Relationship</code>	The Relationships for which this Element is the <code>owningRelatedElement</code> .
<code>oslc_sysmlv2:element_Owner</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The owner of this Element, derived as the <code>owningRelatedElement</code> of the <code>owningRelationship</code> of this Element, if any.
<code>oslc_sysmlv2:element_OwningMembership</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:OwningMembership</code>	The <code>owningRelationship</code> of this Element, if that Relationship is a Membership.
<code>oslc_sysmlv2:element_OwningNamespace</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Namespace</code>	The Namespace that owns this Element, which is the <code>membershipOwningNamespace</code> of the <code>owningMembership</code> of this Element, if any.
<code>oslc_sysmlv2:element_OwningRelationship</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Relationship</code>	The Relationship for which this Element is an <code>ownedRelatedElement</code> , if any.

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:element_QualifiedName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The full ownership-qualified name of this <b>Element</b> , represented in a form that is valid according to the KerML textual concrete syntax for qualified names (including use of unrestricted name notation and escaped characters, as necessary). The <code>qualifiedName</code> is null if this <b>Element</b> has no <code>owningNamespace</code> or if there is not a complete ownership chain of named <b>Namespaces</b> from a root <b>Namespace</b> to this <b>Element</b> .
<code>oslc_sysmlv2:element_ShortName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The short name to be used for this <b>Element</b> during name resolution within its <code>owningNamespace</code> . This is derived using the <code>effectiveShortName()</code> operation. By default, it is the same as the <code>declaredShortName</code> , but this is overridden for certain kinds of <b>Elements</b> to compute a <code>shortName</code> even when the <code>declaredName</code> is null.
<code>oslc_sysmlv2:element_TextualRepresentation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:TextualRepresentation</code>	The <b>TextualRepresentations</b> that annotate this <b>Element</b> .
<code>oslc_sysmlv2:namespace_ImportedMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Membership</code>	The <b>Memberships</b> in this <b>Namespace</b> that result from the <code>ownedImports</code> of this <b>Namespace</b> .
<code>oslc_sysmlv2:namespace_Member</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The set of all member <b>Elements</b> of this <b>Namespace</b> , which are the <code>memberElements</code> of all <code>memberships</code> of the <b>Namespace</b> .
<code>oslc_sysmlv2:namespace_Membership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Membership</code>	All <b>Memberships</b> in this <b>Namespace</b> , including (at least) the union of <code>ownedMemberships</code> and <code>importedMemberships</code> .
<code>oslc_sysmlv2:namespace_OwnedImport</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Import</code>	The <code>ownedRelationships</code> of this <b>Namespace</b> that are <code>Imports</code> , for which the <b>Namespace</b> is the <code>importOwningNamespace</code> .
<code>oslc_sysmlv2:namespace_OwnedMember</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The owned <code>members</code> of this <b>Namespace</b> , which are the <code>ownedMemberElements</code> of the <code>ownedMemberships</code> of the ..
<code>oslc_sysmlv2:namespace_OwnedMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Membership</code>	The <code>ownedRelationships</code> of this <b>Namespace</b> that are <code>Memberships</code> , for which the <b>Namespace</b> is the <code>membershipOwningNamespace</code> .

Standards Track Work Product

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:type_DifferencingType</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The interpretations of a <b>Type</b> with <b>differencingTypes</b> are asserted to be those of the first of those <b>Types</b> , but not including those of the remaining <b>Types</b> . For example, a <b>Classifier</b> might be the difference of a <b>Classifier</b> for people and another for people of a particular nationality, leaving people who are not of that nationality. Similarly, a feature of people might be the difference between a feature for their children and a <b>Classifier</b> for people of a particular sex, identifying their children not of that sex (because the interpretations of the children <b>Feature</b> that identify those of that sex are also interpretations of the <b>Classifier</b> for that sex).
<code>oslc_sysmlv2:type_DirectedFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <b>features</b> of this <b>Type</b> that have a non-null <b>direction</b> .
<code>oslc_sysmlv2:type_EndFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All <b>features</b> of this <b>Type</b> with <b>isEnd</b> = <b>true</b> .
<code>oslc_sysmlv2:type_Feature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <b>ownedMemberFeatures</b> of the <b>featureMemberships</b> of this <b>Type</b> .
<code>oslc_sysmlv2:type_FeatureMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:FeatureMembership</code>	The <b>FeatureMemberships</b> for <b>features</b> of this <b>Type</b> , which include all <b>ownedFeatureMemberships</b> and those <b>inheritedMemberships</b> that are <b>FeatureMemberships</b> (but does <i>not</i> include any <b>importedMemberships</b> ).
<code>oslc_sysmlv2:type_InheritedFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All the <b>memberFeatures</b> of the <b>inheritedMemberships</b> of this <b>Type</b> that are <b>FeatureMemberships</b> .
<code>oslc_sysmlv2:type_InheritedMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Membership</code>	All <b>Memberships</b> inherited by this <b>Type</b> via <b>Specialization</b> or <b>Conjugation</b> . These are included in the derived union for the <b>memberships</b> of the <b>Type</b> .
<code>oslc_sysmlv2:type_Input</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All <b>features</b> related to this <b>Type</b> by <b>FeatureMemberships</b> that have <b>direction</b> <b>in</b> or <b>inout</b> ..

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:type_IntersectingType</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The interpretations of a <b>Type</b> with <b>intersectingTypes</b> are asserted to be those in common among the <b>intersectingTypes</b> , which are the <b>Types</b> derived from the <b>intersectingType</b> of the <b>ownedIntersectings</b> of this <b>Type</b> . For example, a <b>Classifier</b> might be an intersection of <b>Classifiers</b> for people of a particular sex and of a particular nationality. Similarly, a feature for people's children of a particular sex might be the intersection of a <b>Feature</b> for their children and a <b>Classifier</b> for people of that sex (because the interpretations of the children <b>Feature</b> that identify those of that sex are also interpretations of the <b>Classifier</b> for that sex).
<code>oslc_sysmlv2:type_IsAbstract</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Indicates whether instances of this <b>Type</b> must also be instances of at least one of its specialized <b>Types</b> .
<code>oslc_sysmlv2:type_IsConjugated</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Indicates whether this <b>Type</b> has an <b>ownedConjugator</b> .
<code>oslc_sysmlv2:type_IsSufficient</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether all things that meet the classification conditions of this <b>Type</b> must be classified by the <b>Type</b> .
<code>oslc_sysmlv2:type_Multiplicity</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Multiplicity</code>	An <b>ownedMember</b> of this <b>Type</b> that is a <b>Multiplicity</b> , which constrains the cardinality of the <b>Type</b> . If there is no such <b>ownedMember</b> , then the cardinality of this <b>Type</b> is constrained by all the <b>Multiplicity</b> constraints applicable to any direct supertypes.
<code>oslc_sysmlv2:type_Output</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All <b>features</b> related to this <b>Type</b> by <b>FeatureMemberships</b> that have <b>direction out or inout</b> .
<code>oslc_sysmlv2:type_OwnedConjugator</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Conjugation</code>	A <b>Conjugation</b> owned by this <b>Type</b> for which the <b>Type</b> is the <b>originalType</b> .
<code>oslc_sysmlv2:type_OwnedDifferencing</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Differencing</code>	The <b>ownedRelationships</b> of this <b>Type</b> that are <b>Differencings</b> , having this <b>Type</b> as their <b>typeDifferenced</b> .
<code>oslc_sysmlv2:type_OwnedDisjoining</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Disjoining</code>	The <b>ownedRelationships</b> of this <b>Type</b> that are <b>Disjoinings</b> , for which the <b>Type</b> is the <b>typeDisjoined Type</b> .
<code>oslc_sysmlv2:type_OwnedEndFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All <b>endFeatures</b> of this <b>Type</b> that are <b>ownedFeatures</b> .

- **Describes:** <http://open-services.net/ns/sysmlv2#Expression>
- **Summary:** ExpressionShape
- **Description:** An **Expression** is a **Step** that is typed by a **Function**. An **Expression** that also has a **Function** as its **featuringType** is a computational step within that **Function**. An **Expression** always has a single **result** parameter, which redefines the **result** parameter of its defining **function**. This allows **Expressions** to be interconnected in tree structures, in which inputs to each **Expression** in the tree are determined as the results of other **Expression** in the tree.

### Expression Properties

<code>dcterms:description</code>	Zero-or-one	false	XMLLiteral	N/A	Unspecified	Descriptive text about resource represented as rich text in XHTML content.
<code>dcterms:identifier</code>	Exactly-one	true	string	N/A	Unspecified	A unique identifier for a resource. Typically read-only and assigned by the service provider when a resource is created. Not typically intended for end-user display.
<code>dcterms:modified</code>	Zero-or-one	false	dateTime	N/A	Unspecified	Timestamp of latest resource modification.
<code>dcterms:source</code>	Zero-or-one	false	Resource	Reference	<code>oslc:Any</code>	The resource URI a client can perform a get on to obtain the original non-OSLC AM formatted resource that was used to create this resource. The source resource is usually a binary or proprietary format that the service provider can consume and convert into an OSLC AM format. The service may use content negotiation with the Accept header to obtain the desired content type.

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>dcterms:title</code>	Exactly-one	false	XMLLiteral	N/A	Unspecified	Title of the resource represented as rich text in XHTML content.
<code>dcterms:type</code>	Zero-or-many	false	string	N/A	Unspecified	A short string representation for the type, for example 'Car'.
<code>jazz_am:derives</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The resource that derives from another resource originated from or is significantly influenced by the referenced resource. For example a model element derives from a requirement.
<code>jazz_am:elaborates</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	This resource elaborates the referenced resource.
<code>jazz_am:external</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	A generic link from a resource to an external web page.
<code>jazz_am:refine</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The target is a refinement of the source. (e.g. a use case scenario might be a refinement of a textual requirement that describes the interaction).
<code>jazz_am:satisfy</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The model element satisfies the requirement (e.g. The use case satisfies a functional requirement).
<code>jazz_am:trace</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The model element has a trace to the requirement (e.g. An attribute or its value are traced to a requirement).
<code>oslc_sysmlv2:element_AliasIds</code>	Zero-or-many	false	unspecified	Either	<code>xsd:string</code>	Various alternative identifiers for this Element. Generally, these will be set by tools.
<code>oslc_sysmlv2:element_DeclaredName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The declared name of this <b>Element</b> .
<code>oslc_sysmlv2:element_DeclaredShortName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	An optional alternative name for the <b>Element</b> that is intended to be shorter or in some way more succinct than its primary <b>name</b> . It may act as a modeler-specified identifier for the <b>Element</b> , though it is then the responsibility of the modeler to maintain the uniqueness of this identifier within a model or relative to some other context.

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:element_Documentation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Documentation</code>	The Documentation owned by this Element.
<code>oslc_sysmlv2:element_ElementId</code>	Exactly-one	false	unspecified	Either	<code>xsd:string</code>	The globally unique identifier for this Element. This is intended to be set by tooling, and it must not change during the lifetime of the Element.
<code>oslc_sysmlv2:element_IsImpliedIncluded</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether all necessary implied Relationships have been included in the <code>ownedRelationships</code> of this Element. This property may be true, even if there are not actually any <code>ownedRelationships</code> with <code>isImplied = true</code> , meaning that no such Relationships are actually implied for this Element. However, if it is false, then <code>ownedRelationships</code> may <i>not</i> contain any implied Relationships. That is, either <i>all</i> required implied Relationships must be included, or none of them.
<code>oslc_sysmlv2:element_IsLibraryElement</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether this Element is contained in the ownership tree of a library model.
<code>oslc_sysmlv2:element_Name</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The name to be used for this <code>Element</code> during name resolution within its <code>owningNamespace</code> . This is derived using the <code>effectiveName()</code> operation. By default, it is the same as the <code>declaredName</code> , but this is overridden for certain kinds of <code>Elements</code> to compute a <code>name</code> even when the <code>declaredName</code> is null.
<code>oslc_sysmlv2:element_OwnedAnnotation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Annotation</code>	The <code>ownedRelationships</code> of this <code>Element</code> that are <code>Annotations</code> , for which this <code>Element</code> is the <code>annotatedElement</code> .
<code>oslc_sysmlv2:element_OwnedElement</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The Elements owned by this Element, derived as the <code>ownedRelatedElements</code> of the <code>ownedRelationships</code> of this Element.
<code>oslc_sysmlv2:element_OwnedRelationship</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Relationship</code>	The Relationships for which this Element is the <code>owningRelatedElement</code> .
<code>oslc_sysmlv2:element_Owner</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The owner of this Element, derived as the <code>owningRelatedElement</code> of the <code>owningRelationship</code> of this Element, if any.
<code>oslc_sysmlv2:element_OwningMembership</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:OwningMembership</code>	The <code>owningRelationship</code> of this <code>Element</code> , if that <code>Relationship</code> is a <code>Membership</code> .

Standards Track Work Product

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:element_OwningNamespace</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Namespace</code>	The <b>Namespace</b> that owns this <b>Element</b> , which is the <b>membershipOwningNamespace</b> of the <b>owningMembership</b> of this <b>Element</b> , if any.
<code>oslc_sysmlv2:element_OwningRelationship</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Relationship</code>	The <b>Relationship</b> for which this <b>Element</b> is an <b>ownedRelatedElement</b> , if any.
<code>oslc_sysmlv2:element_QualifiedName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The full ownership-qualified name of this <b>Element</b> , represented in a form that is valid according to the KerML textual concrete syntax for qualified names (including use of unrestricted name notation and escaped characters, as necessary). The <b>qualifiedName</b> is null if this <b>Element</b> has no <b>owningNamespace</b> or if there is not a complete ownership chain of named <b>Namespaces</b> from a root <b>Namespace</b> to this <b>Element</b> .
<code>oslc_sysmlv2:element_ShortName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The short name to be used for this <b>Element</b> during name resolution within its <b>owningNamespace</b> . This is derived using the <b>effectiveShortName()</b> operation. By default, it is the same as the <b>declaredShortName</b> , but this is overridden for certain kinds of <b>Elements</b> to compute a <b>shortName</b> even when the <b>declaredName</b> is null.
<code>oslc_sysmlv2:element_TextualRepresentation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:TextualRepresentation</code>	The <b>TextualRepresentations</b> that annotate this <b>Element</b> .
<code>oslc_sysmlv2:expression_Function</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Function</code>	The <b>Function</b> that types this <b>Expression</b> .
<code>oslc_sysmlv2:expression_IsModelLevelEvaluable</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether this <b>Expression</b> meets the constraints necessary to be evaluated at <i>model level</i> , that is, using metadata within the model.
<code>oslc_sysmlv2:expression_Result</code>	Exactly-one	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	.
<code>oslc_sysmlv2:feature_ChainingFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <b>Feature</b> that are chained together to determine the values of this <b>Feature</b> , derived from the <b>chainingFeatures</b> of the <b>ownedFeatureChainings</b> of this <b>Feature</b> , in the same order. The values of a <b>Feature</b> with <b>chainingFeatures</b> are the same as values of the last <b>Feature</b> in the chain, which can be found by starting with the values of the first <b>Feature</b> (for each instance of the domain of the original <b>Feature</b> ), then using each of those as domain instances to find the values of the second <b>Feature</b> in <b>chainingFeatures</b> , and so on, to values of the last <b>Feature</b> .

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:feature_Direction</code>	Zero-or-one	false	unspecified	Either	<code>oslc_sysmlv2:FeatureDirectionKind</code>	Indicates how values of this <b>Feature</b> are determined or used (as specified for the <b>FeatureDirectionKind</b> ).
<code>oslc_sysmlv2:feature_EndOwningType</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The <b>Type</b> that is related to this <b>Feature</b> by an <b>EndFeatureMembership</b> in which the <b>Feature</b> is an <b>ownedMemberFeature</b> .
<code>oslc_sysmlv2:feature_FeaturingType</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	<b>Types</b> that feature this <b>Feature</b> , such that any instance in the domain of the <b>Feature</b> must be classified by all of these <b>Types</b> , including at least all the <b>featuringTypes</b> of its <b>typeFeaturings</b> . If the <b>Feature</b> is chained, then the <b>featuringTypes</b> of the first <b>Feature</b> in the chain are also <b>featuringTypes</b> of the chained <b>Feature</b> .
<code>oslc_sysmlv2:feature_IsComposite</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether the <b>Feature</b> is a composite <b>feature</b> of its <b>featuringType</b> . If so, the values of the <b>Feature</b> cannot exist after its featuring instance no longer does.
<code>oslc_sysmlv2:feature_IsDerived</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether the values of this <b>Feature</b> can always be computed from the values of other <b>Features</b> .
<code>oslc_sysmlv2:feature_IsEnd</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether or not the this <b>Feature</b> is an end <b>Feature</b> , requiring a different interpretation of the <b>multiplicity</b> of the <b>Feature</b> .
<code>oslc_sysmlv2:feature_IsNonunique</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	isNonunique.
<code>oslc_sysmlv2:feature_IsOrdered</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether an order exists for the values of this <b>Feature</b> or not.
<code>oslc_sysmlv2:feature_IsPortion</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether the values of this <b>Feature</b> are contained in the space and time of instances of the domain of the <b>Feature</b> and represent the same thing as those instances.
<code>oslc_sysmlv2:feature_IsReadOnly</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether the values of this <b>Feature</b> can change over the lifetime of an instance of the domain.
<code>oslc_sysmlv2:feature_IsUnique</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether or not values for this <b>Feature</b> must have no duplicates or not.
<code>oslc_sysmlv2:feature_OwnedFeatureChaining</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:FeatureChaining</code>	The <b>ownedRelationships</b> of this <b>Feature</b> that are <b>FeatureChainings</b> , for which the <b>Feature</b> will be the <b>featureChained</b> .
<code>oslc_sysmlv2:feature_OwnedFeatureInverting</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:FeatureInverting</code>	The <b>ownedRelationships</b> of this <b>Feature</b> that are <b>FeatureInvertings</b> and for which the <b>Feature</b> is the <b>featureInverted</b> .

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:feature_OwnedRedefinition</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Redefinition</code>	The <code>ownedSubsettings</code> of this <code>Feature</code> that are <code>Redefinitions</code> , for which the <code>Feature</code> is the <code>redefiningFeature</code> .
<code>oslc_sysmlv2:feature_OwnedReferenceSubsetting</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:ReferenceSubsetting</code>	The one <code>ownedSubsetting</code> of this <code>Feature</code> , if any, that is a <code>ReferenceSubsetting</code> , for which the <code>Feature</code> is the <code>referencingFeature</code> .
<code>oslc_sysmlv2:feature_OwnedSubsetting</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Subsetting</code>	The <code>ownedSpecializations</code> of this <code>Feature</code> that are <code>Subsettings</code> , for which the <code>Feature</code> is the <code>subsettingFeature</code> .
<code>oslc_sysmlv2:feature_OwnedTypeFeaturing</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:TypeFeaturing</code>	The <code>ownedRelationships</code> of this <code>Feature</code> that are <code>TypeFeaturings</code> and for which the <code>Feature</code> is the <code>featureOfType</code> .
<code>oslc_sysmlv2:feature_OwnedTyping</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:FeatureTyping</code>	The <code>ownedSpecializations</code> of this <code>Feature</code> that are <code>FeatureTypings</code> , for which the <code>Feature</code> is the <code>typedFeature</code> .
<code>oslc_sysmlv2:feature_OwningFeatureMembership</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:FeatureMembership</code>	The <code>FeatureMembership</code> that owns this <code>Feature</code> as an <code>ownedMemberFeature</code> , determining its <code>owningType</code> .
<code>oslc_sysmlv2:feature_OwningType</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The <code>Type</code> that is the <code>owningType</code> of the <code>owningFeatureMembership</code> of this <code>Feature</code> .
<code>oslc_sysmlv2:feature_Type</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	<code>Types</code> that restrict the values of this <code>Feature</code> , such that the values must be instances of all the <code>types</code> . The types of a <code>Feature</code> are derived from its <code>typings</code> and the <code>types</code> of its <code>subsettings</code> . If the <code>Feature</code> is chained, then the <code>types</code> of the last <code>Feature</code> in the chain are also <code>types</code> of the chained <code>Feature</code> .
<code>oslc_sysmlv2:namespace_ImportedMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Membership</code>	The <code>Memberships</code> in this <code>Namespace</code> that result from the <code>ownedImports</code> of this <code>Namespace</code> .
<code>oslc_sysmlv2:namespace_Member</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The set of all member <code>Elements</code> of this <code>Namespace</code> , which are the <code>memberElements</code> of all <code>memberships</code> of the <code>Namespace</code> .
<code>oslc_sysmlv2:namespace_Membership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Membership</code>	All <code>Memberships</code> in this <code>Namespace</code> , including (at least) the union of <code>ownedMemberships</code> and <code>importedMemberships</code> .

Standards Track Work Product

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:namespace_OwnedImport</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Import</code>	The <code>ownedRelationships</code> of this <code>Namespace</code> that are <code>Imports</code> , for which the <code>Namespace</code> is the <code>importOwningNamespace</code> .
<code>oslc_sysmlv2:namespace_OwnedMember</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The owned <code>members</code> of this <code>Namespace</code> , which are the <code>ownedMemberElements</code> of the <code>ownedMemberships</code> of the ..
<code>oslc_sysmlv2:namespace_OwnedMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Membership</code>	The <code>ownedRelationships</code> of this <code>Namespace</code> that are <code>Memberships</code> , for which the <code>Namespace</code> is the <code>membershipOwningNamespace</code> .
<code>oslc_sysmlv2:step_Behavior</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Behavior</code>	The <code>Behaviors</code> that type this <code>Step</code> .
<code>oslc_sysmlv2:step_Parameter</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <code>parameters</code> of this <code>Step</code> , which are defined as its <code>directedFeatures</code> , whose values are passed into and/or out of a performance of the <code>Step</code> .
<code>oslc_sysmlv2:type_DifferencingType</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The interpretations of a <code>Type</code> with <code>differencingTypes</code> are asserted to be those of the first of those <code>Types</code> , but not including those of the remaining <code>Types</code> . For example, a <code>Classifier</code> might be the difference of a <code>Classifier</code> for people and another for people of a particular nationality, leaving people who are not of that nationality. Similarly, a feature of people might be the difference between a feature for their children and a <code>Classifier</code> for people of a particular sex, identifying their children not of that sex (because the interpretations of the children <code>Feature</code> that identify those of that sex are also interpretations of the <code>Classifier</code> for that sex).
<code>oslc_sysmlv2:type_DirectedFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <code>features</code> of this <code>Type</code> that have a non-null <code>direction</code> .
<code>oslc_sysmlv2:type_EndFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All <code>features</code> of this <code>Type</code> with <code>isEnd = true</code> .
<code>oslc_sysmlv2:type_Feature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <code>ownedMemberFeatures</code> of the <code>featureMemberships</code> of this <code>Type</code> .

<code>oslc_sysmlv2:type_Output</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All <b>features</b> related to this <b>Type</b> by <b>FeatureMemberships</b> that have <b>direction out or inout</b> ..
<code>oslc_sysmlv2:type_OwnedConjugator</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Conjugation</code>	A <b>Conjugation</b> owned by this <b>Type</b> for which the <b>Type</b> is the <b>originalType</b> .
<code>oslc_sysmlv2:type_OwnedDifferencing</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Differencing</code>	The <b>ownedRelationships</b> of this <b>Type</b> that are <b>Differencings</b> , having this <b>Type</b> as their <b>typeDifferenced</b> .
<code>oslc_sysmlv2:type_OwnedDisjoining</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Disjoining</code>	The <b>ownedRelationships</b> of this <b>Type</b> that are <b>Disjoinings</b> , for which the <b>Type</b> is the <b>typeDisjoined Type</b> .
<code>oslc_sysmlv2:type_OwnedEndFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All <b>endFeatures</b> of this <b>Type</b> that are <b>ownedFeatures</b> .
<code>oslc_sysmlv2:type_OwnedFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <b>ownedMemberFeatures</b> of the <b>ownedFeatureMemberships</b> of this <b>Type</b> .
<code>oslc_sysmlv2:type_OwnedFeatureMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:FeatureMembership</code>	The <b>ownedMemberships</b> of this <b>Type</b> that are <b>FeatureMemberships</b> , for which the <b>Type</b> is the <b>owningType</b> . Each such <b>FeatureMembership</b> identifies an <b>ownedFeature</b> of the <b>Type</b> .
<code>oslc_sysmlv2:type_OwnedIntersecting</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Intersecting</code>	The <b>ownedRelationships</b> of this <b>Type</b> that are <b>Intersectings</b> , have the <b>Type</b> as their <b>typeIntersected</b> .
<code>oslc_sysmlv2:type_OwnedSpecialization</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Specialization</code>	The <b>ownedRelationships</b> of this <b>Type</b> that are <b>Specializations</b> , for which the <b>Type</b> is the <b>specific Type</b> .
<code>oslc_sysmlv2:type_OwnedUnioning</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Unioning</code>	The <b>ownedRelationships</b> of this <b>Type</b> that are <b>Unionings</b> , having the <b>Type</b> as their <b>typeUnioned</b> .

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:type_UnioningType</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The interpretations of a <b>Type</b> with <b>unioningTypes</b> are asserted to be the same as those of all the <b>unioningTypes</b> together, which are the <b>Types</b> derived from the <b>unioningType</b> of the <b>ownedUnionings</b> of this <b>Type</b> . For example, a <b>Classifier</b> for people might be the union of <b>Classifiers</b> for all the sexes. Similarly, a feature for people's children might be the union of features dividing them in the same ways as people in general.
<code>oslc:instanceShape</code>	Zero-or-one	false	Resource	Reference	<code>oslc:ResourceShape</code>	The URI of a Resource Shape that describes the possible properties, occurrence, value types, allowed values and labels. This shape information is useful in displaying the subject resource as well as guiding clients in performing modifications. Instance shapes may be specific to the authenticated user associated with the request that retrieved the resource, the current state of the resource and other factors and thus should not be cached.
<code>oslc:serviceProvider</code>	Zero-or-many	false	Resource	Reference	<code>oslc:ServiceProvider</code>	A link to the resource's OSLC Service Provider. There may be cases when the subject resource is available from a service provider that implements multiple domain specifications, which could result in multiple values for this property.
<code>oslc:shortTitle</code>	Zero-or-one	false	XMLLiteral	N/A	Unspecified	Short name identifying a resource, often used as an abbreviated identifier for presentation to end-users. <b>SHOULD</b> include only content that is valid inside an XHTML <code>&lt;span&gt;</code> element [sml-36].
<code>rdf:type</code>	Zero-or-many	false	Resource	Reference	<code>rdfs:Class</code>	The resource type URIs.

- **Describes:** <http://open-services.net/ns/sysmlv2#PartDefinition>
- **Summary:** PartDefinitionShape
- **Description:** A **PartDefinition** is an **ItemDefinition** of a **Class** of systems or parts of systems. Note that all parts may be considered items for certain purposes, but not all items are parts that can perform actions within a system.

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:element_IsImpliedIncluded</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether all necessary implied Relationships have been included in the <code>ownedRelationships</code> of this Element. This property may be true, even if there are not actually any <code>ownedRelationships</code> with <code>isImplied = true</code> , meaning that no such Relationships are actually implied for this Element. However, if it is false, then <code>ownedRelationships</code> may <i>not</i> contain any implied Relationships. That is, either <i>all</i> required implied Relationships must be included, or none of them.
<code>oslc_sysmlv2:element_IsLibraryElement</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether this Element is contained in the ownership tree of a library model.
<code>oslc_sysmlv2:element_Name</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The name to be used for this Element during name resolution within its <code>owningNamespace</code> . This is derived using the <code>effectiveName()</code> operation. By default, it is the same as the <code>declaredName</code> , but this is overridden for certain kinds of Elements to compute a name even when the <code>declaredName</code> is null.
<code>oslc_sysmlv2:element_OwnedAnnotation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Annotation</code>	The <code>ownedRelationships</code> of this Element that are Annotations, for which this Element is the <code>annotatedElement</code> .
<code>oslc_sysmlv2:element_OwnedElement</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The Elements owned by this Element, derived as the <code>ownedRelatedElements</code> of the <code>ownedRelationships</code> of this Element.
<code>oslc_sysmlv2:element_OwnedRelationship</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Relationship</code>	The Relationships for which this Element is the <code>owningRelatedElement</code> .
<code>oslc_sysmlv2:element_Owner</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The owner of this Element, derived as the <code>owningRelatedElement</code> of the <code>owningRelationship</code> of this Element, if any.
<code>oslc_sysmlv2:element_OwningMembership</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:OwningMembership</code>	The <code>owningRelationship</code> of this Element, if that Relationship is a Membership.
<code>oslc_sysmlv2:element_OwningNamespace</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Namespace</code>	The <code>Namespace</code> that owns this Element, which is the <code>membershipOwningNamespace</code> of the <code>owningMembership</code> of this Element, if any.
<code>oslc_sysmlv2:element_OwningRelationship</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Relationship</code>	The Relationship for which this Element is an <code>ownedRelatedElement</code> , if any.

Standards Track Work Product

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:element_QualifiedName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The full ownership-qualified name of this <b>Element</b> , represented in a form that is valid according to the KerML textual concrete syntax for qualified names (including use of unrestricted name notation and escaped characters, as necessary). The <code>qualifiedName</code> is null if this <b>Element</b> has no <code>owningNamespace</code> or if there is not a complete ownership chain of named <b>Namespaces</b> from a root <b>Namespace</b> to this <b>Element</b> .
<code>oslc_sysmlv2:element_ShortName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The short name to be used for this <b>Element</b> during name resolution within its <code>owningNamespace</code> . This is derived using the <code>effectiveShortName()</code> operation. By default, it is the same as the <code>declaredShortName</code> , but this is overridden for certain kinds of <b>Elements</b> to compute a <code>shortName</code> even when the <code>declaredName</code> is null.
<code>oslc_sysmlv2:element_TextualRepresentation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:TextualRepresentation</code>	The <b>TextualRepresentations</b> that annotate this <b>Element</b> .
<code>oslc_sysmlv2:namespace_ImportedMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Membership</code>	The <b>Memberships</b> in this <b>Namespace</b> that result from the <code>ownedImports</code> of this <b>Namespace</b> .
<code>oslc_sysmlv2:namespace_Member</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The set of all member <b>Elements</b> of this <b>Namespace</b> , which are the <code>memberElements</code> of all <code>memberships</code> of the <b>Namespace</b> .
<code>oslc_sysmlv2:namespace_Membership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Membership</code>	All <b>Memberships</b> in this <b>Namespace</b> , including (at least) the union of <code>ownedMemberships</code> and <code>importedMemberships</code> .
<code>oslc_sysmlv2:namespace_OwnedImport</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Import</code>	The <code>ownedRelationships</code> of this <b>Namespace</b> that are <b>Imports</b> , for which the <b>Namespace</b> is the <code>importOwningNamespace</code> .
<code>oslc_sysmlv2:namespace_OwnedMember</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The owned <code>members</code> of this <b>Namespace</b> , which are the <code>ownedMemberElements</code> of the <code>ownedMemberships</code> of the ..
<code>oslc_sysmlv2:namespace_OwnedMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Membership</code>	The <code>ownedRelationships</code> of this <b>Namespace</b> that are <b>Memberships</b> , for which the <b>Namespace</b> is the <code>membershipOwningNamespace</code> .
<code>oslc_sysmlv2:occurrenceDefinition_IsIndividual</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether this OccurrenceDefinition is constrained to represent single individual.

Standards Track Work Product

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:occurrenceDefinition_LifeClass</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:LifeClass</code>	If <code>isIndividual</code> is true, a <code>LifeClass</code> that specializes this <code>OccurrenceDefinition</code> , restricting it to represent an individual.
<code>oslc_sysmlv2:type_DifferencingType</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The interpretations of a <code>Type</code> with <code>differencingTypes</code> are asserted to be those of the first of those <code>Types</code> , but not including those of the remaining <code>Types</code> . For example, a <code>Classifier</code> might be the difference of a <code>Classifier</code> for people and another for people of a particular nationality, leaving people who are not of that nationality. Similarly, a feature of people might be the difference between a feature for their children and a <code>Classifier</code> for people of a particular sex, identifying their children not of that sex (because the interpretations of the children <code>Feature</code> that identify those of that sex are also interpretations of the <code>Classifier</code> for that sex).
<code>oslc_sysmlv2:type_DirectedFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <code>features</code> of this <code>Type</code> that have a non-null <code>direction</code> .
<code>oslc_sysmlv2:type_EndFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All <code>features</code> of this <code>Type</code> with <code>isEnd = true</code> .
<code>oslc_sysmlv2:type_Feature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <code>ownedMemberFeatures</code> of the <code>featureMemberships</code> of this <code>Type</code> .
<code>oslc_sysmlv2:type_FeatureMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:FeatureMembership</code>	The <code>FeatureMemberships</code> for <code>features</code> of this <code>Type</code> , which include all <code>ownedFeatureMemberships</code> and those <code>inheritedMemberships</code> that are <code>FeatureMemberships</code> (but does <i>not</i> include any <code>importedMemberships</code> ).
<code>oslc_sysmlv2:type_InheritedFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All the <code>memberFeatures</code> of the <code>inheritedMemberships</code> of this <code>Type</code> that are <code>FeatureMemberships</code> .
<code>oslc_sysmlv2:type_InheritedMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Membership</code>	All <code>Memberships</code> inherited by this <code>Type</code> via <code>Specialization</code> or <code>Conjugation</code> . These are included in the derived union for the <code>memberships</code> of the <code>Type</code> .

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:type_Input</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All <b>features</b> related to this <b>Type</b> by <b>FeatureMemberships</b> that have <b>direction in or inout..</b>
<code>oslc_sysmlv2:type_IntersectingType</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The interpretations of a <b>Type</b> with <b>intersectingTypes</b> are asserted to be those in common among the <b>intersectingTypes</b> , which are the <b>Types</b> derived from the <b>intersectingType</b> of the <b>ownedIntersectings</b> of this <b>Type</b> . For example, a <b>Classifier</b> might be an intersection of <b>Classifiers</b> for people of a particular sex and of a particular nationality. Similarly, a feature for people's children of a particular sex might be the intersection of a <b>Feature</b> for their children and a <b>Classifier</b> for people of that sex (because the interpretations of the children <b>Feature</b> that identify those of that sex are also interpretations of the Classifier for that sex).
<code>oslc_sysmlv2:type_IsAbstract</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Indicates whether instances of this <b>Type</b> must also be instances of at least one of its specialized <b>Types</b> .
<code>oslc_sysmlv2:type_IsConjugated</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Indicates whether this <b>Type</b> has an <b>ownedConjugator</b> .
<code>oslc_sysmlv2:type_IsSufficient</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether all things that meet the classification conditions of this <b>Type</b> must be classified by the <b>Type</b> .
<code>oslc_sysmlv2:type_Multiplicity</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Multiplicity</code>	An <b>ownedMember</b> of this <b>Type</b> that is a <b>Multiplicity</b> , which constrains the cardinality of the <b>Type</b> . If there is no such <b>ownedMember</b> , then the cardinality of this <b>Type</b> is constrained by all the <b>Multiplicity</b> constraints applicable to any direct supertypes.
<code>oslc_sysmlv2:type_Output</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All <b>features</b> related to this <b>Type</b> by <b>FeatureMemberships</b> that have <b>direction out or inout..</b>
<code>oslc_sysmlv2:type_OwnedConjugator</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Conjugation</code>	A <b>Conjugation</b> owned by this <b>Type</b> for which the <b>Type</b> is the <b>originalType</b> .
<code>oslc_sysmlv2:type_OwnedDifferencing</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Differencing</code>	The <b>ownedRelationships</b> of this <b>Type</b> that are <b>Differencings</b> , having this <b>Type</b> as their <b>typeDifferenced</b> .
<code>oslc_sysmlv2:type_OwnedDisjoining</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Disjoining</code>	The <b>ownedRelationships</b> of this <b>Type</b> that are <b>Disjoinings</b> , for which the <b>Type</b> is the <b>typeDisjoined Type</b> .

<code>oslc_sysmlv2:type_OwnedFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <code>ownedMemberFeatures</code> of the <code>ownedFeatureMemberships</code> of this <code>Type</code> .
<code>oslc_sysmlv2:type_OwnedFeatureMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:FeatureMembership</code>	The <code>ownedMemberships</code> of this <code>Type</code> that are <code>FeatureMemberships</code> , for which the <code>Type</code> is the <code>owningType</code> . Each such <code>FeatureMembership</code> identifies an <code>ownedFeature</code> of the <code>Type</code> .
<code>oslc_sysmlv2:type_OwnedIntersecting</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Intersecting</code>	The <code>ownedRelationships</code> of this <code>Type</code> that are <code>Intersectings</code> , have the <code>Type</code> as their <code>typeIntersected</code> .
<code>oslc_sysmlv2:type_OwnedSpecialization</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Specialization</code>	The <code>ownedRelationships</code> of this <code>Type</code> that are <code>Specializations</code> , for which the <code>Type</code> is the <code>specificType</code> .
<code>oslc_sysmlv2:type_OwnedUnioning</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Unioning</code>	The <code>ownedRelationships</code> of this <code>Type</code> that are <code>Unionings</code> , having the <code>Type</code> as their <code>typeUnioned</code> .
<code>oslc_sysmlv2:type_UnioningType</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The interpretations of a <code>Type</code> with <code>unioningTypes</code> are asserted to be the same as those of all the <code>unioningTypes</code> together, which are the <code>Types</code> derived from the <code>unioningType</code> of the <code>ownedUnionings</code> of this <code>Type</code> . For example, a <code>Classifier</code> for people might be the union of <code>Classifiers</code> for all the sexes. Similarly, a feature for people's children might be the union of features dividing them in the same ways as people in general.
<code>oslc:instanceShape</code>	Zero-or-one	false	Resource	Reference	<code>oslc:ResourceShape</code>	The URI of a Resource Shape that describes the possible properties, occurrence, value types, allowed values and labels. This shape information is useful in displaying the subject resource as well as guiding clients in performing modifications. Instance shapes may be specific to the authenticated user associated with the request that retrieved the resource, the current state of the resource and other factors and thus should not be cached.
<code>oslc:serviceProvider</code>	Zero-or-many	false	Resource	Reference	<code>oslc:ServiceProvider</code>	A link to the resource's OSLC Service Provider. There may be cases when the subject resource is available from a service provider that implements multiple domain specifications, which could result in multiple values for this property.

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc:shortTitle</code>	Zero-or-one	false	XMLLiteral	N/A	Unspecified	Short name identifying a resource, often used as an abbreviated identifier for presentation to end-users. <b>SHOULD</b> include only content that is valid inside an XHTML <code>&lt;span&gt;</code> element [sml-37].
<code>rdf:type</code>	Zero-or-many	false	Resource	Reference	<code>rdfs:Class</code>	The resource type URIs.

- **Describes:** <http://open-services.net/ns/sysmlv2#SendActionUsage>
- **Summary:** SendActionUsageShape
- **Description:** A `SendActionUsage` is an `ActionUsage` that specifies the sending of a payload given by the result of its `payloadArgument Expression` via a `MessageTransfer` whose `source` is given by the result of the `senderArgument Expression` and whose `target` is given by the result of the `receiverArgument Expression`. If no `senderArgument` is provided, the default is the `this` context for the action. If no `receiverArgument` is given, then the receiver is to be determined by, e.g., outgoing `Connections` from the sender.

#### SendActionUsage Properties

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>dcterms:contributor</code>	Zero-or-many	false	AnyResource	Either	<code>oslc:Any</code>	Contributor or contributors to the resource. It is likely that the target resource will be a foaf:Person but that is not necessarily the case.
<code>dcterms:created</code>	Zero-or-one	false	dateTime	N/A	Unspecified	Timestamp of resource creation.
<code>dcterms:creator</code>	Zero-or-many	false	AnyResource	Either	<code>oslc:Any</code>	Creator or creators of the resource. It is likely that the target resource will be a foaf:Person but that is not necessarily the case.
<code>dcterms:description</code>	Zero-or-one	false	XMLLiteral	N/A	Unspecified	Descriptive text about resource represented as rich text in XHTML content.
<code>dcterms:identifier</code>	Exactly-one	true	string	N/A	Unspecified	A unique identifier for a resource. Typically read-only and assigned by the service provider when a resource is created. Not typically intended for end-user display.
<code>dcterms:modified</code>	Zero-or-one	false	dateTime	N/A	Unspecified	Timestamp of latest resource modification.

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>dcterms:source</code>	Zero-or-one	false	Resource	Reference	<code>oslc:Any</code>	The resource URI a client can perform a get on to obtain the original non-OSLC AM formatted resource that was used to create this resource. The source resource is usually a binary or proprietary format that the service provider can consume and convert into an OSLC AM format. The service may use content negotiation with the Accept header to obtain the desired content type.
<code>dcterms:title</code>	Exactly-one	false	XMLLiteral	N/A	Unspecified	Title of the resource represented as rich text in XHTML content.
<code>dcterms:type</code>	Zero-or-many	false	string	N/A	Unspecified	A short string representation for the type, for example 'Car'.
<code>jazz_am:derives</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The resource that derives from another resource originated from or is significantly influenced by the referenced resource. For example a model element derives from a requirement.
<code>jazz_am:elaborates</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	This resource elaborates the referenced resource.
<code>jazz_am:external</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	A generic link from a resource to an external web page.
<code>jazz_am:refine</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The target is a refinement of the source. (e.g. a use case scenario might be a refinement of a textual requirement that describes the interaction).
<code>jazz_am:satisfy</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The model element satisfies the requirement (e.g. The use case satisfies a functional requirement).
<code>jazz_am:trace</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The model element has a trace to the requirement (e.g. An attribute or its value are traced to a requirement).
<code>oslc_sysmlv2:actionUsage_ActionDefinition</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Behavior</code>	The <b>Behaviors</b> that are the <b>types</b> of this <b>ActionUsage</b> . Nominally, these would be <b>ActionDefinitions</b> , but other kinds of Kernel <b>Behaviors</b> are also allowed, to permit use of <b>Behaviors</b> from the Kernel Model Libraries.

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:element_AliasIds</code>	Zero-or-many	false	unspecified	Either	<code>xsd:string</code>	Various alternative identifiers for this Element. Generally, these will be set by tools.
<code>oslc_sysmlv2:element_DeclaredName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The declared name of this <b>Element</b> .
<code>oslc_sysmlv2:element_DeclaredShortName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	An optional alternative name for the <b>Element</b> that is intended to be shorter or in some way more succinct than its primary <b>name</b> . It may act as a modeler-specified identifier for the <b>Element</b> , though it is then the responsibility of the modeler to maintain the uniqueness of this identifier within a model or relative to some other context.
<code>oslc_sysmlv2:element_Documentation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Documentation</code>	The Documentation owned by this Element.
<code>oslc_sysmlv2:element_ElementId</code>	Exactly-one	false	unspecified	Either	<code>xsd:string</code>	The globally unique identifier for this Element. This is intended to be set by tooling, and it must not change during the lifetime of the Element.
<code>oslc_sysmlv2:element_IsImpliedIncluded</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether all necessary implied Relationships have been included in the <b>ownedRelationships</b> of this Element. This property may be true, even if there are not actually any <b>ownedRelationships</b> with <b>isImplied = true</b> , meaning that no such Relationships are actually implied for this Element. However, if it is false, then <b>ownedRelationships</b> may <i>not</i> contain any implied Relationships. That is, either <i>all</i> required implied Relationships must be included, or none of them.
<code>oslc_sysmlv2:element_IsLibraryElement</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether this Element is contained in the ownership tree of a library model.
<code>oslc_sysmlv2:element_Name</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The name to be used for this <b>Element</b> during name resolution within its <b>owningNamespace</b> . This is derived using the <b>effectiveName()</b> operation. By default, it is the same as the <b>declaredName</b> , but this is overridden for certain kinds of <b>Elements</b> to compute a <b>name</b> even when the <b>declaredName</b> is null.
<code>oslc_sysmlv2:element_OwnedAnnotation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Annotation</code>	The <b>ownedRelationships</b> of this <b>Element</b> that are <b>Annotations</b> , for which this <b>Element</b> is the <b>annotatedElement</b> .

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:element_OwnedElement</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The Elements owned by this Element, derived as the <code>ownedRelatedElements</code> of the <code>ownedRelationships</code> of this Element.
<code>oslc_sysmlv2:element_OwnedRelationship</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Relationship</code>	The Relationships for which this Element is the <code>owningRelatedElement</code> .
<code>oslc_sysmlv2:element_Owner</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The owner of this Element, derived as the <code>owningRelatedElement</code> of the <code>owningRelationship</code> of this Element, if any.
<code>oslc_sysmlv2:element_OwningMembership</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:OwningMembership</code>	The <code>owningRelationship</code> of this Element, if that Relationship is a <code>Membership</code> .
<code>oslc_sysmlv2:element_OwningNamespace</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Namespace</code>	The <code>Namespace</code> that owns this Element, which is the <code>membershipOwningNamespace</code> of the <code>owningMembership</code> of this Element, if any.
<code>oslc_sysmlv2:element_OwningRelationship</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Relationship</code>	The Relationship for which this Element is an <code>ownedRelatedElement</code> , if any.
<code>oslc_sysmlv2:element_QualifiedName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The full ownership-qualified name of this Element, represented in a form that is valid according to the KerML textual concrete syntax for qualified names (including use of unrestricted name notation and escaped characters, as necessary). The <code>qualifiedName</code> is null if this Element has no <code>owningNamespace</code> or if there is not a complete ownership chain of named <code>Namespaces</code> from a root <code>Namespace</code> to this Element.
<code>oslc_sysmlv2:element_ShortName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The short name to be used for this Element during name resolution within its <code>owningNamespace</code> . This is derived using the <code>effectiveShortName()</code> operation. By default, it is the same as the <code>declaredShortName</code> , but this is overridden for certain kinds of Elements to compute a <code>shortName</code> even when the <code>declaredName</code> is null.
<code>oslc_sysmlv2:element_TextualRepresentation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:TextualRepresentation</code>	The <code>TextualRepresentations</code> that annotate this Element.

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:feature_ChainingFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <b>Feature</b> that are chained together to determine the values of this <b>Feature</b> , derived from the <b>chainingFeatures</b> of the <b>ownedFeatureChainings</b> of this <b>Feature</b> , in the same order. The values of a <b>Feature</b> with <b>chainingFeatures</b> are the same as values of the last <b>Feature</b> in the chain, which can be found by starting with the values of the first <b>Feature</b> (for each instance of the domain of the original <b>Feature</b> ), then using each of those as domain instances to find the values of the second <b>Feature</b> in <b>chainingFeatures</b> , and so on, to values of the last <b>Feature</b> .
<code>oslc_sysmlv2:feature_Direction</code>	Zero-or-one	false	unspecified	Either	<code>oslc_sysmlv2:FeatureDirectionKind</code>	Indicates how values of this <b>Feature</b> are determined or used (as specified for the <b>FeatureDirectionKind</b> ).
<code>oslc_sysmlv2:feature_EndOwningType</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The <b>Type</b> that is related to this <b>Feature</b> by an <b>EndFeatureMembership</b> in which the <b>Feature</b> is an <b>ownedMemberFeature</b> .
<code>oslc_sysmlv2:feature_FeaturingType</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	<b>Types</b> that feature this <b>Feature</b> , such that any instance in the domain of the <b>Feature</b> must be classified by all of these <b>Types</b> , including at least all the <b>featuringTypes</b> of its <b>typeFeaturings</b> . If the <b>Feature</b> is chained, then the <b>featuringTypes</b> of the first <b>Feature</b> in the chain are also <b>featuringTypes</b> of the chained <b>Feature</b> .
<code>oslc_sysmlv2:feature_IsComposite</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether the <b>Feature</b> is a composite <b>feature</b> of its <b>featuringType</b> . If so, the values of the <b>Feature</b> cannot exist after its featuring instance no longer does.
<code>oslc_sysmlv2:feature_IsDerived</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether the values of this <b>Feature</b> can always be computed from the values of other <b>Features</b> .
<code>oslc_sysmlv2:feature_IsEnd</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether or not the this <b>Feature</b> is an end <b>Feature</b> , requiring a different interpretation of the <b>multiplicity</b> of the <b>Feature</b> .
<code>oslc_sysmlv2:feature_IsNonunique</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	isNonunique.
<code>oslc_sysmlv2:feature_IsOrdered</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether an order exists for the values of this <b>Feature</b> or not.
<code>oslc_sysmlv2:feature_IsPortion</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether the values of this <b>Feature</b> are contained in the space and time of instances of the domain of the <b>Feature</b> and represent the same thing as those instances.

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:usage_NestedState</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:StateUsage</code>	The <code>StateUsages</code> that are <code>nestedUsages</code> of this <code>Usage</code> .
<code>oslc_sysmlv2:usage_NestedTransition</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:TransitionUsage</code>	The <code>TransitionUsages</code> that are <code>nestedUsages</code> of this <code>Usage</code> .
<code>oslc_sysmlv2:usage_NestedUsage</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Usage</code>	The <code>Usages</code> that are <code>ownedFeatures</code> of this <code>Usage</code> .
<code>oslc_sysmlv2:usage_NestedUseCase</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:UseCaseUsage</code>	The <code>UseCaseUsages</code> that are <code>nestedUsages</code> of this <code>Usage</code> .
<code>oslc_sysmlv2:usage_NestedVerificationCase</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:VerificationCaseUsage</code>	The <code>VerificationCaseUsages</code> that are <code>nestedUsages</code> of this <code>Usage</code> .
<code>oslc_sysmlv2:usage_NestedView</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:ViewUsage</code>	The <code>ViewUsages</code> that are <code>nestedUsages</code> of this <code>Usage</code> .
<code>oslc_sysmlv2:usage_NestedViewpoint</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:ViewpointUsage</code>	The <code>ViewpointUsages</code> that are <code>nestedUsages</code> of this <code>Usage</code> .
<code>oslc_sysmlv2:usage_OwningDefinition</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Definition</code>	The <code>Definition</code> that owns this <code>Usage</code> (if any).
<code>oslc_sysmlv2:usage_OwningUsage</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Usage</code>	The <code>Usage</code> in which this <code>Usage</code> is nested (if any).
<code>oslc_sysmlv2:usage_Usage</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Usage</code>	The <code>Usages</code> that are <code>features</code> of this <code>Usage</code> (not necessarily owned).
<code>oslc_sysmlv2:usage_Variant</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Usage</code>	The <code>Usages</code> which represent the variants of this <code>Usage</code> as a variation point <code>Usage</code> , if <code>isVariation = true</code> . If <code>isVariation = false</code> , then there must be no <code>variants</code> .

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:usage_VariantMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:VariantMembership</code>	The <code>ownedMemberships</code> of this <code>Usage</code> that are <code>VariantMemberships</code> . If <code>isVariation = true</code> , then this must be all <code>memberships</code> of the <code>Usage</code> . If <code>isVariation = false</code> , then <code>variantMembership</code> must be empty.
<code>oslc:instanceShape</code>	Zero-or-one	false	Resource	Reference	<code>oslc:ResourceShape</code>	The URI of a Resource Shape that describes the possible properties, occurrence, value types, allowed values and labels. This shape information is useful in displaying the subject resource as well as guiding clients in performing modifications. Instance shapes may be specific to the authenticated user associated with the request that retrieved the resource, the current state of the resource and other factors and thus should not be cached.
<code>oslc:serviceProvider</code>	Zero-or-many	false	Resource	Reference	<code>oslc:ServiceProvider</code>	A link to the resource's OSLC Service Provider. There may be cases when the subject resource is available from a service provider that implements multiple domain specifications, which could result in multiple values for this property.
<code>oslc:shortTitle</code>	Zero-or-one	false	XMLLiteral	N/A	Unspecified	Short name identifying a resource, often used as an abbreviated identifier for presentation to end-users. <b>SHOULD</b> include only content that is valid inside an XHTML <code>&lt;span&gt;</code> element [sml-38].
<code>rdf:type</code>	Zero-or-many	false	Resource	Reference	<code>rdfs:Class</code>	The resource type URIs.

- **Describes:** <http://open-services.net/ns/sysmlv2#LiteralExpression>
- **Summary:** LiteralExpressionShape
- **Description:** A `LiteralExpression` is an `Expression` that provides a basic `DataValue` as a result.

**LiteralExpression Properties**

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>dcterms:contributor</code>	Zero-or-many	false	AnyResource	Either	<code>oslc:Any</code>	Contributor or contributors to the resource. It is likely that the target resource will be a foaf:Person but that is not necessarily the case.

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>dcterms:created</code>	Zero-or-one	false	dateTime	N/A	Unspecified	Timestamp of resource creation.
<code>dcterms:creator</code>	Zero-or-many	false	AnyResource	Either	<code>oslc:Any</code>	Creator or creators of the resource. It is likely that the target resource will be a foaf:Person but that is not necessarily the case.
<code>dcterms:description</code>	Zero-or-one	false	XMLLiteral	N/A	Unspecified	Descriptive text about resource represented as rich text in XHTML content.
<code>dcterms:identifier</code>	Exactly-one	true	string	N/A	Unspecified	A unique identifier for a resource. Typically read-only and assigned by the service provider when a resource is created. Not typically intended for end-user display.
<code>dcterms:modified</code>	Zero-or-one	false	dateTime	N/A	Unspecified	Timestamp of latest resource modification.
<code>dcterms:source</code>	Zero-or-one	false	Resource	Reference	<code>oslc:Any</code>	The resource URI a client can perform a get on to obtain the original non-OSLC AM formatted resource that was used to create this resource. The source resource is usually a binary or proprietary format that the service provider can consume and convert into an OSLC AM format. The service may use content negotiation with the Accept header to obtain the desired content type.
<code>dcterms:title</code>	Exactly-one	false	XMLLiteral	N/A	Unspecified	Title of the resource represented as rich text in XHTML content.
<code>dcterms:type</code>	Zero-or-many	false	string	N/A	Unspecified	A short string representation for the type, for example 'Car'.
<code>jazz_am:derives</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The resource that derives from another resource originated from or is significantly influenced by the referenced resource. For example a model element derives from a requirement.
<code>jazz_am:elaborates</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	This resource elaborates the referenced resource.
<code>jazz_am:external</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	A generic link from a resource to an external web page.
<code>jazz_am:refine</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The target is a refinement of the source. (e.g. a use case scenario might be a refinement of a textual requirement that describes the interaction).

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>jazz_am:satisfy</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The model element satisfies the requirement (e.g. The use case satisfies a functional requirement).
<code>jazz_am:trace</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The model element has a trace to the requirement (e.g. An attribute or its value are traced to a requirement).
<code>oslc_sysmlv2:element_AliasIds</code>	Zero-or-many	false	unspecified	Either	<code>xsd:string</code>	Various alternative identifiers for this Element. Generally, these will be set by tools.
<code>oslc_sysmlv2:element_DeclaredName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The declared name of this <b>Element</b> .
<code>oslc_sysmlv2:element_DeclaredShortName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	An optional alternative name for the <b>Element</b> that is intended to be shorter or in some way more succinct than its primary <b>name</b> . It may act as a modeler-specified identifier for the <b>Element</b> , though it is then the responsibility of the modeler to maintain the uniqueness of this identifier within a model or relative to some other context.
<code>oslc_sysmlv2:element_Documentation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Documentation</code>	The Documentation owned by this Element.
<code>oslc_sysmlv2:element_ElementId</code>	Exactly-one	false	unspecified	Either	<code>xsd:string</code>	The globally unique identifier for this Element. This is intended to be set by tooling, and it must not change during the lifetime of the Element.
<code>oslc_sysmlv2:element_IsImpliedIncluded</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether all necessary implied Relationships have been included in the <b>ownedRelationships</b> of this Element. This property may be true, even if there are not actually any <b>ownedRelationships</b> with <b>isImplied = true</b> , meaning that no such Relationships are actually implied for this Element. However, if it is false, then <b>ownedRelationships</b> may <i>not</i> contain any implied Relationships. That is, either <i>all</i> required implied Relationships must be included, or none of them.
<code>oslc_sysmlv2:element_IsLibraryElement</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether this Element is contained in the ownership tree of a library model.

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:element_Name</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The name to be used for this <b>Element</b> during name resolution within its <b>owningNamespace</b> . This is derived using the <code>effectiveName()</code> operation. By default, it is the same as the <b>declaredName</b> , but this is overridden for certain kinds of <b>Elements</b> to compute a <b>name</b> even when the <b>declaredName</b> is null.
<code>oslc_sysmlv2:element_OwnedAnnotation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Annotation</code>	The <b>ownedRelationships</b> of this <b>Element</b> that are <b>Annotations</b> , for which this <b>Element</b> is the <b>annotatedElement</b> .
<code>oslc_sysmlv2:element_OwnedElement</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The <b>Elements</b> owned by this <b>Element</b> , derived as the <b>ownedRelatedElements</b> of the <b>ownedRelationships</b> of this <b>Element</b> .
<code>oslc_sysmlv2:element_OwnedRelationship</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Relationship</code>	The <b>Relationships</b> for which this <b>Element</b> is the <b>owningRelatedElement</b> .
<code>oslc_sysmlv2:element_Owner</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The owner of this <b>Element</b> , derived as the <b>owningRelatedElement</b> of the <b>owningRelationship</b> of this <b>Element</b> , if any.
<code>oslc_sysmlv2:element_OwningMembership</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:OwningMembership</code>	The <b>owningRelationship</b> of this <b>Element</b> , if that <b>Relationship</b> is a <b>Membership</b> .
<code>oslc_sysmlv2:element_OwningNamespace</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Namespace</code>	The <b>Namespace</b> that owns this <b>Element</b> , which is the <b>membershipOwningNamespace</b> of the <b>owningMembership</b> of this <b>Element</b> , if any.
<code>oslc_sysmlv2:element_OwningRelationship</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Relationship</code>	The <b>Relationship</b> for which this <b>Element</b> is an <b>ownedRelatedElement</b> , if any.
<code>oslc_sysmlv2:element_QualifiedName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The full ownership-qualified name of this <b>Element</b> , represented in a form that is valid according to the KerML textual concrete syntax for qualified names (including use of unrestricted name notation and escaped characters, as necessary). The <b>qualifiedName</b> is null if this <b>Element</b> has no <b>owningNamespace</b> or if there is not a complete ownership chain of named <b>Namespaces</b> from a root <b>Namespace</b> to this <b>Element</b> .

Standards Track Work Product

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:element_ShortName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The short name to be used for this <b>Element</b> during name resolution within its <b>owningNamespace</b> . This is derived using the <code>effectiveShortName()</code> operation. By default, it is the same as the <b>declaredShortName</b> , but this is overridden for certain kinds of <b>Elements</b> to compute a <b>shortName</b> even when the <b>declaredName</b> is null.
<code>oslc_sysmlv2:element_TextualRepresentation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:TextualRepresentation</code>	The <b>TextualRepresentations</b> that annotate this <b>Element</b> .
<code>oslc_sysmlv2:expression_Function</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Function</code>	The <b>Function</b> that types this <b>Expression</b> .
<code>oslc_sysmlv2:expression_IsModelLevelEvaluable</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether this <b>Expression</b> meets the constraints necessary to be evaluated at <i>model level</i> , that is, using metadata within the model.
<code>oslc_sysmlv2:expression_Result</code>	Exactly-one	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	.
<code>oslc_sysmlv2:feature_ChainingFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <b>Feature</b> that are chained together to determine the values of this <b>Feature</b> , derived from the <b>chainingFeatures</b> of the <b>ownedFeatureChainings</b> of this <b>Feature</b> , in the same order. The values of a <b>Feature</b> with <b>chainingFeatures</b> are the same as values of the last <b>Feature</b> in the chain, which can be found by starting with the values of the first <b>Feature</b> (for each instance of the domain of the original <b>Feature</b> ), then using each of those as domain instances to find the values of the second <b>Feature</b> in <b>chainingFeatures</b> , and so on, to values of the last <b>Feature</b> .
<code>oslc_sysmlv2:feature_Direction</code>	Zero-or-one	false	unspecified	Either	<code>oslc_sysmlv2:FeatureDirectionKind</code>	Indicates how values of this <b>Feature</b> are determined or used (as specified for the <b>FeatureDirectionKind</b> ).
<code>oslc_sysmlv2:feature_EndOwningType</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The <b>Type</b> that is related to this <b>Feature</b> by an <b>EndFeatureMembership</b> in which the <b>Feature</b> is an <b>ownedMemberFeature</b> .
<code>oslc_sysmlv2:feature_FeaturingType</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	<b>Types</b> that feature this <b>Feature</b> , such that any instance in the domain of the <b>Feature</b> must be classified by all of these <b>Types</b> , including at least all the <b>featuringTypes</b> of its <b>typeFeaturings</b> . If the <b>Feature</b> is chained, then the <b>featuringTypes</b> of the first <b>Feature</b> in the chain are also <b>featuringTypes</b> of the chained <b>Feature</b> .

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:feature_IsComposite</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether the <b>Feature</b> is a composite <b>feature</b> of its <b>featuringType</b> . If so, the values of the <b>Feature</b> cannot exist after its featuring instance no longer does.
<code>oslc_sysmlv2:feature_IsDerived</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether the values of this <b>Feature</b> can always be computed from the values of other <b>Features</b> .
<code>oslc_sysmlv2:feature_IsEnd</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether or not the this <b>Feature</b> is an end <b>Feature</b> , requiring a different interpretation of the <b>multiplicity</b> of the <b>Feature</b> .
<code>oslc_sysmlv2:feature_IsNonunique</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	isNonunique.
<code>oslc_sysmlv2:feature_IsOrdered</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether an order exists for the values of this <b>Feature</b> or not.
<code>oslc_sysmlv2:feature_IsPortion</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether the values of this <b>Feature</b> are contained in the space and time of instances of the domain of the <b>Feature</b> and represent the same thing as those instances.
<code>oslc_sysmlv2:feature_IsReadOnly</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether the values of this <b>Feature</b> can change over the lifetime of an instance of the domain.
<code>oslc_sysmlv2:feature_IsUnique</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether or not values for this <b>Feature</b> must have no duplicates or not.
<code>oslc_sysmlv2:feature_OwnedFeatureChaining</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:FeatureChaining</code>	The <b>ownedRelationships</b> of this <b>Feature</b> that are <b>FeatureChainings</b> , for which the <b>Feature</b> will be the <b>featureChained</b> .
<code>oslc_sysmlv2:feature_OwnedFeatureInverting</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:FeatureInverting</code>	The <b>ownedRelationships</b> of this <b>Feature</b> that are <b>FeatureInvertings</b> and for which the <b>Feature</b> is the <b>featureInverted</b> .
<code>oslc_sysmlv2:feature_OwnedRedefinition</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Redefinition</code>	The <b>ownedSubsettings</b> of this <b>Feature</b> that are <b>Redefinitions</b> , for which the <b>Feature</b> is the <b>redefiningFeature</b> .
<code>oslc_sysmlv2:feature_OwnedReferenceSubsetting</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:ReferenceSubsetting</code>	The one <b>ownedSubsetting</b> of this <b>Feature</b> , if any, that is a <b>ReferenceSubsetting</b> , for which the <b>Feature</b> is the <b>referencingFeature</b> .
<code>oslc_sysmlv2:feature_OwnedSubsetting</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Subsetting</code>	The <b>ownedSpecializations</b> of this <b>Feature</b> that are <b>Subsettings</b> , for which the <b>Feature</b> is the <b>subsettingFeature</b> .

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:type_OwnedEndFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All <code>endFeatures</code> of this <code>Type</code> that are <code>ownedFeatures</code> .
<code>oslc_sysmlv2:type_OwnedFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <code>ownedMemberFeatures</code> of the <code>ownedFeatureMemberships</code> of this <code>Type</code> .
<code>oslc_sysmlv2:type_OwnedFeatureMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:FeatureMembership</code>	The <code>ownedMemberships</code> of this <code>Type</code> that are <code>FeatureMemberships</code> , for which the <code>Type</code> is the <code>owningType</code> . Each such <code>FeatureMembership</code> identifies an <code>ownedFeature</code> of the <code>Type</code> .
<code>oslc_sysmlv2:type_OwnedIntersecting</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Intersecting</code>	The <code>ownedRelationships</code> of this <code>Type</code> that are <code>Intersectings</code> , have the <code>Type</code> as their <code>typeIntersected</code> .
<code>oslc_sysmlv2:type_OwnedSpecialization</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Specialization</code>	The <code>ownedRelationships</code> of this <code>Type</code> that are <code>Specializations</code> , for which the <code>Type</code> is the <code>specific Type</code> .
<code>oslc_sysmlv2:type_OwnedUnioning</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Unioning</code>	The <code>ownedRelationships</code> of this <code>Type</code> that are <code>Unionings</code> , having the <code>Type</code> as their <code>typeUnioned</code> .
<code>oslc_sysmlv2:type_UnioningType</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The interpretations of a <code>Type</code> with <code>unioningTypes</code> are asserted to be the same as those of all the <code>unioningTypes</code> together, which are the <code>Types</code> derived from the <code>unioningType</code> of the <code>ownedUnionings</code> of this <code>Type</code> . For example, a <code>Classifier</code> for people might be the union of <code>Classifiers</code> for all the sexes. Similarly, a feature for people's children might be the union of features dividing them in the same ways as people in general.
<code>oslc:instanceShape</code>	Zero-or-one	false	Resource	Reference	<code>oslc:ResourceShape</code>	The URI of a Resource Shape that describes the possible properties, occurrence, value types, allowed values and labels. This shape information is useful in displaying the subject resource as well as guiding clients in performing modifications. Instance shapes may be specific to the authenticated user associated with the request that retrieved the resource, the current state of the resource and other factors and thus should not be cached.
<code>oslc:serviceProvider</code>	Zero-or-many	false	Resource	Reference	<code>oslc:ServiceProvider</code>	A link to the resource's OSLC Service Provider. There may be cases when the subject resource is available from a service provider that implements multiple domain specifications, which could result in multiple values for this property.

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc:shortTitle</code>	Zero-or-one	false	XMLLiteral	N/A	Unspecified	Short name identifying a resource, often used as an abbreviated identifier for presentation to end-users. <b>SHOULD</b> include only content that is valid inside an XHTML <code>&lt;span&gt;</code> element [sml-39].
<code>rdf:type</code>	Zero-or-many	false	Resource	Reference	<code>rdfs:Class</code>	The resource type URIs.

- **Describes:** <http://open-services.net/ns/sysmlv2#StakeholderMembership>
- **Summary:** StakeholderMembershipShape
- **Description:** A `StakeholderMembership` is a `ParameterMembership` that identifies a `PartUsage` as a `stakeholderParameter` of a `RequirementDefinition` or `RequirementUsage`, which specifies a role played by an entity with concerns framed by the `owningType`.

#### StakeholderMembership Properties

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>dcterms:contributor</code>	Zero-or-many	false	AnyResource	Either	<code>oslc:Any</code>	Contributor or contributors to the resource. It is likely that the target resource will be a foaf:Person but that is not necessarily the case.
<code>dcterms:created</code>	Zero-or-one	false	dateTime	N/A	Unspecified	Timestamp of resource creation.
<code>dcterms:creator</code>	Zero-or-many	false	AnyResource	Either	<code>oslc:Any</code>	Creator or creators of the resource. It is likely that the target resource will be a foaf:Person but that is not necessarily the case.
<code>dcterms:description</code>	Zero-or-one	false	XMLLiteral	N/A	Unspecified	Descriptive text about resource represented as rich text in XHTML content.
<code>dcterms:identifier</code>	Exactly-one	true	string	N/A	Unspecified	A unique identifier for a resource. Typically read-only and assigned by the service provider when a resource is created. Not typically intended for end-user display.
<code>dcterms:modified</code>	Zero-or-one	false	dateTime	N/A	Unspecified	Timestamp of latest resource modification.

Standards Track Work Product

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>dcterms:source</code>	Zero-or-one	false	Resource	Reference	<code>oslc:Any</code>	The resource URI a client can perform a get on to obtain the original non-OSLC AM formatted resource that was used to create this resource. The source resource is usually a binary or proprietary format that the service provider can consume and convert into an OSLC AM format. The service may use content negotiation with the Accept header to obtain the desired content type.
<code>dcterms:title</code>	Exactly-one	false	XMLLiteral	N/A	Unspecified	Title of the resource represented as rich text in XHTML content.
<code>dcterms:type</code>	Zero-or-many	false	string	N/A	Unspecified	A short string representation for the type, for example 'Car'.
<code>jazz_am:derives</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The resource that derives from another resource originated from or is significantly influenced by the referenced resource. For example a model element derives from a requirement.
<code>jazz_am:elaborates</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	This resource elaborates the referenced resource.
<code>jazz_am:external</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	A generic link from a resource to an external web page.
<code>jazz_am:refine</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The target is a refinement of the source. (e.g. a use case scenario might be a refinement of a textual requirement that describes the interaction).
<code>jazz_am:satisfy</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The model element satisfies the requirement (e.g. The use case satisfies a functional requirement).
<code>jazz_am:trace</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The model element has a trace to the requirement (e.g. An attribute or its value are traced to a requirement).
<code>oslc_sysmlv2:element_AliasIds</code>	Zero-or-many	false	unspecified	Either	<code>xsd:string</code>	Various alternative identifiers for this Element. Generally, these will be set by tools.

Standards Track Work Product

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:element_DeclaredName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The declared name of this <b>Element</b> .
<code>oslc_sysmlv2:element_DeclaredShortName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	An optional alternative name for the <b>Element</b> that is intended to be shorter or in some way more succinct than its primary <b>name</b> . It may act as a modeler-specified identifier for the <b>Element</b> , though it is then the responsibility of the modeler to maintain the uniqueness of this identifier within a model or relative to some other context.
<code>oslc_sysmlv2:element_Documentation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Documentation</code>	The Documentation owned by this Element.
<code>oslc_sysmlv2:element_ElementId</code>	Exactly-one	false	unspecified	Either	<code>xsd:string</code>	The globally unique identifier for this Element. This is intended to be set by tooling, and it must not change during the lifetime of the Element.
<code>oslc_sysmlv2:element_IsImpliedIncluded</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether all necessary implied Relationships have been included in the <b>ownedRelationships</b> of this Element. This property may be true, even if there are not actually any <b>ownedRelationships</b> with <b>isImplied = true</b> , meaning that no such Relationships are actually implied for this Element. However, if it is false, then <b>ownedRelationships</b> may <i>not</i> contain any implied Relationships. That is, either <i>all</i> required implied Relationships must be included, or none of them.
<code>oslc_sysmlv2:element_IsLibraryElement</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether this Element is contained in the ownership tree of a library model.
<code>oslc_sysmlv2:element_Name</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The name to be used for this <b>Element</b> during name resolution within its <b>owningNamespace</b> . This is derived using the <b>effectiveName()</b> operation. By default, it is the same as the <b>declaredName</b> , but this is overridden for certain kinds of <b>Elements</b> to compute a <b>name</b> even when the <b>declaredName</b> is null.

Standards Track Work Product

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:element_OwnedAnnotation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Annotation</code>	The <code>ownedRelationships</code> of this <code>Element</code> that are <code>Annotations</code> , for which this <code>Element</code> is the <code>annotatedElement</code> .
<code>oslc_sysmlv2:element_OwnedElement</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The <code>Elements</code> owned by this <code>Element</code> , derived as the <code>ownedRelatedElements</code> of the <code>ownedRelationships</code> of this <code>Element</code> .
<code>oslc_sysmlv2:element_OwnedRelationship</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Relationship</code>	The <code>Relationships</code> for which this <code>Element</code> is the <code>owningRelatedElement</code> .
<code>oslc_sysmlv2:element_Owner</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The owner of this <code>Element</code> , derived as the <code>owningRelatedElement</code> of the <code>owningRelationship</code> of this <code>Element</code> , if any.
<code>oslc_sysmlv2:element_OwningMembership</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:OwningMembership</code>	The <code>owningRelationship</code> of this <code>Element</code> , if that <code>Relationship</code> is a <code>Membership</code> .
<code>oslc_sysmlv2:element_OwningNamespace</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Namespace</code>	The <code>Namespace</code> that owns this <code>Element</code> , which is the <code>membershipOwningNamespace</code> of the <code>owningMembership</code> of this <code>Element</code> , if any.
<code>oslc_sysmlv2:element_OwningRelationship</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Relationship</code>	The <code>Relationship</code> for which this <code>Element</code> is an <code>ownedRelatedElement</code> , if any.
<code>oslc_sysmlv2:element_QualifiedName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The full ownership-qualified name of this <code>Element</code> , represented in a form that is valid according to the KerML textual concrete syntax for qualified names (including use of unrestricted name notation and escaped characters, as necessary). The <code>qualifiedName</code> is null if this <code>Element</code> has no <code>owningNamespace</code> or if there is not a complete ownership chain of named <code>Namespaces</code> from a root <code>Namespace</code> to this <code>Element</code> .
<code>oslc_sysmlv2:element_ShortName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The short name to be used for this <code>Element</code> during name resolution within its <code>owningNamespace</code> . This is derived using the <code>effectiveShortName()</code> operation. By default, it is the same as the <code>declaredShortName</code> , but this is overridden for certain kinds of <code>Elements</code> to compute a <code>shortName</code> even when the <code>declaredName</code> is null.

- **Describes:** <http://open-services.net/ns/sysmlv2#ReferenceUsage>
- **Summary:** ReferenceUsageShape
- **Description:** A **ReferenceUsage** is a **Usage** that specifies a non-compositional (`isComposite = false`) reference to something. The **definition** of a **ReferenceUsage** can be any kind of **Classifier**, with the default being the top-level **Classifier Base::Anything** from the Kernel Semantic Library. This allows the specification of a generic reference without distinguishing if the thing referenced is an attribute value, item, action, etc.

#### ReferenceUsage Properties

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>dcterms:contributor</code>	Zero-or-many	false	AnyResource	Either	<code>oslc:Any</code>	Contributor or contributors to the resource. It is likely that the target resource will be a foaf:Person but that is not necessarily the case.
<code>dcterms:created</code>	Zero-or-one	false	dateTime	N/A	Unspecified	Timestamp of resource creation.
<code>dcterms:creator</code>	Zero-or-many	false	AnyResource	Either	<code>oslc:Any</code>	Creator or creators of the resource. It is likely that the target resource will be a foaf:Person but that is not necessarily the case.
<code>dcterms:description</code>	Zero-or-one	false	XMLLiteral	N/A	Unspecified	Descriptive text about resource represented as rich text in XHTML content.
<code>dcterms:identifier</code>	Exactly-one	true	string	N/A	Unspecified	A unique identifier for a resource. Typically read-only and assigned by the service provider when a resource is created. Not typically intended for end-user display.

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:feature_ChainingFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <b>Feature</b> that are chained together to determine the values of this <b>Feature</b> , derived from the <b>chainingFeatures</b> of the <b>ownedFeatureChainings</b> of this <b>Feature</b> , in the same order. The values of a <b>Feature</b> with <b>chainingFeatures</b> are the same as values of the last <b>Feature</b> in the chain, which can be found by starting with the values of the first <b>Feature</b> (for each instance of the domain of the original <b>Feature</b> ), then using each of those as domain instances to find the values of the second <b>Feature</b> in <b>chainingFeatures</b> , and so on, to values of the last <b>Feature</b> .
<code>oslc_sysmlv2:feature_Direction</code>	Zero-or-one	false	unspecified	Either	<code>oslc_sysmlv2:FeatureDirectionKind</code>	Indicates how values of this <b>Feature</b> are determined or used (as specified for the <b>FeatureDirectionKind</b> ).
<code>oslc_sysmlv2:feature_EndOwningType</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The <b>Type</b> that is related to this <b>Feature</b> by an <b>EndFeatureMembership</b> in which the <b>Feature</b> is an <b>ownedMemberFeature</b> .
<code>oslc_sysmlv2:feature_FeaturingType</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	<b>Types</b> that feature this <b>Feature</b> , such that any instance in the domain of the <b>Feature</b> must be classified by all of these <b>Types</b> , including at least all the <b>featuringTypes</b> of its <b>typeFeaturings</b> . If the <b>Feature</b> is chained, then the <b>featuringTypes</b> of the first <b>Feature</b> in the chain are also <b>featuringTypes</b> of the chained <b>Feature</b> .
<code>oslc_sysmlv2:feature_IsComposite</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether the <b>Feature</b> is a composite <b>feature</b> of its <b>featuringType</b> . If so, the values of the <b>Feature</b> cannot exist after its featuring instance no longer does.
<code>oslc_sysmlv2:feature_IsDerived</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether the values of this <b>Feature</b> can always be computed from the values of other <b>Features</b> .
<code>oslc_sysmlv2:feature_IsEnd</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether or not the this <b>Feature</b> is an end <b>Feature</b> , requiring a different interpretation of the <b>multiplicity</b> of the <b>Feature</b> .
<code>oslc_sysmlv2:feature_IsNonunique</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	isNonunique.
<code>oslc_sysmlv2:feature_IsOrdered</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether an order exists for the values of this <b>Feature</b> or not.
<code>oslc_sysmlv2:feature_IsPortion</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether the values of this <b>Feature</b> are contained in the space and time of instances of the domain of the <b>Feature</b> and represent the same thing as those instances.
<code>oslc_sysmlv2:feature_IsReadOnly</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether the values of this <b>Feature</b> can change over the lifetime of an instance of the domain.

<code>oslc:instanceShape</code>	Zero-or-one	false	Resource	Reference	<code>oslc:ResourceShape</code>	The URI of a Resource Shape that describes the possible properties, occurrence, value types, allowed values and labels. This shape information is useful in displaying the subject resource as well as guiding clients in performing modifications. Instance shapes may be specific to the authenticated user associated with the request that retrieved the resource, the current state of the resource and other factors and thus should not be cached.
<code>oslc:serviceProvider</code>	Zero-or-many	false	Resource	Reference	<code>oslc:ServiceProvider</code>	A link to the resource's OSLC Service Provider. There may be cases when the subject resource is available from a service provider that implements multiple domain specifications, which could result in multiple values for this property.
<code>oslc:shortTitle</code>	Zero-or-one	false	XMLLiteral	N/A	Unspecified	Short name identifying a resource, often used as an abbreviated identifier for presentation to end-users. <b>SHOULD</b> include only content that is valid inside an XHTML <code>&lt;span&gt;</code> element [sml-41].
<code>rdf:type</code>	Zero-or-many	false	Resource	Reference	<code>rdfs:Class</code>	The resource type URIs.

- **Describes:** <http://open-services.net/ns/sysmlv2#AllocationDefinition>
- **Summary:** AllocationDefinitionShape
- **Description:** An **AllocationDefinition** is a **ConnectionDefinition** that specifies that some or all of the responsibility to realize the intent of the **source** is allocated to the **target** instances. Such allocations define mappings across the various structures and hierarchies of a system model, perhaps as a precursor to more rigorous specifications and implementations. An **AllocationDefinition** can itself be refined using nested **allocations** that give a finer-grained decomposition of the containing allocation mapping.

<code>dcterms:creator</code>	Zero-or-many	false	AnyResource	Either	<code>oslc:Any</code>	Creator or creators of the resource. It is likely that the target resource will be a foaf:Person but that is not necessarily the case.
<code>dcterms:description</code>	Zero-or-one	false	XMLLiteral	N/A	Unspecified	Descriptive text about resource represented as rich text in XHTML content.
<code>dcterms:identifier</code>	Exactly-one	true	string	N/A	Unspecified	A unique identifier for a resource. Typically read-only and assigned by the service provider when a resource is created. Not typically intended for end-user display.
<code>dcterms:modified</code>	Zero-or-one	false	dateTime	N/A	Unspecified	Timestamp of latest resource modification.
<code>dcterms:source</code>	Zero-or-one	false	Resource	Reference	<code>oslc:Any</code>	The resource URI a client can perform a get on to obtain the original non-OSLC AM formatted resource that was used to create this resource. The source resource is usually a binary or proprietary format that the service provider can consume and convert into an OSLC AM format. The service may use content negotiation with the Accept header to obtain the desired content type.
<code>dcterms:title</code>	Exactly-one	false	XMLLiteral	N/A	Unspecified	Title of the resource represented as rich text in XHTML content.
<code>dcterms:type</code>	Zero-or-many	false	string	N/A	Unspecified	A short string representation for the type, for example 'Car'.
<code>jazz_am:derives</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The resource that derives from another resource originated from or is significantly influenced by the referenced resource. For example a model element derives from a requirement.
<code>jazz_am:elaborates</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	This resource elaborates the referenced resource.

Standards Track Work Product

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>jazz_am:external</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	A generic link from a resource to an external web page.
<code>jazz_am:refine</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The target is a refinement of the source. (e.g. a use case scenario might be a refinement of a textual requirement that describes the interaction).
<code>jazz_am:satisfy</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The model element satisfies the requirement (e.g. The use case satisfies a functional requirement).
<code>jazz_am:trace</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The model element has a trace to the requirement (e.g. An attribute or its value are traced to a requirement).
<code>oslc_sysmlv2:allocationDefinition_Allocation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:AllocationUsage</code>	The <b>AllocationUsages</b> that refine the allocation mapping defined by this <b>AllocationDefinition</b> .
<code>oslc_sysmlv2:association_AssociationEnd</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <b>features</b> of the <b>Association</b> that identify the things that can be related by it. A concrete <b>Association</b> must have at least two <b>associationEnds</b> . When it has exactly two, the <b>Association</b> is called a <i>binary Association</i> .
<code>oslc_sysmlv2:association_RelatedType</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The <b>types</b> of the <b>associationEnds</b> of the <b>Association</b> , which are the <b>relatedElements</b> of the <b>Association</b> considered as a <b>Relationship</b> .
<code>oslc_sysmlv2:association_SourceType</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The source <b>relatedType</b> for this <b>Association</b> . It is the first <b>relatedType</b> of the <b>Association</b> .
<code>oslc_sysmlv2:association_TargetType</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The target <b>relatedTypes</b> for this <b>Association</b> . This includes all the <b>relatedTypes</b> other than the <b>sourceType</b> .
<code>oslc_sysmlv2:classifier_OwnedSubclassification</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Subclassification</code>	The <b>ownedSpecializations</b> of this <b>Classifier</b> that are <b>Subclassifications</b> , for which this <b>Classifier</b> is the <b>subclassifier</b> .
<code>oslc_sysmlv2:connectionDefinition_ConnectionEnd</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Usage</code>	The <b>Usages</b> that define the things related by the <b>ConnectionDefinition</b> .

<code>oslc_sysmlv2:definition_OwnedReference</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:ReferenceUsage</code>	The <code>ReferenceUsages</code> that are <code>ownedUsages</code> of this <code>Definition</code> .
<code>oslc_sysmlv2:definition_OwnedRendering</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:RenderingUsage</code>	The <code>RenderingUsages</code> that are <code>ownedUsages</code> of this <code>Definition</code> .
<code>oslc_sysmlv2:definition_OwnedRequirement</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:RequirementUsage</code>	The <code>RequirementUsages</code> that are <code>ownedUsages</code> of this <code>Definition</code> .

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:definition_OwnedState</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:StateUsage</code>	The <code>StateUsages</code> that are <code>ownedUsages</code> of this <code>Definition</code> .
<code>oslc_sysmlv2:definition_OwnedTransition</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:TransitionUsage</code>	The <code>TransitionUsages</code> that are <code>ownedUsages</code> of this <code>Definition</code> .
<code>oslc_sysmlv2:definition_OwnedUsage</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Usage</code>	The <code>Usages</code> that are <code>ownedFeatures</code> of this <code>Definition</code> .
<code>oslc_sysmlv2:definition_OwnedUseCase</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:UseCaseUsage</code>	The <code>UseCaseUsages</code> that are <code>ownedUsages</code> of this <code>Definition</code> .
<code>oslc_sysmlv2:definition_OwnedVerificationCase</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:VerificationCaseUsage</code>	The <code>VerificationCaseUsages</code> that are <code>ownedUsages</code> of this <code>Definition</code> .
<code>oslc_sysmlv2:definition_OwnedView</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:ViewUsage</code>	The <code>ViewUsages</code> that are <code>ownedUsages</code> of this <code>Definition</code> .
<code>oslc_sysmlv2:definition_OwnedViewpoint</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:ViewpointUsage</code>	The <code>ViewpointUsages</code> that are <code>ownedUsages</code> of this <code>Definition</code> .
<code>oslc_sysmlv2:definition_Usage</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Usage</code>	The <code>Usages</code> that are <code>features</code> of this <code>Definition</code> (not necessarily owned).
<code>oslc_sysmlv2:definition_Variant</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Usage</code>	The <code>Usages</code> which represent the variants of this <code>Definition</code> as a variation point <code>Definition</code> , if <code>isVariation</code> = true. If <code>isVariation</code> = false, the there must be no <code>variants</code> .
<code>oslc_sysmlv2:definition_VariantMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:VariantMembership</code>	The <code>ownedMemberships</code> of this <code>Definition</code> that are <code>VariantMemberships</code> . If <code>isVariation</code> = true, then this must be all <code>ownedMemberships</code> of the <code>Definition</code> . If <code>isVariation</code> = false, then <code>variantMembership</code> must be empty.
<code>oslc_sysmlv2:element_AliasIds</code>	Zero-or-many	false	unspecified	Either	<code>xsd:string</code>	Various alternative identifiers for this Element. Generally, these will be set by tools.

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:element_DeclaredName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The declared name of this <b>Element</b> .
<code>oslc_sysmlv2:element_DeclaredShortName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	An optional alternative name for the <b>Element</b> that is intended to be shorter or in some way more succinct than its primary <b>name</b> . It may act as a modeler-specified identifier for the <b>Element</b> , though it is then the responsibility of the modeler to maintain the uniqueness of this identifier within a model or relative to some other context.
<code>oslc_sysmlv2:element_Documentation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Documentation</code>	The Documentation owned by this Element.
<code>oslc_sysmlv2:element_ElementId</code>	Exactly-one	false	unspecified	Either	<code>xsd:string</code>	The globally unique identifier for this Element. This is intended to be set by tooling, and it must not change during the lifetime of the Element.
<code>oslc_sysmlv2:element_IsImpliedIncluded</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether all necessary implied Relationships have been included in the <b>ownedRelationships</b> of this Element. This property may be true, even if there are not actually any <b>ownedRelationships</b> with <b>isImplied = true</b> , meaning that no such Relationships are actually implied for this Element. However, if it is false, then <b>ownedRelationships</b> may <i>not</i> contain any implied Relationships. That is, either <i>all</i> required implied Relationships must be included, or none of them.
<code>oslc_sysmlv2:element_IsLibraryElement</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether this Element is contained in the ownership tree of a library model.
<code>oslc_sysmlv2:element_Name</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The name to be used for this <b>Element</b> during name resolution within its <b>owningNamespace</b> . This is derived using the <b>effectiveName()</b> operation. By default, it is the same as the <b>declaredName</b> , but this is overridden for certain kinds of <b>Elements</b> to compute a <b>name</b> even when the <b>declaredName</b> is null.
<code>oslc_sysmlv2:element_OwnedAnnotation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Annotation</code>	The <b>ownedRelationships</b> of this <b>Element</b> that are <b>Annotations</b> , for which this <b>Element</b> is the <b>annotatedElement</b> .
<code>oslc_sysmlv2:element_OwnedElement</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The Elements owned by this Element, derived as the <b>ownedRelatedElements</b> of the <b>ownedRelationships</b> of this Element.

Standards Track Work Product

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:element_OwnedRelationship</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Relationship</code>	The Relationships for which this Element is the <code>owningRelatedElement</code> .
<code>oslc_sysmlv2:element_Owner</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The owner of this Element, derived as the <code>owningRelatedElement</code> of the <code>owningRelationship</code> of this Element, if any.
<code>oslc_sysmlv2:element_OwningMembership</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:OwningMembership</code>	The <code>owningRelationship</code> of this Element, if that Relationship is a Membership.
<code>oslc_sysmlv2:element_OwningNamespace</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Namespace</code>	The Namespace that owns this Element, which is the <code>membershipOwningNamespace</code> of the <code>owningMembership</code> of this Element, if any.
<code>oslc_sysmlv2:element_OwningRelationship</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Relationship</code>	The Relationship for which this Element is an <code>ownedRelatedElement</code> , if any.
<code>oslc_sysmlv2:element_QualifiedName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The full ownership-qualified name of this Element, represented in a form that is valid according to the KerML textual concrete syntax for qualified names (including use of unrestricted name notation and escaped characters, as necessary). The <code>qualifiedName</code> is null if this Element has no <code>owningNamespace</code> or if there is not a complete ownership chain of named Namespaces from a root Namespace to this Element.
<code>oslc_sysmlv2:element_ShortName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The short name to be used for this Element during name resolution within its <code>owningNamespace</code> . This is derived using the <code>effectiveShortName()</code> operation. By default, it is the same as the <code>declaredShortName</code> , but this is overridden for certain kinds of Elements to compute a <code>shortName</code> even when the <code>declaredName</code> is null.
<code>oslc_sysmlv2:element_TextualRepresentation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:TextualRepresentation</code>	The <code>TextualRepresentations</code> that annotate this Element.
<code>oslc_sysmlv2:namespace_ImportedMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Membership</code>	The Memberships in this Namespace that result from the <code>ownedImports</code> of this Namespace.
<code>oslc_sysmlv2:namespace_Member</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The set of all member Elements of this Namespace, which are the <code>memberElements</code> of all <code>memberships</code> of the Namespace.

<code>oslc_sysmlv2:type_OwnedFeatureMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:FeatureMembership</code>	The <code>ownedMemberships</code> of this <code>Type</code> that are <code>FeatureMemberships</code> , for which the <code>Type</code> is the <code>owningType</code> . Each such <code>FeatureMembership</code> identifies an <code>ownedFeature</code> of the <code>Type</code> .
<code>oslc_sysmlv2:type_OwnedIntersecting</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Intersecting</code>	The <code>ownedRelationships</code> of this <code>Type</code> that are <code>Intersectings</code> , have the <code>Type</code> as their <code>typeIntersected</code> .
<code>oslc_sysmlv2:type_OwnedSpecialization</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Specialization</code>	The <code>ownedRelationships</code> of this <code>Type</code> that are <code>Specializations</code> , for which the <code>Type</code> is the <code>specific Type</code> .
<code>oslc_sysmlv2:type_OwnedUnioning</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Unioning</code>	The <code>ownedRelationships</code> of this <code>Type</code> that are <code>Unionings</code> , having the <code>Type</code> as their <code>typeUnioned</code> .
<code>oslc_sysmlv2:type_UnioningType</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The interpretations of a <code>Type</code> with <code>unioningTypes</code> are asserted to be the same as those of all the <code>unioningTypes</code> together, which are the <code>Types</code> derived from the <code>unioningType</code> of the <code>ownedUnionings</code> of this <code>Type</code> . For example, a <code>Classifier</code> for people might be the union of <code>Classifiers</code> for all the sexes. Similarly, a feature for people's children might be the union of features dividing them in the same ways as people in general.
<code>oslc:instanceShape</code>	Zero-or-one	false	Resource	Reference	<code>oslc:ResourceShape</code>	The URI of a Resource Shape that describes the possible properties, occurrence, value types, allowed values and labels. This shape information is useful in displaying the subject resource as well as guiding clients in performing modifications. Instance shapes may be specific to the authenticated user associated with the request that retrieved the resource, the current state of the resource and other factors and thus should not be cached.
<code>oslc:serviceProvider</code>	Zero-or-many	false	Resource	Reference	<code>oslc:ServiceProvider</code>	A link to the resource's OSLC Service Provider. There may be cases when the subject resource is available from a service provider that implements multiple domain specifications, which could result in multiple values for this property.
<code>oslc:shortTitle</code>	Zero-or-one	false	XMLLiteral	N/A	Unspecified	Short name identifying a resource, often used as an abbreviated identifier for presentation to end-users. <b>SHOULD</b> include only content that is valid inside an XHTML <code>&lt;span&gt;</code> element [sml-42].

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>rdf:type</code>	Zero-or-many	false	Resource	Reference	<code>rdfs:Class</code>	The resource type URIs.

- **Describes:** <http://open-services.net/ns/sysmlv2#ReferenceSubsetting>
- **Summary:** ReferenceSubsettingShape
- **Description:** ReferenceSubsetting is a kind of Subsetting in which the `referencedFeature` is syntactically distinguished from other `Features` subsetting by the `referencingFeature`. ReferenceSubsetting has the same semantics as Subsetting, but the `referenceFeature` may have a special purpose relative to the `referencingFeature`. For instance, ReferenceSubsetting is used to identify the `relatedFeatures` of a Connector.

### ReferenceSubsetting Properties

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>dcterms:contributor</code>	Zero-or-many	false	AnyResource	Either	<code>oslc:Any</code>	Contributor or contributors to the resource. It is likely that the target resource will be a foaf:Person but that is not necessarily the case.
<code>dcterms:created</code>	Zero-or-one	false	dateTime	N/A	Unspecified	Timestamp of resource creation.
<code>dcterms:creator</code>	Zero-or-many	false	AnyResource	Either	<code>oslc:Any</code>	Creator or creators of the resource. It is likely that the target resource will be a foaf:Person but that is not necessarily the case.
<code>dcterms:description</code>	Zero-or-one	false	XMLLiteral	N/A	Unspecified	Descriptive text about resource represented as rich text in XHTML content.
<code>dcterms:identifier</code>	Exactly-one	true	string	N/A	Unspecified	A unique identifier for a resource. Typically read-only and assigned by the service provider when a resource is created. Not typically intended for end-user display.
<code>dcterms:modified</code>	Zero-or-one	false	dateTime	N/A	Unspecified	Timestamp of latest resource modification.
<code>dcterms:source</code>	Zero-or-one	false	Resource	Reference	<code>oslc:Any</code>	The resource URI a client can perform a get on to obtain the original non-OSLC AM formatted resource that was used to create this resource. The source resource is usually a binary or proprietary format that the service provider can consume and convert into an OSLC AM format. The service may use content negotiation with the Accept header to obtain the desired content type.

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>dcterms:title</code>	Exactly-one	false	XMLLiteral	N/A	Unspecified	Title of the resource represented as rich text in XHTML content.
<code>dcterms:type</code>	Zero-or-many	false	string	N/A	Unspecified	A short string representation for the type, for example 'Car'.
<code>jazz_am:derives</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The resource that derives from another resource originated from or is significantly influenced by the referenced resource. For example a model element derives from a requirement.
<code>jazz_am:elaborates</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	This resource elaborates the referenced resource.
<code>jazz_am:external</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	A generic link from a resource to an external web page.
<code>jazz_am:refine</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The target is a refinement of the source. (e.g. a use case scenario might be a refinement of a textual requirement that describes the interaction).
<code>jazz_am:satisfy</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The model element satisfies the requirement (e.g. The use case satisfies a functional requirement).
<code>jazz_am:trace</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The model element has a trace to the requirement (e.g. An attribute or its value are traced to a requirement).
<code>oslc_sysmlv2:element_AliasIds</code>	Zero-or-many	false	unspecified	Either	<code>xsd:string</code>	Various alternative identifiers for this Element. Generally, these will be set by tools.
<code>oslc_sysmlv2:element_DeclaredName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The declared name of this <b>Element</b> .
<code>oslc_sysmlv2:element_DeclaredShortName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	An optional alternative name for the <b>Element</b> that is intended to be shorter or in some way more succinct than its primary <b>name</b> . It may act as a modeler-specified identifier for the <b>Element</b> , though it is then the responsibility of the modeler to maintain the uniqueness of this identifier within a model or relative to some other context.

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:element_Documentation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Documentation</code>	The Documentation owned by this Element.
<code>oslc_sysmlv2:element_ElementId</code>	Exactly-one	false	unspecified	Either	<code>xsd:string</code>	The globally unique identifier for this Element. This is intended to be set by tooling, and it must not change during the lifetime of the Element.
<code>oslc_sysmlv2:element_IsImpliedIncluded</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether all necessary implied Relationships have been included in the <code>ownedRelationships</code> of this Element. This property may be true, even if there are not actually any <code>ownedRelationships</code> with <code>isImplied = true</code> , meaning that no such Relationships are actually implied for this Element. However, if it is false, then <code>ownedRelationships</code> may <i>not</i> contain any implied Relationships. That is, either <i>all</i> required implied Relationships must be included, or none of them.
<code>oslc_sysmlv2:element_IsLibraryElement</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether this Element is contained in the ownership tree of a library model.
<code>oslc_sysmlv2:element_Name</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The name to be used for this <code>Element</code> during name resolution within its <code>owningNamespace</code> . This is derived using the <code>effectiveName()</code> operation. By default, it is the same as the <code>declaredName</code> , but this is overridden for certain kinds of <code>Elements</code> to compute a <code>name</code> even when the <code>declaredName</code> is null.
<code>oslc_sysmlv2:element_OwnedAnnotation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Annotation</code>	The <code>ownedRelationships</code> of this <code>Element</code> that are <code>Annotations</code> , for which this <code>Element</code> is the <code>annotatedElement</code> .
<code>oslc_sysmlv2:element_OwnedElement</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The <code>Elements</code> owned by this Element, derived as the <code>ownedRelatedElements</code> of the <code>ownedRelationships</code> of this Element.
<code>oslc_sysmlv2:element_OwnedRelationship</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Relationship</code>	The <code>Relationships</code> for which this Element is the <code>owningRelatedElement</code> .
<code>oslc_sysmlv2:element_Owner</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The owner of this Element, derived as the <code>owningRelatedElement</code> of the <code>owningRelationship</code> of this Element, if any.

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:element_OwningMembership</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:OwningMembership</code>	The <code>owningRelationship</code> of this <code>Element</code> , if that <code>Relationship</code> is a <code>Membership</code> .
<code>oslc_sysmlv2:element_OwningNamespace</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Namespace</code>	The <code>Namespace</code> that owns this <code>Element</code> , which is the <code>membershipOwningNamespace</code> of the <code>owningMembership</code> of this <code>Element</code> , if any.
<code>oslc_sysmlv2:element_OwningRelationship</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Relationship</code>	The <code>Relationship</code> for which this <code>Element</code> is an <code>ownedRelatedElement</code> , if any.
<code>oslc_sysmlv2:element_QualifiedName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The full ownership-qualified name of this <code>Element</code> , represented in a form that is valid according to the KerML textual concrete syntax for qualified names (including use of unrestricted name notation and escaped characters, as necessary). The <code>qualifiedName</code> is null if this <code>Element</code> has no <code>owningNamespace</code> or if there is not a complete ownership chain of named <code>Namespaces</code> from a root <code>Namespace</code> to this <code>Element</code> .
<code>oslc_sysmlv2:element_ShortName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The short name to be used for this <code>Element</code> during name resolution within its <code>owningNamespace</code> . This is derived using the <code>effectiveShortName()</code> operation. By default, it is the same as the <code>declaredShortName</code> , but this is overridden for certain kinds of <code>Elements</code> to compute a <code>shortName</code> even when the <code>declaredName</code> is null.
<code>oslc_sysmlv2:element_TextualRepresentation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:TextualRepresentation</code>	The <code>TextualRepresentations</code> that annotate this <code>Element</code> .
<code>oslc_sysmlv2:referenceSubsetting_ReferencedFeature</code>	Exactly-one	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <code>Feature</code> that is referenced by the <code>referencingFeature</code> of this <code>ReferenceSubsetting</code> .
<code>oslc_sysmlv2:referenceSubsetting_ReferencingFeature</code>	Exactly-one	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <code>Feature</code> that owns this <code>ReferenceSubsetting</code> relationship, which is also its <code>subsettingFeature</code> .
<code>oslc_sysmlv2:relationship_IsImplied</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether this <code>Relationship</code> was generated by tooling to meet semantic rules, rather than being directly created by a modeler.
<code>oslc_sysmlv2:relationship_OwnedRelatedElement</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The <code>relatedElements</code> of this <code>Relationship</code> that are owned by the <code>Relationship</code> .

Standards Track Work Product

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:relationship_OwningRelatedElement</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The <code>relatedElement</code> of this Relationship that owns the Relationship, if any.
<code>oslc_sysmlv2:relationship_RelatedElement</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The Elements that are related by this Relationship, derived as the union of the <code>source</code> and <code>target</code> Elements of the Relationship.
<code>oslc_sysmlv2:relationship_Source</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The <code>relatedElements</code> from which this Relationship is considered to be directed..
<code>oslc_sysmlv2:relationship_Target</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The <code>relatedElements</code> to which this Relationship is considered to be directed.
<code>oslc_sysmlv2:specialization_General</code>	Exactly-one	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	A <code>Type</code> with a superset of all instances of the <code>specific Type</code> , which might be the same set.
<code>oslc_sysmlv2:specialization_OwningType</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The <code>Type</code> that is the <code>specific Type</code> of this <code>Specialization</code> and owns it as its <code>owningRelatedElement</code> .
<code>oslc_sysmlv2:specialization_Specific</code>	Exactly-one	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	A <code>Type</code> with a subset of all instances of the <code>general Type</code> , which might be the same set.
<code>oslc_sysmlv2:subsetting_OwningFeature</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	A <code>subsettingFeature</code> that is also the <code>owningRelatedElement</code> of this <code>Subsetting</code> .
<code>oslc_sysmlv2:subsetting_SubsettedFeature</code>	Exactly-one	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <code>Feature</code> that is subsetted by the <code>subsettingFeature</code> of this <code>Subsetting</code> .
<code>oslc_sysmlv2:subsetting_SubsettingFeature</code>	Exactly-one	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <code>Feature</code> that is a subset of the <code>subsettedFeature</code> of this <code>Subsetting</code> .
<code>oslc:instanceShape</code>	Zero-or-one	false	Resource	Reference	<code>oslc:ResourceShape</code>	The URI of a Resource Shape that describes the possible properties, occurrence, value types, allowed values and labels. This shape information is useful in displaying the subject resource as well as guiding clients in performing modifications. Instance shapes may be specific to the authenticated user associated with the request that retrieved the resource, the current state of the resource and other factors and thus should not be cached.

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc:serviceProvider</code>	Zero-or-many	false	Resource	Reference	<code>oslc:ServiceProvider</code>	A link to the resource's OSLC Service Provider. There may be cases when the subject resource is available from a service provider that implements multiple domain specifications, which could result in multiple values for this property.
<code>oslc:shortTitle</code>	Zero-or-one	false	XMLLiteral	N/A	Unspecified	Short name identifying a resource, often used as an abbreviated identifier for presentation to end-users. <b>SHOULD</b> include only content that is valid inside an XHTML <code>&lt;span&gt;</code> element [sml-43].
<code>rdf:type</code>	Zero-or-many	false	Resource	Reference	<code>rdfs:Class</code>	The resource type URIs.

- **Describes:** <http://open-services.net/ns/sysmlv2#Invariant>
- **Summary:** InvariantShape
- **Description:** An **Invariant** is a **BooleanExpression** that is asserted to have a specific **Boolean** result value. If `isNegated = false`, then the result is asserted to be true. If `isNegated = true`, then the result is asserted to be false.

#### Invariant Properties

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>dcterms:contributor</code>	Zero-or-many	false	AnyResource	Either	<code>oslc:Any</code>	Contributor or contributors to the resource. It is likely that the target resource will be a foaf:Person but that is not necessarily the case.
<code>dcterms:created</code>	Zero-or-one	false	dateTime	N/A	Unspecified	Timestamp of resource creation.
<code>dcterms:creator</code>	Zero-or-many	false	AnyResource	Either	<code>oslc:Any</code>	Creator or creators of the resource. It is likely that the target resource will be a foaf:Person but that is not necessarily the case.
<code>dcterms:description</code>	Zero-or-one	false	XMLLiteral	N/A	Unspecified	Descriptive text about resource represented as rich text in XHTML content.
<code>dcterms:identifier</code>	Exactly-one	true	string	N/A	Unspecified	A unique identifier for a resource. Typically read-only and assigned by the service provider when a resource is created. Not typically intended for end-user display.

<code>oslc_sysmlv2:feature_IsReadOnly</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether the values of this <b>Feature</b> can change over the lifetime of an instance of the domain.
<code>oslc_sysmlv2:feature_IsUnique</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether or not values for this <b>Feature</b> must have no duplicates or not.
<code>oslc_sysmlv2:feature_OwnedFeatureChaining</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:FeatureChaining</code>	The <b>ownedRelationships</b> of this <b>Feature</b> that are <b>FeatureChainings</b> , for which the <b>Feature</b> will be the <b>featureChained</b> .
<code>oslc_sysmlv2:feature_OwnedFeatureInverting</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:FeatureInverting</code>	The <b>ownedRelationships</b> of this <b>Feature</b> that are <b>FeatureInvertings</b> and for which the <b>Feature</b> is the <b>featureInverted</b> .
<code>oslc_sysmlv2:feature_OwnedRedefinition</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Redefinition</code>	The <b>ownedSubsettings</b> of this <b>Feature</b> that are <b>Redefinitions</b> , for which the <b>Feature</b> is the <b>redefiningFeature</b> .
<code>oslc_sysmlv2:feature_OwnedReferenceSubsetting</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:ReferenceSubsetting</code>	The one <b>ownedSubsetting</b> of this <b>Feature</b> , if any, that is a <b>ReferenceSubsetting</b> , for which the <b>Feature</b> is the <b>referencingFeature</b> .
<code>oslc_sysmlv2:feature_OwnedSubsetting</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Subsetting</code>	The <b>ownedSpecializations</b> of this <b>Feature</b> that are <b>Subsettings</b> , for which the <b>Feature</b> is the <b>subsettingFeature</b> .
<code>oslc_sysmlv2:feature_OwnedTypeFeaturing</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:TypeFeaturing</code>	The <b>ownedRelationships</b> of this <b>Feature</b> that are <b>TypeFeaturings</b> and for which the <b>Feature</b> is the <b>featureOfType</b> .
<code>oslc_sysmlv2:feature_OwnedTyping</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:FeatureTyping</code>	The <b>ownedSpecializations</b> of this <b>Feature</b> that are <b>FeatureTypings</b> , for which the <b>Feature</b> is the <b>typedFeature</b> .
<code>oslc_sysmlv2:feature_OwningFeatureMembership</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:FeatureMembership</code>	The <b>FeatureMembership</b> that owns this <b>Feature</b> as an <b>ownedMemberFeature</b> , determining its <b>owningType</b> .
<code>oslc_sysmlv2:feature_OwningType</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The <b>Type</b> that is the <b>owningType</b> of the <b>owningFeatureMembership</b> of this <b>Feature</b> .
<code>oslc_sysmlv2:feature_Type</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	<b>Types</b> that restrict the values of this <b>Feature</b> , such that the values must be instances of all the <b>types</b> . The types of a <b>Feature</b> are derived from its <b>typings</b> and the <b>types</b> of its <b>subsettings</b> . If the <b>Feature</b> is chained, then the <b>types</b> of the last <b>Feature</b> in the chain are also <b>types</b> of the chained <b>Feature</b> .

<code>oslc_sysmlv2:type_IsConjugated</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Indicates whether this <b>Type</b> has an <b>ownedConjugator</b> .

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:type_IsSufficient</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether all things that meet the classification conditions of this <b>Type</b> must be classified by the <b>Type</b> .
<code>oslc_sysmlv2:type_Multiplicity</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Multiplicity</code>	An <b>ownedMember</b> of this <b>Type</b> that is a <b>Multiplicity</b> , which constrains the cardinality of the <b>Type</b> . If there is no such <b>ownedMember</b> , then the cardinality of this <b>Type</b> is constrained by all the <b>Multiplicity</b> constraints applicable to any direct supertypes.
<code>oslc_sysmlv2:type_Output</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All <b>features</b> related to this <b>Type</b> by <b>FeatureMemberships</b> that have <b>direction out or inout</b> ..
<code>oslc_sysmlv2:type_OwnedConjugator</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Conjugation</code>	A <b>Conjugation</b> owned by this <b>Type</b> for which the <b>Type</b> is the <b>originalType</b> .
<code>oslc_sysmlv2:type_OwnedDifferencing</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Differencing</code>	The <b>ownedRelationships</b> of this <b>Type</b> that are <b>Differencings</b> , having this <b>Type</b> as their <b>typeDifferenced</b> .
<code>oslc_sysmlv2:type_OwnedDisjoining</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Disjoining</code>	The <b>ownedRelationships</b> of this <b>Type</b> that are <b>Disjoinings</b> , for which the <b>Type</b> is the <b>typeDisjoined Type</b> .
<code>oslc_sysmlv2:type_OwnedEndFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All <b>endFeatures</b> of this <b>Type</b> that are <b>ownedFeatures</b> .
<code>oslc_sysmlv2:type_OwnedFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <b>ownedMemberFeatures</b> of the <b>ownedFeatureMemberships</b> of this <b>Type</b> .
<code>oslc_sysmlv2:type_OwnedFeatureMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:FeatureMembership</code>	The <b>ownedMemberships</b> of this <b>Type</b> that are <b>FeatureMemberships</b> , for which the <b>Type</b> is the <b>owningType</b> . Each such <b>FeatureMembership</b> identifies an <b>ownedFeature</b> of the <b>Type</b> .
<code>oslc_sysmlv2:type_OwnedIntersecting</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Intersecting</code>	The <b>ownedRelationships</b> of this <b>Type</b> that are <b>Intersectings</b> , have the <b>Type</b> as their <b>typeIntersected</b> .
<code>oslc_sysmlv2:type_OwnedSpecialization</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Specialization</code>	The <b>ownedRelationships</b> of this <b>Type</b> that are <b>Specializations</b> , for which the <b>Type</b> is the <b>specific Type</b> .

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:type_OwnedUnioning</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Unioning</code>	The <code>ownedRelationships</code> of this <code>Type</code> that are <code>Unionings</code> , having the <code>Type</code> as their <code>typeUnioned</code> .
<code>oslc_sysmlv2:type_UnioningType</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The interpretations of a <code>Type</code> with <code>unioningTypes</code> are asserted to be the same as those of all the <code>unioningTypes</code> together, which are the <code>Types</code> derived from the <code>unioningType</code> of the <code>ownedUnionings</code> of this <code>Type</code> . For example, a <code>Classifier</code> for people might be the union of <code>Classifiers</code> for all the sexes. Similarly, a feature for people's children might be the union of features dividing them in the same ways as people in general.
<code>oslc:instanceShape</code>	Zero-or-one	false	Resource	Reference	<code>oslc:ResourceShape</code>	The URI of a Resource Shape that describes the possible properties, occurrence, value types, allowed values and labels. This shape information is useful in displaying the subject resource as well as guiding clients in performing modifications. Instance shapes may be specific to the authenticated user associated with the request that retrieved the resource, the current state of the resource and other factors and thus should not be cached.
<code>oslc:serviceProvider</code>	Zero-or-many	false	Resource	Reference	<code>oslc:ServiceProvider</code>	A link to the resource's OSLC Service Provider. There may be cases when the subject resource is available from a service provider that implements multiple domain specifications, which could result in multiple values for this property.
<code>oslc:shortTitle</code>	Zero-or-one	false	XMLLiteral	N/A	Unspecified	Short name identifying a resource, often used as an abbreviated identifier for presentation to end-users. <b>SHOULD</b> include only content that is valid inside an XHTML <code>&lt;span&gt;</code> element [sml-44].
<code>rdf:type</code>	Zero-or-many	false	Resource	Reference	<code>rdfs:Class</code>	The resource type URIs.

- **Describes:** <http://open-services.net/ns/sysmlv2#Type>
- **Summary:** TypeShape
- **Description:** A `Type` is a `Namespace` that is the most general kind of `Element` supporting the semantics of classification. A `Type` may be a `Classifier` or a `Feature`, defining conditions on what is classified by the `Type` (see also the description of `isSufficient`).

### Type Properties

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
-------------	--------	-----------	------------	----------------	-------	-------------

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>dcterms:contributor</code>	Zero-or-many	false	AnyResource	Either	<code>oslc:Any</code>	Contributor or contributors to the resource. It is likely that the target resource will be a foaf:Person but that is not necessarily the case.
<code>dcterms:created</code>	Zero-or-one	false	dateTime	N/A	Unspecified	Timestamp of resource creation.
<code>dcterms:creator</code>	Zero-or-many	false	AnyResource	Either	<code>oslc:Any</code>	Creator or creators of the resource. It is likely that the target resource will be a foaf:Person but that is not necessarily the case.
<code>dcterms:description</code>	Zero-or-one	false	XMLLiteral	N/A	Unspecified	Descriptive text about resource represented as rich text in XHTML content.
<code>dcterms:identifier</code>	Exactly-one	true	string	N/A	Unspecified	A unique identifier for a resource. Typically read-only and assigned by the service provider when a resource is created. Not typically intended for end-user display.
<code>dcterms:modified</code>	Zero-or-one	false	dateTime	N/A	Unspecified	Timestamp of latest resource modification.
<code>dcterms:source</code>	Zero-or-one	false	Resource	Reference	<code>oslc:Any</code>	The resource URI a client can perform a get on to obtain the original non-OSLC AM formatted resource that was used to create this resource. The source resource is usually a binary or proprietary format that the service provider can consume and convert into an OSLC AM format. The service may use content negotiation with the Accept header to obtain the desired content type.
<code>dcterms:title</code>	Exactly-one	false	XMLLiteral	N/A	Unspecified	Title of the resource represented as rich text in XHTML content.
<code>dcterms:type</code>	Zero-or-many	false	string	N/A	Unspecified	A short string representation for the type, for example 'Car'.
<code>jazz_am:derives</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The resource that derives from another resource originated from or is significantly influenced by the referenced resource. For example a model element derives from a requirement.
<code>jazz_am:elaborates</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	This resource elaborates the referenced resource.
<code>jazz_am:external</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	A generic link from a resource to an external web page.

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>jazz_am:refine</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The target is a refinement of the source. (e.g. a use case scenario might be a refinement of a textual requirement that describes the interaction).
<code>jazz_am:satisfy</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The model element satisfies the requirement (e.g. The use case satisfies a functional requirement).
<code>jazz_am:trace</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The model element has a trace to the requirement (e.g. An attribute or its value are traced to a requirement).
<code>oslc_sysmlv2:element_AliasIds</code>	Zero-or-many	false	unspecified	Either	<code>xsd:string</code>	Various alternative identifiers for this Element. Generally, these will be set by tools.
<code>oslc_sysmlv2:element_DeclaredName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The declared name of this <b>Element</b> .
<code>oslc_sysmlv2:element_DeclaredShortName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	An optional alternative name for the <b>Element</b> that is intended to be shorter or in some way more succinct than its primary <b>name</b> . It may act as a modeler-specified identifier for the <b>Element</b> , though it is then the responsibility of the modeler to maintain the uniqueness of this identifier within a model or relative to some other context.
<code>oslc_sysmlv2:element_Documentation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Documentation</code>	The Documentation owned by this Element.
<code>oslc_sysmlv2:element_ElementId</code>	Exactly-one	false	unspecified	Either	<code>xsd:string</code>	The globally unique identifier for this Element. This is intended to be set by tooling, and it must not change during the lifetime of the Element.
<code>oslc_sysmlv2:element_IsImpliedIncluded</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether all necessary implied Relationships have been included in the <b>ownedRelationships</b> of this Element. This property may be true, even if there are not actually any <b>ownedRelationships</b> with <b>isImplied = true</b> , meaning that no such Relationships are actually implied for this Element. However, if it is false, then <b>ownedRelationships</b> may <i>not</i> contain any implied Relationships. That is, either <i>all</i> required implied Relationships must be included, or none of them.
<code>oslc_sysmlv2:element_IsLibraryElement</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether this Element is contained in the ownership tree of a library model.

Standards Track Work Product

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:element_Name</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The name to be used for this <b>Element</b> during name resolution within its <b>owningNamespace</b> . This is derived using the <code>effectiveName()</code> operation. By default, it is the same as the <b>declaredName</b> , but this is overridden for certain kinds of <b>Elements</b> to compute a <b>name</b> even when the <b>declaredName</b> is null.
<code>oslc_sysmlv2:element_OwnedAnnotation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Annotation</code>	The <b>ownedRelationships</b> of this <b>Element</b> that are <b>Annotations</b> , for which this <b>Element</b> is the <b>annotatedElement</b> .
<code>oslc_sysmlv2:element_OwnedElement</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The <b>Elements</b> owned by this <b>Element</b> , derived as the <b>ownedRelatedElements</b> of the <b>ownedRelationships</b> of this <b>Element</b> .
<code>oslc_sysmlv2:element_OwnedRelationship</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Relationship</code>	The <b>Relationships</b> for which this <b>Element</b> is the <b>owningRelatedElement</b> .
<code>oslc_sysmlv2:element_Owner</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The owner of this <b>Element</b> , derived as the <b>owningRelatedElement</b> of the <b>owningRelationship</b> of this <b>Element</b> , if any.
<code>oslc_sysmlv2:element_OwningMembership</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:OwningMembership</code>	The <b>owningRelationship</b> of this <b>Element</b> , if that <b>Relationship</b> is a <b>Membership</b> .
<code>oslc_sysmlv2:element_OwningNamespace</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Namespace</code>	The <b>Namespace</b> that owns this <b>Element</b> , which is the <b>membershipOwningNamespace</b> of the <b>owningMembership</b> of this <b>Element</b> , if any.
<code>oslc_sysmlv2:element_OwningRelationship</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Relationship</code>	The <b>Relationship</b> for which this <b>Element</b> is an <b>ownedRelatedElement</b> , if any.
<code>oslc_sysmlv2:element_QualifiedName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The full ownership-qualified name of this <b>Element</b> , represented in a form that is valid according to the KerML textual concrete syntax for qualified names (including use of unrestricted name notation and escaped characters, as necessary). The <b>qualifiedName</b> is null if this <b>Element</b> has no <b>owningNamespace</b> or if there is not a complete ownership chain of named <b>Namespaces</b> from a root <b>Namespace</b> to this <b>Element</b> .
<code>oslc_sysmlv2:element_ShortName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The short name to be used for this <b>Element</b> during name resolution within its <b>owningNamespace</b> . This is derived using the <code>effectiveShortName()</code> operation. By default, it is the same as the <b>declaredShortName</b> , but this is overridden for certain kinds of <b>Elements</b> to compute a <b>shortName</b> even when the <b>declaredName</b> is null.

<code>oslc_sysmlv2:type_IntersectingType</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The interpretations of a <b>Type</b> with <code>intersectingTypes</code> are asserted to be those in common among the <code>intersectingTypes</code> , which are the <b>Types</b> derived from the <code>intersectingType</code> of the <code>ownedIntersectings</code> of this <b>Type</b> . For example, a <code>Classifier</code> might be an intersection of <code>Classifiers</code> for people of a particular sex and of a particular nationality. Similarly, a feature for people's children of a particular sex might be the intersection of a <code>Feature</code> for their children and a <code>Classifier</code> for people of that sex (because the interpretations of the children <code>Feature</code> that identify those of that sex are also interpretations of the Classifier for that sex).
<code>oslc_sysmlv2:type_IsAbstract</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Indicates whether instances of this <b>Type</b> must also be instances of at least one of its specialized <b>Types</b> .
<code>oslc_sysmlv2:type_IsConjugated</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Indicates whether this <b>Type</b> has an <code>ownedConjugator</code> .
<code>oslc_sysmlv2:type_IsSufficient</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether all things that meet the classification conditions of this <b>Type</b> must be classified by the <b>Type</b> .

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:type_Multiplicity</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Multiplicity</code>	An <b>ownedMember</b> of this <b>Type</b> that is a <b>Multiplicity</b> , which constraints the cardinality of the <b>Type</b> . If there is no such <b>ownedMember</b> , then the cardinality of this <b>Type</b> is constrained by all the <b>Multiplicity</b> constraints applicable to any direct supertypes.
<code>oslc_sysmlv2:type_Output</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All <b>features</b> related to this <b>Type</b> by <b>FeatureMemberships</b> that have <b>direction out or inout</b> ..
<code>oslc_sysmlv2:type_OwnedConjugator</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Conjugation</code>	A <b>Conjugation</b> owned by this <b>Type</b> for which the <b>Type</b> is the <b>originalType</b> .
<code>oslc_sysmlv2:type_OwnedDifferencing</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Differencing</code>	The <b>ownedRelationships</b> of this <b>Type</b> that are <b>Differencings</b> , having this <b>Type</b> as their <b>typeDifferenced</b> .
<code>oslc_sysmlv2:type_OwnedDisjoining</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Disjoining</code>	The <b>ownedRelationships</b> of this <b>Type</b> that are <b>Disjoinings</b> , for which the <b>Type</b> is the <b>typeDisjoined Type</b> .
<code>oslc_sysmlv2:type_OwnedEndFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All <b>endFeatures</b> of this <b>Type</b> that are <b>ownedFeatures</b> .
<code>oslc_sysmlv2:type_OwnedFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <b>ownedMemberFeatures</b> of the <b>ownedFeatureMemberships</b> of this <b>Type</b> .
<code>oslc_sysmlv2:type_OwnedFeatureMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:FeatureMembership</code>	The <b>ownedMemberships</b> of this <b>Type</b> that are <b>FeatureMemberships</b> , for which the <b>Type</b> is the <b>owningType</b> . Each such <b>FeatureMembership</b> identifies an <b>ownedFeature</b> of the <b>Type</b> .
<code>oslc_sysmlv2:type_OwnedIntersecting</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Intersecting</code>	The <b>ownedRelationships</b> of this <b>Type</b> that are <b>Intersectings</b> , have the <b>Type</b> as their <b>typeIntersected</b> .
<code>oslc_sysmlv2:type_OwnedSpecialization</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Specialization</code>	The <b>ownedRelationships</b> of this <b>Type</b> that are <b>Specializations</b> , for which the <b>Type</b> is the <b>specific Type</b> .
<code>oslc_sysmlv2:type_OwnedUnioning</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Unioning</code>	The <b>ownedRelationships</b> of this <b>Type</b> that are <b>Unionings</b> , having the <b>Type</b> as their <b>typeUnioned</b> .

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:type_UnioningType</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The interpretations of a <b>Type</b> with <b>unioningTypes</b> are asserted to be the same as those of all the <b>unioningTypes</b> together, which are the <b>Types</b> derived from the <b>unioningType</b> of the <b>ownedUnionings</b> of this <b>Type</b> . For example, a <b>Classifier</b> for people might be the union of <b>Classifiers</b> for all the sexes. Similarly, a feature for people's children might be the union of features dividing them in the same ways as people in general.
<code>oslc:instanceShape</code>	Zero-or-one	false	Resource	Reference	<code>oslc:ResourceShape</code>	The URI of a Resource Shape that describes the possible properties, occurrence, value types, allowed values and labels. This shape information is useful in displaying the subject resource as well as guiding clients in performing modifications. Instance shapes may be specific to the authenticated user associated with the request that retrieved the resource, the current state of the resource and other factors and thus should not be cached.
<code>oslc:serviceProvider</code>	Zero-or-many	false	Resource	Reference	<code>oslc:ServiceProvider</code>	A link to the resource's OSLC Service Provider. There may be cases when the subject resource is available from a service provider that implements multiple domain specifications, which could result in multiple values for this property.
<code>oslc:shortTitle</code>	Zero-or-one	false	XMLLiteral	N/A	Unspecified	Short name identifying a resource, often used as an abbreviated identifier for presentation to end-users. <b>SHOULD</b> include only content that is valid inside an XHTML <code>&lt;span&gt;</code> element [sml-45].
<code>rdf:type</code>	Zero-or-many	false	Resource	Reference	<code>rdfs:Class</code>	The resource type URIs.

- **Describes:** <http://open-services.net/ns/sysmlv2#AnalysisCaseUsage>
- **Summary:** AnalysisCaseUsageShape
- **Description:** An **AnalysisCaseUsage** is a **Usage** of an **AnalysisCaseDefinition**.

#### AnalysisCaseUsage Properties

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>dcterms:contributor</code>	Zero-or-many	false	AnyResource	Either	<code>oslc:Any</code>	Contributor or contributors to the resource. It is likely that the target resource will be a foaf:Person but that is not necessarily the case.

Standards Track Work Product

Prefixes Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>dcterms:created</code>	Zero-or-one	false	dateTime	N/A	Unspecified	Timestamp of resource creation.
<code>dcterms:creator</code>	Zero-or-many	false	AnyResource	Either	<code>oslc:Any</code>	Creator or creators of the resource. It is likely that the target resource will be a foaf:Person but that is not necessarily the case.
<code>dcterms:description</code>	Zero-or-one	false	XMLLiteral	N/A	Unspecified	Descriptive text about resource represented as rich text in XHTML content.
<code>dcterms:identifier</code>	Exactly-one	true	string	N/A	Unspecified	A unique identifier for a resource. Typically read-only and assigned by the service provider when a resource is created. Not typically intended for end-user display.
<code>dcterms:modified</code>	Zero-or-one	false	dateTime	N/A	Unspecified	Timestamp of latest resource modification.
<code>dcterms:source</code>	Zero-or-one	false	Resource	Reference	<code>oslc:Any</code>	The resource URI a client can perform a get on to obtain the original non-OSLC AM formatted resource that was used to create this resource. The source resource is usually a binary or proprietary format that the service provider can consume and convert into an OSLC AM format. The service may use content negotiation with the Accept header to obtain the desired content type.
<code>dcterms:title</code>	Exactly-one	false	XMLLiteral	N/A	Unspecified	Title of the resource represented as rich text in XHTML content.
<code>dcterms:type</code>	Zero-or-many	false	string	N/A	Unspecified	A short string representation for the type, for example 'Car'.
<code>jazz_am:derives</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The resource that derives from another resource originated from or is significantly influenced by the referenced resource. For example a model element derives from a requirement.
<code>jazz_am:elaborates</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	This resource elaborates the referenced resource.
<code>jazz_am:external</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	A generic link from a resource to an external web page.

Standards Track Work Product

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>jazz_am:refine</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The target is a refinement of the source. (e.g. a use case scenario might be a refinement of a textual requirement that describes the interaction).
<code>jazz_am:satisfy</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The model element satisfies the requirement (e.g. The use case satisfies a functional requirement).
<code>jazz_am:trace</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The model element has a trace to the requirement (e.g. An attribute or its value are traced to a requirement).
<code>oslc_sysmlv2:actionUsage_ActionDefinition</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Behavior</code>	The <b>Behaviors</b> that are the <b>types</b> of this <b>ActionUsage</b> . Nominally, these would be <b>ActionDefinitions</b> , but other kinds of Kernel <b>Behaviors</b> are also allowed, to permit use of <b>Behaviors</b> from the Kernel Model Libraries.
<code>oslc_sysmlv2:analysisCaseUsage_AnalysisAction</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:ActionUsage</code>	The composite <b>usages</b> of the <b>AnalysisCaseUsage</b> that are defined as <b>AnalysisActions</b> .
<code>oslc_sysmlv2:analysisCaseUsage_AnalysisCaseDefinition</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:AnalysisCaseDefinition</code>	The <b>AnalysisCaseDefinition</b> that is the <b>definition</b> of this <b>AnalysisCaseUsage</b> .
<code>oslc_sysmlv2:analysisCaseUsage_ResultExpression</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Expression</code>	An <b>Expression</b> used to compute the <b>result</b> of the <b>AnalysisCaseUsage</b> , owned via a <b>ResultExpressionMembership</b> .
<code>oslc_sysmlv2:calculationUsage_CalculationDefinition</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Function</code>	The <b>Function</b> that is the <b>type</b> of this <b>CalculationUsage</b> . Nominally, this would be a <b>CalculationDefinition</b> , but a kernel <b>Function</b> is also allowed, to permit use of <b>Functions</b> from the Kernel Model Libraries..
<code>oslc_sysmlv2:caseUsage_ActorParameter</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:PartUsage</code>	The <b>parameters</b> of this <b>CaseUsage</b> that represent actors involved in the case.
<code>oslc_sysmlv2:caseUsage_CaseDefinition</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:CaseDefinition</code>	The <b>CaseDefinition</b> that is the type of this <b>CaseUsage</b> .
<code>oslc_sysmlv2:caseUsage_ObjectiveRequirement</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:RequirementUsage</code>	The <b>RequirementUsage</b> representing the objective of this <b>CaseUsage</b> .
<code>oslc_sysmlv2:caseUsage_SubjectParameter</code>	Exactly-one	false	Resource	Either	<code>oslc_sysmlv2:Usage</code>	The <b>parameter</b> of this <b>CaseUsage</b> that represents its subject.

Standards Track Work Product

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:element_AliasIds</code>	Zero-or-many	false	unspecified	Either	<code>xsd:string</code>	Various alternative identifiers for this Element. Generally, these will be set by tools.
<code>oslc_sysmlv2:element_DeclaredName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The declared name of this <b>Element</b> .
<code>oslc_sysmlv2:element_DeclaredShortName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	An optional alternative name for the <b>Element</b> that is intended to be shorter or in some way more succinct than its primary <b>name</b> . It may act as a modeler-specified identifier for the <b>Element</b> , though it is then the responsibility of the modeler to maintain the uniqueness of this identifier within a model or relative to some other context.
<code>oslc_sysmlv2:element_Documentation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Documentation</code>	The Documentation owned by this Element.
<code>oslc_sysmlv2:element_ElementId</code>	Exactly-one	false	unspecified	Either	<code>xsd:string</code>	The globally unique identifier for this Element. This is intended to be set by tooling, and it must not change during the lifetime of the Element.
<code>oslc_sysmlv2:element_IsImpliedIncluded</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether all necessary implied Relationships have been included in the <b>ownedRelationships</b> of this Element. This property may be true, even if there are not actually any <b>ownedRelationships</b> with <b>isImplied = true</b> , meaning that no such Relationships are actually implied for this Element. However, if it is false, then <b>ownedRelationships</b> may <i>not</i> contain any implied Relationships. That is, either <i>all</i> required implied Relationships must be included, or none of them.
<code>oslc_sysmlv2:element_IsLibraryElement</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether this Element is contained in the ownership tree of a library model.
<code>oslc_sysmlv2:element_Name</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The name to be used for this <b>Element</b> during name resolution within its <b>owningNamespace</b> . This is derived using the <b>effectiveName()</b> operation. By default, it is the same as the <b>declaredName</b> , but this is overridden for certain kinds of <b>Elements</b> to compute a <b>name</b> even when the <b>declaredName</b> is null.

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:element_OwnedAnnotation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Annotation</code>	The <code>ownedRelationships</code> of this <code>Element</code> that are <code>Annotations</code> , for which this <code>Element</code> is the <code>annotatedElement</code> .
<code>oslc_sysmlv2:element_OwnedElement</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The <code>Elements</code> owned by this <code>Element</code> , derived as the <code>ownedRelatedElements</code> of the <code>ownedRelationships</code> of this <code>Element</code> .
<code>oslc_sysmlv2:element_OwnedRelationship</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Relationship</code>	The <code>Relationships</code> for which this <code>Element</code> is the <code>owningRelatedElement</code> .
<code>oslc_sysmlv2:element_Owner</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The owner of this <code>Element</code> , derived as the <code>owningRelatedElement</code> of the <code>owningRelationship</code> of this <code>Element</code> , if any.
<code>oslc_sysmlv2:element_OwningMembership</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:OwningMembership</code>	The <code>owningRelationship</code> of this <code>Element</code> , if that <code>Relationship</code> is a <code>Membership</code> .
<code>oslc_sysmlv2:element_OwningNamespace</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Namespace</code>	The <code>Namespace</code> that owns this <code>Element</code> , which is the <code>membershipOwningNamespace</code> of the <code>owningMembership</code> of this <code>Element</code> , if any.
<code>oslc_sysmlv2:element_OwningRelationship</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Relationship</code>	The <code>Relationship</code> for which this <code>Element</code> is an <code>ownedRelatedElement</code> , if any.
<code>oslc_sysmlv2:element_QualifiedName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The full ownership-qualified name of this <code>Element</code> , represented in a form that is valid according to the KerML textual concrete syntax for qualified names (including use of unrestricted name notation and escaped characters, as necessary). The <code>qualifiedName</code> is null if this <code>Element</code> has no <code>owningNamespace</code> or if there is not a complete ownership chain of named <code>Namespace</code> s from a root <code>Namespace</code> to this <code>Element</code> .
<code>oslc_sysmlv2:element_ShortName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The short name to be used for this <code>Element</code> during name resolution within its <code>owningNamespace</code> . This is derived using the <code>effectiveShortName()</code> operation. By default, it is the same as the <code>declaredShortName</code> , but this is overridden for certain kinds of <code>Elements</code> to compute a <code>shortName</code> even when the <code>declaredName</code> is null.
<code>oslc_sysmlv2:element_TextualRepresentation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:TextualRepresentation</code>	The <code>TextualRepresentations</code> that annotate this <code>Element</code> .

Standards Track Work Product

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:expression_Function</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Function</code>	The <b>Function</b> that types this <b>Expression</b> .
<code>oslc_sysmlv2:expression_IsModelLevelEvaluable</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether this <b>Expression</b> meets the constraints necessary to be evaluated at <i>model level</i> , that is, using metadata within the model.
<code>oslc_sysmlv2:expression_Result</code>	Exactly-one	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	.
<code>oslc_sysmlv2:feature_ChainingFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <b>Feature</b> that are chained together to determine the values of this <b>Feature</b> , derived from the <b>chainingFeatures</b> of the <b>ownedFeatureChainings</b> of this <b>Feature</b> , in the same order. The values of a <b>Feature</b> with <b>chainingFeatures</b> are the same as values of the last <b>Feature</b> in the chain, which can be found by starting with the values of the first <b>Feature</b> (for each instance of the domain of the original <b>Feature</b> ), then using each of those as domain instances to find the values of the second <b>Feature</b> in <b>chainingFeatures</b> , and so on, to values of the last <b>Feature</b> .
<code>oslc_sysmlv2:feature_Direction</code>	Zero-or-one	false	unspecified	Either	<code>oslc_sysmlv2:FeatureDirectionKind</code>	Indicates how values of this <b>Feature</b> are determined or used (as specified for the <b>FeatureDirectionKind</b> ).
<code>oslc_sysmlv2:feature_EndOwningType</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The <b>Type</b> that is related to this <b>Feature</b> by an <b>EndFeatureMembership</b> in which the <b>Feature</b> is an <b>ownedMemberFeature</b> .
<code>oslc_sysmlv2:feature_FeaturingType</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	<b>Types</b> that feature this <b>Feature</b> , such that any instance in the domain of the <b>Feature</b> must be classified by all of these <b>Types</b> , including at least all the <b>featuringTypes</b> of its <b>typeFeaturings</b> . If the <b>Feature</b> is chained, then the <b>featuringTypes</b> of the first <b>Feature</b> in the chain are also <b>featuringTypes</b> of the chained <b>Feature</b> .
<code>oslc_sysmlv2:feature_IsComposite</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether the <b>Feature</b> is a composite <b>feature</b> of its <b>featuringType</b> . If so, the values of the <b>Feature</b> cannot exist after its featuring instance no longer does.
<code>oslc_sysmlv2:feature_IsDerived</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether the values of this <b>Feature</b> can always be computed from the values of other <b>Features</b> .

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:feature_IsEnd</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether or not the this <b>Feature</b> is an end <b>Feature</b> , requiring a different interpretation of the <b>multiplicity</b> of the <b>Feature</b> .
<code>oslc_sysmlv2:feature_IsNonunique</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	isNonunique.
<code>oslc_sysmlv2:feature_IsOrdered</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether an order exists for the values of this <b>Feature</b> or not.
<code>oslc_sysmlv2:feature_IsPortion</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether the values of this <b>Feature</b> are contained in the space and time of instances of the domain of the <b>Feature</b> and represent the same thing as those instances.
<code>oslc_sysmlv2:feature_IsReadOnly</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether the values of this <b>Feature</b> can change over the lifetime of an instance of the domain.
<code>oslc_sysmlv2:feature_IsUnique</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether or not values for this <b>Feature</b> must have no duplicates or not.
<code>oslc_sysmlv2:feature_OwnedFeatureChaining</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:FeatureChaining</code>	The <b>ownedRelationships</b> of this <b>Feature</b> that are <b>FeatureChainings</b> , for which the <b>Feature</b> will be the <b>featureChained</b> .
<code>oslc_sysmlv2:feature_OwnedFeatureInverting</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:FeatureInverting</code>	The <b>ownedRelationships</b> of this <b>Feature</b> that are <b>FeatureInvertings</b> and for which the <b>Feature</b> is the <b>featureInverted</b> .
<code>oslc_sysmlv2:feature_OwnedRedefinition</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Redefinition</code>	The <b>ownedSubsettings</b> of this <b>Feature</b> that are <b>Redefinitions</b> , for which the <b>Feature</b> is the <b>redefiningFeature</b> .
<code>oslc_sysmlv2:feature_OwnedReferenceSubsetting</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:ReferenceSubsetting</code>	The one <b>ownedSubsetting</b> of this <b>Feature</b> , if any, that is a <b>ReferenceSubsetting</b> , for which the <b>Feature</b> is the <b>referencingFeature</b> .
<code>oslc_sysmlv2:feature_OwnedSubsetting</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Subsetting</code>	The <b>ownedSpecializations</b> of this <b>Feature</b> that are <b>Subsettings</b> , for which the <b>Feature</b> is the <b>subsettingFeature</b> .
<code>oslc_sysmlv2:feature_OwnedTypeFeaturing</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:TypeFeaturing</code>	The <b>ownedRelationships</b> of this <b>Feature</b> that are <b>TypeFeaturings</b> and for which the <b>Feature</b> is the <b>featureOfType</b> .
<code>oslc_sysmlv2:feature_OwnedTyping</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:FeatureTyping</code>	The <b>ownedSpecializations</b> of this <b>Feature</b> that are <b>FeatureTypings</b> , for which the <b>Feature</b> is the <b>typedFeature</b> .

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:feature_OwningFeatureMembership</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:FeatureMembership</code>	The <b>FeatureMembership</b> that owns this <b>Feature</b> as an <b>ownedMemberFeature</b> , determining its <b>owningType</b> .
<code>oslc_sysmlv2:feature_OwningType</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The <b>Type</b> that is the <b>owningType</b> of the <b>owningFeatureMembership</b> of this <b>Feature</b> .
<code>oslc_sysmlv2:feature_Type</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	<b>Types</b> that restrict the values of this <b>Feature</b> , such that the values must be instances of all the <b>types</b> . The types of a <b>Feature</b> are derived from its <b>typings</b> and the <b>types</b> of its <b>subsettings</b> . If the <b>Feature</b> is chained, then the <b>types</b> of the last <b>Feature</b> in the chain are also <b>types</b> of the chained <b>Feature</b> .
<code>oslc_sysmlv2:namespace_ImportedMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Membership</code>	The <b>Memberships</b> in this <b>Namespace</b> that result from the <b>ownedImports</b> of this <b>Namespace</b> .
<code>oslc_sysmlv2:namespace_Member</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The set of all member <b>Elements</b> of this <b>Namespace</b> , which are the <b>memberElements</b> of all <b>memberships</b> of the <b>Namespace</b> .
<code>oslc_sysmlv2:namespace_Membership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Membership</code>	All <b>Memberships</b> in this <b>Namespace</b> , including (at least) the union of <b>ownedMemberships</b> and <b>importedMemberships</b> .
<code>oslc_sysmlv2:namespace_OwnedImport</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Import</code>	The <b>ownedRelationships</b> of this <b>Namespace</b> that are <b>Imports</b> , for which the <b>Namespace</b> is the <b>importOwningNamespace</b> .
<code>oslc_sysmlv2:namespace_OwnedMember</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The owned <b>members</b> of this <b>Namespace</b> , which are the <b>ownedMemberElements</b> of the <b>ownedMemberships</b> of the ..
<code>oslc_sysmlv2:namespace_OwnedMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Membership</code>	The <b>ownedRelationships</b> of this <b>Namespace</b> that are <b>Memberships</b> , for which the <b>Namespace</b> is the <b>membershipOwningNamespace</b> .
<code>oslc_sysmlv2:occurrenceUsage_IndividualDefinition</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:OccurrenceDefinition</code>	The at most one <b>occurrenceDefinition</b> that has <b>isIndividual = true</b> .
<code>oslc_sysmlv2:occurrenceUsage_IsIndividual</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether this <b>OccurrenceUsage</b> represents the usage of the specific individual (or portion of it) represented by its <b>individualDefinition</b> .

Standards Track Work Product

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:occurrenceUsage_OccurrenceDefinition</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Class</code>	The <b>Classes</b> that are the types of this <b>OccurrenceUsage</b> . Nominally, these are <b>OccurrenceDefinitions</b> , but other kinds of kernel <b>Classes</b> are also allowed, to permit use of <b>Classes</b> from the Kernel Model Libraries.
<code>oslc_sysmlv2:occurrenceUsage_PortionKind</code>	Zero-or-one	false	unspecified	Either	<code>oslc_sysmlv2:PortionKind</code>	The kind of (temporal) portion of the life of the <b>occurrenceDefinition</b> represented by this <b>OccurrenceUsage</b> , if it is so restricted.
<code>oslc_sysmlv2:step_Behavior</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Behavior</code>	The <b>Behaviors</b> that type this <b>Step</b> .
<code>oslc_sysmlv2:step_Parameter</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <b>parameters</b> of this <b>Step</b> , which are defined as its <b>directedFeatures</b> , whose values are passed into and/or out of a performance of the <b>Step</b> .
<code>oslc_sysmlv2:type_DifferencingType</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The interpretations of a <b>Type</b> with <b>differencingTypes</b> are asserted to be those of the first of those <b>Types</b> , but not including those of the remaining <b>Types</b> . For example, a <b>Classifier</b> might be the difference of a <b>Classifier</b> for people and another for people of a particular nationality, leaving people who are not of that nationality. Similarly, a feature of people might be the difference between a feature for their children and a <b>Classifier</b> for people of a particular sex, identifying their children not of that sex (because the interpretations of the children <b>Feature</b> that identify those of that sex are also interpretations of the <b>Classifier</b> for that sex).
<code>oslc_sysmlv2:type_DirectedFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <b>features</b> of this <b>Type</b> that have a non-null <b>direction</b> .
<code>oslc_sysmlv2:type_EndFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All <b>features</b> of this <b>Type</b> with <b>isEnd = true</b> .
<code>oslc_sysmlv2:type_Feature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <b>ownedMemberFeatures</b> of the <b>featureMemberships</b> of this <b>Type</b> .

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:type_FeatureMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:FeatureMembership</code>	The <b>FeatureMemberships</b> for <b>features</b> of this <b>Type</b> , which include all <b>ownedFeatureMemberships</b> and those <b>inheritedMemberships</b> that are <b>FeatureMemberships</b> (but does <i>not</i> include any <b>importedMemberships</b> ).
<code>oslc_sysmlv2:type_InheritedFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All the <b>memberFeatures</b> of the <b>inheritedMemberships</b> of this <b>Type</b> that are <b>FeatureMemberships</b> .
<code>oslc_sysmlv2:type_InheritedMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Membership</code>	All <b>Memberships</b> inherited by this <b>Type</b> via <b>Specialization</b> or <b>Conjugation</b> . These are included in the derived union for the <b>memberships</b> of the <b>Type</b> .
<code>oslc_sysmlv2:type_Input</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All <b>features</b> related to this <b>Type</b> by <b>FeatureMemberships</b> that have <b>direction in or inout</b> .
<code>oslc_sysmlv2:type_IntersectingType</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The interpretations of a <b>Type</b> with <b>intersectingTypes</b> are asserted to be those in common among the <b>intersectingTypes</b> , which are the <b>Types</b> derived from the <b>intersectingType</b> of the <b>ownedIntersectings</b> of this <b>Type</b> . For example, a <b>Classifier</b> might be an intersection of <b>Classifiers</b> for people of a particular sex and of a particular nationality. Similarly, a feature for people's children of a particular sex might be the intersection of a <b>Feature</b> for their children and a <b>Classifier</b> for people of that sex (because the interpretations of the children <b>Feature</b> that identify those of that sex are also interpretations of the <b>Classifier</b> for that sex).
<code>oslc_sysmlv2:type_IsAbstract</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Indicates whether instances of this <b>Type</b> must also be instances of at least one of its specialized <b>Types</b> .
<code>oslc_sysmlv2:type_IsConjugated</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Indicates whether this <b>Type</b> has an <b>ownedConjugator</b> .
<code>oslc_sysmlv2:type_IsSufficient</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether all things that meet the classification conditions of this <b>Type</b> must be classified by the <b>Type</b> .

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:type_Multiplicity</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Multiplicity</code>	An <b>ownedMember</b> of this <b>Type</b> that is a <b>Multiplicity</b> , which constrains the cardinality of the <b>Type</b> . If there is no such <b>ownedMember</b> , then the cardinality of this <b>Type</b> is constrained by all the <b>Multiplicity</b> constraints applicable to any direct supertypes.
<code>oslc_sysmlv2:type_Output</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All <b>features</b> related to this <b>Type</b> by <b>FeatureMemberships</b> that have <b>direction out or inout</b> .
<code>oslc_sysmlv2:type_OwnedConjugator</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Conjugation</code>	A <b>Conjugation</b> owned by this <b>Type</b> for which the <b>Type</b> is the <b>originalType</b> .
<code>oslc_sysmlv2:type_OwnedDifferencing</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Differencing</code>	The <b>ownedRelationships</b> of this <b>Type</b> that are <b>Differencings</b> , having this <b>Type</b> as their <b>typeDifferenced</b> .
<code>oslc_sysmlv2:type_OwnedDisjoining</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Disjoining</code>	The <b>ownedRelationships</b> of this <b>Type</b> that are <b>Disjoinings</b> , for which the <b>Type</b> is the <b>typeDisjoined Type</b> .
<code>oslc_sysmlv2:type_OwnedEndFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All <b>endFeatures</b> of this <b>Type</b> that are <b>ownedFeatures</b> .
<code>oslc_sysmlv2:type_OwnedFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <b>ownedMemberFeatures</b> of the <b>ownedFeatureMemberships</b> of this <b>Type</b> .
<code>oslc_sysmlv2:type_OwnedFeatureMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:FeatureMembership</code>	The <b>ownedMemberships</b> of this <b>Type</b> that are <b>FeatureMemberships</b> , for which the <b>Type</b> is the <b>owningType</b> . Each such <b>FeatureMembership</b> identifies an <b>ownedFeature</b> of the <b>Type</b> .
<code>oslc_sysmlv2:type_OwnedIntersecting</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Intersecting</code>	The <b>ownedRelationships</b> of this <b>Type</b> that are <b>Intersectings</b> , have the <b>Type</b> as their <b>typeIntersected</b> .
<code>oslc_sysmlv2:type_OwnedSpecialization</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Specialization</code>	The <b>ownedRelationships</b> of this <b>Type</b> that are <b>Specializations</b> , for which the <b>Type</b> is the <b>specific Type</b> .
<code>oslc_sysmlv2:type_OwnedUnioning</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Unioning</code>	The <b>ownedRelationships</b> of this <b>Type</b> that are <b>Unionings</b> , having the <b>Type</b> as their <b>typeUnioned</b> .

Standards Track Work Product

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:type_UnioningType</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The interpretations of a <b>Type</b> with <b>unioningTypes</b> are asserted to be the same as those of all the <b>unioningTypes</b> together, which are the <b>Types</b> derived from the <b>unioningType</b> of the <b>ownedUnionings</b> of this <b>Type</b> . For example, a <b>Classifier</b> for people might be the union of <b>Classifiers</b> for all the sexes. Similarly, a feature for people's children might be the union of features dividing them in the same ways as people in general.
<code>oslc_sysmlv2:usage_Definition</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Classifier</code>	The <b>Classifiers</b> that are the types of this <b>Usage</b> . Nominally, these are <b>Definitions</b> , but other kinds of Kernel <b>Classifiers</b> are also allowed, to permit use of <b>Classifiers</b> from the Kernel Model Libraries.
<code>oslc_sysmlv2:usage_DirectedUsage</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Usage</code>	The <b>usages</b> of this <b>Usage</b> that are <b>directedFeatures</b> .
<code>oslc_sysmlv2:usage_IsReference</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether this <b>Usage</b> is a referential <b>Usage</b> , that is, it has <b>isComposite = false</b> .
<code>oslc_sysmlv2:usage_IsVariation</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether this <b>Usage</b> is for a variation point or not. If true, then all the <b>memberships</b> of the <b>Usage</b> must be <b>VariantMemberships</b> .
<code>oslc_sysmlv2:usage_NestedAction</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:ActionUsage</code>	The <b>ActionUsages</b> that are <b>nestedUsages</b> of this <b>Usage</b> .
<code>oslc_sysmlv2:usage_NestedAllocation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:AllocationUsage</code>	The <b>AllocationUsages</b> that are <b>nestedUsages</b> of this <b>Usage</b> .
<code>oslc_sysmlv2:usage_NestedAnalysisCase</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:AnalysisCaseUsage</code>	The <b>AnalysisCaseUsages</b> that are <b>nestedUsages</b> of this <b>Usage</b> .
<code>oslc_sysmlv2:usage_NestedAttribute</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:AttributeUsage</code>	The code>AttributeUsages that are <b>nestedUsages</b> of this <b>Usage</b> .
<code>oslc_sysmlv2:usage_NestedCalculation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:CalculationUsage</code>	The <b>CalculationUsage</b> that are <b>nestedUsages</b> of this <b>Usage</b> .

Standards Track Work Product

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:usage_NestedCase</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:CaseUsage</code>	The <code>CaseUsages</code> that are <code>nestedUsages</code> of this <code>Usage</code> .
<code>oslc_sysmlv2:usage_NestedConcern</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:ConcernUsage</code>	The <code>ConcernUsages</code> that are <code>nestedUsages</code> of this <code>Usage</code> .
<code>oslc_sysmlv2:usage_NestedConnection</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:ConnectorAsUsage</code>	The <code>ConnectorAsUsages</code> that are <code>nestedUsages</code> of this <code>Usage</code> . Note that this list includes <code>BindingConnectorAsUsages</code> and <code>SuccessionAsUsages</code> , even though these are <code>ConnectorAsUsages</code> but not <code>ConnectionUsages</code> .
<code>oslc_sysmlv2:usage_NestedConstraint</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:ConstraintUsage</code>	The <code>ConstraintUsages</code> that are <code>nestedUsages</code> of this <code>Usage</code> .
<code>oslc_sysmlv2:usage_NestedEnumeration</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:EnumerationUsage</code>	The <code>code&gt;EnumerationUsages</code> that are <code>nestedUsages</code> of this <code>Usage</code> .
<code>oslc_sysmlv2:usage_NestedFlow</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:FlowConnectionUsage</code>	The <code>code&gt;FlowConnectionUsages</code> that are <code>nestedUsages</code> of this <code>Usage</code> .
<code>oslc_sysmlv2:usage_NestedInterface</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:InterfaceUsage</code>	The <code>InterfaceUsages</code> that are <code>nestedUsages</code> of this <code>Usage</code> .
<code>oslc_sysmlv2:usage_NestedItem</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:ItemUsage</code>	The <code>ItemUsages</code> that are <code>nestedUsages</code> of this <code>Usage</code> .
<code>oslc_sysmlv2:usage_NestedMetadata</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:MetadataUsage</code>	The <code>MetadataUsages</code> that are <code>nestedUsages</code> of this of this <code>Usage</code> .
<code>oslc_sysmlv2:usage_NestedOccurrence</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:OccurrenceUsage</code>	The <code>OccurrenceUsages</code> that are <code>nestedUsages</code> of this <code>Usage</code> .
<code>oslc_sysmlv2:usage_NestedPart</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:PartUsage</code>	The <code>PartUsages</code> that are <code>nestedUsages</code> of this <code>Usage</code> .

Standards Track Work Product

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description

<code>oslc_sysmlv2:usage_NestedReference</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:ReferenceUsage</code>	The <code>ReferenceUsages</code> that are <code>nestedUsages</code> of this <code>Usage</code> .
<code>oslc_sysmlv2:usage_NestedRendering</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:RenderingUsage</code>	The <code>RenderingUsages</code> that are <code>nestedUsages</code> of this <code>Usage</code> .
<code>oslc_sysmlv2:usage_NestedRequirement</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:RequirementUsage</code>	The <code>RequirementUsages</code> that are <code>nestedUsages</code> of this <code>Usage</code> .
<code>oslc_sysmlv2:usage_NestedState</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:StateUsage</code>	The <code>StateUsages</code> that are <code>nestedUsages</code> of this <code>Usage</code> .
<code>oslc_sysmlv2:usage_NestedTransition</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:TransitionUsage</code>	The <code>TransitionUsages</code> that are <code>nestedUsages</code> of this <code>Usage</code> .
<code>oslc_sysmlv2:usage_NestedUsage</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Usage</code>	The <code>Usages</code> that are <code>ownedFeatures</code> of this <code>Usage</code> .
<code>oslc_sysmlv2:usage_NestedUseCase</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:UseCaseUsage</code>	The <code>UseCaseUsages</code> that are <code>nestedUsages</code> of this <code>Usage</code> .
<code>oslc_sysmlv2:usage_NestedVerificationCase</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:VerificationCaseUsage</code>	The <code>VerificationCaseUsages</code> that are <code>nestedUsages</code> of this <code>Usage</code> .
<code>oslc_sysmlv2:usage_NestedView</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:ViewUsage</code>	The <code>ViewUsages</code> that are <code>nestedUsages</code> of this <code>Usage</code> .
<code>oslc_sysmlv2:usage_NestedViewpoint</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:ViewpointUsage</code>	The <code>ViewpointUsages</code> that are <code>nestedUsages</code> of this <code>Usage</code> .
<code>oslc_sysmlv2:usage_OwningDefinition</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Definition</code>	The <code>Definition</code> that owns this <code>Usage</code> (if any).

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:usage_OwningUsage</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Usage</code>	The <b>Usage</b> in which this <b>Usage</b> is nested (if any).
<code>oslc_sysmlv2:usage_Usage</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Usage</code>	The <b>Usages</b> that are <b>features</b> of this <b>Usage</b> (not necessarily owned).
<code>oslc_sysmlv2:usage_Variant</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Usage</code>	The <b>Usages</b> which represent the variants of this <b>Usage</b> as a variation point <b>Usage</b> , if <b>isVariation = true</b> . If <b>isVariation = false</b> , then there must be no <b>variants</b> .
<code>oslc_sysmlv2:usage_VariantMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:VariantMembership</code>	The <b>ownedMemberships</b> of this <b>Usage</b> that are <b>VariantMemberships</b> . If <b>isVariation = true</b> , then this must be all <b>memberships</b> of the <b>Usage</b> . If <b>isVariation = false</b> , then <b>variantMembership</b> must be empty.
<code>oslc:instanceShape</code>	Zero-or-one	false	Resource	Reference	<code>oslc:ResourceShape</code>	The URI of a Resource Shape that describes the possible properties, occurrence, value types, allowed values and labels. This shape information is useful in displaying the subject resource as well as guiding clients in performing modifications. Instance shapes may be specific to the authenticated user associated with the request that retrieved the resource, the current state of the resource and other factors and thus should not be cached.
<code>oslc:serviceProvider</code>	Zero-or-many	false	Resource	Reference	<code>oslc:ServiceProvider</code>	A link to the resource's OSLC Service Provider. There may be cases when the subject resource is available from a service provider that implements multiple domain specifications, which could result in multiple values for this property.
<code>oslc:shortTitle</code>	Zero-or-one	false	XMLLiteral	N/A	Unspecified	Short name identifying a resource, often used as an abbreviated identifier for presentation to end-users. <b>SHOULD</b> include only content that is valid inside an XHTML <code>&lt;span&gt;</code> element [sml-46].
<code>rdf:type</code>	Zero-or-many	false	Resource	Reference	<code>rdfs:Class</code>	The resource type URIs.

- **Describes:** <http://open-services.net/ns/sysmlv2#FramedConcernMembership>
- **Summary:** FramedConcernMembershipShape
- **Description:** A **FramedConcernMembership** is a **RequirementConstraintMembership** for a framed **ConcernUsage** of a **RequirementDefinition** or **RequirementUsage**.

## FramedConcernMembership Properties

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>dcterms:contributor</code>	Zero-or-many	false	AnyResource	Either	<code>oslc:Any</code>	Contributor or contributors to the resource. It is likely that the target resource will be a foaf:Person but that is not necessarily the case.
<code>dcterms:created</code>	Zero-or-one	false	dateTime	N/A	Unspecified	Timestamp of resource creation.
<code>dcterms:creator</code>	Zero-or-many	false	AnyResource	Either	<code>oslc:Any</code>	Creator or creators of the resource. It is likely that the target resource will be a foaf:Person but that is not necessarily the case.
<code>dcterms:description</code>	Zero-or-one	false	XMLLiteral	N/A	Unspecified	Descriptive text about resource represented as rich text in XHTML content.
<code>dcterms:identifier</code>	Exactly-one	true	string	N/A	Unspecified	A unique identifier for a resource. Typically read-only and assigned by the service provider when a resource is created. Not typically intended for end-user display.
<code>dcterms:modified</code>	Zero-or-one	false	dateTime	N/A	Unspecified	Timestamp of latest resource modification.
<code>dcterms:source</code>	Zero-or-one	false	Resource	Reference	<code>oslc:Any</code>	The resource URI a client can perform a get on to obtain the original non-OSLC AM formatted resource that was used to create this resource. The source resource is usually a binary or proprietary format that the service provider can consume and convert into an OSLC AM format. The service may use content negotiation with the Accept header to obtain the desired content type.
<code>dcterms:title</code>	Exactly-one	false	XMLLiteral	N/A	Unspecified	Title of the resource represented as rich text in XHTML content.

Standards Track Work Product

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>dcterms:type</code>	Zero-or-many	false	string	N/A	Unspecified	A short string representation for the type, for example 'Car'.
<code>jazz_am:derives</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The resource that derives from another resource originated from or is significantly influenced by the referenced resource. For example a model element derives from a requirement.
<code>jazz_am:elaborates</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	This resource elaborates the referenced resource.
<code>jazz_am:external</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	A generic link from a resource to an external web page.
<code>jazz_am:refine</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The target is a refinement of the source. (e.g. a use case scenario might be a refinement of a textual requirement that describes the interaction).
<code>jazz_am:satisfy</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The model element satisfies the requirement (e.g. The use case satisfies a functional requirement).
<code>jazz_am:trace</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The model element has a trace to the requirement (e.g. An attribute or its value are traced to a requirement).
<code>oslc_sysmlv2:element_AliasIds</code>	Zero-or-many	false	unspecified	Either	<code>xsd:string</code>	Various alternative identifiers for this Element. Generally, these will be set by tools.
<code>oslc_sysmlv2:element_DeclaredName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The declared name of this <b>Element</b> .

Standards Track Work Product

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:element_DeclaredShortName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	An optional alternative name for the <b>Element</b> that is intended to be shorter or in some way more succinct than its primary <b>name</b> . It may act as a modeler-specified identifier for the <b>Element</b> , though it is then the responsibility of the modeler to maintain the uniqueness of this identifier within a model or relative to some other context.
<code>oslc_sysmlv2:element_Documentation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Documentation</code>	The Documentation owned by this Element.
<code>oslc_sysmlv2:element_ElementId</code>	Exactly-one	false	unspecified	Either	<code>xsd:string</code>	The globally unique identifier for this Element. This is intended to be set by tooling, and it must not change during the lifetime of the Element.
<code>oslc_sysmlv2:element_IsImpliedIncluded</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether all necessary implied Relationships have been included in the <b>ownedRelationships</b> of this Element. This property may be true, even if there are not actually any <b>ownedRelationships</b> with <b>isImplied = true</b> , meaning that no such Relationships are actually implied for this Element. However, if it is false, then <b>ownedRelationships</b> may <i>not</i> contain any implied Relationships. That is, either <i>all</i> required implied Relationships must be included, or none of them.
<code>oslc_sysmlv2:element_IsLibraryElement</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether this Element is contained in the ownership tree of a library model.

Standards Track Work Product

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:element_Name</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The name to be used for this <b>Element</b> during name resolution within its <b>owningNamespace</b> . This is derived using the <code>effectiveName()</code> operation. By default, it is the same as the <b>declaredName</b> , but this is overridden for certain kinds of <b>Elements</b> to compute a <b>name</b> even when the <b>declaredName</b> is null.
<code>oslc_sysmlv2:element_OwnedAnnotation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Annotation</code>	The <b>ownedRelationships</b> of this <b>Element</b> that are <b>Annotations</b> , for which this <b>Element</b> is the <b>annotatedElement</b> .
<code>oslc_sysmlv2:element_OwnedElement</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The <b>Elements</b> owned by this <b>Element</b> , derived as the <b>ownedRelatedElements</b> of the <b>ownedRelationships</b> of this <b>Element</b> .
<code>oslc_sysmlv2:element_OwnedRelationship</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Relationship</code>	The <b>Relationships</b> for which this <b>Element</b> is the <b>owningRelatedElement</b> .
<code>oslc_sysmlv2:element_Owner</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The owner of this <b>Element</b> , derived as the <b>owningRelatedElement</b> of the <b>owningRelationship</b> of this <b>Element</b> , if any.
<code>oslc_sysmlv2:element_OwningMembership</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:OwningMembership</code>	The <b>owningRelationship</b> of this <b>Element</b> , if that <b>Relationship</b> is a <b>Membership</b> .
<code>oslc_sysmlv2:element_OwningNamespace</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Namespace</code>	The <b>Namespace</b> that owns this <b>Element</b> , which is the <b>membershipOwningNamespace</b> of the <b>owningMembership</b> of this <b>Element</b> , if any.
<code>oslc_sysmlv2:element_OwningRelationship</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Relationship</code>	The <b>Relationship</b> for which this <b>Element</b> is an <b>ownedRelatedElement</b> , if any.

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:element_QualifiedName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The full ownership-qualified name of this <b>Element</b> , represented in a form that is valid according to the KerML textual concrete syntax for qualified names (including use of unrestricted name notation and escaped characters, as necessary). The <code>qualifiedName</code> is null if this <b>Element</b> has no <code>owningNamespace</code> or if there is not a complete ownership chain of named <b>Namespaces</b> from a root <b>Namespace</b> to this <b>Element</b> .
<code>oslc_sysmlv2:element_ShortName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The short name to be used for this <b>Element</b> during name resolution within its <code>owningNamespace</code> . This is derived using the <code>effectiveShortName()</code> operation. By default, it is the same as the <code>declaredShortName</code> , but this is overridden for certain kinds of <b>Elements</b> to compute a <code>shortName</code> even when the <code>declaredName</code> is null.
<code>oslc_sysmlv2:element_TextualRepresentation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:TextualRepresentation</code>	The <b>TextualRepresentations</b> that annotate this <b>Element</b> .
<code>oslc_sysmlv2:featureMembership_OwnedMemberFeature</code>	Exactly-one	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <b>Feature</b> that this <b>FeatureMembership</b> relates to its <code>owningType</code> , making it an <b>ownedFeature</b> of the <code>owningType</code> .
<code>oslc_sysmlv2:featureMembership_OwningType</code>	Exactly-one	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The <b>Type</b> that owns this <b>FeatureMembership</b> .
<code>oslc_sysmlv2:featuring_Feature</code>	Exactly-one	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <b>Feature</b> that is featured by the <code>featuringType</code> .
<code>oslc_sysmlv2:featuring_Type</code>	Exactly-one	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The <b>Type</b> that features the <code>featureOfType</code> .
<code>oslc_sysmlv2:framedConcernMembership_OwnedConcern</code>	Exactly-one	false	Resource	Either	<code>oslc_sysmlv2:ConcernUsage</code>	The <b>ConcernUsage</b> that is the <b>ownedConstraint</b> of this <b>FramedConcernMembership</b> .

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:framedConcernMembership_ReferencedConcern</code>	Exactly-one	false	Resource	Either	<code>oslc_sysmlv2:ConcernUsage</code>	The <b>ConcernUsage</b> that is referenced through this <b>FramedConcernMembership</b> . It is the <b>referencedConstraint</b> of the <b>FramedConcernMembership</b> considered as a <b>RequirementConstraintMembership</b> , which must be a <b>ConcernUsage</b> .
<code>oslc_sysmlv2:membership_MemberElement</code>	Exactly-one	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The <b>Element</b> that becomes a <b>member</b> of the <b>membershipOwningNamespace</b> due to this <b>Membership</b> .
<code>oslc_sysmlv2:membership_MemberElementId</code>	Exactly-one	false	unspecified	Either	<code>xsd:string</code>	The <b>elementId</b> of the <b>memberElement</b> .
<code>oslc_sysmlv2:membership_MemberName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The name of the <b>memberElement</b> relative to the <b>membershipOwningNamespace</b> .
<code>oslc_sysmlv2:membership_MembershipOwningNamespace</code>	Exactly-one	false	Resource	Either	<code>oslc_sysmlv2:Namespace</code>	The <b>Namespace</b> of which the <b>memberElement</b> becomes a member due to this <b>Membership</b> .
<code>oslc_sysmlv2:membership_MemberShortName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The short name of the <b>memberElement</b> relative to the <b>membershipOwningNamespace</b> .
<code>oslc_sysmlv2:membership_Visibility</code>	Exactly-one	false	unspecified	Either	<code>oslc_sysmlv2:VisibilityKind</code>	Whether or not the <b>Membership</b> of the <b>memberElement</b> in the <b>membershipOwningNamespace</b> is publicly visible outside that <b>Namespace</b> .
<code>oslc_sysmlv2:owningMembership_OwnedMemberElement</code>	Exactly-one	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The <b>Element</b> that becomes an <b>ownedMember</b> of the <b>membershipOwningNamespace</b> due to this <b>OwningMembership</b> .
<code>oslc_sysmlv2:owningMembership_OwnedMemberElementId</code>	Exactly-one	false	unspecified	Either	<code>xsd:string</code>	The <b>elementId</b> of the <b>ownedMemberElement</b> .
<code>oslc_sysmlv2:owningMembership_OwnedMemberName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The <b>name</b> of the <b>ownedMemberElement</b> .
<code>oslc_sysmlv2:owningMembership_OwnedMemberShortName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The <b>shortName</b> of the <b>ownedMemberElement</b> .

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc:instanceShape</code>	Zero-or-one	false	Resource	Reference	<code>oslc:ResourceShape</code>	The URI of a Resource Shape that describes the possible properties, occurrence, value types, allowed values and labels. This shape information is useful in displaying the subject resource as well as guiding clients in performing modifications. Instance shapes may be specific to the authenticated user associated with the request that retrieved the resource, the current state of the resource and other factors and thus should not be cached.
<code>oslc:serviceProvider</code>	Zero-or-many	false	Resource	Reference	<code>oslc:ServiceProvider</code>	A link to the resource's OSLC Service Provider. There may be cases when the subject resource is available from a service provider that implements multiple domain specifications, which could result in multiple values for this property.
<code>oslc:shortTitle</code>	Zero-or-one	false	XMLLiteral	N/A	Unspecified	Short name identifying a resource, often used as an abbreviated identifier for presentation to end-users. <b>SHOULD</b> include only content that is valid inside an XHTML <code>&lt;span&gt;</code> element [sml-47].
<code>rdf:type</code>	Zero-or-many	false	Resource	Reference	<code>rdfs:Class</code>	The resource type URIs.

- **Describes:** <http://open-services.net/ns/sysmlv2#AssignmentActionUsage>
- **Summary:** AssignmentActionUsageShape
- **Description:** An `AssignmentActionUsage` is an `ActionUsage` that is defined, directly or indirectly, by the `ActionDefinition AssignmentAction` from the Systems Model Library. It specifies that the value of the `referent Feature`, relative to the target given by the result of the `targetArgument Expression`, should be set to the result of the `valueExpression`.

AssignmentActionUsage Properties

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
-------------	--------	-----------	------------	----------------	-------	-------------

Standards Track Work Product

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>dcterms:contributor</code>	Zero-or-many	false	AnyResource	Either	<code>oslc:Any</code>	Contributor or contributors to the resource. It is likely that the target resource will be a foaf:Person but that is not necessarily the case.
<code>dcterms:created</code>	Zero-or-one	false	dateTime	N/A	Unspecified	Timestamp of resource creation.
<code>dcterms:creator</code>	Zero-or-many	false	AnyResource	Either	<code>oslc:Any</code>	Creator or creators of the resource. It is likely that the target resource will be a foaf:Person but that is not necessarily the case.
<code>dcterms:description</code>	Zero-or-one	false	XMLLiteral	N/A	Unspecified	Descriptive text about resource represented as rich text in XHTML content.
<code>dcterms:identifier</code>	Exactly-one	true	string	N/A	Unspecified	A unique identifier for a resource. Typically read-only and assigned by the service provider when a resource is created. Not typically intended for end-user display.
<code>dcterms:modified</code>	Zero-or-one	false	dateTime	N/A	Unspecified	Timestamp of latest resource modification.
<code>dcterms:source</code>	Zero-or-one	false	Resource	Reference	<code>oslc:Any</code>	The resource URI a client can perform a get on to obtain the original non-OSLC AM formatted resource that was used to create this resource. The source resource is usually a binary or proprietary format that the service provider can consume and convert into an OSLC AM format. The service may use content negotiation with the Accept header to obtain the desired content type.
<code>dcterms:title</code>	Exactly-one	false	XMLLiteral	N/A	Unspecified	Title of the resource represented as rich text in XHTML content.
<code>dcterms:type</code>	Zero-or-many	false	string	N/A	Unspecified	A short string representation for the type, for example 'Car'.
<code>jazz_am:derives</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The resource that derives from another resource originated from or is significantly influenced by the referenced resource. For example a model element derives from a requirement.
<code>jazz_am:elaborates</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	This resource elaborates the referenced resource.

Standards Track Work Product

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>jazz_am:external</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	A generic link from a resource to an external web page.
<code>jazz_am:refine</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The target is a refinement of the source. (e.g. a use case scenario might be a refinement of a textual requirement that describes the interaction).
<code>jazz_am:satisfy</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The model element satisfies the requirement (e.g. The use case satisfies a functional requirement).
<code>jazz_am:trace</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The model element has a trace to the requirement (e.g. An attribute or its value are traced to a requirement).
<code>oslc_sysmlv2:actionUsage_ActionDefinition</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Behavior</code>	The <b>Behaviors</b> that are the <b>types</b> of this <b>ActionUsage</b> . Nominally, these would be <b>ActionDefinitions</b> , but other kinds of Kernel <b>Behaviors</b> are also allowed, to permit use of <b>Behaviors</b> from the Kernel Model Libraries.
<code>oslc_sysmlv2:assignmentActionUsage_Referent</code>	Exactly-one	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <b>Feature</b> whose value is to be set.
<code>oslc_sysmlv2:assignmentActionUsage_TargetArgument</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Expression</code>	The <b>Expression</b> whose value is an occurrence in the domain of the <b>referent Feature</b> , for which the value of the <b>referent</b> will be set to the result of the <b>valueExpression</b> by this <b>AssignmentActionUsage</b> .
<code>oslc_sysmlv2:assignmentActionUsage_ValueExpression</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Expression</code>	The <b>Expression</b> whose result is to be assigned to the <b>referent Feature</b> .
<code>oslc_sysmlv2:element_AliasIds</code>	Zero-or-many	false	unspecified	Either	<code>xsd:string</code>	Various alternative identifiers for this Element. Generally, these will be set by tools.
<code>oslc_sysmlv2:element_DeclaredName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The declared name of this <b>Element</b> .
<code>oslc_sysmlv2:element_DeclaredShortName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	An optional alternative name for the <b>Element</b> that is intended to be shorter or in some way more succinct than its primary <b>name</b> . It may act as a modeler-specified identifier for the <b>Element</b> , though it is then the responsibility of the modeler to maintain the uniqueness of this identifier within a model or relative to some other context.

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:element_Documentation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Documentation</code>	The Documentation owned by this Element.
<code>oslc_sysmlv2:element_ElementId</code>	Exactly-one	false	unspecified	Either	<code>xsd:string</code>	The globally unique identifier for this Element. This is intended to be set by tooling, and it must not change during the lifetime of the Element.
<code>oslc_sysmlv2:element_IsImpliedIncluded</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether all necessary implied Relationships have been included in the <code>ownedRelationships</code> of this Element. This property may be true, even if there are not actually any <code>ownedRelationships</code> with <code>isImplied = true</code> , meaning that no such Relationships are actually implied for this Element. However, if it is false, then <code>ownedRelationships</code> may <i>not</i> contain any implied Relationships. That is, either <i>all</i> required implied Relationships must be included, or none of them.
<code>oslc_sysmlv2:element_IsLibraryElement</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether this Element is contained in the ownership tree of a library model.
<code>oslc_sysmlv2:element_Name</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The name to be used for this <code>Element</code> during name resolution within its <code>owningNamespace</code> . This is derived using the <code>effectiveName()</code> operation. By default, it is the same as the <code>declaredName</code> , but this is overridden for certain kinds of <code>Elements</code> to compute a <code>name</code> even when the <code>declaredName</code> is null.
<code>oslc_sysmlv2:element_OwnedAnnotation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Annotation</code>	The <code>ownedRelationships</code> of this <code>Element</code> that are <code>Annotations</code> , for which this <code>Element</code> is the <code>annotatedElement</code> .
<code>oslc_sysmlv2:element_OwnedElement</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The Elements owned by this Element, derived as the <code>ownedRelatedElements</code> of the <code>ownedRelationships</code> of this Element.
<code>oslc_sysmlv2:element_OwnedRelationship</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Relationship</code>	The Relationships for which this Element is the <code>owningRelatedElement</code> .
<code>oslc_sysmlv2:element_Owner</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The owner of this Element, derived as the <code>owningRelatedElement</code> of the <code>owningRelationship</code> of this Element, if any.

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:element_OwningMembership</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:OwningMembership</code>	The <code>owningRelationship</code> of this <code>Element</code> , if that <code>Relationship</code> is a <code>Membership</code> .
<code>oslc_sysmlv2:element_OwningNamespace</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Namespace</code>	The <code>Namespace</code> that owns this <code>Element</code> , which is the <code>membershipOwningNamespace</code> of the <code>owningMembership</code> of this <code>Element</code> , if any.
<code>oslc_sysmlv2:element_OwningRelationship</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Relationship</code>	The <code>Relationship</code> for which this <code>Element</code> is an <code>ownedRelatedElement</code> , if any.
<code>oslc_sysmlv2:element_QualifiedName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The full ownership-qualified name of this <code>Element</code> , represented in a form that is valid according to the KerML textual concrete syntax for qualified names (including use of unrestricted name notation and escaped characters, as necessary). The <code>qualifiedName</code> is null if this <code>Element</code> has no <code>owningNamespace</code> or if there is not a complete ownership chain of named <code>Namespaces</code> from a root <code>Namespace</code> to this <code>Element</code> .
<code>oslc_sysmlv2:element_ShortName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The short name to be used for this <code>Element</code> during name resolution within its <code>owningNamespace</code> . This is derived using the <code>effectiveShortName()</code> operation. By default, it is the same as the <code>declaredShortName</code> , but this is overridden for certain kinds of <code>Elements</code> to compute a <code>shortName</code> even when the <code>declaredName</code> is null.
<code>oslc_sysmlv2:element_TextualRepresentation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:TextualRepresentation</code>	The <code>TextualRepresentations</code> that annotate this <code>Element</code> .
<code>oslc_sysmlv2:feature_ChainingFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <code>Feature</code> that are chained together to determine the values of this <code>Feature</code> , derived from the <code>chainingFeatures</code> of the <code>ownedFeatureChainings</code> of this <code>Feature</code> , in the same order. The values of a <code>Feature</code> with <code>chainingFeatures</code> are the same as values of the last <code>Feature</code> in the chain, which can be found by starting with the values of the first <code>Feature</code> (for each instance of the domain of the original <code>Feature</code> ), then using each of those as domain instances to find the values of the second <code>Feature</code> in <code>chainingFeatures</code> , and so on, to values of the last <code>Feature</code> .
<code>oslc_sysmlv2:feature_Direction</code>	Zero-or-one	false	unspecified	Either	<code>oslc_sysmlv2:FeatureDirectionKind</code>	Indicates how values of this <code>Feature</code> are determined or used (as specified for the <code>FeatureDirectionKind</code> ).

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:feature_EndOwningType</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The <b>Type</b> that is related to this <b>Feature</b> by an <b>EndFeatureMembership</b> in which the <b>Feature</b> is an <b>ownedMemberFeature</b> .
<code>oslc_sysmlv2:feature_FeaturingType</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	<b>Types</b> that feature this <b>Feature</b> , such that any instance in the domain of the <b>Feature</b> must be classified by all of these <b>Types</b> , including at least all the <b>featuringTypes</b> of its <b>typeFeaturings</b> . If the <b>Feature</b> is chained, then the <b>featuringTypes</b> of the first <b>Feature</b> in the chain are also <b>featuringTypes</b> of the chained <b>Feature</b> .
<code>oslc_sysmlv2:feature_IsComposite</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether the <b>Feature</b> is a composite <b>feature</b> of its <b>featuringType</b> . If so, the values of the <b>Feature</b> cannot exist after its featuring instance no longer does.
<code>oslc_sysmlv2:feature_IsDerived</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether the values of this <b>Feature</b> can always be computed from the values of other <b>Features</b> .
<code>oslc_sysmlv2:feature_IsEnd</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether or not the this <b>Feature</b> is an end <b>Feature</b> , requiring a different interpretation of the <b>multiplicity</b> of the <b>Feature</b> .
<code>oslc_sysmlv2:feature_IsNonunique</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	isNonunique.
<code>oslc_sysmlv2:feature_IsOrdered</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether an order exists for the values of this <b>Feature</b> or not.
<code>oslc_sysmlv2:feature_IsPortion</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether the values of this <b>Feature</b> are contained in the space and time of instances of the domain of the <b>Feature</b> and represent the same thing as those instances.
<code>oslc_sysmlv2:feature_IsReadOnly</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether the values of this <b>Feature</b> can change over the lifetime of an instance of the domain.
<code>oslc_sysmlv2:feature_IsUnique</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether or not values for this <b>Feature</b> must have no duplicates or not.
<code>oslc_sysmlv2:feature_OwnedFeatureChaining</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:FeatureChaining</code>	The <b>ownedRelationships</b> of this <b>Feature</b> that are <b>FeatureChainings</b> , for which the <b>Feature</b> will be the <b>featureChained</b> .
<code>oslc_sysmlv2:feature_OwnedFeatureInverting</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:FeatureInverting</code>	The <b>ownedRelationships</b> of this <b>Feature</b> that are <b>FeatureInvertings</b> and for which the <b>Feature</b> is the <b>featureInverted</b> .

<code>oslc_sysmlv2:type_IntersectingType</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The interpretations of a <b>Type</b> with <b>intersectingTypes</b> are asserted to be those in common among the <b>intersectingTypes</b> , which are the <b>Types</b> derived from the <b>intersectingType</b> of the <b>ownedIntersectings</b> of this <b>Type</b> . For example, a <b>Classifier</b> might be an intersection of <b>Classifiers</b> for people of a particular sex and of a particular nationality. Similarly, a feature for people's children of a particular sex might be the intersection of a <b>Feature</b> for their children and a <b>Classifier</b> for people of that sex (because the interpretations of the children <b>Feature</b> that identify those of that sex are also interpretations of the <b>Classifier</b> for that sex).
<code>oslc_sysmlv2:type_IsAbstract</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Indicates whether instances of this <b>Type</b> must also be instances of at least one of its specialized <b>Types</b> .
<code>oslc_sysmlv2:type_IsConjugated</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Indicates whether this <b>Type</b> has an <b>ownedConjugator</b> .
<code>oslc_sysmlv2:type_IsSufficient</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether all things that meet the classification conditions of this <b>Type</b> must be classified by the <b>Type</b> .
<code>oslc_sysmlv2:type_Multiplicity</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Multiplicity</code>	An <b>ownedMember</b> of this <b>Type</b> that is a <b>Multiplicity</b> , which constrains the cardinality of the <b>Type</b> . If there is no such <b>ownedMember</b> , then the cardinality of this <b>Type</b> is constrained by all the <b>Multiplicity</b> constraints applicable to any direct supertypes.
<code>oslc_sysmlv2:type_Output</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All <b>features</b> related to this <b>Type</b> by <b>FeatureMemberships</b> that have <b>direction out or inout</b> .
<code>oslc_sysmlv2:type_OwnedConjugator</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Conjugation</code>	A <b>Conjugation</b> owned by this <b>Type</b> for which the <b>Type</b> is the <b>originalType</b> .
<code>oslc_sysmlv2:type_OwnedDifferencing</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Differencing</code>	The <b>ownedRelationships</b> of this <b>Type</b> that are <b>Differencings</b> , having this <b>Type</b> as their <b>typeDifferenced</b> .
<code>oslc_sysmlv2:type_OwnedDisjoining</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Disjoining</code>	The <b>ownedRelationships</b> of this <b>Type</b> that are <b>Disjoinings</b> , for which the <b>Type</b> is the <b>typeDisjoined Type</b> .
<code>oslc_sysmlv2:type_OwnedEndFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All <b>endFeatures</b> of this <b>Type</b> that are <b>ownedFeatures</b> .

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:type_OwnedFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <code>ownedMemberFeatures</code> of the <code>ownedFeatureMemberships</code> of this <code>Type</code> .
<code>oslc_sysmlv2:type_OwnedFeatureMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:FeatureMembership</code>	The <code>ownedMemberships</code> of this <code>Type</code> that are <code>FeatureMemberships</code> , for which the <code>Type</code> is the <code>owningType</code> . Each such <code>FeatureMembership</code> identifies an <code>ownedFeature</code> of the <code>Type</code> .
<code>oslc_sysmlv2:type_OwnedIntersecting</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Intersecting</code>	The <code>ownedRelationships</code> of this <code>Type</code> that are <code>Intersectings</code> , have the <code>Type</code> as their <code>typeIntersected</code> .
<code>oslc_sysmlv2:type_OwnedSpecialization</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Specialization</code>	The <code>ownedRelationships</code> of this <code>Type</code> that are <code>Specializations</code> , for which the <code>Type</code> is the <code>specific Type</code> .
<code>oslc_sysmlv2:type_OwnedUnioning</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Unioning</code>	The <code>ownedRelationships</code> of this <code>Type</code> that are <code>Unionings</code> , having the <code>Type</code> as their <code>typeUnioned</code> .
<code>oslc_sysmlv2:type_UnioningType</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The interpretations of a <code>Type</code> with <code>unioningTypes</code> are asserted to be the same as those of all the <code>unioningTypes</code> together, which are the <code>Types</code> derived from the <code>unioningType</code> of the <code>ownedUnionings</code> of this <code>Type</code> . For example, a <code>Classifier</code> for people might be the union of <code>Classifiers</code> for all the sexes. Similarly, a feature for people's children might be the union of features dividing them in the same ways as people in general.
<code>oslc_sysmlv2:usage_Definition</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Classifier</code>	The <code>Classifiers</code> that are the types of this <code>Usage</code> . Nominally, these are <code>Definitions</code> , but other kinds of Kernel <code>Classifiers</code> are also allowed, to permit use of <code>Classifiers</code> from the Kernel Model Libraries.
<code>oslc_sysmlv2:usage_DirectedUsage</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Usage</code>	The <code>usages</code> of this <code>Usage</code> that are <code>directedFeatures</code> .
<code>oslc_sysmlv2:usage_IsReference</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether this <code>Usage</code> is a referential <code>Usage</code> , that is, it has <code>isComposite = false</code> .
<code>oslc_sysmlv2:usage_IsVariation</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether this <code>Usage</code> is for a variation point or not. If true, then all the <code>memberships</code> of the <code>Usage</code> must be <code>VariantMemberships</code> .

<code>oslc_sysmlv2:usage_OwningDefinition</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Definition</code>	The <code>Definition</code> that owns this <code>Usage</code> (if any).
<code>oslc_sysmlv2:usage_OwningUsage</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Usage</code>	The <code>Usage</code> in which this <code>Usage</code> is nested (if any).
<code>oslc_sysmlv2:usage_Usage</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Usage</code>	The <code>Usages</code> that are <code>features</code> of this <code>Usage</code> (not necessarily owned).
<code>oslc_sysmlv2:usage_Variant</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Usage</code>	The <code>Usages</code> which represent the variants of this <code>Usage</code> as a variation point <code>Usage</code> , if <code>isVariation = true</code> . If <code>isVariation = false</code> , then there must be no <code>variants</code> .
<code>oslc_sysmlv2:usage_VariantMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:VariantMembership</code>	The <code>ownedMemberships</code> of this <code>Usage</code> that are <code>VariantMemberships</code> . If <code>isVariation = true</code> , then this must be all <code>memberships</code> of the <code>Usage</code> . If <code>isVariation = false</code> , then <code>variantMembership</code> must be empty.

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc:instanceShape</code>	Zero-or-one	false	Resource	Reference	<code>oslc:ResourceShape</code>	The URI of a Resource Shape that describes the possible properties, occurrence, value types, allowed values and labels. This shape information is useful in displaying the subject resource as well as guiding clients in performing modifications. Instance shapes may be specific to the authenticated user associated with the request that retrieved the resource, the current state of the resource and other factors and thus should not be cached.
<code>oslc:serviceProvider</code>	Zero-or-many	false	Resource	Reference	<code>oslc:ServiceProvider</code>	A link to the resource's OSLC Service Provider. There may be cases when the subject resource is available from a service provider that implements multiple domain specifications, which could result in multiple values for this property.
<code>oslc:shortTitle</code>	Zero-or-one	false	XMLLiteral	N/A	Unspecified	Short name identifying a resource, often used as an abbreviated identifier for presentation to end-users. <b>SHOULD</b> include only content that is valid inside an XHTML <code>&lt;span&gt;</code> element [sml-48].
<code>rdf:type</code>	Zero-or-many	false	Resource	Reference	<code>rdfs:Class</code>	The resource type URIs.

- **Describes:** <http://open-services.net/ns/sysmlv2#Package>
- **Summary:** PackageShape
- **Description:** A `Package` is a `Namespace` used to group `Elements`, without any instance-level semantics. It may have one or more model-level evaluable `filterCondition Expressions` used to filter its `importedMemberships`. Any imported `member` must meet all of the `filterConditions`.

#### Package Properties

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>dcterms:contributor</code>	Zero-or-many	false	AnyResource	Either	<code>oslc:Any</code>	Contributor or contributors to the resource. It is likely that the target resource will be a foaf:Person but that is not necessarily the case.
<code>dcterms:created</code>	Zero-or-one	false	dateTime	N/A	Unspecified	Timestamp of resource creation.

Standards Track Work Product

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>dcterms:creator</code>	Zero-or-many	false	AnyResource	Either	<code>oslc:Any</code>	Creator or creators of the resource. It is likely that the target resource will be a foaf:Person but that is not necessarily the case.
<code>dcterms:description</code>	Zero-or-one	false	XMLLiteral	N/A	Unspecified	Descriptive text about resource represented as rich text in XHTML content.
<code>dcterms:identifier</code>	Exactly-one	true	string	N/A	Unspecified	A unique identifier for a resource. Typically read-only and assigned by the service provider when a resource is created. Not typically intended for end-user display.
<code>dcterms:modified</code>	Zero-or-one	false	dateTime	N/A	Unspecified	Timestamp of latest resource modification.
<code>dcterms:source</code>	Zero-or-one	false	Resource	Reference	<code>oslc:Any</code>	The resource URI a client can perform a get on to obtain the original non-OSLC AM formatted resource that was used to create this resource. The source resource is usually a binary or proprietary format that the service provider can consume and convert into an OSLC AM format. The service may use content negotiation with the Accept header to obtain the desired content type.
<code>dcterms:title</code>	Exactly-one	false	XMLLiteral	N/A	Unspecified	Title of the resource represented as rich text in XHTML content.
<code>dcterms:type</code>	Zero-or-many	false	string	N/A	Unspecified	A short string representation for the type, for example 'Car'.
<code>jazz_am:derives</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The resource that derives from another resource originated from or is significantly influenced by the referenced resource. For example a model element derives from a requirement.
<code>jazz_am:elaborates</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	This resource elaborates the referenced resource.
<code>jazz_am:external</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	A generic link from a resource to an external web page.
<code>jazz_am:refine</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The target is a refinement of the source. (e.g. a use case scenario might be a refinement of a textual requirement that describes the interaction).

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>jazz_am:satisfy</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The model element satisfies the requirement (e.g. The use case satisfies a functional requirement).
<code>jazz_am:trace</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The model element has a trace to the requirement (e.g. An attribute or its value are traced to a requirement).
<code>oslc_sysmlv2:element_AliasIds</code>	Zero-or-many	false	unspecified	Either	<code>xsd:string</code>	Various alternative identifiers for this Element. Generally, these will be set by tools.
<code>oslc_sysmlv2:element_DeclaredName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The declared name of this <b>Element</b> .
<code>oslc_sysmlv2:element_DeclaredShortName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	An optional alternative name for the <b>Element</b> that is intended to be shorter or in some way more succinct than its primary <b>name</b> . It may act as a modeler-specified identifier for the <b>Element</b> , though it is then the responsibility of the modeler to maintain the uniqueness of this identifier within a model or relative to some other context.
<code>oslc_sysmlv2:element_Documentation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Documentation</code>	The Documentation owned by this Element.
<code>oslc_sysmlv2:element_ElementId</code>	Exactly-one	false	unspecified	Either	<code>xsd:string</code>	The globally unique identifier for this Element. This is intended to be set by tooling, and it must not change during the lifetime of the Element.
<code>oslc_sysmlv2:element_IsImpliedIncluded</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether all necessary implied Relationships have been included in the <b>ownedRelationships</b> of this Element. This property may be true, even if there are not actually any <b>ownedRelationships</b> with <b>isImplied = true</b> , meaning that no such Relationships are actually implied for this Element. However, if it is false, then <b>ownedRelationships</b> may <i>not</i> contain any implied Relationships. That is, either <i>all</i> required implied Relationships must be included, or none of them.
<code>oslc_sysmlv2:element_IsLibraryElement</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether this Element is contained in the ownership tree of a library model.
<code>oslc_sysmlv2:element_Name</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The name to be used for this <b>Element</b> during name resolution within its <b>owningNamespace</b> . This is derived using the <b>effectiveName()</b> operation. By default, it is the same as the <b>declaredName</b> , but this is overridden for certain kinds of <b>Elements</b> to compute a <b>name</b> even when the <b>declaredName</b> is null.

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:element_OwnedAnnotation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Annotation</code>	The <code>ownedRelationships</code> of this <code>Element</code> that are <code>Annotations</code> , for which this <code>Element</code> is the <code>annotatedElement</code> .
<code>oslc_sysmlv2:element_OwnedElement</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The <code>Elements</code> owned by this <code>Element</code> , derived as the <code>ownedRelatedElements</code> of the <code>ownedRelationships</code> of this <code>Element</code> .
<code>oslc_sysmlv2:element_OwnedRelationship</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Relationship</code>	The <code>Relationships</code> for which this <code>Element</code> is the <code>owningRelatedElement</code> .
<code>oslc_sysmlv2:element_Owner</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The owner of this <code>Element</code> , derived as the <code>owningRelatedElement</code> of the <code>owningRelationship</code> of this <code>Element</code> , if any.
<code>oslc_sysmlv2:element_OwningMembership</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:OwningMembership</code>	The <code>owningRelationship</code> of this <code>Element</code> , if that <code>Relationship</code> is a <code>Membership</code> .
<code>oslc_sysmlv2:element_OwningNamespace</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Namespace</code>	The <code>Namespace</code> that owns this <code>Element</code> , which is the <code>membershipOwningNamespace</code> of the <code>owningMembership</code> of this <code>Element</code> , if any.
<code>oslc_sysmlv2:element_OwningRelationship</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Relationship</code>	The <code>Relationship</code> for which this <code>Element</code> is an <code>ownedRelatedElement</code> , if any.
<code>oslc_sysmlv2:element_QualifiedName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The full ownership-qualified name of this <code>Element</code> , represented in a form that is valid according to the KerML textual concrete syntax for qualified names (including use of unrestricted name notation and escaped characters, as necessary). The <code>qualifiedName</code> is null if this <code>Element</code> has no <code>owningNamespace</code> or if there is not a complete ownership chain of named <code>Namespaces</code> from a root <code>Namespace</code> to this <code>Element</code> .
<code>oslc_sysmlv2:element_ShortName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The short name to be used for this <code>Element</code> during name resolution within its <code>owningNamespace</code> . This is derived using the <code>effectiveShortName()</code> operation. By default, it is the same as the <code>declaredShortName</code> , but this is overridden for certain kinds of <code>Elements</code> to compute a <code>shortName</code> even when the <code>declaredName</code> is null.
<code>oslc_sysmlv2:element_TextualRepresentation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:TextualRepresentation</code>	The <code>TextualRepresentations</code> that annotate this <code>Element</code> .
<code>oslc_sysmlv2:namespace_ImportedMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Membership</code>	The <code>Memberships</code> in this <code>Namespace</code> that result from the <code>ownedImports</code> of this <code>Namespace</code> .

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:namespace_Member</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The set of all member <b>Elements</b> of this <b>Namespace</b> , which are the <b>memberElements</b> of all <b>memberships</b> of the <b>Namespace</b> .
<code>oslc_sysmlv2:namespace_Membership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Membership</code>	All <b>Memberships</b> in this <b>Namespace</b> , including (at least) the union of <b>ownedMemberships</b> and <b>importedMemberships</b> .
<code>oslc_sysmlv2:namespace_OwnedImport</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Import</code>	The <b>ownedRelationships</b> of this <b>Namespace</b> that are <b>Imports</b> , for which the <b>Namespace</b> is the <b>importOwningNamespace</b> .
<code>oslc_sysmlv2:namespace_OwnedMember</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The owned <b>members</b> of this <b>Namespace</b> , which are the <b>ownedMemberElements</b> of the <b>ownedMemberships</b> of the ..
<code>oslc_sysmlv2:namespace_OwnedMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Membership</code>	The <b>ownedRelationships</b> of this <b>Namespace</b> that are <b>Memberships</b> , for which the <b>Namespace</b> is the <b>membershipOwningNamespace</b> .
<code>oslc_sysmlv2:package_FilterCondition</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Expression</code>	The model-level evaluable <b>Boolean</b> -valued <b>Expression</b> used to filter the <b>members</b> of this <b>Package</b> , which are owned by the <b>Package</b> are via <b>ElementFilterMemberships</b> .
<code>oslc:instanceShape</code>	Zero-or-one	false	Resource	Reference	<code>oslc:ResourceShape</code>	The URI of a Resource Shape that describes the possible properties, occurrence, value types, allowed values and labels. This shape information is useful in displaying the subject resource as well as guiding clients in performing modifications. Instance shapes may be specific to the authenticated user associated with the request that retrieved the resource, the current state of the resource and other factors and thus should not be cached.
<code>oslc:serviceProvider</code>	Zero-or-many	false	Resource	Reference	<code>oslc:ServiceProvider</code>	A link to the resource's OSLC Service Provider. There may be cases when the subject resource is available from a service provider that implements multiple domain specifications, which could result in multiple values for this property.
<code>oslc:shortTitle</code>	Zero-or-one	false	XMLLiteral	N/A	Unspecified	Short name identifying a resource, often used as an abbreviated identifier for presentation to end-users. <b>SHOULD</b> include only content that is valid inside an XHTML <code>&lt;span&gt;</code> element [sml-49].
<code>rdf:type</code>	Zero-or-many	false	Resource	Reference	<code>rdfs:Class</code>	The resource type URIs.

- **Describes:** <http://open-services.net/ns/sysmlv2#ItemFeature>
- **Summary:** ItemFeatureShape
- **Description:** An **ItemFeature** is the **ownedFeature** of an **ItemFlow** that identifies the things carried by the kinds of transfers that are instances of the **ItemFlow**.

**ItemFeature Properties**

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description

The source resource is usually a binary or proprietary format that the service provider can consume and convert into an OSLC AM format. The service may use content negotiation with the Accept header to obtain the desired content type.
<b>dcterms:title</b>	Exactly-one	false	XMLLiteral	N/A	Unspecified	Title of the resource represented as rich text in XHTML content.
<b>dcterms:type</b>	Zero-or-many	false	string	N/A	Unspecified	A short string representation for the type, for example 'Car'.
<b>jazz_am:derives</b>	Zero-or-many	false	Resource	Reference	<b>oslc:Any</b>	The resource that derives from another resource originated from or is significantly influenced by the referenced resource. For example a model element derives from a requirement.

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>jazz_am:elaborates</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	This resource elaborates the referenced resource.
<code>jazz_am:external</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	A generic link from a resource to an external web page.
<code>jazz_am:refine</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The target is a refinement of the source. (e.g. a use case scenario might be a refinement of a textual requirement that describes the interaction).
<code>jazz_am:satisfy</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The model element satisfies the requirement (e.g. The use case satisfies a functional requirement).
<code>jazz_am:trace</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The model element has a trace to the requirement (e.g. An attribute or its value are traced to a requirement).
<code>oslc_sysmlv2:element_AliasIds</code>	Zero-or-many	false	unspecified	Either	<code>xsd:string</code>	Various alternative identifiers for this Element. Generally, these will be set by tools.
<code>oslc_sysmlv2:element_DeclaredName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The declared name of this <b>Element</b> .
<code>oslc_sysmlv2:element_DeclaredShortName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	An optional alternative name for the <b>Element</b> that is intended to be shorter or in some way more succinct than its primary <b>name</b> . It may act as a modeler-specified identifier for the <b>Element</b> , though it is then the responsibility of the modeler to maintain the uniqueness of this identifier within a model or relative to some other context.
<code>oslc_sysmlv2:element_Documentation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Documentation</code>	The Documentation owned by this Element.
<code>oslc_sysmlv2:element_ElementId</code>	Exactly-one	false	unspecified	Either	<code>xsd:string</code>	The globally unique identifier for this Element. This is intended to be set by tooling, and it must not change during the lifetime of the Element.

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:element_IsImpliedIncluded</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether all necessary implied Relationships have been included in the <code>ownedRelationships</code> of this Element. This property may be true, even if there are not actually any <code>ownedRelationships</code> with <code>isImplied = true</code> , meaning that no such Relationships are actually implied for this Element. However, if it is false, then <code>ownedRelationships</code> may <i>not</i> contain any implied Relationships. That is, either <i>all</i> required implied Relationships must be included, or none of them.
<code>oslc_sysmlv2:element_IsLibraryElement</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether this Element is contained in the ownership tree of a library model.
<code>oslc_sysmlv2:element_Name</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The name to be used for this <code>Element</code> during name resolution within its <code>owningNamespace</code> . This is derived using the <code>effectiveName()</code> operation. By default, it is the same as the <code>declaredName</code> , but this is overridden for certain kinds of <code>Elements</code> to compute a <code>name</code> even when the <code>declaredName</code> is null.
<code>oslc_sysmlv2:element_OwnedAnnotation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Annotation</code>	The <code>ownedRelationships</code> of this <code>Element</code> that are <code>Annotations</code> , for which this <code>Element</code> is the <code>annotatedElement</code> .
<code>oslc_sysmlv2:element_OwnedElement</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The Elements owned by this Element, derived as the <code>ownedRelatedElements</code> of the <code>ownedRelationships</code> of this Element.
<code>oslc_sysmlv2:element_OwnedRelationship</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Relationship</code>	The Relationships for which this Element is the <code>owningRelatedElement</code> .
<code>oslc_sysmlv2:element_Owner</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The owner of this Element, derived as the <code>owningRelatedElement</code> of the <code>owningRelationship</code> of this Element, if any.
<code>oslc_sysmlv2:element_OwningMembership</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:OwningMembership</code>	The <code>owningRelationship</code> of this <code>Element</code> , if that <code>Relationship</code> is a <code>Membership</code> .
<code>oslc_sysmlv2:element_OwningNamespace</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Namespace</code>	The <code>Namespace</code> that owns this <code>Element</code> , which is the <code>membershipOwningNamespace</code> of the <code>owningMembership</code> of this <code>Element</code> , if any.
<code>oslc_sysmlv2:element_OwningRelationship</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Relationship</code>	The Relationship for which this Element is an <code>ownedRelatedElement</code> , if any.

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:element_QualifiedName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The full ownership-qualified name of this <b>Element</b> , represented in a form that is valid according to the KerML textual concrete syntax for qualified names (including use of unrestricted name notation and escaped characters, as necessary). The <code>qualifiedName</code> is null if this <b>Element</b> has no <code>owningNamespace</code> or if there is not a complete ownership chain of named <b>Namespaces</b> from a root <b>Namespace</b> to this <b>Element</b> .
<code>oslc_sysmlv2:element_ShortName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The short name to be used for this <b>Element</b> during name resolution within its <code>owningNamespace</code> . This is derived using the <code>effectiveShortName()</code> operation. By default, it is the same as the <code>declaredShortName</code> , but this is overridden for certain kinds of <b>Elements</b> to compute a <code>shortName</code> even when the <code>declaredName</code> is null.
<code>oslc_sysmlv2:element_TextualRepresentation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:TextualRepresentation</code>	The <b>TextualRepresentations</b> that annotate this <b>Element</b> .
<code>oslc_sysmlv2:feature_ChainingFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <b>Feature</b> that are chained together to determine the values of this <b>Feature</b> , derived from the <code>chainingFeatures</code> of the <code>ownedFeatureChainings</code> of this <b>Feature</b> , in the same order. The values of a <b>Feature</b> with <code>chainingFeatures</code> are the same as values of the last <b>Feature</b> in the chain, which can be found by starting with the values of the first <b>Feature</b> (for each instance of the domain of the original <b>Feature</b> ), then using each of those as domain instances to find the values of the second <b>Feature</b> in <code>chainingFeatures</code> , and so on, to values of the last <b>Feature</b> .
<code>oslc_sysmlv2:feature_Direction</code>	Zero-or-one	false	unspecified	Either	<code>oslc_sysmlv2:FeatureDirectionKind</code>	Indicates how values of this <b>Feature</b> are determined or used (as specified for the <code>FeatureDirectionKind</code> ).
<code>oslc_sysmlv2:feature_EndOwningType</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The <b>Type</b> that is related to this <b>Feature</b> by an <code>EndFeatureMembership</code> in which the <b>Feature</b> is an <code>ownedMemberFeature</code> .
<code>oslc_sysmlv2:feature_FeaturingType</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	<b>Types</b> that feature this <b>Feature</b> , such that any instance in the domain of the <b>Feature</b> must be classified by all of these <b>Types</b> , including at least all the <code>featuringTypes</code> of its <code>typeFeaturings</code> . If the <b>Feature</b> is chained, then the <code>featuringTypes</code> of the first <b>Feature</b> in the chain are also <code>featuringTypes</code> of the chained <b>Feature</b> .

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:feature_IsComposite</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether the <b>Feature</b> is a composite <b>feature</b> of its <b>featuringType</b> . If so, the values of the <b>Feature</b> cannot exist after its featuring instance no longer does.
<code>oslc_sysmlv2:feature_IsDerived</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether the values of this <b>Feature</b> can always be computed from the values of other <b>Features</b> .
<code>oslc_sysmlv2:feature_IsEnd</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether or not the this <b>Feature</b> is an end <b>Feature</b> , requiring a different interpretation of the <b>multiplicity</b> of the <b>Feature</b> .
<code>oslc_sysmlv2:feature_IsNonunique</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	isNonunique.
<code>oslc_sysmlv2:feature_IsOrdered</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether an order exists for the values of this <b>Feature</b> or not.
<code>oslc_sysmlv2:feature_IsPortion</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether the values of this <b>Feature</b> are contained in the space and time of instances of the domain of the <b>Feature</b> and represent the same thing as those instances.
<code>oslc_sysmlv2:feature_IsReadOnly</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether the values of this <b>Feature</b> can change over the lifetime of an instance of the domain.
<code>oslc_sysmlv2:feature_IsUnique</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether or not values for this <b>Feature</b> must have no duplicates or not.
<code>oslc_sysmlv2:feature_OwnedFeatureChaining</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:FeatureChaining</code>	The <b>ownedRelationships</b> of this <b>Feature</b> that are <b>FeatureChainings</b> , for which the <b>Feature</b> will be the <b>featureChained</b> .
<code>oslc_sysmlv2:feature_OwnedFeatureInverting</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:FeatureInverting</code>	The <b>ownedRelationships</b> of this <b>Feature</b> that are <b>FeatureInvertings</b> and for which the <b>Feature</b> is the <b>featureInverted</b> .
<code>oslc_sysmlv2:feature_OwnedRedefinition</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Redefinition</code>	The <b>ownedSubsettings</b> of this <b>Feature</b> that are <b>Redefinitions</b> , for which the <b>Feature</b> is the <b>redefiningFeature</b> .
<code>oslc_sysmlv2:feature_OwnedReferenceSubsetting</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:ReferenceSubsetting</code>	The one <b>ownedSubsetting</b> of this <b>Feature</b> , if any, that is a <b>ReferenceSubsetting</b> , for which the <b>Feature</b> is the <b>referencingFeature</b> .
<code>oslc_sysmlv2:feature_OwnedSubsetting</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Subsetting</code>	The <b>ownedSpecializations</b> of this <b>Feature</b> that are <b>Subsettings</b> , for which the <b>Feature</b> is the <b>subsettingFeature</b> .

Standards Track Work Product

<code>oslc_sysmlv2:feature_OwnedTypeFeaturing</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:TypeFeaturing</code>	The <code>ownedRelationships</code> of this <code>Feature</code> that are <code>TypeFeaturings</code> and for which the <code>Feature</code> is the <code>featureOfType</code> .
<code>oslc_sysmlv2:feature_OwnedTyping</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:FeatureTyping</code>	The <code>ownedSpecializations</code> of this <code>Feature</code> that are <code>FeatureTypings</code> , for which the <code>Feature</code> is the <code>typedFeature</code> .
<code>oslc_sysmlv2:feature_OwningFeatureMembership</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:FeatureMembership</code>	The <code>FeatureMembership</code> that owns this <code>Feature</code> as an <code>ownedMemberFeature</code> , determining its <code>owningType</code> .
<code>oslc_sysmlv2:feature_OwningType</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The <code>Type</code> that is the <code>owningType</code> of the <code>owningFeatureMembership</code> of this <code>Feature</code> .
<code>oslc_sysmlv2:feature_Type</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	<code>Types</code> that restrict the values of this <code>Feature</code> , such that the values must be instances of all the <code>types</code> . The types of a <code>Feature</code> are derived from its <code>typings</code> and the <code>types</code> of its <code>subsettings</code> . If the <code>Feature</code> is chained, then the <code>types</code> of the last <code>Feature</code> in the chain are also <code>types</code> of the chained <code>Feature</code> .
<code>oslc_sysmlv2:namespace_ImportedMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Membership</code>	The <code>Memberships</code> in this <code>Namespace</code> that result from the <code>ownedImports</code> of this <code>Namespace</code> .
<code>oslc_sysmlv2:namespace_Member</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The set of all member <code>Elements</code> of this <code>Namespace</code> , which are the <code>memberElements</code> of all <code>memberships</code> of the <code>Namespace</code> .
<code>oslc_sysmlv2:namespace_Membership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Membership</code>	All <code>Memberships</code> in this <code>Namespace</code> , including (at least) the union of <code>ownedMemberships</code> and <code>importedMemberships</code> .
<code>oslc_sysmlv2:namespace_OwnedImport</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Import</code>	The <code>ownedRelationships</code> of this <code>Namespace</code> that are <code>Imports</code> , for which the <code>Namespace</code> is the <code>importOwningNamespace</code> .
<code>oslc_sysmlv2:namespace_OwnedMember</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The owned <code>members</code> of this <code>Namespace</code> , which are the <code>ownedMemberElements</code> of the <code>ownedMemberships</code> of the ..
<code>oslc_sysmlv2:namespace_OwnedMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Membership</code>	The <code>ownedRelationships</code> of this <code>Namespace</code> that are <code>Memberships</code> , for which the <code>Namespace</code> is the <code>membershipOwningNamespace</code> .

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:type_DifferencingType</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The interpretations of a <b>Type</b> with <b>differencingTypes</b> are asserted to be those of the first of those <b>Types</b> , but not including those of the remaining <b>Types</b> . For example, a <b>Classifier</b> might be the difference of a <b>Classifier</b> for people and another for people of a particular nationality, leaving people who are not of that nationality. Similarly, a feature of people might be the difference between a feature for their children and a <b>Classifier</b> for people of a particular sex, identifying their children not of that sex (because the interpretations of the children <b>Feature</b> that identify those of that sex are also interpretations of the <b>Classifier</b> for that sex).
<code>oslc_sysmlv2:type_DirectedFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <b>features</b> of this <b>Type</b> that have a non-null <b>direction</b> .
<code>oslc_sysmlv2:type_EndFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All <b>features</b> of this <b>Type</b> with <b>isEnd</b> = true.
<code>oslc_sysmlv2:type_Feature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <b>ownedMemberFeatures</b> of the <b>featureMemberships</b> of this <b>Type</b> .
<code>oslc_sysmlv2:type_FeatureMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:FeatureMembership</code>	The <b>FeatureMemberships</b> for <b>features</b> of this <b>Type</b> , which include all <b>ownedFeatureMemberships</b> and those <b>inheritedMemberships</b> that are <b>FeatureMemberships</b> (but does <i>not</i> include any <b>importedMemberships</b> ).
<code>oslc_sysmlv2:type_InheritedFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All the <b>memberFeatures</b> of the <b>inheritedMemberships</b> of this <b>Type</b> that are <b>FeatureMemberships</b> .
<code>oslc_sysmlv2:type_InheritedMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Membership</code>	All <b>Memberships</b> inherited by this <b>Type</b> via <b>Specialization</b> or <b>Conjugation</b> . These are included in the derived union for the <b>memberships</b> of the <b>Type</b> .
<code>oslc_sysmlv2:type_Input</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All <b>features</b> related to this <b>Type</b> by <b>FeatureMemberships</b> that have <b>direction</b> in or inout..

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:type_IntersectingType</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The interpretations of a <b>Type</b> with <b>intersectingTypes</b> are asserted to be those in common among the <b>intersectingTypes</b> , which are the <b>Types</b> derived from the <b>intersectingType</b> of the <b>ownedIntersectings</b> of this <b>Type</b> . For example, a <b>Classifier</b> might be an intersection of <b>Classifiers</b> for people of a particular sex and of a particular nationality. Similarly, a feature for people's children of a particular sex might be the intersection of a <b>Feature</b> for their children and a <b>Classifier</b> for people of that sex (because the interpretations of the children <b>Feature</b> that identify those of that sex are also interpretations of the <b>Classifier</b> for that sex).
<code>oslc_sysmlv2:type_IsAbstract</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Indicates whether instances of this <b>Type</b> must also be instances of at least one of its specialized <b>Types</b> .
<code>oslc_sysmlv2:type_IsConjugated</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Indicates whether this <b>Type</b> has an <b>ownedConjugator</b> .
<code>oslc_sysmlv2:type_IsSufficient</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether all things that meet the classification conditions of this <b>Type</b> must be classified by the <b>Type</b> .
<code>oslc_sysmlv2:type_Multiplicity</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Multiplicity</code>	An <b>ownedMember</b> of this <b>Type</b> that is a <b>Multiplicity</b> , which constrains the cardinality of the <b>Type</b> . If there is no such <b>ownedMember</b> , then the cardinality of this <b>Type</b> is constrained by all the <b>Multiplicity</b> constraints applicable to any direct supertypes.
<code>oslc_sysmlv2:type_Output</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All <b>features</b> related to this <b>Type</b> by <b>FeatureMemberships</b> that have <b>direction out or inout</b> .
<code>oslc_sysmlv2:type_OwnedConjugator</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Conjugation</code>	A <b>Conjugation</b> owned by this <b>Type</b> for which the <b>Type</b> is the <b>originalType</b> .
<code>oslc_sysmlv2:type_OwnedDifferencing</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Differencing</code>	The <b>ownedRelationships</b> of this <b>Type</b> that are <b>Differencings</b> , having this <b>Type</b> as their <b>typeDifferenced</b> .
<code>oslc_sysmlv2:type_OwnedDisjoining</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Disjoining</code>	The <b>ownedRelationships</b> of this <b>Type</b> that are <b>Disjoinings</b> , for which the <b>Type</b> is the <b>typeDisjoined Type</b> .
<code>oslc_sysmlv2:type_OwnedEndFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All <b>endFeatures</b> of this <b>Type</b> that are <b>ownedFeatures</b> .

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:type_OwnedFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <code>ownedMemberFeatures</code> of the <code>ownedFeatureMemberships</code> of this <code>Type</code> .
<code>oslc_sysmlv2:type_OwnedFeatureMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:FeatureMembership</code>	The <code>ownedMemberships</code> of this <code>Type</code> that are <code>FeatureMemberships</code> , for which the <code>Type</code> is the <code>owningType</code> . Each such <code>FeatureMembership</code> identifies an <code>ownedFeature</code> of the <code>Type</code> .
<code>oslc_sysmlv2:type_OwnedIntersecting</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Intersecting</code>	The <code>ownedRelationships</code> of this <code>Type</code> that are <code>Intersectings</code> , have the <code>Type</code> as their <code>typeIntersected</code> .
<code>oslc_sysmlv2:type_OwnedSpecialization</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Specialization</code>	The <code>ownedRelationships</code> of this <code>Type</code> that are <code>Specializations</code> , for which the <code>Type</code> is the <code>specificType</code> .
<code>oslc_sysmlv2:type_OwnedUnioning</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Unioning</code>	The <code>ownedRelationships</code> of this <code>Type</code> that are <code>Unionings</code> , having the <code>Type</code> as their <code>typeUnioned</code> .
<code>oslc_sysmlv2:type_UnioningType</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The interpretations of a <code>Type</code> with <code>unioningTypes</code> are asserted to be the same as those of all the <code>unioningTypes</code> together, which are the <code>Types</code> derived from the <code>unioningType</code> of the <code>ownedUnionings</code> of this <code>Type</code> . For example, a <code>Classifier</code> for people might be the union of <code>Classifiers</code> for all the sexes. Similarly, a feature for people's children might be the union of features dividing them in the same ways as people in general.
<code>oslc:instanceShape</code>	Zero-or-one	false	Resource	Reference	<code>oslc:ResourceShape</code>	The URI of a Resource Shape that describes the possible properties, occurrence, value types, allowed values and labels. This shape information is useful in displaying the subject resource as well as guiding clients in performing modifications. Instance shapes may be specific to the authenticated user associated with the request that retrieved the resource, the current state of the resource and other factors and thus should not be cached.
<code>oslc:serviceProvider</code>	Zero-or-many	false	Resource	Reference	<code>oslc:ServiceProvider</code>	A link to the resource's OSLC Service Provider. There may be cases when the subject resource is available from a service provider that implements multiple domain specifications, which could result in multiple values for this property.
<code>oslc:shortTitle</code>	Zero-or-one	false	XMLLiteral	N/A	Unspecified	Short name identifying a resource, often used as an abbreviated identifier for presentation to end-users. <b>SHOULD</b> include only content that is valid inside an XHTML <code>&lt;span&gt;</code> element [sml-50].

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>rdf:type</code>	Zero-or-many	false	Resource	Reference	<code>rdfs:Class</code>	The resource type URIs.

- **Describes:** <http://open-services.net/ns/sysmlv2#ConstraintUsage>
- **Summary:** ConstraintUsageShape
- **Description:** A `ConstraintUsage` is an `OccurrenceUsage` that is also a `BooleanExpression`, and, so, is typed by a `Predicate`. Nominally, if the type is a `ConstraintDefinition`, a `ConstraintUsage` is a `Usage` of that `ConstraintDefinition`. However, other kinds of kernel `Predicates` are also allowed, to permit use of `Predicates` from the Kernel Model Libraries.

### ConstraintUsage Properties

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>dcterms:contributor</code>	Zero-or-many	false	AnyResource	Either	<code>oslc:Any</code>	Contributor or contributors to the resource. It is likely that the target resource will be a foaf:Person but that is not necessarily the case.
<code>dcterms:created</code>	Zero-or-one	false	dateTime	N/A	Unspecified	Timestamp of resource creation.
<code>dcterms:creator</code>	Zero-or-many	false	AnyResource	Either	<code>oslc:Any</code>	Creator or creators of the resource. It is likely that the target resource will be a foaf:Person but that is not necessarily the case.
<code>dcterms:description</code>	Zero-or-one	false	XMLLiteral	N/A	Unspecified	Descriptive text about resource represented as rich text in XHTML content.
<code>dcterms:identifier</code>	Exactly-one	true	string	N/A	Unspecified	A unique identifier for a resource. Typically read-only and assigned by the service provider when a resource is created. Not typically intended for end-user display.
<code>dcterms:modified</code>	Zero-or-one	false	dateTime	N/A	Unspecified	Timestamp of latest resource modification.
<code>dcterms:source</code>	Zero-or-one	false	Resource	Reference	<code>oslc:Any</code>	The resource URI a client can perform a get on to obtain the original non-OSLC AM formatted resource that was used to create this resource. The source resource is usually a binary or proprietary format that the service provider can consume and convert into an OSLC AM format. The service may use content negotiation with the Accept header to obtain the desired content type.

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:element_DeclaredShortName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	An optional alternative name for the <b>Element</b> that is intended to be shorter or in some way more succinct than its primary <b>name</b> . It may act as a modeler-specified identifier for the <b>Element</b> , though it is then the responsibility of the modeler to maintain the uniqueness of this identifier within a model or relative to some other context.
<code>oslc_sysmlv2:element_Documentation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Documentation</code>	The Documentation owned by this Element.
<code>oslc_sysmlv2:element_ElementId</code>	Exactly-one	false	unspecified	Either	<code>xsd:string</code>	The globally unique identifier for this Element. This is intended to be set by tooling, and it must not change during the lifetime of the Element.
<code>oslc_sysmlv2:element_IsImpliedIncluded</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether all necessary implied Relationships have been included in the <b>ownedRelationships</b> of this Element. This property may be true, even if there are not actually any <b>ownedRelationships</b> with <b>isImplied = true</b> , meaning that no such Relationships are actually implied for this Element. However, if it is false, then <b>ownedRelationships</b> may <i>not</i> contain any implied Relationships. That is, either <i>all</i> required implied Relationships must be included, or none of them.
<code>oslc_sysmlv2:element_IsLibraryElement</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether this Element is contained in the ownership tree of a library model.
<code>oslc_sysmlv2:element_Name</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The name to be used for this <b>Element</b> during name resolution within its <b>owningNamespace</b> . This is derived using the <b>effectiveName()</b> operation. By default, it is the same as the <b>declaredName</b> , but this is overridden for certain kinds of <b>Elements</b> to compute a <b>name</b> even when the <b>declaredName</b> is null.
<code>oslc_sysmlv2:element_OwnedAnnotation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Annotation</code>	The <b>ownedRelationships</b> of this <b>Element</b> that are <b>Annotations</b> , for which this <b>Element</b> is the <b>annotatedElement</b> .
<code>oslc_sysmlv2:element_OwnedElement</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The Elements owned by this Element, derived as the <b>ownedRelatedElements</b> of the <b>ownedRelationships</b> of this Element.

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:element_OwnedRelationship</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Relationship</code>	The Relationships for which this Element is the <code>owningRelatedElement</code> .
<code>oslc_sysmlv2:element_Owner</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The owner of this Element, derived as the <code>owningRelatedElement</code> of the <code>owningRelationship</code> of this Element, if any.
<code>oslc_sysmlv2:element_OwningMembership</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:OwningMembership</code>	The <code>owningRelationship</code> of this Element, if that Relationship is a <code>Membership</code> .
<code>oslc_sysmlv2:element_OwningNamespace</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Namespace</code>	The <code>Namespace</code> that owns this Element, which is the <code>membershipOwningNamespace</code> of the <code>owningMembership</code> of this Element, if any.
<code>oslc_sysmlv2:element_OwningRelationship</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Relationship</code>	The Relationship for which this Element is an <code>ownedRelatedElement</code> , if any.
<code>oslc_sysmlv2:element_QualifiedName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The full ownership-qualified name of this Element, represented in a form that is valid according to the KerML textual concrete syntax for qualified names (including use of unrestricted name notation and escaped characters, as necessary). The <code>qualifiedName</code> is null if this Element has no <code>owningNamespace</code> or if there is not a complete ownership chain of named <code>Namespaces</code> from a root <code>Namespace</code> to this Element.
<code>oslc_sysmlv2:element_ShortName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The short name to be used for this Element during name resolution within its <code>owningNamespace</code> . This is derived using the <code>effectiveShortName()</code> operation. By default, it is the same as the <code>declaredShortName</code> , but this is overridden for certain kinds of Elements to compute a <code>shortName</code> even when the <code>declaredName</code> is null.
<code>oslc_sysmlv2:element_TextualRepresentation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:TextualRepresentation</code>	The <code>TextualRepresentations</code> that annotate this Element.
<code>oslc_sysmlv2:expression_Function</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Function</code>	The <code>Function</code> that types this Expression.
<code>oslc_sysmlv2:expression_IsModelLevelEvaluable</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether this Expression meets the constraints necessary to be evaluated at <i>model level</i> , that is, using metadata within the model.

Standards Track Work Product

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:expression_Result</code>	Exactly-one	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	.
<code>oslc_sysmlv2:feature_ChainingFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <b>Feature</b> that are chained together to determine the values of this <b>Feature</b> , derived from the <b>chainingFeatures</b> of the <b>ownedFeatureChainings</b> of this <b>Feature</b> , in the same order. The values of a <b>Feature</b> with <b>chainingFeatures</b> are the same as values of the last <b>Feature</b> in the chain, which can be found by starting with the values of the first <b>Feature</b> (for each instance of the domain of the original <b>Feature</b> ), then using each of those as domain instances to find the values of the second <b>Feature</b> in <b>chainingFeatures</b> , and so on, to values of the last <b>Feature</b> .
<code>oslc_sysmlv2:feature_Direction</code>	Zero-or-one	false	unspecified	Either	<code>oslc_sysmlv2:FeatureDirectionKind</code>	Indicates how values of this <b>Feature</b> are determined or used (as specified for the <b>FeatureDirectionKind</b> ).
<code>oslc_sysmlv2:feature_EndOwningType</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The <b>Type</b> that is related to this <b>Feature</b> by an <b>EndFeatureMembership</b> in which the <b>Feature</b> is an <b>ownedMemberFeature</b> .
<code>oslc_sysmlv2:feature_FeaturingType</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	<b>Types</b> that feature this <b>Feature</b> , such that any instance in the domain of the <b>Feature</b> must be classified by all of these <b>Types</b> , including at least all the <b>featuringTypes</b> of its <b>typeFeaturings</b> . If the <b>Feature</b> is chained, then the <b>featuringTypes</b> of the first <b>Feature</b> in the chain are also <b>featuringTypes</b> of the chained <b>Feature</b> .
<code>oslc_sysmlv2:feature_IsComposite</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether the <b>Feature</b> is a composite <b>feature</b> of its <b>featuringType</b> . If so, the values of the <b>Feature</b> cannot exist after its <b>featuring</b> instance no longer does.
<code>oslc_sysmlv2:feature_IsDerived</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether the values of this <b>Feature</b> can always be computed from the values of other <b>Features</b> .
<code>oslc_sysmlv2:feature_IsEnd</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether or not the this <b>Feature</b> is an end <b>Feature</b> , requiring a different interpretation of the <b>multiplicity</b> of the <b>Feature</b> .
<code>oslc_sysmlv2:feature_IsNonunique</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	isNonunique.
<code>oslc_sysmlv2:feature_IsOrdered</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether an order exists for the values of this <b>Feature</b> or not.

Standards Track Work Product

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:feature_IsPortion</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether the values of this <b>Feature</b> are contained in the space and time of instances of the domain of the <b>Feature</b> and represent the same thing as those instances.
<code>oslc_sysmlv2:feature_IsReadOnly</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether the values of this <b>Feature</b> can change over the lifetime of an instance of the domain.
<code>oslc_sysmlv2:feature_IsUnique</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether or not values for this <b>Feature</b> must have no duplicates or not.
<code>oslc_sysmlv2:feature_OwnedFeatureChaining</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:FeatureChaining</code>	The <b>ownedRelationships</b> of this <b>Feature</b> that are <b>FeatureChainings</b> , for which the <b>Feature</b> will be the <b>featureChained</b> .
<code>oslc_sysmlv2:feature_OwnedFeatureInverting</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:FeatureInverting</code>	The <b>ownedRelationships</b> of this <b>Feature</b> that are <b>FeatureInvertings</b> and for which the <b>Feature</b> is the <b>featureInverted</b> .
<code>oslc_sysmlv2:feature_OwnedRedefinition</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Redefinition</code>	The <b>ownedSubsettings</b> of this <b>Feature</b> that are <b>Redefinitions</b> , for which the <b>Feature</b> is the <b>redefiningFeature</b> .
<code>oslc_sysmlv2:feature_OwnedReferenceSubsetting</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:ReferenceSubsetting</code>	The one <b>ownedSubsetting</b> of this <b>Feature</b> , if any, that is a <b>ReferenceSubsetting</b> , for which the <b>Feature</b> is the <b>referencingFeature</b> .
<code>oslc_sysmlv2:feature_OwnedSubsetting</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Subsetting</code>	The <b>ownedSpecializations</b> of this <b>Feature</b> that are <b>Subsettings</b> , for which the <b>Feature</b> is the <b>subsettingFeature</b> .
<code>oslc_sysmlv2:feature_OwnedTypeFeaturing</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:TypeFeaturing</code>	The <b>ownedRelationships</b> of this <b>Feature</b> that are <b>TypeFeaturings</b> and for which the <b>Feature</b> is the <b>featureOfType</b> .
<code>oslc_sysmlv2:feature_OwnedTyping</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:FeatureTyping</code>	The <b>ownedSpecializations</b> of this <b>Feature</b> that are <b>FeatureTypings</b> , for which the <b>Feature</b> is the <b>typedFeature</b> .
<code>oslc_sysmlv2:feature_OwningFeatureMembership</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:FeatureMembership</code>	The <b>FeatureMembership</b> that owns this <b>Feature</b> as an <b>ownedMemberFeature</b> , determining its <b>owningType</b> .
<code>oslc_sysmlv2:feature_OwningType</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The <b>Type</b> that is the <b>owningType</b> of the <b>owningFeatureMembership</b> of this <b>Feature</b> .

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:feature_Type</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	<b>Types</b> that restrict the values of this <b>Feature</b> , such that the values must be instances of all the <b>types</b> . The types of a <b>Feature</b> are derived from its <b>typings</b> and the <b>types</b> of its <b>subsettings</b> . If the <b>Feature</b> is chained, then the <b>types</b> of the last <b>Feature</b> in the chain are also <b>types</b> of the chained <b>Feature</b> .
<code>oslc_sysmlv2:namespace_ImportedMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Membership</code>	The <b>Memberships</b> in this <b>Namespace</b> that result from the <b>ownedImports</b> of this <b>Namespace</b> .
<code>oslc_sysmlv2:namespace_Member</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The set of all member <b>Elements</b> of this <b>Namespace</b> , which are the <b>memberElements</b> of all <b>memberships</b> of the <b>Namespace</b> .
<code>oslc_sysmlv2:namespace_Membership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Membership</code>	All <b>Memberships</b> in this <b>Namespace</b> , including (at least) the union of <b>ownedMemberships</b> and <b>importedMemberships</b> .
<code>oslc_sysmlv2:namespace_OwnedImport</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Import</code>	The <b>ownedRelationships</b> of this <b>Namespace</b> that are <b>Imports</b> , for which the <b>Namespace</b> is the <b>importOwningNamespace</b> .
<code>oslc_sysmlv2:namespace_OwnedMember</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The owned <b>members</b> of this <b>Namespace</b> , which are the <b>ownedMemberElements</b> of the <b>ownedMemberships</b> of the ..
<code>oslc_sysmlv2:namespace_OwnedMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Membership</code>	The <b>ownedRelationships</b> of this <b>Namespace</b> that are <b>Memberships</b> , for which the <b>Namespace</b> is the <b>membershipOwningNamespace</b> .
<code>oslc_sysmlv2:occurrenceUsage_IndividualDefinition</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:OccurrenceDefinition</code>	The at most one <b>occurrenceDefinition</b> that has <b>isIndividual = true</b> .
<code>oslc_sysmlv2:occurrenceUsage_IsIndividual</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether this <b>OccurrenceUsage</b> represents the usage of the specific individual (or portion of it) represented by its <b>individualDefinition</b> .
<code>oslc_sysmlv2:occurrenceUsage_OccurrenceDefinition</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Class</code>	The <b>Classes</b> that are the types of this <b>OccurrenceUsage</b> . Nominally, these are <b>OccurrenceDefinitions</b> , but other kinds of kernel <b>Classes</b> are also allowed, to permit use of <b>Classes</b> from the Kernel Model Libraries.
<code>oslc_sysmlv2:occurrenceUsage_PortionKind</code>	Zero-or-one	false	unspecified	Either	<code>oslc_sysmlv2:PortionKind</code>	The kind of (temporal) portion of the life of the <b>occurrenceDefinition</b> represented by this <b>OccurrenceUsage</b> , if it is so restricted.

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:step_Behavior</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Behavior</code>	The <b>Behaviors</b> that type this <b>Step</b> .
<code>oslc_sysmlv2:step_Parameter</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <b>parameters</b> of this <b>Step</b> , which are defined as its <b>directedFeatures</b> , whose values are passed into and/or out of a performance of the <b>Step</b> .
<code>oslc_sysmlv2:type_DifferencingType</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The interpretations of a <b>Type</b> with <b>differencingTypes</b> are asserted to be those of the first of those <b>Types</b> , but not including those of the remaining <b>Types</b> . For example, a <b>Classifier</b> might be the difference of a <b>Classifier</b> for people and another for people of a particular nationality, leaving people who are not of that nationality. Similarly, a feature of people might be the difference between a feature for their children and a <b>Classifier</b> for people of a particular sex, identifying their children not of that sex (because the interpretations of the children <b>Feature</b> that identify those of that sex are also interpretations of the <b>Classifier</b> for that sex).
<code>oslc_sysmlv2:type_DirectedFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <b>features</b> of this <b>Type</b> that have a non-null <b>direction</b> .
<code>oslc_sysmlv2:type_EndFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All <b>features</b> of this <b>Type</b> with <code>isEnd = true</code> .
<code>oslc_sysmlv2:type_Feature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <b>ownedMemberFeatures</b> of the <b>featureMemberships</b> of this <b>Type</b> .
<code>oslc_sysmlv2:type_FeatureMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:FeatureMembership</code>	The <b>FeatureMemberships</b> for <b>features</b> of this <b>Type</b> , which include all <b>ownedFeatureMemberships</b> and those <b>inheritedMemberships</b> that are <b>FeatureMemberships</b> (but does <i>not</i> include any <b>importedMemberships</b> ).
<code>oslc_sysmlv2:type_InheritedFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All the <b>memberFeatures</b> of the <b>inheritedMemberships</b> of this <b>Type</b> that are <b>FeatureMemberships</b> .
<code>oslc_sysmlv2:type_InheritedMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Membership</code>	All <b>Memberships</b> inherited by this <b>Type</b> via <b>Specialization</b> or <b>Conjugation</b> . These are included in the derived union for the <b>memberships</b> of the <b>Type</b> .

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:type_Input</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All <b>features</b> related to this <b>Type</b> by <b>FeatureMemberships</b> that have <b>direction in or inout..</b>
<code>oslc_sysmlv2:type_IntersectingType</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The interpretations of a <b>Type</b> with <b>intersectingTypes</b> are asserted to be those in common among the <b>intersectingTypes</b> , which are the <b>Types</b> derived from the <b>intersectingType</b> of the <b>ownedIntersectings</b> of this <b>Type</b> . For example, a <b>Classifier</b> might be an intersection of <b>Classifiers</b> for people of a particular sex and of a particular nationality. Similarly, a feature for people's children of a particular sex might be the intersection of a <b>Feature</b> for their children and a <b>Classifier</b> for people of that sex (because the interpretations of the children <b>Feature</b> that identify those of that sex are also interpretations of the <b>Classifier</b> for that sex).
<code>oslc_sysmlv2:type_IsAbstract</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Indicates whether instances of this <b>Type</b> must also be instances of at least one of its specialized <b>Types</b> .
<code>oslc_sysmlv2:type_IsConjugated</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Indicates whether this <b>Type</b> has an <b>ownedConjugator</b> .
<code>oslc_sysmlv2:type_IsSufficient</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether all things that meet the classification conditions of this <b>Type</b> must be classified by the <b>Type</b> .
<code>oslc_sysmlv2:type_Multiplicity</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Multiplicity</code>	An <b>ownedMember</b> of this <b>Type</b> that is a <b>Multiplicity</b> , which constrains the cardinality of the <b>Type</b> . If there is no such <b>ownedMember</b> , then the cardinality of this <b>Type</b> is constrained by all the <b>Multiplicity</b> constraints applicable to any direct supertypes.
<code>oslc_sysmlv2:type_Output</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All <b>features</b> related to this <b>Type</b> by <b>FeatureMemberships</b> that have <b>direction out or inout..</b>
<code>oslc_sysmlv2:type_OwnedConjugator</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Conjugation</code>	A <b>Conjugation</b> owned by this <b>Type</b> for which the <b>Type</b> is the <b>originalType</b> .
<code>oslc_sysmlv2:type_OwnedDifferencing</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Differencing</code>	The <b>ownedRelationships</b> of this <b>Type</b> that are <b>Differencings</b> , having this <b>Type</b> as their <b>typeDifferenced</b> .

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:type_OwnedDisjoining</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Disjoining</code>	The <code>ownedRelationships</code> of this <code>Type</code> that are <code>Disjoinings</code> , for which the <code>Type</code> is the <code>typeDisjoined Type</code> .
<code>oslc_sysmlv2:type_OwnedEndFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All <code>endFeatures</code> of this <code>Type</code> that are <code>ownedFeatures</code> .
<code>oslc_sysmlv2:type_OwnedFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <code>ownedMemberFeatures</code> of the <code>ownedFeatureMemberships</code> of this <code>Type</code> .
<code>oslc_sysmlv2:type_OwnedFeatureMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:FeatureMembership</code>	The <code>ownedMemberships</code> of this <code>Type</code> that are <code>FeatureMemberships</code> , for which the <code>Type</code> is the <code>owningType</code> . Each such <code>FeatureMembership</code> identifies an <code>ownedFeature</code> of the <code>Type</code> .
<code>oslc_sysmlv2:type_OwnedIntersecting</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Intersecting</code>	The <code>ownedRelationships</code> of this <code>Type</code> that are <code>Intersectings</code> , have the <code>Type</code> as their <code>typeIntersected</code> .
<code>oslc_sysmlv2:type_OwnedSpecialization</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Specialization</code>	The <code>ownedRelationships</code> of this <code>Type</code> that are <code>Specializations</code> , for which the <code>Type</code> is the <code>specific Type</code> .
<code>oslc_sysmlv2:type_OwnedUnioning</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Unioning</code>	The <code>ownedRelationships</code> of this <code>Type</code> that are <code>Unionings</code> , having the <code>Type</code> as their <code>typeUnioned</code> .
<code>oslc_sysmlv2:type_UnioningType</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The interpretations of a <code>Type</code> with <code>unioningTypes</code> are asserted to be the same as those of all the <code>unioningTypes</code> together, which are the <code>Types</code> derived from the <code>unioningType</code> of the <code>ownedUnionings</code> of this <code>Type</code> . For example, a <code>Classifier</code> for people might be the union of <code>Classifiers</code> for all the sexes. Similarly, a feature for people's children might be the union of features dividing them in the same ways as people in general.
<code>oslc_sysmlv2:usage_Definition</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Classifier</code>	The <code>Classifiers</code> that are the types of this <code>Usage</code> . Nominally, these are <code>Definitions</code> , but other kinds of Kernel <code>Classifiers</code> are also allowed, to permit use of <code>Classifiers</code> from the Kernel Model Libraries.
<code>oslc_sysmlv2:usage_DirectedUsage</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Usage</code>	The <code>usages</code> of this <code>Usage</code> that are <code>directedFeatures</code> .

- **Describes:** <http://open-services.net/ns/sysmlv2#FeatureInverting>
- **Summary:** FeatureInvertingShape
- **Description:** A **FeatureInverting** is a **Relationship** between **Features** asserting that their interpretations (sequences) are the reverse of each other, identified as **featureInverted** and **invertingFeature**. For example, a **Feature** identifying each person's parents is the inverse of a **Feature** identifying each person's children. A person identified as a parent of another will identify that other as one of their children.

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:element_TextualRepresentation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:TextualRepresentation</code>	The <code>TextualRepresentations</code> that annotate this <code>Element</code> .
<code>oslc_sysmlv2:featureInverting_FeatureInverted</code>	Exactly-one	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <code>Feature</code> that is an inverse of the <code>invertingFeature</code> .
<code>oslc_sysmlv2:featureInverting_InvertingFeature</code>	Exactly-one	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <code>Feature</code> that is an inverse of the <code>invertedFeature</code> .
<code>oslc_sysmlv2:featureInverting_OwningFeature</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	A <code>featureInverted</code> that is also the <code>owningRelatedElement</code> of this <code>FeatureInverting</code> .
<code>oslc_sysmlv2:relationship_IsImplied</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether this Relationship was generated by tooling to meet semantic rules, rather than being directly created by a modeler.
<code>oslc_sysmlv2:relationship_OwnedRelatedElement</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The <code>relatedElements</code> of this Relationship that are owned by the Relationship.
<code>oslc_sysmlv2:relationship_OwningRelatedElement</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The <code>relatedElement</code> of this Relationship that owns the Relationship, if any.
<code>oslc_sysmlv2:relationship_RelatedElement</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The Elements that are related by this Relationship, derived as the union of the <code>source</code> and <code>target</code> Elements of the Relationship.
<code>oslc_sysmlv2:relationship_Source</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The <code>relatedElements</code> from which this Relationship is considered to be directed..
<code>oslc_sysmlv2:relationship_Target</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The <code>relatedElements</code> to which this Relationship is considered to be directed.
<code>oslc:instanceShape</code>	Zero-or-one	false	Resource	Reference	<code>oslc:ResourceShape</code>	The URI of a Resource Shape that describes the possible properties, occurrence, value types, allowed values and labels. This shape information is useful in displaying the subject resource as well as guiding clients in performing modifications. Instance shapes may be specific to the authenticated user associated with the request that retrieved the resource, the current state of the resource and other factors and thus should not be cached.

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc:serviceProvider</code>	Zero-or-many	false	Resource	Reference	<code>oslc:ServiceProvider</code>	A link to the resource's OSLC Service Provider. There may be cases when the subject resource is available from a service provider that implements multiple domain specifications, which could result in multiple values for this property.
<code>oslc:shortTitle</code>	Zero-or-one	false	XMLLiteral	N/A	Unspecified	Short name identifying a resource, often used as an abbreviated identifier for presentation to end-users. <b>SHOULD</b> include only content that is valid inside an XHTML <code>&lt;span&gt;</code> element [sml-53].
<code>rdf:type</code>	Zero-or-many	false	Resource	Reference	<code>rdfs:Class</code>	The resource type URIs.

- **Describes:** <http://open-services.net/ns/sysmlv2#ElementFilterMembership>
- **Summary:** ElementFilterMembershipShape
- **Description:** ElementFilterMembership is a Membership between a Namespace and a model-level evaluable Boolean-valued Expression, asserting that imported members of the Namespace should be filtered using the condition Expression. A general Namespace does not define any specific filtering behavior, but such behavior may be defined for various specialized kinds of Namespaces.

#### ElementFilterMembership Properties

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>dcterms:contributor</code>	Zero-or-many	false	AnyResource	Either	<code>oslc:Any</code>	Contributor or contributors to the resource. It is likely that the target resource will be a foaf:Person but that is not necessarily the case.
<code>dcterms:created</code>	Zero-or-one	false	dateTime	N/A	Unspecified	Timestamp of resource creation.
<code>dcterms:creator</code>	Zero-or-many	false	AnyResource	Either	<code>oslc:Any</code>	Creator or creators of the resource. It is likely that the target resource will be a foaf:Person but that is not necessarily the case.
<code>dcterms:description</code>	Zero-or-one	false	XMLLiteral	N/A	Unspecified	Descriptive text about resource represented as rich text in XHTML content.
<code>dcterms:identifier</code>	Exactly-one	true	string	N/A	Unspecified	A unique identifier for a resource. Typically read-only and assigned by the service provider when a resource is created. Not typically intended for end-user display.
<code>dcterms:modified</code>	Zero-or-one	false	dateTime	N/A	Unspecified	Timestamp of latest resource modification.

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>dcterms:source</code>	Zero-or-one	false	Resource	Reference	<code>oslc:Any</code>	The resource URI a client can perform a get on to obtain the original non-OSLC AM formatted resource that was used to create this resource. The source resource is usually a binary or proprietary format that the service provider can consume and convert into an OSLC AM format. The service may use content negotiation with the Accept header to obtain the desired content type.
<code>dcterms:title</code>	Exactly-one	false	XMLLiteral	N/A	Unspecified	Title of the resource represented as rich text in XHTML content.
<code>dcterms:type</code>	Zero-or-many	false	string	N/A	Unspecified	A short string representation for the type, for example 'Car'.
<code>jazz_am:derives</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The resource that derives from another resource originated from or is significantly influenced by the referenced resource. For example a model element derives from a requirement.
<code>jazz_am:elaborates</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	This resource elaborates the referenced resource.
<code>jazz_am:external</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	A generic link from a resource to an external web page.
<code>jazz_am:refine</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The target is a refinement of the source. (e.g. a use case scenario might be a refinement of a textual requirement that describes the interaction).
<code>jazz_am:satisfy</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The model element satisfies the requirement (e.g. The use case satisfies a functional requirement).
<code>jazz_am:trace</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The model element has a trace to the requirement (e.g. An attribute or its value are traced to a requirement).
<code>oslc_sysmlv2:element_AliasIds</code>	Zero-or-many	false	unspecified	Either	<code>xsd:string</code>	Various alternative identifiers for this Element. Generally, these will be set by tools.
<code>oslc_sysmlv2:element_DeclaredName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The declared name of this <b>Element</b> .

## Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:element_DeclaredShortName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	An optional alternative name for the <b>Element</b> that is intended to be shorter or in some way more succinct than its primary <b>name</b> . It may act as a modeler-specified identifier for the <b>Element</b> , though it is then the responsibility of the modeler to maintain the uniqueness of this identifier within a model or relative to some other context.
<code>oslc_sysmlv2:element_Documentation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Documentation</code>	The Documentation owned by this Element.
<code>oslc_sysmlv2:element_ElementId</code>	Exactly-one	false	unspecified	Either	<code>xsd:string</code>	The globally unique identifier for this Element. This is intended to be set by tooling, and it must not change during the lifetime of the Element.
<code>oslc_sysmlv2:element_IsImpliedIncluded</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether all necessary implied Relationships have been included in the <b>ownedRelationships</b> of this Element. This property may be true, even if there are not actually any <b>ownedRelationships</b> with <b>isImplied = true</b> , meaning that no such Relationships are actually implied for this Element. However, if it is false, then <b>ownedRelationships</b> may <i>not</i> contain any implied Relationships. That is, either <i>all</i> required implied Relationships must be included, or none of them.
<code>oslc_sysmlv2:element_IsLibraryElement</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether this Element is contained in the ownership tree of a library model.
<code>oslc_sysmlv2:element_Name</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The name to be used for this <b>Element</b> during name resolution within its <b>owningNamespace</b> . This is derived using the <b>effectiveName()</b> operation. By default, it is the same as the <b>declaredName</b> , but this is overridden for certain kinds of <b>Elements</b> to compute a <b>name</b> even when the <b>declaredName</b> is null.
<code>oslc_sysmlv2:element_OwnedAnnotation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Annotation</code>	The <b>ownedRelationships</b> of this <b>Element</b> that are <b>Annotations</b> , for which this <b>Element</b> is the <b>annotatedElement</b> .
<code>oslc_sysmlv2:element_OwnedElement</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The Elements owned by this Element, derived as the <b>ownedRelatedElements</b> of the <b>ownedRelationships</b> of this Element.

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:element_OwnedRelationship</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Relationship</code>	The Relationships for which this Element is the <code>owningRelatedElement</code> .
<code>oslc_sysmlv2:element_Owner</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The owner of this Element, derived as the <code>owningRelatedElement</code> of the <code>owningRelationship</code> of this Element, if any.
<code>oslc_sysmlv2:element_OwningMembership</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:OwningMembership</code>	The <code>owningRelationship</code> of this Element, if that Relationship is a <code>Membership</code> .
<code>oslc_sysmlv2:element_OwningNamespace</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Namespace</code>	The <code>Namespace</code> that owns this Element, which is the <code>membershipOwningNamespace</code> of the <code>owningMembership</code> of this Element, if any.
<code>oslc_sysmlv2:element_OwningRelationship</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Relationship</code>	The Relationship for which this Element is an <code>ownedRelatedElement</code> , if any.
<code>oslc_sysmlv2:element_QualifiedName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The full ownership-qualified name of this Element, represented in a form that is valid according to the KerML textual concrete syntax for qualified names (including use of unrestricted name notation and escaped characters, as necessary). The <code>qualifiedName</code> is null if this Element has no <code>owningNamespace</code> or if there is not a complete ownership chain of named <code>Namespaces</code> from a root <code>Namespace</code> to this Element.
<code>oslc_sysmlv2:element_ShortName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The short name to be used for this Element during name resolution within its <code>owningNamespace</code> . This is derived using the <code>effectiveShortName()</code> operation. By default, it is the same as the <code>declaredShortName</code> , but this is overridden for certain kinds of Elements to compute a <code>shortName</code> even when the <code>declaredName</code> is null.
<code>oslc_sysmlv2:element_TextualRepresentation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:TextualRepresentation</code>	The <code>TextualRepresentations</code> that annotate this Element.
<code>oslc_sysmlv2:elementFilterMembership_Condition</code>	Exactly-one	false	Resource	Either	<code>oslc_sysmlv2:Expression</code>	The model-level evaluable <code>Boolean</code> -valued <code>Expression</code> used to filter the imported <code>members</code> of the <code>membershipOwningNamespace</code> of this <code>ElementFilterMembership</code> .
<code>oslc_sysmlv2:membership_MemberElement</code>	Exactly-one	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The Element that becomes a <code>member</code> of the <code>membershipOwningNamespace</code> due to this <code>Membership</code> .

Standards Track Work Product

<code>oslc_sysmlv2:usage_Variant</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Usage</code>	The <b>Usages</b> which represent the variants of this <b>Usage</b> as a variation point <b>Usage</b> , if <code>isVariation = true</code> . If <code>isVariation = false</code> , then there must be no <b>variants</b> .
<code>oslc_sysmlv2:usage_VariantMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:VariantMembership</code>	The <b>ownedMemberships</b> of this <b>Usage</b> that are <b>VariantMemberships</b> . If <code>isVariation = true</code> , then this must be all <b>memberships</b> of the <b>Usage</b> . If <code>isVariation = false</code> , then <b>variantMembership</b> must be empty.
<code>oslc_sysmlv2:useCaseUsage_IncludedUseCase</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:UseCaseUsage</code>	The <b>UseCaseUsages</b> that are included by this <b>UseCaseUse</b> , which are the <b>useCaseIncluded</b> s of the <b>IncludeUseCaseUsages</b> owned by this <b>UseCaseUsage</b> ..
<code>oslc_sysmlv2:useCaseUsage_UseCaseDefinition</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:UseCaseDefinition</code>	The <b>UseCaseDefinition</b> that is the <b>definition</b> of this <b>UseCaseUsage</b> .
<code>oslc:instanceShape</code>	Zero-or-one	false	Resource	Reference	<code>oslc:ResourceShape</code>	The URI of a Resource Shape that describes the possible properties, occurrence, value types, allowed values and labels. This shape information is useful in displaying the subject resource as well as guiding clients in performing modifications. Instance shapes may be specific to the authenticated user associated with the request that retrieved the resource, the current state of the resource and other factors and thus should not be cached.
<code>oslc:serviceProvider</code>	Zero-or-many	false	Resource	Reference	<code>oslc:ServiceProvider</code>	A link to the resource's OSLC Service Provider. There may be cases when the subject resource is available from a service provider that implements multiple domain specifications, which could result in multiple values for this property.
<code>oslc:shortTitle</code>	Zero-or-one	false	XMLLiteral	N/A	Unspecified	Short name identifying a resource, often used as an abbreviated identifier for presentation to end-users. <b>SHOULD</b> include only content that is valid inside an XHTML <code>&lt;span&gt;</code> element [sml-55].

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>rdf:type</code>	Zero-or-many	false	Resource	Reference	<code>rdfs:Class</code>	The resource type URIs.

- **Describes:** <http://open-services.net/ns/sysmlv2#ItemUsage>
- **Summary:** ItemUsageShape
- **Description:** An `ItemUsage` is a `ItemUsage` whose `definition` is a `Structure`. Nominally, if the `definition` is an `ItemDefinition`, an `ItemUsage` is a `ItemUsage` of that `ItemDefinition` within a system. However, other kinds of Kernel `Structures` are also allowed, to permit use of `Structures` from the Kernel Model Libraries.

### ItemUsage Properties

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>dcterms:contributor</code>	Zero-or-many	false	AnyResource	Either	<code>oslc:Any</code>	Contributor or contributors to the resource. It is likely that the target resource will be a foaf:Person but that is not necessarily the case.
<code>dcterms:created</code>	Zero-or-one	false	dateTime	N/A	Unspecified	Timestamp of resource creation.
<code>dcterms:creator</code>	Zero-or-many	false	AnyResource	Either	<code>oslc:Any</code>	Creator or creators of the resource. It is likely that the target resource will be a foaf:Person but that is not necessarily the case.
<code>dcterms:description</code>	Zero-or-one	false	XMLLiteral	N/A	Unspecified	Descriptive text about resource represented as rich text in XHTML content.
<code>dcterms:identifier</code>	Exactly-one	true	string	N/A	Unspecified	A unique identifier for a resource. Typically read-only and assigned by the service provider when a resource is created. Not typically intended for end-user display.
<code>dcterms:modified</code>	Zero-or-one	false	dateTime	N/A	Unspecified	Timestamp of latest resource modification.
<code>dcterms:source</code>	Zero-or-one	false	Resource	Reference	<code>oslc:Any</code>	The resource URI a client can perform a get on to obtain the original non-OSLC AM formatted resource that was used to create this resource. The source resource is usually a binary or proprietary format that the service provider can consume and convert into an OSLC AM format. The service may use content negotiation with the Accept header to obtain the desired content type.

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>dcterms:title</code>	Exactly-one	false	XMLLiteral	N/A	Unspecified	Title of the resource represented as rich text in XHTML content.
<code>dcterms:type</code>	Zero-or-many	false	string	N/A	Unspecified	A short string representation for the type, for example 'Car'.
<code>jazz_am:derives</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The resource that derives from another resource originated from or is significantly influenced by the referenced resource. For example a model element derives from a requirement.
<code>jazz_am:elaborates</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	This resource elaborates the referenced resource.
<code>jazz_am:external</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	A generic link from a resource to an external web page.
<code>jazz_am:refine</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The target is a refinement of the source. (e.g. a use case scenario might be a refinement of a textual requirement that describes the interaction).
<code>jazz_am:satisfy</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The model element satisfies the requirement (e.g. The use case satisfies a functional requirement).
<code>jazz_am:trace</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The model element has a trace to the requirement (e.g. An attribute or its value are traced to a requirement).
<code>oslc_sysmlv2:element_AliasIds</code>	Zero-or-many	false	unspecified	Either	<code>xsd:string</code>	Various alternative identifiers for this Element. Generally, these will be set by tools.
<code>oslc_sysmlv2:element_DeclaredName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The declared name of this <b>Element</b> .
<code>oslc_sysmlv2:element_DeclaredShortName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	An optional alternative name for the <b>Element</b> that is intended to be shorter or in some way more succinct than its primary <b>name</b> . It may act as a modeler-specified identifier for the <b>Element</b> , though it is then the responsibility of the modeler to maintain the uniqueness of this identifier within a model or relative to some other context.

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:element_Documentation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Documentation</code>	The Documentation owned by this Element.
<code>oslc_sysmlv2:element_ElementId</code>	Exactly-one	false	unspecified	Either	<code>xsd:string</code>	The globally unique identifier for this Element. This is intended to be set by tooling, and it must not change during the lifetime of the Element.
<code>oslc_sysmlv2:element_IsImpliedIncluded</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether all necessary implied Relationships have been included in the <code>ownedRelationships</code> of this Element. This property may be true, even if there are not actually any <code>ownedRelationships</code> with <code>isImplied = true</code> , meaning that no such Relationships are actually implied for this Element. However, if it is false, then <code>ownedRelationships</code> may <i>not</i> contain any implied Relationships. That is, either <i>all</i> required implied Relationships must be included, or none of them.
<code>oslc_sysmlv2:element_IsLibraryElement</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether this Element is contained in the ownership tree of a library model.
<code>oslc_sysmlv2:element_Name</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The name to be used for this <code>Element</code> during name resolution within its <code>owningNamespace</code> . This is derived using the <code>effectiveName()</code> operation. By default, it is the same as the <code>declaredName</code> , but this is overridden for certain kinds of <code>Elements</code> to compute a <code>name</code> even when the <code>declaredName</code> is null.
<code>oslc_sysmlv2:element_OwnedAnnotation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Annotation</code>	The <code>ownedRelationships</code> of this <code>Element</code> that are <code>Annotations</code> , for which this <code>Element</code> is the <code>annotatedElement</code> .
<code>oslc_sysmlv2:element_OwnedElement</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The Elements owned by this Element, derived as the <code>ownedRelatedElements</code> of the <code>ownedRelationships</code> of this Element.
<code>oslc_sysmlv2:element_OwnedRelationship</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Relationship</code>	The Relationships for which this Element is the <code>owningRelatedElement</code> .
<code>oslc_sysmlv2:element_Owner</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The owner of this Element, derived as the <code>owningRelatedElement</code> of the <code>owningRelationship</code> of this Element, if any.
<code>oslc_sysmlv2:element_OwningMembership</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:OwningMembership</code>	The <code>owningRelationship</code> of this <code>Element</code> , if that <code>Relationship</code> is a <code>Membership</code> .

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:element_OwningNamespace</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Namespace</code>	The <b>Namespace</b> that owns this <b>Element</b> , which is the <b>membershipOwningNamespace</b> of the <b>owningMembership</b> of this <b>Element</b> , if any.
<code>oslc_sysmlv2:element_OwningRelationship</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Relationship</code>	The <b>Relationship</b> for which this <b>Element</b> is an <b>ownedRelatedElement</b> , if any.
<code>oslc_sysmlv2:element_QualifiedName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The full ownership-qualified name of this <b>Element</b> , represented in a form that is valid according to the KerML textual concrete syntax for qualified names (including use of unrestricted name notation and escaped characters, as necessary). The <b>qualifiedName</b> is null if this <b>Element</b> has no <b>owningNamespace</b> or if there is not a complete ownership chain of named <b>Namespaces</b> from a root <b>Namespace</b> to this <b>Element</b> .
<code>oslc_sysmlv2:element_ShortName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The short name to be used for this <b>Element</b> during name resolution within its <b>owningNamespace</b> . This is derived using the <b>effectiveShortName()</b> operation. By default, it is the same as the <b>declaredShortName</b> , but this is overridden for certain kinds of <b>Elements</b> to compute a <b>shortName</b> even when the <b>declaredName</b> is null.
<code>oslc_sysmlv2:element_TextualRepresentation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:TextualRepresentation</code>	The <b>TextualRepresentations</b> that annotate this <b>Element</b> .
<code>oslc_sysmlv2:feature_ChainingFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <b>Feature</b> that are chained together to determine the values of this <b>Feature</b> , derived from the <b>chainingFeatures</b> of the <b>ownedFeatureChainings</b> of this <b>Feature</b> , in the same order. The values of a <b>Feature</b> with <b>chainingFeatures</b> are the same as values of the last <b>Feature</b> in the chain, which can be found by starting with the values of the first <b>Feature</b> (for each instance of the domain of the original <b>Feature</b> ), then using each of those as domain instances to find the values of the second <b>Feature</b> in <b>chainingFeatures</b> , and so on, to values of the last <b>Feature</b> .
<code>oslc_sysmlv2:feature_Direction</code>	Zero-or-one	false	unspecified	Either	<code>oslc_sysmlv2:FeatureDirectionKind</code>	Indicates how values of this <b>Feature</b> are determined or used (as specified for the <b>FeatureDirectionKind</b> ).
<code>oslc_sysmlv2:feature_EndOwningType</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The <b>Type</b> that is related to this <b>Feature</b> by an <b>EndFeatureMembership</b> in which the <b>Feature</b> is an <b>ownedMemberFeature</b> .

Standards Track Work Product

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:feature_FeaturingType</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	<b>Types</b> that feature this <b>Feature</b> , such that any instance in the domain of the <b>Feature</b> must be classified by all of these <b>Types</b> , including at least all the <b>featuringTypes</b> of its <b>typeFeaturings</b> . If the <b>Feature</b> is chained, then the <b>featuringTypes</b> of the first <b>Feature</b> in the chain are also <b>featuringTypes</b> of the chained <b>Feature</b> .
<code>oslc_sysmlv2:feature_IsComposite</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether the <b>Feature</b> is a composite <b>feature</b> of its <b>featuringType</b> . If so, the values of the <b>Feature</b> cannot exist after its featuring instance no longer does.
<code>oslc_sysmlv2:feature_IsDerived</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether the values of this <b>Feature</b> can always be computed from the values of other <b>Features</b> .
<code>oslc_sysmlv2:feature_IsEnd</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether or not the this <b>Feature</b> is an end <b>Feature</b> , requiring a different interpretation of the <b>multiplicity</b> of the <b>Feature</b> .
<code>oslc_sysmlv2:feature_IsNonunique</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	isNonunique.
<code>oslc_sysmlv2:feature_IsOrdered</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether an order exists for the values of this <b>Feature</b> or not.
<code>oslc_sysmlv2:feature_IsPortion</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether the values of this <b>Feature</b> are contained in the space and time of instances of the domain of the <b>Feature</b> and represent the same thing as those instances.
<code>oslc_sysmlv2:feature_IsReadOnly</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether the values of this <b>Feature</b> can change over the lifetime of an instance of the domain.
<code>oslc_sysmlv2:feature_IsUnique</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether or not values for this <b>Feature</b> must have no duplicates or not.
<code>oslc_sysmlv2:feature_OwnedFeatureChaining</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:FeatureChaining</code>	The <b>ownedRelationships</b> of this <b>Feature</b> that are <b>FeatureChainings</b> , for which the <b>Feature</b> will be the <b>featureChained</b> .
<code>oslc_sysmlv2:feature_OwnedFeatureInverting</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:FeatureInverting</code>	The <b>ownedRelationships</b> of this <b>Feature</b> that are <b>FeatureInvertings</b> and for which the <b>Feature</b> is the <b>featureInverted</b> .
<code>oslc_sysmlv2:feature_OwnedRedefinition</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Redefinition</code>	The <b>ownedSubsettings</b> of this <b>Feature</b> that are <b>Redefinitions</b> , for which the <b>Feature</b> is the <b>redefiningFeature</b> .

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:feature_OwnedReferenceSubsetting</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:ReferenceSubsetting</code>	The one <b>ownedSubsetting</b> of this <b>Feature</b> , if any, that is a <b>ReferenceSubsetting</b> , for which the <b>Feature</b> is the <b>referencingFeature</b> .
<code>oslc_sysmlv2:feature_OwnedSubsetting</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Subsetting</code>	The <b>ownedSpecializations</b> of this <b>Feature</b> that are <b>Subsettings</b> , for which the <b>Feature</b> is the <b>subsettingFeature</b> .
<code>oslc_sysmlv2:feature_OwnedTypeFeaturing</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:TypeFeaturing</code>	The <b>ownedRelationships</b> of this <b>Feature</b> that are <b>TypeFeaturings</b> and for which the <b>Feature</b> is the <b>featureOfType</b> .
<code>oslc_sysmlv2:feature_OwnedTyping</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:FeatureTyping</code>	The <b>ownedSpecializations</b> of this <b>Feature</b> that are <b>FeatureTypings</b> , for which the <b>Feature</b> is the <b>typedFeature</b> .
<code>oslc_sysmlv2:feature_OwningFeatureMembership</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:FeatureMembership</code>	The <b>FeatureMembership</b> that owns this <b>Feature</b> as an <b>ownedMemberFeature</b> , determining its <b>owningType</b> .
<code>oslc_sysmlv2:feature_OwningType</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The <b>Type</b> that is the <b>owningType</b> of the <b>owningFeatureMembership</b> of this <b>Feature</b> .
<code>oslc_sysmlv2:feature_Type</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	<b>Types</b> that restrict the values of this <b>Feature</b> , such that the values must be instances of all the <b>types</b> . The types of a <b>Feature</b> are derived from its <b>typings</b> and the <b>types</b> of its <b>subsettings</b> . If the <b>Feature</b> is chained, then the <b>types</b> of the last <b>Feature</b> in the chain are also <b>types</b> of the chained <b>Feature</b> .
<code>oslc_sysmlv2:itemUsage_ItemDefinition</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Structure</code>	The Structures that are the <b>definitions</b> of this <b>ItemUsage</b> . Nominally, these are <b>ItemDefinitions</b> , but other kinds of Kernel Structures are also allowed, to permit use of Structures from the Kernel Library.
<code>oslc_sysmlv2:namespace_ImportedMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Membership</code>	The <b>Memberships</b> in this <b>Namespace</b> that result from the <b>ownedImports</b> of this <b>Namespace</b> .
<code>oslc_sysmlv2:namespace_Member</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The set of all member <b>Elements</b> of this <b>Namespace</b> , which are the <b>memberElements</b> of all <b>memberships</b> of the <b>Namespace</b> .
<code>oslc_sysmlv2:namespace_Membership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Membership</code>	All <b>Memberships</b> in this <b>Namespace</b> , including (at least) the union of <b>ownedMemberships</b> and <b>importedMemberships</b> .

Standards Track Work Product

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:namespace_OwnedImport</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Import</code>	The <code>ownedRelationships</code> of this <code>Namespace</code> that are <code>Imports</code> , for which the <code>Namespace</code> is the <code>importOwningNamespace</code> .
<code>oslc_sysmlv2:namespace_OwnedMember</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The owned <code>members</code> of this <code>Namespace</code> , which are the <code>ownedMemberElements</code> of the <code>ownedMemberships</code> of the ..
<code>oslc_sysmlv2:namespace_OwnedMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Membership</code>	The <code>ownedRelationships</code> of this <code>Namespace</code> that are <code>Memberships</code> , for which the <code>Namespace</code> is the <code>membershipOwningNamespace</code> .
<code>oslc_sysmlv2:occurrenceUsage_IndividualDefinition</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:OccurrenceDefinition</code>	The at most one <code>occurrenceDefinition</code> that has <code>isIndividual = true</code> .
<code>oslc_sysmlv2:occurrenceUsage_IsIndividual</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether this <code>OccurrenceUsage</code> represents the usage of the specific individual (or portion of it) represented by its <code>individualDefinition</code> .
<code>oslc_sysmlv2:occurrenceUsage_OccurrenceDefinition</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Class</code>	The <code>Classes</code> that are the types of this <code>OccurrenceUsage</code> . Nominally, these are <code>OccurrenceDefinitions</code> , but other kinds of kernel <code>Classes</code> are also allowed, to permit use of <code>Classes</code> from the Kernel Model Libraries.
<code>oslc_sysmlv2:occurrenceUsage_PortionKind</code>	Zero-or-one	false	unspecified	Either	<code>oslc_sysmlv2:PortionKind</code>	The kind of (temporal) portion of the life of the <code>occurrenceDefinition</code> represented by this <code>OccurrenceUsage</code> , if it is so restricted.
<code>oslc_sysmlv2:type_DifferencingType</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The interpretations of a <code>Type</code> with <code>differencingTypes</code> are asserted to be those of the first of those <code>Types</code> , but not including those of the remaining <code>Types</code> . For example, a <code>Classifier</code> might be the difference of a <code>Classifier</code> for people and another for people of a particular nationality, leaving people who are not of that nationality. Similarly, a feature of people might be the difference between a feature for their children and a <code>Classifier</code> for people of a particular sex, identifying their children not of that sex (because the interpretations of the children <code>Feature</code> that identify those of that sex are also interpretations of the <code>Classifier</code> for that sex).
<code>oslc_sysmlv2:type_DirectedFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <code>features</code> of this <code>Type</code> that have a non-null <code>direction</code> .

## Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:type_EndFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All <b>features</b> of this <b>Type</b> with <code>isEnd = true</code> .
<code>oslc_sysmlv2:type_Feature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <b>ownedMemberFeatures</b> of the <b>featureMemberships</b> of this <b>Type</b> .
<code>oslc_sysmlv2:type_FeatureMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:FeatureMembership</code>	The <b>FeatureMemberships</b> for <b>features</b> of this <b>Type</b> , which include all <b>ownedFeatureMemberships</b> and those <b>inheritedMemberships</b> that are <b>FeatureMemberships</b> (but does <i>not</i> include any <b>importedMemberships</b> ).
<code>oslc_sysmlv2:type_InheritedFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All the <b>memberFeatures</b> of the <b>inheritedMemberships</b> of this <b>Type</b> that are <b>FeatureMemberships</b> .
<code>oslc_sysmlv2:type_InheritedMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Membership</code>	All <b>Memberships</b> inherited by this <b>Type</b> via <b>Specialization</b> or <b>Conjugation</b> . These are included in the derived union for the <b>memberships</b> of the <b>Type</b> .
<code>oslc_sysmlv2:type_Input</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All <b>features</b> related to this <b>Type</b> by <b>FeatureMemberships</b> that have <code>direction in or inout..</code>
<code>oslc_sysmlv2:type_IntersectingType</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The interpretations of a <b>Type</b> with <b>intersectingTypes</b> are asserted to be those in common among the <b>intersectingTypes</b> , which are the <b>Types</b> derived from the <b>intersectingType</b> of the <b>ownedIntersectings</b> of this <b>Type</b> . For example, a <b>Classifier</b> might be an intersection of <b>Classifiers</b> for people of a particular sex and of a particular nationality. Similarly, a feature for people's children of a particular sex might be the intersection of a <b>Feature</b> for their children and a <b>Classifier</b> for people of that sex (because the interpretations of the children <b>Feature</b> that identify those of that sex are also interpretations of the Classifier for that sex).
<code>oslc_sysmlv2:type_IsAbstract</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Indicates whether instances of this <b>Type</b> must also be instances of at least one of its specialized <b>Types</b> .
<code>oslc_sysmlv2:type_IsConjugated</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Indicates whether this <b>Type</b> has an <b>ownedConjugator</b> .

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:type_IsSufficient</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether all things that meet the classification conditions of this <b>Type</b> must be classified by the <b>Type</b> .
<code>oslc_sysmlv2:type_Multiplicity</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Multiplicity</code>	An <b>ownedMember</b> of this <b>Type</b> that is a <b>Multiplicity</b> , which constrains the cardinality of the <b>Type</b> . If there is no such <b>ownedMember</b> , then the cardinality of this <b>Type</b> is constrained by all the <b>Multiplicity</b> constraints applicable to any direct supertypes.
<code>oslc_sysmlv2:type_Output</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All <b>features</b> related to this <b>Type</b> by <b>FeatureMemberships</b> that have <b>direction out or inout</b> ..
<code>oslc_sysmlv2:type_OwnedConjugator</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Conjugation</code>	A <b>Conjugation</b> owned by this <b>Type</b> for which the <b>Type</b> is the <b>originalType</b> .
<code>oslc_sysmlv2:type_OwnedDifferencing</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Differencing</code>	The <b>ownedRelationships</b> of this <b>Type</b> that are <b>Differencings</b> , having this <b>Type</b> as their <b>typeDifferenced</b> .
<code>oslc_sysmlv2:type_OwnedDisjoining</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Disjoining</code>	The <b>ownedRelationships</b> of this <b>Type</b> that are <b>Disjoinings</b> , for which the <b>Type</b> is the <b>typeDisjoined Type</b> .
<code>oslc_sysmlv2:type_OwnedEndFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All <b>endFeatures</b> of this <b>Type</b> that are <b>ownedFeatures</b> .
<code>oslc_sysmlv2:type_OwnedFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <b>ownedMemberFeatures</b> of the <b>ownedFeatureMemberships</b> of this <b>Type</b> .
<code>oslc_sysmlv2:type_OwnedFeatureMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:FeatureMembership</code>	The <b>ownedMemberships</b> of this <b>Type</b> that are <b>FeatureMemberships</b> , for which the <b>Type</b> is the <b>owningType</b> . Each such <b>FeatureMembership</b> identifies an <b>ownedFeature</b> of the <b>Type</b> .
<code>oslc_sysmlv2:type_OwnedIntersecting</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Intersecting</code>	The <b>ownedRelationships</b> of this <b>Type</b> that are <b>Intersectings</b> , have the <b>Type</b> as their <b>typeIntersected</b> .
<code>oslc_sysmlv2:type_OwnedSpecialization</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Specialization</code>	The <b>ownedRelationships</b> of this <b>Type</b> that are <b>Specializations</b> , for which the <b>Type</b> is the <b>specific Type</b> .

Standards Track Work Product

<code>oslc_sysmlv2:usage_VariantMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:VariantMembership</code>	The <code>ownedMemberships</code> of this <code>Usage</code> that are <code>VariantMemberships</code> . If <code>isVariation = true</code> , then this must be all <code>memberships</code> of the <code>Usage</code> . If <code>isVariation = false</code> , then <code>variantMembership</code> must be empty.
<code>oslc:instanceShape</code>	Zero-or-one	false	Resource	Reference	<code>oslc:ResourceShape</code>	The URI of a Resource Shape that describes the possible properties, occurrence, value types, allowed values and labels. This shape information is useful in displaying the subject resource as well as guiding clients in performing modifications. Instance shapes may be specific to the authenticated user associated with the request that retrieved the resource, the current state of the resource and other factors and thus should not be cached.
<code>oslc:serviceProvider</code>	Zero-or-many	false	Resource	Reference	<code>oslc:ServiceProvider</code>	A link to the resource's OSLC Service Provider. There may be cases when the subject resource is available from a service provider that implements multiple domain specifications, which could result in multiple values for this property.
<code>oslc:shortTitle</code>	Zero-or-one	false	XMLLiteral	N/A	Unspecified	Short name identifying a resource, often used as an abbreviated identifier for presentation to end-users. <b>SHOULD</b> include only content that is valid inside an XHTML <code>&lt;span&gt;</code> element [sml-56].

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>rdf:type</code>	Zero-or-many	false	Resource	Reference	<code>rdfs:Class</code>	The resource type URIs.

- **Describes:** <http://open-services.net/ns/sysmlv2#TextualRepresentation>
- **Summary:** TextualRepresentationShape
- **Description:** A `TextualRepresentation` is an `AnnotatingElement` whose `body` represents the `representedElement` in a given `language`. The `representedElement` must be the `owner` of the `TextualRepresentation`. The named `language` can be a natural language, in which case the `body` is an informal representation, or an artificial language, in which case the `body` is expected to be a formal, machine-parsable representation.

### TextualRepresentation Properties

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>dcterms:contributor</code>	Zero-or-many	false	AnyResource	Either	<code>oslc:Any</code>	Contributor or contributors to the resource. It is likely that the target resource will be a foaf:Person but that is not necessarily the case.
<code>dcterms:created</code>	Zero-or-one	false	dateTime	N/A	Unspecified	Timestamp of resource creation.
<code>dcterms:creator</code>	Zero-or-many	false	AnyResource	Either	<code>oslc:Any</code>	Creator or creators of the resource. It is likely that the target resource will be a foaf:Person but that is not necessarily the case.
<code>dcterms:description</code>	Zero-or-one	false	XMLLiteral	N/A	Unspecified	Descriptive text about resource represented as rich text in XHTML content.
<code>dcterms:identifier</code>	Exactly-one	true	string	N/A	Unspecified	A unique identifier for a resource. Typically read-only and assigned by the service provider when a resource is created. Not typically intended for end-user display.
<code>dcterms:modified</code>	Zero-or-one	false	dateTime	N/A	Unspecified	Timestamp of latest resource modification.

Standards Track Work Product

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>dcterms:source</code>	Zero-or-one	false	Resource	Reference	<code>oslc:Any</code>	The resource URI a client can perform a get on to obtain the original non-OSLC AM formatted resource that was used to create this resource. The source resource is usually a binary or proprietary format that the service provider can consume and convert into an OSLC AM format. The service may use content negotiation with the Accept header to obtain the desired content type.
<code>dcterms:title</code>	Exactly-one	false	XMLLiteral	N/A	Unspecified	Title of the resource represented as rich text in XHTML content.
<code>dcterms:type</code>	Zero-or-many	false	string	N/A	Unspecified	A short string representation for the type, for example 'Car'.
<code>jazz_am:derives</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The resource that derives from another resource originated from or is significantly influenced by the referenced resource. For example a model element derives from a requirement.
<code>jazz_am:elaborates</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	This resource elaborates the referenced resource.
<code>jazz_am:external</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	A generic link from a resource to an external web page.
<code>jazz_am:refine</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The target is a refinement of the source. (e.g. a use case scenario might be a refinement of a textual requirement that describes the interaction).
<code>jazz_am:satisfy</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The model element satisfies the requirement (e.g. The use case satisfies a functional requirement).
<code>jazz_am:trace</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The model element has a trace to the requirement (e.g. An attribute or its value are traced to a requirement).

Standards Track Work Product

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:annotatingElement_AnnotatedElement</code>	One-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The <b>Elements</b> that are annotated by this <b>AnnotatingElement</b> . If <b>annotation</b> is not empty, these are the <b>annotatedElements</b> of the <b>annotations</b> . If <b>annotation</b> is empty, then it is the <b>owningNamespace</b> of the <b>AnnotatingElement</b> .
<code>oslc_sysmlv2:annotatingElement_Annotation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Annotation</code>	The <b>Annotations</b> that relate this <b>AnnotatingElement</b> to its <b>annotatedElements</b> .
<code>oslc_sysmlv2:annotatingElement_OwnedAnnotatingRelationship</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Annotation</code>	The <b>ownedRelationships</b> of this <b>AnnotatingElement</b> that are <b>Annotations</b> , for which this <b>AnnotatingElement</b> is the <b>annotatingElement</b> .
<code>oslc_sysmlv2:element_AliasIds</code>	Zero-or-many	false	unspecified	Either	<code>xsd:string</code>	Various alternative identifiers for this Element. Generally, these will be set by tools.
<code>oslc_sysmlv2:element_DeclaredName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The declared name of this <b>Element</b> .
<code>oslc_sysmlv2:element_DeclaredShortName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	An optional alternative name for the <b>Element</b> that is intended to be shorter or in some way more succinct than its primary <b>name</b> . It may act as a modeler-specified identifier for the <b>Element</b> , though it is then the responsibility of the modeler to maintain the uniqueness of this identifier within a model or relative to some other context.
<code>oslc_sysmlv2:element_Documentation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Documentation</code>	The Documentation owned by this Element.
<code>oslc_sysmlv2:element_ElementId</code>	Exactly-one	false	unspecified	Either	<code>xsd:string</code>	The globally unique identifier for this Element. This is intended to be set by tooling, and it must not change during the lifetime of the Element.

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:element_IsImpliedIncluded</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether all necessary implied Relationships have been included in the <code>ownedRelationships</code> of this Element. This property may be true, even if there are not actually any <code>ownedRelationships</code> with <code>isImplied = true</code> , meaning that no such Relationships are actually implied for this Element. However, if it is false, then <code>ownedRelationships</code> may <i>not</i> contain any implied Relationships. That is, either <i>all</i> required implied Relationships must be included, or none of them.
<code>oslc_sysmlv2:element_IsLibraryElement</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether this Element is contained in the ownership tree of a library model.
<code>oslc_sysmlv2:element_Name</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The name to be used for this <code>Element</code> during name resolution within its <code>owningNamespace</code> . This is derived using the <code>effectiveName()</code> operation. By default, it is the same as the <code>declaredName</code> , but this is overridden for certain kinds of <code>Elements</code> to compute a <code>name</code> even when the <code>declaredName</code> is null.
<code>oslc_sysmlv2:element_OwnedAnnotation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Annotation</code>	The <code>ownedRelationships</code> of this <code>Element</code> that are <code>Annotations</code> , for which this <code>Element</code> is the <code>annotatedElement</code> .
<code>oslc_sysmlv2:element_OwnedElement</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The <code>Elements</code> owned by this <code>Element</code> , derived as the <code>ownedRelatedElements</code> of the <code>ownedRelationships</code> of this <code>Element</code> .
<code>oslc_sysmlv2:element_OwnedRelationship</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Relationship</code>	The <code>Relationships</code> for which this <code>Element</code> is the <code>owningRelatedElement</code> .
<code>oslc_sysmlv2:element_Owner</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The owner of this <code>Element</code> , derived as the <code>owningRelatedElement</code> of the <code>owningRelationship</code> of this <code>Element</code> , if any.
<code>oslc_sysmlv2:element_OwningMembership</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:OwningMembership</code>	The <code>owningRelationship</code> of this <code>Element</code> , if that <code>Relationship</code> is a <code>Membership</code> .
<code>oslc_sysmlv2:element_OwningNamespace</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Namespace</code>	The <code>Namespace</code> that owns this <code>Element</code> , which is the <code>membershipOwningNamespace</code> of the <code>owningMembership</code> of this <code>Element</code> , if any.

Standards Track Work Product

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:element_OwningRelationship</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Relationship</code>	The Relationship for which this Element is an ownedRelatedElement, if any.
<code>oslc_sysmlv2:element_QualifiedName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The full ownership-qualified name of this Element, represented in a form that is valid according to the KerML textual concrete syntax for qualified names (including use of unrestricted name notation and escaped characters, as necessary). The <code>qualifiedName</code> is null if this Element has no <code>owningNamespace</code> or if there is not a complete ownership chain of named <code>Namespaces</code> from a root <code>Namespace</code> to this Element.
<code>oslc_sysmlv2:element_ShortName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The short name to be used for this Element during name resolution within its <code>owningNamespace</code> . This is derived using the <code>effectiveShortName()</code> operation. By default, it is the same as the <code>declaredShortName</code> , but this is overridden for certain kinds of Elements to compute a <code>shortName</code> even when the <code>declaredName</code> is null.
<code>oslc_sysmlv2:element_TextualRepresentation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:TextualRepresentation</code>	The <code>TextualRepresentations</code> that annotate this Element.
<code>oslc_sysmlv2:textualRepresentation_Body</code>	Exactly-one	false	unspecified	Either	<code>xsd:string</code>	The textual representation of the <code>representedElement</code> in the given <code>language</code> .
<code>oslc_sysmlv2:textualRepresentation_Language</code>	Exactly-one	false	unspecified	Either	<code>xsd:string</code>	The natural or artificial language in which the <code>body</code> text is written.
<code>oslc_sysmlv2:textualRepresentation_RepresentedElement</code>	Exactly-one	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The Element that is represented by this <code>TextualRepresentation</code> .
<code>oslc:instanceShape</code>	Zero-or-one	false	Resource	Reference	<code>oslc:ResourceShape</code>	The URI of a Resource Shape that describes the possible properties, occurrence, value types, allowed values and labels. This shape information is useful in displaying the subject resource as well as guiding clients in performing modifications. Instance shapes may be specific to the authenticated user associated with the request that retrieved the resource, the current state of the resource and other factors and thus should not be cached.

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:element_OwnedElement</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The Elements owned by this Element, derived as the <code>ownedRelatedElements</code> of the <code>ownedRelationships</code> of this Element.
<code>oslc_sysmlv2:element_OwnedRelationship</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Relationship</code>	The Relationships for which this Element is the <code>owningRelatedElement</code> .
<code>oslc_sysmlv2:element_Owner</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The owner of this Element, derived as the <code>owningRelatedElement</code> of the <code>owningRelationship</code> of this Element, if any.
<code>oslc_sysmlv2:element_OwningMembership</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:OwningMembership</code>	The <code>owningRelationship</code> of this Element, if that Relationship is a <code>Membership</code> .
<code>oslc_sysmlv2:element_OwningNamespace</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Namespace</code>	The <code>Namespace</code> that owns this Element, which is the <code>membershipOwningNamespace</code> of the <code>owningMembership</code> of this Element, if any.
<code>oslc_sysmlv2:element_OwningRelationship</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Relationship</code>	The Relationship for which this Element is an <code>ownedRelatedElement</code> , if any.
<code>oslc_sysmlv2:element_QualifiedName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The full ownership-qualified name of this Element, represented in a form that is valid according to the KerML textual concrete syntax for qualified names (including use of unrestricted name notation and escaped characters, as necessary). The <code>qualifiedName</code> is null if this Element has no <code>owningNamespace</code> or if there is not a complete ownership chain of named <code>Namespaces</code> from a root <code>Namespace</code> to this Element.
<code>oslc_sysmlv2:element_ShortName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The short name to be used for this Element during name resolution within its <code>owningNamespace</code> . This is derived using the <code>effectiveShortName()</code> operation. By default, it is the same as the <code>declaredShortName</code> , but this is overridden for certain kinds of Elements to compute a <code>shortName</code> even when the <code>declaredName</code> is null.
<code>oslc_sysmlv2:element_TextualRepresentation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:TextualRepresentation</code>	The <code>TextualRepresentations</code> that annotate this Element.

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:feature_ChainingFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <b>Feature</b> that are chained together to determine the values of this <b>Feature</b> , derived from the <b>chainingFeatures</b> of the <b>ownedFeatureChainings</b> of this <b>Feature</b> , in the same order. The values of a <b>Feature</b> with <b>chainingFeatures</b> are the same as values of the last <b>Feature</b> in the chain, which can be found by starting with the values of the first <b>Feature</b> (for each instance of the domain of the original <b>Feature</b> ), then using each of those as domain instances to find the values of the second <b>Feature</b> in <b>chainingFeatures</b> , and so on, to values of the last <b>Feature</b> .
<code>oslc_sysmlv2:feature_Direction</code>	Zero-or-one	false	unspecified	Either	<code>oslc_sysmlv2:FeatureDirectionKind</code>	Indicates how values of this <b>Feature</b> are determined or used (as specified for the <b>FeatureDirectionKind</b> ).
<code>oslc_sysmlv2:feature_EndOwningType</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The <b>Type</b> that is related to this <b>Feature</b> by an <b>EndFeatureMembership</b> in which the <b>Feature</b> is an <b>ownedMemberFeature</b> .
<code>oslc_sysmlv2:feature_FeaturingType</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	<b>Types</b> that feature this <b>Feature</b> , such that any instance in the domain of the <b>Feature</b> must be classified by all of these <b>Types</b> , including at least all the <b>featuringTypes</b> of its <b>typeFeaturings</b> . If the <b>Feature</b> is chained, then the <b>featuringTypes</b> of the first <b>Feature</b> in the chain are also <b>featuringTypes</b> of the chained <b>Feature</b> .
<code>oslc_sysmlv2:feature_IsComposite</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether the <b>Feature</b> is a composite <b>feature</b> of its <b>featuringType</b> . If so, the values of the <b>Feature</b> cannot exist after its featuring instance no longer does.
<code>oslc_sysmlv2:feature_IsDerived</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether the values of this <b>Feature</b> can always be computed from the values of other <b>Features</b> .
<code>oslc_sysmlv2:feature_IsEnd</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether or not the this <b>Feature</b> is an end <b>Feature</b> , requiring a different interpretation of the <b>multiplicity</b> of the <b>Feature</b> .
<code>oslc_sysmlv2:feature_IsNonunique</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	isNonunique.
<code>oslc_sysmlv2:feature_IsOrdered</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether an order exists for the values of this <b>Feature</b> or not.
<code>oslc_sysmlv2:feature_IsPortion</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether the values of this <b>Feature</b> are contained in the space and time of instances of the domain of the <b>Feature</b> and represent the same thing as those instances.
<code>oslc_sysmlv2:feature_IsReadOnly</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether the values of this <b>Feature</b> can change over the lifetime of an instance of the domain.

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc:instanceShape</code>	Zero-or-one	false	Resource	Reference	<code>oslc:ResourceShape</code>	The URI of a Resource Shape that describes the possible properties, occurrence, value types, allowed values and labels. This shape information is useful in displaying the subject resource as well as guiding clients in performing modifications. Instance shapes may be specific to the authenticated user associated with the request that retrieved the resource, the current state of the resource and other factors and thus should not be cached.
<code>oslc:serviceProvider</code>	Zero-or-many	false	Resource	Reference	<code>oslc:ServiceProvider</code>	A link to the resource's OSLC Service Provider. There may be cases when the subject resource is available from a service provider that implements multiple domain specifications, which could result in multiple values for this property.
<code>oslc:shortTitle</code>	Zero-or-one	false	XMLLiteral	N/A	Unspecified	Short name identifying a resource, often used as an abbreviated identifier for presentation to end-users. <b>SHOULD</b> include only content that is valid inside an XHTML <code>&lt;span&gt;</code> element [sml-58].
<code>rdf:type</code>	Zero-or-many	false	Resource	Reference	<code>rdfs:Class</code>	The resource type URIs.

- **Describes:** <http://open-services.net/ns/sysmlv2#CalculationDefinition>
- **Summary:** CalculationDefinitionShape
- **Description:** A `CalculationDefinition` is an `ActionDefinition` that also defines a `Function` producing a `result..`

CalculationDefinition Properties

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>dcterms:contributor</code>	Zero-or-many	false	AnyResource	Either	<code>oslc:Any</code>	Contributor or contributors to the resource. It is likely that the target resource will be a foaf:Person but that is not necessarily the case.
<code>dcterms:created</code>	Zero-or-one	false	dateTime	N/A	Unspecified	Timestamp of resource creation.
<code>dcterms:creator</code>	Zero-or-many	false	AnyResource	Either	<code>oslc:Any</code>	Creator or creators of the resource. It is likely that the target resource will be a foaf:Person but that is not necessarily the case.

Standards Track Work Product

Prefixes Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>dcterms:description</code>	Zero-or-one	false	XMLLiteral	N/A	Unspecified	Descriptive text about resource represented as rich text in XHTML content.
<code>dcterms:identifier</code>	Exactly-one	true	string	N/A	Unspecified	A unique identifier for a resource. Typically read-only and assigned by the service provider when a resource is created. Not typically intended for end-user display.
<code>dcterms:modified</code>	Zero-or-one	false	dateTime	N/A	Unspecified	Timestamp of latest resource modification.
<code>dcterms:source</code>	Zero-or-one	false	Resource	Reference	<code>oslc:Any</code>	The resource URI a client can perform a get on to obtain the original non-OSLC AM formatted resource that was used to create this resource. The source resource is usually a binary or proprietary format that the service provider can consume and convert into an OSLC AM format. The service may use content negotiation with the Accept header to obtain the desired content type.
<code>dcterms:title</code>	Exactly-one	false	XMLLiteral	N/A	Unspecified	Title of the resource represented as rich text in XHTML content.
<code>dcterms:type</code>	Zero-or-many	false	string	N/A	Unspecified	A short string representation for the type, for example 'Car'.
<code>jazz_am:derives</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The resource that derives from another resource originated from or is significantly influenced by the referenced resource. For example a model element derives from a requirement.
<code>jazz_am:elaborates</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	This resource elaborates the referenced resource.
<code>jazz_am:external</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	A generic link from a resource to an external web page.
<code>jazz_am:refine</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The target is a refinement of the source. (e.g. a use case scenario might be a refinement of a textual requirement that describes the interaction).
<code>jazz_am:satisfy</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The model element satisfies the requirement (e.g. The use case satisfies a functional requirement).

Standards Track Work Product

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>jazz_am:trace</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The model element has a trace to the requirement (e.g. An attribute or its value are traced to a requirement).
<code>oslc_sysmlv2:actionDefinition_Action</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:ActionUsage</code>	The <b>ActionUsages</b> that are <b>steps</b> in this <b>ActionDefinition</b> , which define the actions that specify the behavior of the <b>ActionDefinition</b> .
<code>oslc_sysmlv2:behavior_Parameter</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The parameters of this <b>Behavior</b> , which are defined as its <b>directedFeatures</b> , whose values are passed into and/or out of a performance of the <b>Behavior</b> .
<code>oslc_sysmlv2:behavior_Step</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Step</code>	The <b>Steps</b> that make up this <b>Behavior</b> .
<code>oslc_sysmlv2:calculationDefinition_Calculation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:CalculationUsage</code>	The <b>actions</b> of this <b>CalculationDefinition</b> that are <b>CalculationUsages</b> .
<code>oslc_sysmlv2:classifier_OwnedSubclassification</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Subclassification</code>	The <b>ownedSpecializations</b> of this <b>Classifier</b> that are <b>Subclassifications</b> , for which this <b>Classifier</b> is the <b>subclassifier</b> .
<code>oslc_sysmlv2:definition_DirectedUsage</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Usage</code>	The <b>usages</b> of this <b>Definition</b> that are <b>directedFeatures</b> .
<code>oslc_sysmlv2:definition_IsVariation</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether this <b>Definition</b> is for a variation point or not. If true, then all the <b>memberships</b> of the <b>Definition</b> must be <b>VariantMemberships</b> .
<code>oslc_sysmlv2:definition_OwnedAction</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:ActionUsage</code>	The <b>ActionUsages</b> that are <b>ownedUsages</b> of this <b>Definition</b> .
<code>oslc_sysmlv2:definition_OwnedAllocation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:AllocationUsage</code>	The <b>AllocationUsages</b> that are <b>ownedUsages</b> of this <b>Definition</b> .
<code>oslc_sysmlv2:definition_OwnedAnalysisCase</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:AnalysisCaseUsage</code>	The <b>AnalysisCaseUsages</b> that are <b>ownedUsages</b> of this <b>Definition</b> .

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:element_IsImpliedIncluded</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether all necessary implied Relationships have been included in the <code>ownedRelationships</code> of this Element. This property may be true, even if there are not actually any <code>ownedRelationships</code> with <code>isImplied = true</code> , meaning that no such Relationships are actually implied for this Element. However, if it is false, then <code>ownedRelationships</code> may <i>not</i> contain any implied Relationships. That is, either <i>all</i> required implied Relationships must be included, or none of them.
<code>oslc_sysmlv2:element_IsLibraryElement</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether this Element is contained in the ownership tree of a library model.
<code>oslc_sysmlv2:element_Name</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The name to be used for this Element during name resolution within its <code>owningNamespace</code> . This is derived using the <code>effectiveName()</code> operation. By default, it is the same as the <code>declaredName</code> , but this is overridden for certain kinds of Elements to compute a name even when the <code>declaredName</code> is null.
<code>oslc_sysmlv2:element_OwnedAnnotation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Annotation</code>	The <code>ownedRelationships</code> of this Element that are Annotations, for which this Element is the <code>annotatedElement</code> .
<code>oslc_sysmlv2:element_OwnedElement</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The Elements owned by this Element, derived as the <code>ownedRelatedElements</code> of the <code>ownedRelationships</code> of this Element.
<code>oslc_sysmlv2:element_OwnedRelationship</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Relationship</code>	The Relationships for which this Element is the <code>owningRelatedElement</code> .
<code>oslc_sysmlv2:element_Owner</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The owner of this Element, derived as the <code>owningRelatedElement</code> of the <code>owningRelationship</code> of this Element, if any.
<code>oslc_sysmlv2:element_OwningMembership</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:OwningMembership</code>	The <code>owningRelationship</code> of this Element, if that Relationship is a Membership.
<code>oslc_sysmlv2:element_OwningNamespace</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Namespace</code>	The Namespace that owns this Element, which is the <code>membershipOwningNamespace</code> of the <code>owningMembership</code> of this Element, if any.
<code>oslc_sysmlv2:element_OwningRelationship</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Relationship</code>	The Relationship for which this Element is an <code>ownedRelatedElement</code> , if any.

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:element_QualifiedName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The full ownership-qualified name of this <b>Element</b> , represented in a form that is valid according to the KerML textual concrete syntax for qualified names (including use of unrestricted name notation and escaped characters, as necessary). The <code>qualifiedName</code> is null if this <b>Element</b> has no <code>owningNamespace</code> or if there is not a complete ownership chain of named <b>Namespaces</b> from a root <b>Namespace</b> to this <b>Element</b> .
<code>oslc_sysmlv2:element_ShortName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The short name to be used for this <b>Element</b> during name resolution within its <code>owningNamespace</code> . This is derived using the <code>effectiveShortName()</code> operation. By default, it is the same as the <code>declaredShortName</code> , but this is overridden for certain kinds of <b>Elements</b> to compute a <code>shortName</code> even when the <code>declaredName</code> is null.
<code>oslc_sysmlv2:element_TextualRepresentation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:TextualRepresentation</code>	The <b>TextualRepresentations</b> that annotate this <b>Element</b> .
<code>oslc_sysmlv2:function_Expression</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Expression</code>	The <b>Expressions</b> that are <b>steps</b> in the calculation of the <b>result</b> of this <b>Function</b> .
<code>oslc_sysmlv2:function_IsModelLevelEvaluable</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether this <b>Function</b> can be used as the <b>function</b> of a model-level evaluable <b>InvocationExpression</b> . Certain <b>Functions</b> from the Kernel Functions Library are considered to have <code>isModelLevelEvaluable = true</code> . For all other <b>Functions</b> it is <code>false</code> .
<code>oslc_sysmlv2:function_Result</code>	Exactly-one	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <b>result parameter</b> of the <b>Function</b> , which is owned by the <b>Function</b> via a <b>ReturnParameterMembership</b> .
<code>oslc_sysmlv2:namespace_ImportedMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Membership</code>	The <b>Memberships</b> in this <b>Namespace</b> that result from the <b>ownedImports</b> of this <b>Namespace</b> .
<code>oslc_sysmlv2:namespace_Member</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The set of all member <b>Elements</b> of this <b>Namespace</b> , which are the <b>memberElements</b> of all <b>memberships</b> of the <b>Namespace</b> .
<code>oslc_sysmlv2:namespace_Membership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Membership</code>	All <b>Memberships</b> in this <b>Namespace</b> , including (at least) the union of <b>ownedMemberships</b> and <b>importedMemberships</b> .

Standards Track Work Product

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:namespace_OwnedImport</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Import</code>	The <code>ownedRelationships</code> of this <code>Namespace</code> that are <code>Imports</code> , for which the <code>Namespace</code> is the <code>importOwningNamespace</code> .
<code>oslc_sysmlv2:namespace_OwnedMember</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The owned <code>members</code> of this <code>Namespace</code> , which are the <code>ownedMemberElements</code> of the <code>ownedMemberships</code> of the ..
<code>oslc_sysmlv2:namespace_OwnedMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Membership</code>	The <code>ownedRelationships</code> of this <code>Namespace</code> that are <code>Memberships</code> , for which the <code>Namespace</code> is the <code>membershipOwningNamespace</code> .
<code>oslc_sysmlv2:occurrenceDefinition_IsIndividual</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether this <code>OccurrenceDefinition</code> is constrained to represent single individual.
<code>oslc_sysmlv2:occurrenceDefinition_LifeClass</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:LifeClass</code>	If <code>isIndividual</code> is true, a <code>LifeClass</code> that specializes this <code>OccurrenceDefinition</code> , restricting it to represent an individual.
<code>oslc_sysmlv2:type_DifferencingType</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The interpretations of a <code>Type</code> with <code>differencingTypes</code> are asserted to be those of the first of those <code>Types</code> , but not including those of the remaining <code>Types</code> . For example, a <code>Classifier</code> might be the difference of a <code>Classifier</code> for people and another for people of a particular nationality, leaving people who are not of that nationality. Similarly, a feature of people might be the difference between a feature for their children and a <code>Classifier</code> for people of a particular sex, identifying their children not of that sex (because the interpretations of the children <code>Feature</code> that identify those of that sex are also interpretations of the <code>Classifier</code> for that sex).
<code>oslc_sysmlv2:type_DirectedFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <code>features</code> of this <code>Type</code> that have a non-null <code>direction</code> .
<code>oslc_sysmlv2:type_EndFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All <code>features</code> of this <code>Type</code> with <code>isEnd = true</code> .
<code>oslc_sysmlv2:type_Feature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <code>ownedMemberFeatures</code> of the <code>featureMemberships</code> of this <code>Type</code> .

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:type_FeatureMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:FeatureMembership</code>	The <b>FeatureMemberships</b> for <b>features</b> of this <b>Type</b> , which include all <b>ownedFeatureMemberships</b> and those <b>inheritedMemberships</b> that are <b>FeatureMemberships</b> (but does <i>not</i> include any <b>importedMemberships</b> ).
<code>oslc_sysmlv2:type_InheritedFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All the <b>memberFeatures</b> of the <b>inheritedMemberships</b> of this <b>Type</b> that are <b>FeatureMemberships</b> .
<code>oslc_sysmlv2:type_InheritedMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Membership</code>	All <b>Memberships</b> inherited by this <b>Type</b> via <b>Specialization</b> or <b>Conjugation</b> . These are included in the derived union for the <b>memberships</b> of the <b>Type</b> .
<code>oslc_sysmlv2:type_Input</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All <b>features</b> related to this <b>Type</b> by <b>FeatureMemberships</b> that have <b>direction in or inout..</b>
<code>oslc_sysmlv2:type_IntersectingType</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The interpretations of a <b>Type</b> with <b>intersectingTypes</b> are asserted to be those in common among the <b>intersectingTypes</b> , which are the <b>Types</b> derived from the <b>intersectingType</b> of the <b>ownedIntersectings</b> of this <b>Type</b> . For example, a <b>Classifier</b> might be an intersection of <b>Classifiers</b> for people of a particular sex and of a particular nationality. Similarly, a feature for people's children of a particular sex might be the intersection of a <b>Feature</b> for their children and a <b>Classifier</b> for people of that sex (because the interpretations of the children <b>Feature</b> that identify those of that sex are also interpretations of the <b>Classifier</b> for that sex).
<code>oslc_sysmlv2:type_IsAbstract</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Indicates whether instances of this <b>Type</b> must also be instances of at least one of its specialized <b>Types</b> .
<code>oslc_sysmlv2:type_IsConjugated</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Indicates whether this <b>Type</b> has an <b>ownedConjugator</b> .
<code>oslc_sysmlv2:type_IsSufficient</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether all things that meet the classification conditions of this <b>Type</b> must be classified by the <b>Type</b> .
<code>oslc_sysmlv2:type_Multiplicity</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Multiplicity</code>	An <b>ownedMember</b> of this <b>Type</b> that is a <b>Multiplicity</b> , which constrains the cardinality of the <b>Type</b> . If there is no such <b>ownedMember</b> , then the cardinality of this <b>Type</b> is constrained by all the <b>Multiplicity</b> constraints applicable to any direct supertypes.

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:type_Output</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All <b>features</b> related to this <b>Type</b> by <b>FeatureMemberships</b> that have <b>direction out or inout..</b>
<code>oslc_sysmlv2:type_OwnedConjugator</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Conjugation</code>	A <b>Conjugation</b> owned by this <b>Type</b> for which the <b>Type</b> is the <b>originalType</b> .
<code>oslc_sysmlv2:type_OwnedDifferencing</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Differencing</code>	The <b>ownedRelationships</b> of this <b>Type</b> that are <b>Differencings</b> , having this <b>Type</b> as their <b>typeDifferenced</b> .
<code>oslc_sysmlv2:type_OwnedDisjoining</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Disjoining</code>	The <b>ownedRelationships</b> of this <b>Type</b> that are <b>Disjoinings</b> , for which the <b>Type</b> is the <b>typeDisjoined Type</b> .
<code>oslc_sysmlv2:type_OwnedEndFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All <b>endFeatures</b> of this <b>Type</b> that are <b>ownedFeatures</b> .
<code>oslc_sysmlv2:type_OwnedFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <b>ownedMemberFeatures</b> of the <b>ownedFeatureMemberships</b> of this <b>Type</b> .
<code>oslc_sysmlv2:type_OwnedFeatureMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:FeatureMembership</code>	The <b>ownedMemberships</b> of this <b>Type</b> that are <b>FeatureMemberships</b> , for which the <b>Type</b> is the <b>owningType</b> . Each such <b>FeatureMembership</b> identifies an <b>ownedFeature</b> of the <b>Type</b> .
<code>oslc_sysmlv2:type_OwnedIntersecting</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Intersecting</code>	The <b>ownedRelationships</b> of this <b>Type</b> that are <b>Intersectings</b> , have the <b>Type</b> as their <b>typeIntersected</b> .
<code>oslc_sysmlv2:type_OwnedSpecialization</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Specialization</code>	The <b>ownedRelationships</b> of this <b>Type</b> that are <b>Specializations</b> , for which the <b>Type</b> is the <b>specific Type</b> .
<code>oslc_sysmlv2:type_OwnedUnioning</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Unioning</code>	The <b>ownedRelationships</b> of this <b>Type</b> that are <b>Unionings</b> , having the <b>Type</b> as their <b>typeUnioned</b> .

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:type_UnioningType</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The interpretations of a <b>Type</b> with <b>unioningTypes</b> are asserted to be the same as those of all the <b>unioningTypes</b> together, which are the <b>Types</b> derived from the <b>unioningType</b> of the <b>ownedUnionings</b> of this <b>Type</b> . For example, a <b>Classifier</b> for people might be the union of <b>Classifiers</b> for all the sexes. Similarly, a feature for people's children might be the union of features dividing them in the same ways as people in general.
<code>oslc:instanceShape</code>	Zero-or-one	false	Resource	Reference	<code>oslc:ResourceShape</code>	The URI of a Resource Shape that describes the possible properties, occurrence, value types, allowed values and labels. This shape information is useful in displaying the subject resource as well as guiding clients in performing modifications. Instance shapes may be specific to the authenticated user associated with the request that retrieved the resource, the current state of the resource and other factors and thus should not be cached.
<code>oslc:serviceProvider</code>	Zero-or-many	false	Resource	Reference	<code>oslc:ServiceProvider</code>	A link to the resource's OSLC Service Provider. There may be cases when the subject resource is available from a service provider that implements multiple domain specifications, which could result in multiple values for this property.
<code>oslc:shortTitle</code>	Zero-or-one	false	XMLLiteral	N/A	Unspecified	Short name identifying a resource, often used as an abbreviated identifier for presentation to end-users. <b>SHOULD</b> include only content that is valid inside an XHTML <code>&lt;span&gt;</code> element [sml-59].
<code>rdf:type</code>	Zero-or-many	false	Resource	Reference	<code>rdfs:Class</code>	The resource type URIs.

- **Describes:** <http://open-services.net/ns/sysmlv2#ConjugatedPortTyping>
- **Summary:** ConjugatedPortTypingShape
- **Description:** A **ConjugatedPortTyping** is a **FeatureTyping** whose **type** is a **ConjugatedPortDefinition**. (This relationship is intended to be an abstract-syntax marker for a special surface notation for conjugated typing of ports.)

#### ConjugatedPortTyping Properties

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>jazz_am:elaborates</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	This resource elaborates the referenced resource.
<code>jazz_am:external</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	A generic link from a resource to an external web page.
<code>jazz_am:refine</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The target is a refinement of the source. (e.g. a use case scenario might be a refinement of a textual requirement that describes the interaction).
<code>jazz_am:satisfy</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The model element satisfies the requirement (e.g. The use case satisfies a functional requirement).
<code>jazz_am:trace</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The model element has a trace to the requirement (e.g. An attribute or its value are traced to a requirement).
<code>oslc_sysmlv2:conjugatedPortTyping_ConjugatedPortDefinition</code>	Exactly-one	false	Resource	Either	<code>oslc_sysmlv2:ConjugatedPortDefinition</code>	The <code>type</code> of this <code>ConjugatedPortTyping</code> considered as a <code>FeatureTyping</code> , which must be a <code>ConjugatedPortDefinition</code> .
<code>oslc_sysmlv2:conjugatedPortTyping_PortDefinition</code>	Exactly-one	false	Resource	Either	<code>oslc_sysmlv2:PortDefinition</code>	The <code>originalPortDefinition</code> of the <code>conjugatedPortDefinition</code> of this <code>ConjugatedPortTyping</code> .
<code>oslc_sysmlv2:element_AliasIds</code>	Zero-or-many	false	unspecified	Either	<code>xsd:string</code>	Various alternative identifiers for this Element. Generally, these will be set by tools.
<code>oslc_sysmlv2:element_DeclaredName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The declared name of this <code>Element</code> .
<code>oslc_sysmlv2:element_DeclaredShortName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	An optional alternative name for the <code>Element</code> that is intended to be shorter or in some way more succinct than its primary <code>name</code> . It may act as a modeler-specified identifier for the <code>Element</code> , though it is then the responsibility of the modeler to maintain the uniqueness of this identifier within a model or relative to some other context.

Standards Track Work Product

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:element_Documentation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Documentation</code>	The Documentation owned by this Element.
<code>oslc_sysmlv2:element_ElementId</code>	Exactly-one	false	unspecified	Either	<code>xsd:string</code>	The globally unique identifier for this Element. This is intended to be set by tooling, and it must not change during the lifetime of the Element.
<code>oslc_sysmlv2:element_IsImpliedIncluded</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether all necessary implied Relationships have been included in the <code>ownedRelationships</code> of this Element. This property may be true, even if there are not actually any <code>ownedRelationships</code> with <code>isImplied = true</code> , meaning that no such Relationships are actually implied for this Element. However, if it is false, then <code>ownedRelationships</code> may <i>not</i> contain any implied Relationships. That is, either <i>all</i> required implied Relationships must be included, or none of them.
<code>oslc_sysmlv2:element_IsLibraryElement</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether this Element is contained in the ownership tree of a library model.
<code>oslc_sysmlv2:element_Name</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The name to be used for this <code>Element</code> during name resolution within its <code>owningNamespace</code> . This is derived using the <code>effectiveName()</code> operation. By default, it is the same as the <code>declaredName</code> , but this is overridden for certain kinds of <code>Elements</code> to compute a <code>name</code> even when the <code>declaredName</code> is null.
<code>oslc_sysmlv2:element_OwnedAnnotation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Annotation</code>	The <code>ownedRelationships</code> of this <code>Element</code> that are <code>Annotations</code> , for which this <code>Element</code> is the <code>annotatedElement</code> .
<code>oslc_sysmlv2:element_OwnedElement</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The <code>Elements</code> owned by this Element, derived as the <code>ownedRelatedElements</code> of the <code>ownedRelationships</code> of this Element.
<code>oslc_sysmlv2:element_OwnedRelationship</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Relationship</code>	The <code>Relationships</code> for which this Element is the <code>owningRelatedElement</code> .

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:element_Owner</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The owner of this Element, derived as the <code>owningRelatedElement</code> of the <code>owningRelationship</code> of this Element, if any.
<code>oslc_sysmlv2:element_OwningMembership</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:OwningMembership</code>	The <code>owningRelationship</code> of this Element, if that Relationship is a Membership.
<code>oslc_sysmlv2:element_OwningNamespace</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Namespace</code>	The Namespace that owns this Element, which is the <code>membershipOwningNamespace</code> of the <code>owningMembership</code> of this Element, if any.
<code>oslc_sysmlv2:element_OwningRelationship</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Relationship</code>	The Relationship for which this Element is an <code>ownedRelatedElement</code> , if any.
<code>oslc_sysmlv2:element_QualifiedName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The full ownership-qualified name of this Element, represented in a form that is valid according to the KerML textual concrete syntax for qualified names (including use of unrestricted name notation and escaped characters, as necessary). The <code>qualifiedName</code> is null if this Element has no <code>owningNamespace</code> or if there is not a complete ownership chain of named Namespaces from a root Namespace to this Element.
<code>oslc_sysmlv2:element_ShortName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The short name to be used for this Element during name resolution within its <code>owningNamespace</code> . This is derived using the <code>effectiveShortName()</code> operation. By default, it is the same as the <code>declaredShortName</code> , but this is overridden for certain kinds of Elements to compute a <code>shortName</code> even when the <code>declaredName</code> is null.
<code>oslc_sysmlv2:element_TextualRepresentation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:TextualRepresentation</code>	The <code>TextualRepresentations</code> that annotate this Element.
<code>oslc_sysmlv2:featureTyping_OwningFeature</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	A <code>typedFeature</code> that is also the <code>owningRelatedElement</code> of this <code>FeatureTyping</code> .
<code>oslc_sysmlv2:featureTyping_Type</code>	Exactly-one	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The Type that is being applied by this <code>FeatureTyping</code> .
<code>oslc_sysmlv2:featureTyping_TypedFeature</code>	Exactly-one	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The Feature that has a type determined by this <code>FeatureTyping</code> .

<code>oslc_sysmlv2:usage_VariantMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:VariantMembership</code>	The <code>ownedMemberships</code> of this <code>Usage</code> that are <code>VariantMemberships</code> . If <code>isVariation = true</code> , then this must be all <code>memberships</code> of the <code>Usage</code> . If <code>isVariation = false</code> , then <code>variantMembership</code> must be empty.
<code>oslc:instanceShape</code>	Zero-or-one	false	Resource	Reference	<code>oslc:ResourceShape</code>	The URI of a Resource Shape that describes the possible properties, occurrence, value types, allowed values and labels. This shape information is useful in displaying the subject resource as well as guiding clients in performing modifications. Instance shapes may be specific to the authenticated user associated with the request that retrieved the resource, the current state of the resource and other factors and thus should not be cached.
<code>oslc:serviceProvider</code>	Zero-or-many	false	Resource	Reference	<code>oslc:ServiceProvider</code>	A link to the resource's OSLC Service Provider. There may be cases when the subject resource is available from a service provider that implements multiple domain specifications, which could result in multiple values for this property.
<code>oslc:shortTitle</code>	Zero-or-one	false	XMLLiteral	N/A	Unspecified	Short name identifying a resource, often used as an abbreviated identifier for presentation to end-users. <b>SHOULD</b> include only content that is valid inside an XHTML <code>&lt;span&gt;</code> element [sml-61].
<code>rdf:type</code>	Zero-or-many	false	Resource	Reference	<code>rdfs:Class</code>	The resource type URIs.

- **Describes:** <http://open-services.net/ns/sysmlv2#ConnectionUsage>
- **Summary:** ConnectionUsageShape
- **Description:** A `ConnectionUsage` is a `ConnectorAsUsage` that is also a `PartUsage`. Nominally, if its type is a `ConnectionDefinition`, then a `ConnectionUsage` is a Usage of that `ConnectionDefinition`, representing a connection between parts of a system. However, other kinds of kernel `AssociationStructures` are also allowed, to permit use of `AssociationStructures` from the Kernel Model Libraries.

ConnectionUsage Properties

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>dcterms:contributor</code>	Zero-or-many	false	AnyResource	Either	<code>oslc:Any</code>	Contributor or contributors to the resource. It is likely that the target resource will be a foaf:Person but that is not necessarily the case.

Standards Track Work Product

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>dcterms:created</code>	Zero-or-one	false	dateTime	N/A	Unspecified	Timestamp of resource creation.
<code>dcterms:creator</code>	Zero-or-many	false	AnyResource	Either	<code>oslc:Any</code>	Creator or creators of the resource. It is likely that the target resource will be a foaf:Person but that is not necessarily the case.
<code>dcterms:description</code>	Zero-or-one	false	XMLLiteral	N/A	Unspecified	Descriptive text about resource represented as rich text in XHTML content.
<code>dcterms:identifier</code>	Exactly-one	true	string	N/A	Unspecified	A unique identifier for a resource. Typically read-only and assigned by the service provider when a resource is created. Not typically intended for end-user display.
<code>dcterms:modified</code>	Zero-or-one	false	dateTime	N/A	Unspecified	Timestamp of latest resource modification.
<code>dcterms:source</code>	Zero-or-one	false	Resource	Reference	<code>oslc:Any</code>	The resource URI a client can perform a get on to obtain the original non-OSLC AM formatted resource that was used to create this resource. The source resource is usually a binary or proprietary format that the service provider can consume and convert into an OSLC AM format. The service may use content negotiation with the Accept header to obtain the desired content type.
<code>dcterms:title</code>	Exactly-one	false	XMLLiteral	N/A	Unspecified	Title of the resource represented as rich text in XHTML content.
<code>dcterms:type</code>	Zero-or-many	false	string	N/A	Unspecified	A short string representation for the type, for example 'Car'.
<code>jazz_am:derives</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The resource that derives from another resource originated from or is significantly influenced by the referenced resource. For example a model element derives from a requirement.
<code>jazz_am:elaborates</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	This resource elaborates the referenced resource.
<code>jazz_am:external</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	A generic link from a resource to an external web page.

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>jazz_am:refine</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The target is a refinement of the source. (e.g. a use case scenario might be a refinement of a textual requirement that describes the interaction).
<code>jazz_am:satisfy</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The model element satisfies the requirement (e.g. The use case satisfies a functional requirement).
<code>jazz_am:trace</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The model element has a trace to the requirement (e.g. An attribute or its value are traced to a requirement).
<code>oslc_sysmlv2:connectionUsage_ConnectionDefinition</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:AssociationStructure</code>	The <b>AssociationStructures</b> that are the types of this <b>ConnectionUsage</b> . Nominally, these are , but other kinds of Kernel <b>AssociationStructures</b> are also allowed, to permit use of <b>AssociationStructures</b> from the Kernel Model Libraries.
<code>oslc_sysmlv2:connector_Association</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Association</code>	The <b>Associations</b> that type the <b>Connector</b> .
<code>oslc_sysmlv2:connector_ConnectorEnd</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <b>endFeatures</b> of a <b>Connector</b> , which redefine the <b>endFeatures</b> of the <b>associations</b> of the <b>Connector</b> . The <b>connectorEnds</b> determine via <b>ReferenceSubsetting Relationships</b> which <b>Features</b> are related by the <b>Connector</b> .
<code>oslc_sysmlv2:connector_RelatedFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <b>Features</b> that are related by this <b>Connector</b> considered as a <b>Relationship</b> and that restrict the links it identifies, given by the referenced <b>Features</b> of the <b>connectorEnds</b> of the <b>Connector</b> .
<code>oslc_sysmlv2:connector_SourceFeature</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The source <b>relatedFeature</b> for this <b>Connector</b> . It is the first <b>relatedFeature</b> .
<code>oslc_sysmlv2:connector_TargetFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The target <b>relatedFeatures</b> for this <b>Connector</b> . This includes all the <b>relatedFeatures</b> other than the <b>sourceFeature</b> .
<code>oslc_sysmlv2:element_AliasIds</code>	Zero-or-many	false	unspecified	Either	<code>xsd:string</code>	Various alternative identifiers for this Element. Generally, these will be set by tools.
<code>oslc_sysmlv2:element_DeclaredName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The declared name of this <b>Element</b> .

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:element_DeclaredShortName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	An optional alternative name for the <b>Element</b> that is intended to be shorter or in some way more succinct than its primary <b>name</b> . It may act as a modeler-specified identifier for the <b>Element</b> , though it is then the responsibility of the modeler to maintain the uniqueness of this identifier within a model or relative to some other context.
<code>oslc_sysmlv2:element_Documentation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Documentation</code>	The Documentation owned by this Element.
<code>oslc_sysmlv2:element_ElementId</code>	Exactly-one	false	unspecified	Either	<code>xsd:string</code>	The globally unique identifier for this Element. This is intended to be set by tooling, and it must not change during the lifetime of the Element.
<code>oslc_sysmlv2:element_IsImpliedIncluded</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether all necessary implied Relationships have been included in the <b>ownedRelationships</b> of this Element. This property may be true, even if there are not actually any <b>ownedRelationships</b> with <b>isImplied = true</b> , meaning that no such Relationships are actually implied for this Element. However, if it is false, then <b>ownedRelationships</b> may <i>not</i> contain any implied Relationships. That is, either <i>all</i> required implied Relationships must be included, or none of them.
<code>oslc_sysmlv2:element_IsLibraryElement</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether this Element is contained in the ownership tree of a library model.
<code>oslc_sysmlv2:element_Name</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The name to be used for this <b>Element</b> during name resolution within its <b>owningNamespace</b> . This is derived using the <b>effectiveName()</b> operation. By default, it is the same as the <b>declaredName</b> , but this is overridden for certain kinds of <b>Elements</b> to compute a <b>name</b> even when the <b>declaredName</b> is null.
<code>oslc_sysmlv2:element_OwnedAnnotation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Annotation</code>	The <b>ownedRelationships</b> of this <b>Element</b> that are <b>Annotations</b> , for which this <b>Element</b> is the <b>annotatedElement</b> .
<code>oslc_sysmlv2:element_OwnedElement</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The Elements owned by this Element, derived as the <b>ownedRelatedElements</b> of the <b>ownedRelationships</b> of this Element.

Standards Track Work Product

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:element_OwnedRelationship</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Relationship</code>	The Relationships for which this Element is the <code>owningRelatedElement</code> .
<code>oslc_sysmlv2:element_Owner</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The owner of this Element, derived as the <code>owningRelatedElement</code> of the <code>owningRelationship</code> of this Element, if any.
<code>oslc_sysmlv2:element_OwningMembership</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:OwningMembership</code>	The <code>owningRelationship</code> of this Element, if that Relationship is a <code>Membership</code> .
<code>oslc_sysmlv2:element_OwningNamespace</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Namespace</code>	The <code>Namespace</code> that owns this Element, which is the <code>membershipOwningNamespace</code> of the <code>owningMembership</code> of this Element, if any.
<code>oslc_sysmlv2:element_OwningRelationship</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Relationship</code>	The Relationship for which this Element is an <code>ownedRelatedElement</code> , if any.
<code>oslc_sysmlv2:element_QualifiedName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The full ownership-qualified name of this Element, represented in a form that is valid according to the KerML textual concrete syntax for qualified names (including use of unrestricted name notation and escaped characters, as necessary). The <code>qualifiedName</code> is null if this Element has no <code>owningNamespace</code> or if there is not a complete ownership chain of named <code>Namespaces</code> from a root <code>Namespace</code> to this Element.
<code>oslc_sysmlv2:element_ShortName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The short name to be used for this Element during name resolution within its <code>owningNamespace</code> . This is derived using the <code>effectiveShortName()</code> operation. By default, it is the same as the <code>declaredShortName</code> , but this is overridden for certain kinds of Elements to compute a <code>shortName</code> even when the <code>declaredName</code> is null.
<code>oslc_sysmlv2:element_TextualRepresentation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:TextualRepresentation</code>	The <code>TextualRepresentations</code> that annotate this Element.

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:feature_ChainingFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <b>Feature</b> that are chained together to determine the values of this <b>Feature</b> , derived from the <b>chainingFeatures</b> of the <b>ownedFeatureChainings</b> of this <b>Feature</b> , in the same order. The values of a <b>Feature</b> with <b>chainingFeatures</b> are the same as values of the last <b>Feature</b> in the chain, which can be found by starting with the values of the first <b>Feature</b> (for each instance of the domain of the original <b>Feature</b> ), then using each of those as domain instances to find the values of the second <b>Feature</b> in <b>chainingFeatures</b> , and so on, to values of the last <b>Feature</b> .
<code>oslc_sysmlv2:feature_Direction</code>	Zero-or-one	false	unspecified	Either	<code>oslc_sysmlv2:FeatureDirectionKind</code>	Indicates how values of this <b>Feature</b> are determined or used (as specified for the <b>FeatureDirectionKind</b> ).
<code>oslc_sysmlv2:feature_EndOwningType</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The <b>Type</b> that is related to this <b>Feature</b> by an <b>EndFeatureMembership</b> in which the <b>Feature</b> is an <b>ownedMemberFeature</b> .
<code>oslc_sysmlv2:feature_FeaturingType</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	<b>Types</b> that feature this <b>Feature</b> , such that any instance in the domain of the <b>Feature</b> must be classified by all of these <b>Types</b> , including at least all the <b>featuringTypes</b> of its <b>typeFeaturings</b> . If the <b>Feature</b> is chained, then the <b>featuringTypes</b> of the first <b>Feature</b> in the chain are also <b>featuringTypes</b> of the chained <b>Feature</b> .
<code>oslc_sysmlv2:feature_IsComposite</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether the <b>Feature</b> is a composite <b>feature</b> of its <b>featuringType</b> . If so, the values of the <b>Feature</b> cannot exist after its featuring instance no longer does.
<code>oslc_sysmlv2:feature_IsDerived</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether the values of this <b>Feature</b> can always be computed from the values of other <b>Features</b> .
<code>oslc_sysmlv2:feature_IsEnd</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether or not the this <b>Feature</b> is an end <b>Feature</b> , requiring a different interpretation of the <b>multiplicity</b> of the <b>Feature</b> .
<code>oslc_sysmlv2:feature_IsNonunique</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	isNonunique.
<code>oslc_sysmlv2:feature_IsOrdered</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether an order exists for the values of this <b>Feature</b> or not.
<code>oslc_sysmlv2:feature_IsPortion</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether the values of this <b>Feature</b> are contained in the space and time of instances of the domain of the <b>Feature</b> and represent the same thing as those instances.
<code>oslc_sysmlv2:feature_IsReadOnly</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether the values of this <b>Feature</b> can change over the lifetime of an instance of the domain.

<code>oslc:instanceShape</code>	Zero-or-one	false	Resource	Reference	<code>oslc:ResourceShape</code>	The URI of a Resource Shape that describes the possible properties, occurrence, value types, allowed values and labels. This shape information is useful in displaying the subject resource as well as guiding clients in performing modifications. Instance shapes may be specific to the authenticated user associated with the request that retrieved the resource, the current state of the resource and other factors and thus should not be cached.
<code>oslc:serviceProvider</code>	Zero-or-many	false	Resource	Reference	<code>oslc:ServiceProvider</code>	A link to the resource's OSLC Service Provider. There may be cases when the subject resource is available from a service provider that implements multiple domain specifications, which could result in multiple values for this property.
<code>oslc:shortTitle</code>	Zero-or-one	false	XMLLiteral	N/A	Unspecified	Short name identifying a resource, often used as an abbreviated identifier for presentation to end-users. <b>SHOULD</b> include only content that is valid inside an XHTML <code>&lt;span&gt;</code> element [sml-62].
<code>rdf:type</code>	Zero-or-many	false	Resource	Reference	<code>rdfs:Class</code>	The resource type URIs.

- **Describes:** <http://open-services.net/ns/sysmlv2#NamespaceImport>
- **Summary:** NamespaceImportShape
- **Description:** A **NamespaceImport** is an Import that imports **Memberships** from its **importedNamespace** into the **importOwningNamespace**. If `isRecursive = false`, then only the visible **Memberships** of the

## Standards Track Work Product

`importedNamespace` are imported. If `isRecursive = true`, then, in addition, `Memberships` are recursively imported from any `ownedMembers` of the `importedNamespace` that are `Namespaces`.

### NamespaceImport Properties

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>dcterms:contributor</code>	Zero-or-many	false	AnyResource	Either	<code>oslc:Any</code>	Contributor or contributors to the resource. It is likely that the target resource will be a foaf:Person but that is not necessarily the case.
<code>dcterms:created</code>	Zero-or-one	false	dateTime	N/A	Unspecified	Timestamp of resource creation.
<code>dcterms:creator</code>	Zero-or-many	false	AnyResource	Either	<code>oslc:Any</code>	Creator or creators of the resource. It is likely that the target resource will be a foaf:Person but that is not necessarily the case.
<code>dcterms:description</code>	Zero-or-one	false	XMLLiteral	N/A	Unspecified	Descriptive text about resource represented as rich text in XHTML content.
<code>dcterms:identifier</code>	Exactly-one	true	string	N/A	Unspecified	A unique identifier for a resource. Typically read-only and assigned by the service provider when a resource is created. Not typically intended for end-user display.
<code>dcterms:modified</code>	Zero-or-one	false	dateTime	N/A	Unspecified	Timestamp of latest resource modification.
<code>dcterms:source</code>	Zero-or-one	false	Resource	Reference	<code>oslc:Any</code>	The resource URI a client can perform a get on to obtain the original non-OSLC AM formatted resource that was used to create this resource. The source resource is usually a binary or proprietary format that the service provider can consume and convert into an OSLC AM format. The service may use content negotiation with the Accept header to obtain the desired content type.
<code>dcterms:title</code>	Exactly-one	false	XMLLiteral	N/A	Unspecified	Title of the resource represented as rich text in XHTML content.
<code>dcterms:type</code>	Zero-or-many	false	string	N/A	Unspecified	A short string representation for the type, for example 'Car'.
<code>jazz_am:derives</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The resource that derives from another resource originated from or is significantly influenced by the referenced resource. For example a model element derives from a requirement.
<code>jazz_am:elaborates</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	This resource elaborates the referenced resource.

Standards Track Work Product

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>jazz_am:external</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	A generic link from a resource to an external web page.
<code>jazz_am:refine</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The target is a refinement of the source. (e.g. a use case scenario might be a refinement of a textual requirement that describes the interaction).
<code>jazz_am:satisfy</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The model element satisfies the requirement (e.g. The use case satisfies a functional requirement).
<code>jazz_am:trace</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The model element has a trace to the requirement (e.g. An attribute or its value are traced to a requirement).
<code>oslc_sysmlv2:element_AliasIds</code>	Zero-or-many	false	unspecified	Either	<code>xsd:string</code>	Various alternative identifiers for this Element. Generally, these will be set by tools.
<code>oslc_sysmlv2:element_DeclaredName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The declared name of this <b>Element</b> .
<code>oslc_sysmlv2:element_DeclaredShortName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	An optional alternative name for the <b>Element</b> that is intended to be shorter or in some way more succinct than its primary <b>name</b> . It may act as a modeler-specified identifier for the <b>Element</b> , though it is then the responsibility of the modeler to maintain the uniqueness of this identifier within a model or relative to some other context.
<code>oslc_sysmlv2:element_Documentation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Documentation</code>	The Documentation owned by this Element.
<code>oslc_sysmlv2:element_ElementId</code>	Exactly-one	false	unspecified	Either	<code>xsd:string</code>	The globally unique identifier for this Element. This is intended to be set by tooling, and it must not change during the lifetime of the Element.

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:element_IsImpliedIncluded</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether all necessary implied Relationships have been included in the <code>ownedRelationships</code> of this Element. This property may be true, even if there are not actually any <code>ownedRelationships</code> with <code>isImplied = true</code> , meaning that no such Relationships are actually implied for this Element. However, if it is false, then <code>ownedRelationships</code> may <i>not</i> contain any implied Relationships. That is, either <i>all</i> required implied Relationships must be included, or none of them.
<code>oslc_sysmlv2:element_IsLibraryElement</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether this Element is contained in the ownership tree of a library model.
<code>oslc_sysmlv2:element_Name</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The name to be used for this Element during name resolution within its <code>owningNamespace</code> . This is derived using the <code>effectiveName()</code> operation. By default, it is the same as the <code>declaredName</code> , but this is overridden for certain kinds of Elements to compute a name even when the <code>declaredName</code> is null.
<code>oslc_sysmlv2:element_OwnedAnnotation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Annotation</code>	The <code>ownedRelationships</code> of this Element that are Annotations, for which this Element is the <code>annotatedElement</code> .
<code>oslc_sysmlv2:element_OwnedElement</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The Elements owned by this Element, derived as the <code>ownedRelatedElements</code> of the <code>ownedRelationships</code> of this Element.
<code>oslc_sysmlv2:element_OwnedRelationship</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Relationship</code>	The Relationships for which this Element is the <code>owningRelatedElement</code> .
<code>oslc_sysmlv2:element_Owner</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The owner of this Element, derived as the <code>owningRelatedElement</code> of the <code>owningRelationship</code> of this Element, if any.
<code>oslc_sysmlv2:element_OwningMembership</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:OwningMembership</code>	The <code>owningRelationship</code> of this Element, if that Relationship is a Membership.
<code>oslc_sysmlv2:element_OwningNamespace</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Namespace</code>	The Namespace that owns this Element, which is the <code>membershipOwningNamespace</code> of the <code>owningMembership</code> of this Element, if any.
<code>oslc_sysmlv2:element_OwningRelationship</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Relationship</code>	The Relationship for which this Element is an <code>ownedRelatedElement</code> , if any.

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:element_QualifiedName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The full ownership-qualified name of this <b>Element</b> , represented in a form that is valid according to the KerML textual concrete syntax for qualified names (including use of unrestricted name notation and escaped characters, as necessary). The <code>qualifiedName</code> is null if this <b>Element</b> has no <code>owningNamespace</code> or if there is not a complete ownership chain of named <b>Namespaces</b> from a root <b>Namespace</b> to this <b>Element</b> .
<code>oslc_sysmlv2:element_ShortName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The short name to be used for this <b>Element</b> during name resolution within its <code>owningNamespace</code> . This is derived using the <code>effectiveShortName()</code> operation. By default, it is the same as the <code>declaredShortName</code> , but this is overridden for certain kinds of <b>Elements</b> to compute a <code>shortName</code> even when the <code>declaredName</code> is null.
<code>oslc_sysmlv2:element_TextualRepresentation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:TextualRepresentation</code>	The <b>TextualRepresentations</b> that annotate this <b>Element</b> .
<code>oslc_sysmlv2:import_ImportedElement</code>	Exactly-one	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The effectively imported <b>Element</b> for this Import. For a <b>MembershipImport</b> , this is the <code>memberElement</code> of the <code>importedMembership</code> . For a <b>NamespaceImport</b> , it is the <code>importedNamespace</code> .
<code>oslc_sysmlv2:import_ImportOwningNamespace</code>	Exactly-one	false	Resource	Either	<code>oslc_sysmlv2:Namespace</code>	The <b>Namespace</b> into which Memberships are imported by this Import, which must be the <code>owningRelatedElement</code> of the Import.
<code>oslc_sysmlv2:import_IsImportAll</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether to import memberships without regard to declared visibility.
<code>oslc_sysmlv2:import_IsRecursive</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether to recursively import Memberships from visible, owned sub-Namespaces.
<code>oslc_sysmlv2:import_Visibility</code>	Exactly-one	false	unspecified	Either	<code>oslc_sysmlv2:VisibilityKind</code>	The visibility level of the imported <b>members</b> from this Import relative to the <code>importOwningNamespace</code> .
<code>oslc_sysmlv2:namespaceImport_ImportedNamespace</code>	Exactly-one	false	Resource	Either	<code>oslc_sysmlv2:Namespace</code>	The <b>Namespace</b> whose visible <b>Memberships</b> are imported by this <b>NamespaceImport</b> .
<code>oslc_sysmlv2:relationship_IsImplied</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether this Relationship was generated by tooling to meet semantic rules, rather than being directly created by a modeler.
<code>oslc_sysmlv2:relationship_OwnedRelatedElement</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The <code>relatedElements</code> of this Relationship that are owned by the Relationship.

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:relationship_OwningRelatedElement</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The <code>relatedElement</code> of this Relationship that owns the Relationship, if any.
<code>oslc_sysmlv2:relationship_RelatedElement</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The Elements that are related by this Relationship, derived as the union of the <code>source</code> and <code>target</code> Elements of the Relationship.
<code>oslc_sysmlv2:relationship_Source</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The <code>relatedElements</code> from which this Relationship is considered to be directed..
<code>oslc_sysmlv2:relationship_Target</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The <code>relatedElements</code> to which this Relationship is considered to be directed.
<code>oslc:instanceShape</code>	Zero-or-one	false	Resource	Reference	<code>oslc:ResourceShape</code>	The URI of a Resource Shape that describes the possible properties, occurrence, value types, allowed values and labels. This shape information is useful in displaying the subject resource as well as guiding clients in performing modifications. Instance shapes may be specific to the authenticated user associated with the request that retrieved the resource, the current state of the resource and other factors and thus should not be cached.
<code>oslc:serviceProvider</code>	Zero-or-many	false	Resource	Reference	<code>oslc:ServiceProvider</code>	A link to the resource's OSLC Service Provider. There may be cases when the subject resource is available from a service provider that implements multiple domain specifications, which could result in multiple values for this property.
<code>oslc:shortTitle</code>	Zero-or-one	false	XMLLiteral	N/A	Unspecified	Short name identifying a resource, often used as an abbreviated identifier for presentation to end-users. <b>SHOULD</b> include only content that is valid inside an XHTML <code>&lt;span&gt;</code> element [sml-63].
<code>rdf:type</code>	Zero-or-many	false	Resource	Reference	<code>rdfs:Class</code>	The resource type URIs.

- **Describes:** <http://open-services.net/ns/sysmlv2#FeatureReferenceExpression>
- **Summary:** FeatureReferenceExpressionShape
- **Description:** A `FeatureReferenceExpression` is an `Expression` whose `result` is bound to a `referent Feature`.

By default, it is the same as the <code>declaredName</code> , but this is overridden for certain kinds of <code>Elements</code> to compute a <code>name</code> even when the <code>declaredName</code> is null.
<code>oslc_sysmlv2:element_OwnedAnnotation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Annotation</code>	The <code>ownedRelationships</code> of this <code>Element</code> that are <code>Annotations</code> , for which this <code>Element</code> is the <code>annotatedElement</code> .
<code>oslc_sysmlv2:element_OwnedElement</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The Elements owned by this Element, derived as the <code>ownedRelatedElements</code> of the <code>ownedRelationships</code> of this Element.
<code>oslc_sysmlv2:element_OwnedRelationship</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Relationship</code>	The Relationships for which this Element is the <code>owningRelatedElement</code> .
<code>oslc_sysmlv2:element_Owner</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The owner of this Element, derived as the <code>owningRelatedElement</code> of the <code>owningRelationship</code> of this Element, if any.
<code>oslc_sysmlv2:element_OwningMembership</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:OwningMembership</code>	The <code>owningRelationship</code> of this <code>Element</code> , if that <code>Relationship</code> is a <code>Membership</code> .
<code>oslc_sysmlv2:element_OwningNamespace</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Namespace</code>	The <code>Namespace</code> that owns this <code>Element</code> , which is the <code>membershipOwningNamespace</code> of the <code>owningMembership</code> of this <code>Element</code> , if any.
<code>oslc_sysmlv2:element_OwningRelationship</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Relationship</code>	The Relationship for which this Element is an <code>ownedRelatedElement</code> , if any.

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:element_QualifiedName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The full ownership-qualified name of this <b>Element</b> , represented in a form that is valid according to the KerML textual concrete syntax for qualified names (including use of unrestricted name notation and escaped characters, as necessary). The <code>qualifiedName</code> is null if this <b>Element</b> has no <code>owningNamespace</code> or if there is not a complete ownership chain of named <b>Namespaces</b> from a root <b>Namespace</b> to this <b>Element</b> .
<code>oslc_sysmlv2:element_ShortName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The short name to be used for this <b>Element</b> during name resolution within its <code>owningNamespace</code> . This is derived using the <code>effectiveShortName()</code> operation. By default, it is the same as the <code>declaredShortName</code> , but this is overridden for certain kinds of <b>Elements</b> to compute a <code>shortName</code> even when the <code>declaredName</code> is null.
<code>oslc_sysmlv2:element_TextualRepresentation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:TextualRepresentation</code>	The <b>TextualRepresentations</b> that annotate this <b>Element</b> .
<code>oslc_sysmlv2:expression_Function</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Function</code>	The <b>Function</b> that types this <b>Expression</b> .
<code>oslc_sysmlv2:expression_IsModelLevelEvaluable</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether this <b>Expression</b> meets the constraints necessary to be evaluated at <i>model level</i> , that is, using metadata within the model.
<code>oslc_sysmlv2:expression_Result</code>	Exactly-one	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	.
<code>oslc_sysmlv2:feature_ChainingFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <b>Feature</b> that are chained together to determine the values of this <b>Feature</b> , derived from the <code>chainingFeatures</code> of the <code>ownedFeatureChainings</code> of this <b>Feature</b> , in the same order. The values of a <b>Feature</b> with <code>chainingFeatures</code> are the same as values of the last <b>Feature</b> in the chain, which can be found by starting with the values of the first <b>Feature</b> (for each instance of the domain of the original <b>Feature</b> ), then using each of those as domain instances to find the values of the second <b>Feature</b> in <code>chainingFeatures</code> , and so on, to values of the last <b>Feature</b> .
<code>oslc_sysmlv2:feature_Direction</code>	Zero-or-one	false	unspecified	Either	<code>oslc_sysmlv2:FeatureDirectionKind</code>	Indicates how values of this <b>Feature</b> are determined or used (as specified for the <code>FeatureDirectionKind</code> ).

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:feature_EndOwningType</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The <b>Type</b> that is related to this <b>Feature</b> by an <b>EndFeatureMembership</b> in which the <b>Feature</b> is an <b>ownedMemberFeature</b> .
<code>oslc_sysmlv2:feature_FeaturingType</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	<b>Types</b> that feature this <b>Feature</b> , such that any instance in the domain of the <b>Feature</b> must be classified by all of these <b>Types</b> , including at least all the <b>featuringTypes</b> of its <b>typeFeaturings</b> . If the <b>Feature</b> is chained, then the <b>featuringTypes</b> of the first <b>Feature</b> in the chain are also <b>featuringTypes</b> of the chained <b>Feature</b> .
<code>oslc_sysmlv2:feature_IsComposite</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether the <b>Feature</b> is a composite <b>feature</b> of its <b>featuringType</b> . If so, the values of the <b>Feature</b> cannot exist after its featuring instance no longer does.
<code>oslc_sysmlv2:feature_IsDerived</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether the values of this <b>Feature</b> can always be computed from the values of other <b>Features</b> .
<code>oslc_sysmlv2:feature_IsEnd</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether or not the this <b>Feature</b> is an end <b>Feature</b> , requiring a different interpretation of the <b>multiplicity</b> of the <b>Feature</b> .
<code>oslc_sysmlv2:feature_IsNonunique</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	isNonunique.
<code>oslc_sysmlv2:feature_IsOrdered</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether an order exists for the values of this <b>Feature</b> or not.
<code>oslc_sysmlv2:feature_IsPortion</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether the values of this <b>Feature</b> are contained in the space and time of instances of the domain of the <b>Feature</b> and represent the same thing as those instances.
<code>oslc_sysmlv2:feature_IsReadOnly</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether the values of this <b>Feature</b> can change over the lifetime of an instance of the domain.
<code>oslc_sysmlv2:feature_IsUnique</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether or not values for this <b>Feature</b> must have no duplicates or not.
<code>oslc_sysmlv2:feature_OwnedFeatureChaining</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:FeatureChaining</code>	The <b>ownedRelationships</b> of this <b>Feature</b> that are <b>FeatureChainings</b> , for which the <b>Feature</b> will be the <b>featureChained</b> .
<code>oslc_sysmlv2:feature_OwnedFeatureInverting</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:FeatureInverting</code>	The <b>ownedRelationships</b> of this <b>Feature</b> that are <b>FeatureInvertings</b> and for which the <b>Feature</b> is the <b>featureInverted</b> .

<code>oslc_sysmlv2:feature_OwnedReferenceSubsetting</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:ReferenceSubsetting</code>	The one <code>ownedSubsetting</code> of this <code>Feature</code> , if any, that is a <code>ReferenceSubsetting</code> , for which the <code>Feature</code> is the <code>referencingFeature</code> .
<code>oslc_sysmlv2:feature_OwnedSubsetting</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Subsetting</code>	The <code>ownedSpecializations</code> of this <code>Feature</code> that are <code>Subsettings</code> , for which the <code>Feature</code> is the <code>subsettingFeature</code> .
<code>oslc_sysmlv2:feature_OwnedTypeFeaturing</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:TypeFeaturing</code>	The <code>ownedRelationships</code> of this <code>Feature</code> that are <code>TypeFeaturings</code> and for which the <code>Feature</code> is the <code>featureOfType</code> .
<code>oslc_sysmlv2:feature_OwnedTyping</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:FeatureTyping</code>	The <code>ownedSpecializations</code> of this <code>Feature</code> that are <code>FeatureTypings</code> , for which the <code>Feature</code> is the <code>typedFeature</code> .
<code>oslc_sysmlv2:feature_OwningFeatureMembership</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:FeatureMembership</code>	The <code>FeatureMembership</code> that owns this <code>Feature</code> as an <code>ownedMemberFeature</code> , determining its <code>owningType</code> .
<code>oslc_sysmlv2:feature_OwningType</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The <code>Type</code> that is the <code>owningType</code> of the <code>owningFeatureMembership</code> of this <code>Feature</code> .
<code>oslc_sysmlv2:feature_Type</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	<code>Types</code> that restrict the values of this <code>Feature</code> , such that the values must be instances of all the <code>types</code> . The types of a <code>Feature</code> are derived from its <code>typings</code> and the <code>types</code> of its <code>subsettings</code> . If the <code>Feature</code> is chained, then the <code>types</code> of the last <code>Feature</code> in the chain are also <code>types</code> of the chained <code>Feature</code> .
<code>oslc_sysmlv2:featureReferenceExpression_Referent</code>	Exactly-one	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <code>Feature</code> that is referenced by this <code>FeatureReferenceExpression</code> , which is its first non-parameter member.
<code>oslc_sysmlv2:namespace_ImportedMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Membership</code>	The <code>Memberships</code> in this <code>Namespace</code> that result from the <code>ownedImports</code> of this <code>Namespace</code> .
<code>oslc_sysmlv2:namespace_Member</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The set of all member <code>Elements</code> of this <code>Namespace</code> , which are the <code>memberElements</code> of all <code>memberships</code> of the <code>Namespace</code> .

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:namespace_Membership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Membership</code>	All <b>Memberships</b> in this <b>Namespace</b> , including (at least) the union of <b>ownedMemberships</b> and <b>importedMemberships</b> .
<code>oslc_sysmlv2:namespace_OwnedImport</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Import</code>	The <b>ownedRelationships</b> of this <b>Namespace</b> that are <b>Imports</b> , for which the <b>Namespace</b> is the <b>importOwningNamespace</b> .
<code>oslc_sysmlv2:namespace_OwnedMember</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The owned <b>members</b> of this <b>Namespace</b> , which are the <b>ownedMemberElements</b> of the <b>ownedMemberships</b> of the ..
<code>oslc_sysmlv2:namespace_OwnedMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Membership</code>	The <b>ownedRelationships</b> of this <b>Namespace</b> that are <b>Memberships</b> , for which the <b>Namespace</b> is the <b>membershipOwningNamespace</b> .
<code>oslc_sysmlv2:step_Behavior</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Behavior</code>	The <b>Behaviors</b> that type this <b>Step</b> .
<code>oslc_sysmlv2:step_Parameter</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <b>parameters</b> of this <b>Step</b> , which are defined as its <b>directedFeatures</b> , whose values are passed into and/or out of a performance of the <b>Step</b> .
<code>oslc_sysmlv2:type_DifferencingType</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The interpretations of a <b>Type</b> with <b>differencingTypes</b> are asserted to be those of the first of those <b>Types</b> , but not including those of the remaining <b>Types</b> . For example, a <b>Classifier</b> might be the difference of a <b>Classifier</b> for people and another for people of a particular nationality, leaving people who are not of that nationality. Similarly, a feature of people might be the difference between a feature for their children and a <b>Classifier</b> for people of a particular sex, identifying their children not of that sex (because the interpretations of the children <b>Feature</b> that identify those of that sex are also interpretations of the <b>Classifier</b> for that sex).
<code>oslc_sysmlv2:type_DirectedFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <b>features</b> of this <b>Type</b> that have a non-null <b>direction</b> .
<code>oslc_sysmlv2:type_EndFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All <b>features</b> of this <b>Type</b> with <b>isEnd = true</b> .

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:type_Feature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <code>ownedMemberFeatures</code> of the <code>featureMemberships</code> of this <code>Type</code> .
<code>oslc_sysmlv2:type_FeatureMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:FeatureMembership</code>	The <code>FeatureMemberships</code> for <code>features</code> of this <code>Type</code> , which include all <code>ownedFeatureMemberships</code> and those <code>inheritedMemberships</code> that are <code>FeatureMemberships</code> (but does <i>not</i> include any <code>importedMemberships</code> ).
<code>oslc_sysmlv2:type_InheritedFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All the <code>memberFeatures</code> of the <code>inheritedMemberships</code> of this <code>Type</code> that are <code>FeatureMemberships</code> .
<code>oslc_sysmlv2:type_InheritedMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Membership</code>	All <code>Memberships</code> inherited by this <code>Type</code> via <code>Specialization</code> or <code>Conjugation</code> . These are included in the derived union for the <code>memberships</code> of the <code>Type</code> .
<code>oslc_sysmlv2:type_Input</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All <code>features</code> related to this <code>Type</code> by <code>FeatureMemberships</code> that have <code>direction in or inout..</code>
<code>oslc_sysmlv2:type_IntersectingType</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The interpretations of a <code>Type</code> with <code>intersectingTypes</code> are asserted to be those in common among the <code>intersectingTypes</code> , which are the <code>Types</code> derived from the <code>intersectingType</code> of the <code>ownedIntersectings</code> of this <code>Type</code> . For example, a <code>Classifier</code> might be an intersection of <code>Classifiers</code> for people of a particular sex and of a particular nationality. Similarly, a feature for people's children of a particular sex might be the intersection of a <code>Feature</code> for their children and a <code>Classifier</code> for people of that sex (because the interpretations of the children <code>Feature</code> that identify those of that sex are also interpretations of the <code>Classifier</code> for that sex).
<code>oslc_sysmlv2:type_IsAbstract</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Indicates whether instances of this <code>Type</code> must also be instances of at least one of its specialized <code>Types</code> .
<code>oslc_sysmlv2:type_IsConjugated</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Indicates whether this <code>Type</code> has an <code>ownedConjugator</code> .
<code>oslc_sysmlv2:type_IsSufficient</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether all things that meet the classification conditions of this <code>Type</code> must be classified by the <code>Type</code> .

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:type_Multiplicity</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Multiplicity</code>	An <b>ownedMember</b> of this <b>Type</b> that is a <b>Multiplicity</b> , which constrains the cardinality of the <b>Type</b> . If there is no such <b>ownedMember</b> , then the cardinality of this <b>Type</b> is constrained by all the <b>Multiplicity</b> constraints applicable to any direct supertypes.
<code>oslc_sysmlv2:type_Output</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All <b>features</b> related to this <b>Type</b> by <b>FeatureMemberships</b> that have <b>direction out or inout</b> .
<code>oslc_sysmlv2:type_OwnedConjugator</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Conjugation</code>	A <b>Conjugation</b> owned by this <b>Type</b> for which the <b>Type</b> is the <b>originalType</b> .
<code>oslc_sysmlv2:type_OwnedDifferencing</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Differencing</code>	The <b>ownedRelationships</b> of this <b>Type</b> that are <b>Differencings</b> , having this <b>Type</b> as their <b>typeDifferenced</b> .
<code>oslc_sysmlv2:type_OwnedDisjoining</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Disjoining</code>	The <b>ownedRelationships</b> of this <b>Type</b> that are <b>Disjoinings</b> , for which the <b>Type</b> is the <b>typeDisjoined Type</b> .
<code>oslc_sysmlv2:type_OwnedEndFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All <b>endFeatures</b> of this <b>Type</b> that are <b>ownedFeatures</b> .
<code>oslc_sysmlv2:type_OwnedFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <b>ownedMemberFeatures</b> of the <b>ownedFeatureMemberships</b> of this <b>Type</b> .
<code>oslc_sysmlv2:type_OwnedFeatureMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:FeatureMembership</code>	The <b>ownedMemberships</b> of this <b>Type</b> that are <b>FeatureMemberships</b> , for which the <b>Type</b> is the <b>owningType</b> . Each such <b>FeatureMembership</b> identifies an <b>ownedFeature</b> of the <b>Type</b> .
<code>oslc_sysmlv2:type_OwnedIntersecting</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Intersecting</code>	The <b>ownedRelationships</b> of this <b>Type</b> that are <b>Intersectings</b> , have the <b>Type</b> as their <b>typeIntersected</b> .
<code>oslc_sysmlv2:type_OwnedSpecialization</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Specialization</code>	The <b>ownedRelationships</b> of this <b>Type</b> that are <b>Specializations</b> , for which the <b>Type</b> is the <b>specific Type</b> .
<code>oslc_sysmlv2:type_OwnedUnioning</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Unioning</code>	The <b>ownedRelationships</b> of this <b>Type</b> that are <b>Unionings</b> , having the <b>Type</b> as their <b>typeUnioned</b> .

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:type_UnioningType</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The interpretations of a <b>Type</b> with <b>unioningTypes</b> are asserted to be the same as those of all the <b>unioningTypes</b> together, which are the <b>Types</b> derived from the <b>unioningType</b> of the <b>ownedUnionings</b> of this <b>Type</b> . For example, a <b>Classifier</b> for people might be the union of <b>Classifiers</b> for all the sexes. Similarly, a feature for people's children might be the union of features dividing them in the same ways as people in general.
<code>oslc:instanceShape</code>	Zero-or-one	false	Resource	Reference	<code>oslc:ResourceShape</code>	The URI of a Resource Shape that describes the possible properties, occurrence, value types, allowed values and labels. This shape information is useful in displaying the subject resource as well as guiding clients in performing modifications. Instance shapes may be specific to the authenticated user associated with the request that retrieved the resource, the current state of the resource and other factors and thus should not be cached.
<code>oslc:serviceProvider</code>	Zero-or-many	false	Resource	Reference	<code>oslc:ServiceProvider</code>	A link to the resource's OSLC Service Provider. There may be cases when the subject resource is available from a service provider that implements multiple domain specifications, which could result in multiple values for this property.
<code>oslc:shortTitle</code>	Zero-or-one	false	XMLLiteral	N/A	Unspecified	Short name identifying a resource, often used as an abbreviated identifier for presentation to end-users. <b>SHOULD</b> include only content that is valid inside an XHTML <code>&lt;span&gt;</code> element [sml-64].
<code>rdf:type</code>	Zero-or-many	false	Resource	Reference	<code>rdfs:Class</code>	The resource type URIs.

- **Describes:** <http://open-services.net/ns/sysmlv2#AcceptActionUsage>
- **Summary:** AcceptActionUsageShape
- **Description:** An **AcceptActionUsage** is an **ActionUsage** that specifies the acceptance of an **incomingTransfer** from the **Occurrence** given by the result of its **receiverArgument** Expression. (If no **receiverArgument** is provided, the default is the **this** context of the **AcceptActionUsage**.) The payload of the accepted **Transfer** is output on its **payloadParameter**. Which **Transfers** may be accepted is determined by conformance to the typing and (potentially) binding of the **payloadParameter**.

#### AcceptActionUsage Properties

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description

Standards Track Work Product

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>dcterms:contributor</code>	Zero-or-many	false	AnyResource	Either	<code>oslc:Any</code>	Contributor or contributors to the resource. It is likely that the target resource will be a foaf:Person but that is not necessarily the case.
<code>dcterms:created</code>	Zero-or-one	false	dateTime	N/A	Unspecified	Timestamp of resource creation.
<code>dcterms:creator</code>	Zero-or-many	false	AnyResource	Either	<code>oslc:Any</code>	Creator or creators of the resource. It is likely that the target resource will be a foaf:Person but that is not necessarily the case.
<code>dcterms:description</code>	Zero-or-one	false	XMLLiteral	N/A	Unspecified	Descriptive text about resource represented as rich text in XHTML content.
<code>dcterms:identifier</code>	Exactly-one	true	string	N/A	Unspecified	A unique identifier for a resource. Typically read-only and assigned by the service provider when a resource is created. Not typically intended for end-user display.
<code>dcterms:modified</code>	Zero-or-one	false	dateTime	N/A	Unspecified	Timestamp of latest resource modification.
<code>dcterms:source</code>	Zero-or-one	false	Resource	Reference	<code>oslc:Any</code>	The resource URI a client can perform a get on to obtain the original non-OSLC AM formatted resource that was used to create this resource. The source resource is usually a binary or proprietary format that the service provider can consume and convert into an OSLC AM format. The service may use content negotiation with the Accept header to obtain the desired content type.
<code>dcterms:title</code>	Exactly-one	false	XMLLiteral	N/A	Unspecified	Title of the resource represented as rich text in XHTML content.
<code>dcterms:type</code>	Zero-or-many	false	string	N/A	Unspecified	A short string representation for the type, for example 'Car'.
<code>jazz_am:derives</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The resource that derives from another resource originated from or is significantly influenced by the referenced resource. For example a model element derives from a requirement.
<code>jazz_am:elaborates</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	This resource elaborates the referenced resource.

Standards Track Work Product

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>jazz_am:external</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	A generic link from a resource to an external web page.
<code>jazz_am:refine</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The target is a refinement of the source. (e.g. a use case scenario might be a refinement of a textual requirement that describes the interaction).
<code>jazz_am:satisfy</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The model element satisfies the requirement (e.g. The use case satisfies a functional requirement).
<code>jazz_am:trace</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The model element has a trace to the requirement (e.g. An attribute or its value are traced to a requirement).
<code>oslc_sysmlv2:acceptActionUsage_PayloadArgument</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Expression</code>	An <b>Expression</b> whose <b>result</b> is bound to the <b>payload parameter</b> of this <b>AcceptActionUsage</b> . If provided, the <b>AcceptActionUsage</b> will only accept a <b>Transfer</b> with exactly this <b>payload</b> .
<code>oslc_sysmlv2:acceptActionUsage_PayloadParameter</code>	Exactly-one	false	Resource	Either	<code>oslc_sysmlv2:ReferenceUsage</code>	The <b>nestedReference</b> of this <b>AcceptActionUsage</b> that redefines the <b>payload output parameter</b> of the base <b>AcceptActionUsage</b> <b>AcceptAction</b> from the Systems Model Library.
<code>oslc_sysmlv2:acceptActionUsage_ReceiverArgument</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Expression</code>	An <b>Expression</b> whose <b>result</b> is bound to the <b>receiver input parameter</b> of this <b>AcceptActionUsage</b> .
<code>oslc_sysmlv2:actionUsage_ActionDefinition</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Behavior</code>	The <b>Behaviors</b> that are the <b>types</b> of this <b>ActionUsage</b> . Nominally, these would be <b>ActionDefinitions</b> , but other kinds of Kernel <b>Behaviors</b> are also allowed, to permit use of <b>Behaviors</b> from the Kernel Model Libraries.
<code>oslc_sysmlv2:element_AliasIds</code>	Zero-or-many	false	unspecified	Either	<code>xsd:string</code>	Various alternative identifiers for this Element. Generally, these will be set by tools.
<code>oslc_sysmlv2:element_DeclaredName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The declared name of this <b>Element</b> .

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:element_DeclaredShortName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	An optional alternative name for the <b>Element</b> that is intended to be shorter or in some way more succinct than its primary <b>name</b> . It may act as a modeler-specified identifier for the <b>Element</b> , though it is then the responsibility of the modeler to maintain the uniqueness of this identifier within a model or relative to some other context.
<code>oslc_sysmlv2:element_Documentation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Documentation</code>	The Documentation owned by this Element.
<code>oslc_sysmlv2:element_ElementId</code>	Exactly-one	false	unspecified	Either	<code>xsd:string</code>	The globally unique identifier for this Element. This is intended to be set by tooling, and it must not change during the lifetime of the Element.
<code>oslc_sysmlv2:element_IsImpliedIncluded</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether all necessary implied Relationships have been included in the <b>ownedRelationships</b> of this Element. This property may be true, even if there are not actually any <b>ownedRelationships</b> with <b>isImplied = true</b> , meaning that no such Relationships are actually implied for this Element. However, if it is false, then <b>ownedRelationships</b> may <i>not</i> contain any implied Relationships. That is, either <i>all</i> required implied Relationships must be included, or none of them.
<code>oslc_sysmlv2:element_IsLibraryElement</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether this Element is contained in the ownership tree of a library model.
<code>oslc_sysmlv2:element_Name</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The name to be used for this <b>Element</b> during name resolution within its <b>owningNamespace</b> . This is derived using the <b>effectiveName()</b> operation. By default, it is the same as the <b>declaredName</b> , but this is overridden for certain kinds of <b>Elements</b> to compute a <b>name</b> even when the <b>declaredName</b> is null.
<code>oslc_sysmlv2:element_OwnedAnnotation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Annotation</code>	The <b>ownedRelationships</b> of this <b>Element</b> that are <b>Annotations</b> , for which this <b>Element</b> is the <b>annotatedElement</b> .
<code>oslc_sysmlv2:element_OwnedElement</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The Elements owned by this Element, derived as the <b>ownedRelatedElements</b> of the <b>ownedRelationships</b> of this Element.

Standards Track Work Product

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:element_OwnedRelationship</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Relationship</code>	The Relationships for which this Element is the <code>owningRelatedElement</code> .
<code>oslc_sysmlv2:element_Owner</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The owner of this Element, derived as the <code>owningRelatedElement</code> of the <code>owningRelationship</code> of this Element, if any.
<code>oslc_sysmlv2:element_OwningMembership</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:OwningMembership</code>	The <code>owningRelationship</code> of this Element, if that Relationship is a <code>Membership</code> .
<code>oslc_sysmlv2:element_OwningNamespace</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Namespace</code>	The <code>Namespace</code> that owns this Element, which is the <code>membershipOwningNamespace</code> of the <code>owningMembership</code> of this Element, if any.
<code>oslc_sysmlv2:element_OwningRelationship</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Relationship</code>	The Relationship for which this Element is an <code>ownedRelatedElement</code> , if any.
<code>oslc_sysmlv2:element_QualifiedName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The full ownership-qualified name of this Element, represented in a form that is valid according to the KerML textual concrete syntax for qualified names (including use of unrestricted name notation and escaped characters, as necessary). The <code>qualifiedName</code> is null if this Element has no <code>owningNamespace</code> or if there is not a complete ownership chain of named <code>Namespaces</code> from a root <code>Namespace</code> to this Element.
<code>oslc_sysmlv2:element_ShortName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The short name to be used for this Element during name resolution within its <code>owningNamespace</code> . This is derived using the <code>effectiveShortName()</code> operation. By default, it is the same as the <code>declaredShortName</code> , but this is overridden for certain kinds of Elements to compute a <code>shortName</code> even when the <code>declaredName</code> is null.
<code>oslc_sysmlv2:element_TextualRepresentation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:TextualRepresentation</code>	The <code>TextualRepresentations</code> that annotate this Element.

<code>oslc_sysmlv2:usage_NestedUseCase</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:UseCaseUsage</code>	The <code>UseCaseUsages</code> that are <code>nestedUsages</code> of this <code>Usage</code> .
<code>oslc_sysmlv2:usage_NestedVerificationCase</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:VerificationCaseUsage</code>	The <code>VerificationCaseUsages</code> that are <code>nestedUsages</code> of this <code>Usage</code> .
<code>oslc_sysmlv2:usage_NestedView</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:ViewUsage</code>	The <code>ViewUsages</code> that are <code>nestedUsages</code> of this <code>Usage</code> .
<code>oslc_sysmlv2:usage_NestedViewpoint</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:ViewpointUsage</code>	The <code>ViewpointUsages</code> that are <code>nestedUsages</code> of this <code>Usage</code> .
<code>oslc_sysmlv2:usage_OwningDefinition</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Definition</code>	The <code>Definition</code> that owns this <code>Usage</code> (if any).
<code>oslc_sysmlv2:usage_OwningUsage</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Usage</code>	The <code>Usage</code> in which this <code>Usage</code> is nested (if any).
<code>oslc_sysmlv2:usage_Usage</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Usage</code>	The <code>Usages</code> that are <code>features</code> of this <code>Usage</code> (not necessarily owned).
<code>oslc_sysmlv2:usage_Variant</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Usage</code>	The <code>Usages</code> which represent the variants of this <code>Usage</code> as a variation point <code>Usage</code> , if <code>isVariation = true</code> . If <code>isVariation = false</code> , then there must be no <code>variants</code> .
<code>oslc_sysmlv2:usage_VariantMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:VariantMembership</code>	The <code>ownedMemberships</code> of this <code>Usage</code> that are <code>VariantMemberships</code> . If <code>isVariation = true</code> , then this must be all <code>memberships</code> of the <code>Usage</code> . If <code>isVariation = false</code> , then <code>variantMembership</code> must be empty.

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc:instanceShape</code>	Zero-or-one	false	Resource	Reference	<code>oslc:ResourceShape</code>	The URI of a Resource Shape that describes the possible properties, occurrence, value types, allowed values and labels. This shape information is useful in displaying the subject resource as well as guiding clients in performing modifications. Instance shapes may be specific to the authenticated user associated with the request that retrieved the resource, the current state of the resource and other factors and thus should not be cached.
<code>oslc:serviceProvider</code>	Zero-or-many	false	Resource	Reference	<code>oslc:ServiceProvider</code>	A link to the resource's OSLC Service Provider. There may be cases when the subject resource is available from a service provider that implements multiple domain specifications, which could result in multiple values for this property.
<code>oslc:shortTitle</code>	Zero-or-one	false	XMLLiteral	N/A	Unspecified	Short name identifying a resource, often used as an abbreviated identifier for presentation to end-users. <b>SHOULD</b> include only content that is valid inside an XHTML <code>&lt;span&gt;</code> element [sml-65].
<code>rdf:type</code>	Zero-or-many	false	Resource	Reference	<code>rdfs:Class</code>	The resource type URIs.

- **Describes:** <http://open-services.net/ns/sysmlv2#BindingConnector>
- **Summary:** BindingConnectorShape
- **Description:** A `BindingConnector` is a binary `Connector` that requires its `relatedFeatures` to identify the same things (have the same values).

**BindingConnector Properties**

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>dcterms:contributor</code>	Zero-or-many	false	AnyResource	Either	<code>oslc:Any</code>	Contributor or contributors to the resource. It is likely that the target resource will be a foaf:Person but that is not necessarily the case.
<code>dcterms:created</code>	Zero-or-one	false	dateTime	N/A	Unspecified	Timestamp of resource creation.
<code>dcterms:creator</code>	Zero-or-many	false	AnyResource	Either	<code>oslc:Any</code>	Creator or creators of the resource. It is likely that the target resource will be a foaf:Person but that is not necessarily the case.

Standards Track Work Product

Prefixes Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>dcterms:description</code>	Zero-or-one	false	XMLLiteral	N/A	Unspecified	Descriptive text about resource represented as rich text in XHTML content.
<code>dcterms:identifier</code>	Exactly-one	true	string	N/A	Unspecified	A unique identifier for a resource. Typically read-only and assigned by the service provider when a resource is created. Not typically intended for end-user display.
<code>dcterms:modified</code>	Zero-or-one	false	dateTime	N/A	Unspecified	Timestamp of latest resource modification.
<code>dcterms:source</code>	Zero-or-one	false	Resource	Reference	<code>oslc:Any</code>	The resource URI a client can perform a get on to obtain the original non-OSLC AM formatted resource that was used to create this resource. The source resource is usually a binary or proprietary format that the service provider can consume and convert into an OSLC AM format. The service may use content negotiation with the Accept header to obtain the desired content type.
<code>dcterms:title</code>	Exactly-one	false	XMLLiteral	N/A	Unspecified	Title of the resource represented as rich text in XHTML content.
<code>dcterms:type</code>	Zero-or-many	false	string	N/A	Unspecified	A short string representation for the type, for example 'Car'.
<code>jazz_am:derives</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The resource that derives from another resource originated from or is significantly influenced by the referenced resource. For example a model element derives from a requirement.
<code>jazz_am:elaborates</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	This resource elaborates the referenced resource.
<code>jazz_am:external</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	A generic link from a resource to an external web page.
<code>jazz_am:refine</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The target is a refinement of the source. (e.g. a use case scenario might be a refinement of a textual requirement that describes the interaction).
<code>jazz_am:satisfy</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The model element satisfies the requirement (e.g. The use case satisfies a functional requirement).

Standards Track Work Product

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>jazz_am:trace</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The model element has a trace to the requirement (e.g. An attribute or its value are traced to a requirement).
<code>oslc_sysmlv2:connector_Association</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Association</code>	The <b>Associations</b> that type the <b>Connector</b> .
<code>oslc_sysmlv2:connector_ConnectorEnd</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <b>endFeatures</b> of a <b>Connector</b> , which redefine the <b>endFeatures</b> of the <b>associations</b> of the <b>Connector</b> . The <b>connectorEnds</b> determine via <b>ReferenceSubsetting Relationships</b> which <b>Features</b> are related by the <b>Connector</b> .
<code>oslc_sysmlv2:connector_RelatedFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <b>Features</b> that are related by this <b>Connector</b> considered as a <b>Relationship</b> and that restrict the links it identifies, given by the referenced <b>Features</b> of the <b>connectorEnds</b> of the <b>Connector</b> .
<code>oslc_sysmlv2:connector_SourceFeature</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The source <b>relatedFeature</b> for this <b>Connector</b> . It is the first <b>relatedFeature</b> .
<code>oslc_sysmlv2:connector_TargetFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The target <b>relatedFeatures</b> for this <b>Connector</b> . This includes all the <b>relatedFeatures</b> other than the <b>sourceFeature</b> .
<code>oslc_sysmlv2:element_AliasIds</code>	Zero-or-many	false	unspecified	Either	<code>xsd:string</code>	Various alternative identifiers for this <b>Element</b> . Generally, these will be set by tools.
<code>oslc_sysmlv2:element_DeclaredName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The declared name of this <b>Element</b> .
<code>oslc_sysmlv2:element_DeclaredShortName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	An optional alternative name for the <b>Element</b> that is intended to be shorter or in some way more succinct than its primary <b>name</b> . It may act as a modeler-specified identifier for the <b>Element</b> , though it is then the responsibility of the modeler to maintain the uniqueness of this identifier within a model or relative to some other context.
<code>oslc_sysmlv2:element_Documentation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Documentation</code>	The <b>Documentation</b> owned by this <b>Element</b> .
<code>oslc_sysmlv2:element_ElementId</code>	Exactly-one	false	unspecified	Either	<code>xsd:string</code>	The globally unique identifier for this <b>Element</b> . This is intended to be set by tooling, and it must not change during the lifetime of the <b>Element</b> .

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:element_IsImpliedIncluded</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether all necessary implied Relationships have been included in the <code>ownedRelationships</code> of this Element. This property may be true, even if there are not actually any <code>ownedRelationships</code> with <code>isImplied = true</code> , meaning that no such Relationships are actually implied for this Element. However, if it is false, then <code>ownedRelationships</code> may <i>not</i> contain any implied Relationships. That is, either <i>all</i> required implied Relationships must be included, or none of them.
<code>oslc_sysmlv2:element_IsLibraryElement</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether this Element is contained in the ownership tree of a library model.
<code>oslc_sysmlv2:element_Name</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The name to be used for this Element during name resolution within its <code>owningNamespace</code> . This is derived using the <code>effectiveName()</code> operation. By default, it is the same as the <code>declaredName</code> , but this is overridden for certain kinds of Elements to compute a <code>name</code> even when the <code>declaredName</code> is null.
<code>oslc_sysmlv2:element_OwnedAnnotation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Annotation</code>	The <code>ownedRelationships</code> of this Element that are Annotations, for which this Element is the <code>annotatedElement</code> .
<code>oslc_sysmlv2:element_OwnedElement</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The Elements owned by this Element, derived as the <code>ownedRelatedElements</code> of the <code>ownedRelationships</code> of this Element.
<code>oslc_sysmlv2:element_OwnedRelationship</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Relationship</code>	The Relationships for which this Element is the <code>owningRelatedElement</code> .
<code>oslc_sysmlv2:element_Owner</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The owner of this Element, derived as the <code>owningRelatedElement</code> of the <code>owningRelationship</code> of this Element, if any.
<code>oslc_sysmlv2:element_OwningMembership</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:OwningMembership</code>	The <code>owningRelationship</code> of this Element, if that Relationship is a Membership.
<code>oslc_sysmlv2:element_OwningNamespace</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Namespace</code>	The Namespace that owns this Element, which is the <code>membershipOwningNamespace</code> of the <code>owningMembership</code> of this Element, if any.
<code>oslc_sysmlv2:element_OwningRelationship</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Relationship</code>	The Relationship for which this Element is an <code>ownedRelatedElement</code> , if any.

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:element_QualifiedName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The full ownership-qualified name of this <b>Element</b> , represented in a form that is valid according to the KerML textual concrete syntax for qualified names (including use of unrestricted name notation and escaped characters, as necessary). The <code>qualifiedName</code> is null if this <b>Element</b> has no <code>owningNamespace</code> or if there is not a complete ownership chain of named <b>Namespaces</b> from a root <b>Namespace</b> to this <b>Element</b> .
<code>oslc_sysmlv2:element_ShortName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The short name to be used for this <b>Element</b> during name resolution within its <code>owningNamespace</code> . This is derived using the <code>effectiveShortName()</code> operation. By default, it is the same as the <code>declaredShortName</code> , but this is overridden for certain kinds of <b>Elements</b> to compute a <code>shortName</code> even when the <code>declaredName</code> is null.
<code>oslc_sysmlv2:element_TextualRepresentation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:TextualRepresentation</code>	The <b>TextualRepresentations</b> that annotate this <b>Element</b> .
<code>oslc_sysmlv2:feature_ChainingFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <b>Feature</b> that are chained together to determine the values of this <b>Feature</b> , derived from the <code>chainingFeatures</code> of the <code>ownedFeatureChainings</code> of this <b>Feature</b> , in the same order. The values of a <b>Feature</b> with <code>chainingFeatures</code> are the same as values of the last <b>Feature</b> in the chain, which can be found by starting with the values of the first <b>Feature</b> (for each instance of the domain of the original <b>Feature</b> ), then using each of those as domain instances to find the values of the second <b>Feature</b> in <code>chainingFeatures</code> , and so on, to values of the last <b>Feature</b> .
<code>oslc_sysmlv2:feature_Direction</code>	Zero-or-one	false	unspecified	Either	<code>oslc_sysmlv2:FeatureDirectionKind</code>	Indicates how values of this <b>Feature</b> are determined or used (as specified for the <code>FeatureDirectionKind</code> ).
<code>oslc_sysmlv2:feature_EndOwningType</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The <b>Type</b> that is related to this <b>Feature</b> by an <code>EndFeatureMembership</code> in which the <b>Feature</b> is an <code>ownedMemberFeature</code> .
<code>oslc_sysmlv2:feature_FeaturingType</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	<b>Types</b> that feature this <b>Feature</b> , such that any instance in the domain of the <b>Feature</b> must be classified by all of these <b>Types</b> , including at least all the <code>featuringTypes</code> of its <code>typeFeaturings</code> . If the <b>Feature</b> is chained, then the <code>featuringTypes</code> of the first <b>Feature</b> in the chain are also <code>featuringTypes</code> of the chained <b>Feature</b> .

Standards Track Work Product

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:feature_IsComposite</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether the <b>Feature</b> is a composite <b>feature</b> of its <b>featuringType</b> . If so, the values of the <b>Feature</b> cannot exist after its featuring instance no longer does.
<code>oslc_sysmlv2:feature_IsDerived</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether the values of this <b>Feature</b> can always be computed from the values of other <b>Features</b> .
<code>oslc_sysmlv2:feature_IsEnd</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether or not the this <b>Feature</b> is an end <b>Feature</b> , requiring a different interpretation of the <b>multiplicity</b> of the <b>Feature</b> .
<code>oslc_sysmlv2:feature_IsNonunique</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	isNonunique.
<code>oslc_sysmlv2:feature_IsOrdered</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether an order exists for the values of this <b>Feature</b> or not.
<code>oslc_sysmlv2:feature_IsPortion</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether the values of this <b>Feature</b> are contained in the space and time of instances of the domain of the <b>Feature</b> and represent the same thing as those instances.
<code>oslc_sysmlv2:feature_IsReadOnly</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether the values of this <b>Feature</b> can change over the lifetime of an instance of the domain.
<code>oslc_sysmlv2:feature_IsUnique</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether or not values for this <b>Feature</b> must have no duplicates or not.
<code>oslc_sysmlv2:feature_OwnedFeatureChaining</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:FeatureChaining</code>	The <b>ownedRelationships</b> of this <b>Feature</b> that are <b>FeatureChainings</b> , for which the <b>Feature</b> will be the <b>featureChained</b> .
<code>oslc_sysmlv2:feature_OwnedFeatureInverting</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:FeatureInverting</code>	The <b>ownedRelationships</b> of this <b>Feature</b> that are <b>FeatureInvertings</b> and for which the <b>Feature</b> is the <b>featureInverted</b> .
<code>oslc_sysmlv2:feature_OwnedRedefinition</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Redefinition</code>	The <b>ownedSubsettings</b> of this <b>Feature</b> that are <b>Redefinitions</b> , for which the <b>Feature</b> is the <b>redefiningFeature</b> .
<code>oslc_sysmlv2:feature_OwnedReferenceSubsetting</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:ReferenceSubsetting</code>	The one <b>ownedSubsetting</b> of this <b>Feature</b> , if any, that is a <b>ReferenceSubsetting</b> , for which the <b>Feature</b> is the <b>referencingFeature</b> .
<code>oslc_sysmlv2:feature_OwnedSubsetting</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Subsetting</code>	The <b>ownedSpecializations</b> of this <b>Feature</b> that are <b>Subsettings</b> , for which the <b>Feature</b> is the <b>subsettingFeature</b> .

<code>oslc_sysmlv2:type_OwnedConjugator</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Conjugation</code>	A <b>Conjugation</b> owned by this <b>Type</b> for which the <b>Type</b> is the <b>originalType</b> .
<code>oslc_sysmlv2:type_OwnedDifferencing</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Differencing</code>	The <b>ownedRelationships</b> of this <b>Type</b> that are <b>Differencings</b> , having this <b>Type</b> as their <b>typeDifferenced</b> .
<code>oslc_sysmlv2:type_OwnedDisjoining</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Disjoining</code>	The <b>ownedRelationships</b> of this <b>Type</b> that are <b>Disjoinings</b> , for which the <b>Type</b> is the <b>typeDisjoined Type</b> .
<code>oslc_sysmlv2:type_OwnedEndFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All <b>endFeatures</b> of this <b>Type</b> that are <b>ownedFeatures</b> .
<code>oslc_sysmlv2:type_OwnedFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <b>ownedMemberFeatures</b> of the <b>ownedFeatureMemberships</b> of this <b>Type</b> .
<code>oslc_sysmlv2:type_OwnedFeatureMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:FeatureMembership</code>	The <b>ownedMemberships</b> of this <b>Type</b> that are <b>FeatureMemberships</b> , for which the <b>Type</b> is the <b>owningType</b> . Each such <b>FeatureMembership</b> identifies an <b>ownedFeature</b> of the <b>Type</b> .
<code>oslc_sysmlv2:type_OwnedIntersecting</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Intersecting</code>	The <b>ownedRelationships</b> of this <b>Type</b> that are <b>Intersectings</b> , have the <b>Type</b> as their <b>typeIntersected</b> .
<code>oslc_sysmlv2:type_OwnedSpecialization</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Specialization</code>	The <b>ownedRelationships</b> of this <b>Type</b> that are <b>Specializations</b> , for which the <b>Type</b> is the <b>specific Type</b> .
<code>oslc_sysmlv2:type_OwnedUnioning</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Unioning</code>	The <b>ownedRelationships</b> of this <b>Type</b> that are <b>Unionings</b> , having the <b>Type</b> as their <b>typeUnioned</b> .

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:type_UnioningType</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The interpretations of a <b>Type</b> with <b>unioningTypes</b> are asserted to be the same as those of all the <b>unioningTypes</b> together, which are the <b>Types</b> derived from the <b>unioningType</b> of the <b>ownedUnionings</b> of this <b>Type</b> . For example, a <b>Classifier</b> for people might be the union of <b>Classifiers</b> for all the sexes. Similarly, a feature for people's children might be the union of features dividing them in the same ways as people in general.
<code>oslc:instanceShape</code>	Zero-or-one	false	Resource	Reference	<code>oslc:ResourceShape</code>	The URI of a Resource Shape that describes the possible properties, occurrence, value types, allowed values and labels. This shape information is useful in displaying the subject resource as well as guiding clients in performing modifications. Instance shapes may be specific to the authenticated user associated with the request that retrieved the resource, the current state of the resource and other factors and thus should not be cached.
<code>oslc:serviceProvider</code>	Zero-or-many	false	Resource	Reference	<code>oslc:ServiceProvider</code>	A link to the resource's OSLC Service Provider. There may be cases when the subject resource is available from a service provider that implements multiple domain specifications, which could result in multiple values for this property.
<code>oslc:shortTitle</code>	Zero-or-one	false	XMLLiteral	N/A	Unspecified	Short name identifying a resource, often used as an abbreviated identifier for presentation to end-users. <b>SHOULD</b> include only content that is valid inside an XHTML <code>&lt;span&gt;</code> element [sml-66].
<code>rdf:type</code>	Zero-or-many	false	Resource	Reference	<code>rdfs:Class</code>	The resource type URIs.

- **Describes:** <http://open-services.net/ns/sysmlv2#TriggerInvocationExpression>
- **Summary:** TriggerInvocationExpressionShape
- **Description:** A **TriggerInvocationExpression** is an **InvocationExpression** that invokes one of the trigger **Functions** from the Kernel Semantic Library **Triggers** package, as indicated by its **kind**.

#### TriggerInvocationExpression Properties

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>dcterms:contributor</code>	Zero-or-many	false	AnyResource	Either	<code>oslc:Any</code>	Contributor or contributors to the resource. It is likely that the target resource will be a foaf:Person but that is not necessarily the case.

Standards Track Work Product

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>dcterms:created</code>	Zero-or-one	false	dateTime	N/A	Unspecified	Timestamp of resource creation.
<code>dcterms:creator</code>	Zero-or-many	false	AnyResource	Either	<code>oslc:Any</code>	Creator or creators of the resource. It is likely that the target resource will be a foaf:Person but that is not necessarily the case.
<code>dcterms:description</code>	Zero-or-one	false	XMLLiteral	N/A	Unspecified	Descriptive text about resource represented as rich text in XHTML content.
<code>dcterms:identifier</code>	Exactly-one	true	string	N/A	Unspecified	A unique identifier for a resource. Typically read-only and assigned by the service provider when a resource is created. Not typically intended for end-user display.
<code>dcterms:modified</code>	Zero-or-one	false	dateTime	N/A	Unspecified	Timestamp of latest resource modification.
<code>dcterms:source</code>	Zero-or-one	false	Resource	Reference	<code>oslc:Any</code>	The resource URI a client can perform a get on to obtain the original non-OSLC AM formatted resource that was used to create this resource. The source resource is usually a binary or proprietary format that the service provider can consume and convert into an OSLC AM format. The service may use content negotiation with the Accept header to obtain the desired content type.
<code>dcterms:title</code>	Exactly-one	false	XMLLiteral	N/A	Unspecified	Title of the resource represented as rich text in XHTML content.
<code>dcterms:type</code>	Zero-or-many	false	string	N/A	Unspecified	A short string representation for the type, for example 'Car'.
<code>jazz_am:derives</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The resource that derives from another resource originated from or is significantly influenced by the referenced resource. For example a model element derives from a requirement.
<code>jazz_am:elaborates</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	This resource elaborates the referenced resource.
<code>jazz_am:external</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	A generic link from a resource to an external web page.

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>jazz_am:refine</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The target is a refinement of the source. (e.g. a use case scenario might be a refinement of a textual requirement that describes the interaction).
<code>jazz_am:satisfy</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The model element satisfies the requirement (e.g. The use case satisfies a functional requirement).
<code>jazz_am:trace</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The model element has a trace to the requirement (e.g. An attribute or its value are traced to a requirement).
<code>oslc_sysmlv2:element_AliasIds</code>	Zero-or-many	false	unspecified	Either	<code>xsd:string</code>	Various alternative identifiers for this Element. Generally, these will be set by tools.
<code>oslc_sysmlv2:element_DeclaredName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The declared name of this <b>Element</b> .
<code>oslc_sysmlv2:element_DeclaredShortName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	An optional alternative name for the <b>Element</b> that is intended to be shorter or in some way more succinct than its primary <b>name</b> . It may act as a modeler-specified identifier for the <b>Element</b> , though it is then the responsibility of the modeler to maintain the uniqueness of this identifier within a model or relative to some other context.
<code>oslc_sysmlv2:element_Documentation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Documentation</code>	The Documentation owned by this Element.
<code>oslc_sysmlv2:element_ElementId</code>	Exactly-one	false	unspecified	Either	<code>xsd:string</code>	The globally unique identifier for this Element. This is intended to be set by tooling, and it must not change during the lifetime of the Element.
<code>oslc_sysmlv2:element_IsImpliedIncluded</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether all necessary implied Relationships have been included in the <b>ownedRelationships</b> of this Element. This property may be true, even if there are not actually any <b>ownedRelationships</b> with <b>isImplied = true</b> , meaning that no such Relationships are actually implied for this Element. However, if it is false, then <b>ownedRelationships</b> may <i>not</i> contain any implied Relationships. That is, either <i>all</i> required implied Relationships must be included, or none of them.
<code>oslc_sysmlv2:element_IsLibraryElement</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether this Element is contained in the ownership tree of a library model.

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:element_Name</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The name to be used for this <b>Element</b> during name resolution within its <b>owningNamespace</b> . This is derived using the <code>effectiveName()</code> operation. By default, it is the same as the <b>declaredName</b> , but this is overridden for certain kinds of <b>Elements</b> to compute a <b>name</b> even when the <b>declaredName</b> is null.
<code>oslc_sysmlv2:element_OwnedAnnotation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Annotation</code>	The <b>ownedRelationships</b> of this <b>Element</b> that are <b>Annotations</b> , for which this <b>Element</b> is the <b>annotatedElement</b> .
<code>oslc_sysmlv2:element_OwnedElement</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The <b>Elements</b> owned by this <b>Element</b> , derived as the <b>ownedRelatedElements</b> of the <b>ownedRelationships</b> of this <b>Element</b> .
<code>oslc_sysmlv2:element_OwnedRelationship</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Relationship</code>	The <b>Relationships</b> for which this <b>Element</b> is the <b>owningRelatedElement</b> .
<code>oslc_sysmlv2:element_Owner</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The owner of this <b>Element</b> , derived as the <b>owningRelatedElement</b> of the <b>owningRelationship</b> of this <b>Element</b> , if any.
<code>oslc_sysmlv2:element_OwningMembership</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:OwningMembership</code>	The <b>owningRelationship</b> of this <b>Element</b> , if that <b>Relationship</b> is a <b>Membership</b> .
<code>oslc_sysmlv2:element_OwningNamespace</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Namespace</code>	The <b>Namespace</b> that owns this <b>Element</b> , which is the <b>membershipOwningNamespace</b> of the <b>owningMembership</b> of this <b>Element</b> , if any.
<code>oslc_sysmlv2:element_OwningRelationship</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Relationship</code>	The <b>Relationship</b> for which this <b>Element</b> is an <b>ownedRelatedElement</b> , if any.
<code>oslc_sysmlv2:element_QualifiedName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The full ownership-qualified name of this <b>Element</b> , represented in a form that is valid according to the KerML textual concrete syntax for qualified names (including use of unrestricted name notation and escaped characters, as necessary). The <b>qualifiedName</b> is null if this <b>Element</b> has no <b>owningNamespace</b> or if there is not a complete ownership chain of named <b>Namespaces</b> from a root <b>Namespace</b> to this <b>Element</b> .
<code>oslc_sysmlv2:element_ShortName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The short name to be used for this <b>Element</b> during name resolution within its <b>owningNamespace</b> . This is derived using the <code>effectiveShortName()</code> operation. By default, it is the same as the <b>declaredShortName</b> , but this is overridden for certain kinds of <b>Elements</b> to compute a <b>shortName</b> even when the <b>declaredName</b> is null.

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:element_TextualRepresentation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:TextualRepresentation</code>	The <b>TextualRepresentations</b> that annotate this <b>Element</b> .
<code>oslc_sysmlv2:expression_Function</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Function</code>	The <b>Function</b> that types this <b>Expression</b> .
<code>oslc_sysmlv2:expression_IsModelLevelEvaluable</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether this <b>Expression</b> meets the constraints necessary to be evaluated at <i>model level</i> , that is, using metadata within the model.
<code>oslc_sysmlv2:expression_Result</code>	Exactly-one	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	.
<code>oslc_sysmlv2:feature_ChainingFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <b>Feature</b> that are chained together to determine the values of this <b>Feature</b> , derived from the <b>chainingFeatures</b> of the <b>ownedFeatureChainings</b> of this <b>Feature</b> , in the same order. The values of a <b>Feature</b> with <b>chainingFeatures</b> are the same as values of the last <b>Feature</b> in the chain, which can be found by starting with the values of the first <b>Feature</b> (for each instance of the domain of the original <b>Feature</b> ), then using each of those as domain instances to find the values of the second <b>Feature</b> in <b>chainingFeatures</b> , and so on, to values of the last <b>Feature</b> .
<code>oslc_sysmlv2:feature_Direction</code>	Zero-or-one	false	unspecified	Either	<code>oslc_sysmlv2:FeatureDirectionKind</code>	Indicates how values of this <b>Feature</b> are determined or used (as specified for the <b>FeatureDirectionKind</b> ).
<code>oslc_sysmlv2:feature_EndOwningType</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The <b>Type</b> that is related to this <b>Feature</b> by an <b>EndFeatureMembership</b> in which the <b>Feature</b> is an <b>ownedMemberFeature</b> .
<code>oslc_sysmlv2:feature_FeaturingType</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	<b>Types</b> that feature this <b>Feature</b> , such that any instance in the domain of the <b>Feature</b> must be classified by all of these <b>Types</b> , including at least all the <b>featuringTypes</b> of its <b>typeFeaturings</b> . If the <b>Feature</b> is chained, then the <b>featuringTypes</b> of the first <b>Feature</b> in the chain are also <b>featuringTypes</b> of the chained <b>Feature</b> .
<code>oslc_sysmlv2:feature_IsComposite</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether the <b>Feature</b> is a composite <b>feature</b> of its <b>featuringType</b> . If so, the values of the <b>Feature</b> cannot exist after its featuring instance no longer does.
<code>oslc_sysmlv2:feature_IsDerived</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether the values of this <b>Feature</b> can always be computed from the values of other <b>Features</b> .
<code>oslc_sysmlv2:feature_IsEnd</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether or not the this <b>Feature</b> is an end <b>Feature</b> , requiring a different interpretation of the <b>multiplicity</b> of the <b>Feature</b> .

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:type_OwnedEndFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All <code>endFeatures</code> of this <code>Type</code> that are <code>ownedFeatures</code> .
<code>oslc_sysmlv2:type_OwnedFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <code>ownedMemberFeatures</code> of the <code>ownedFeatureMemberships</code> of this <code>Type</code> .
<code>oslc_sysmlv2:type_OwnedFeatureMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:FeatureMembership</code>	The <code>ownedMemberships</code> of this <code>Type</code> that are <code>FeatureMemberships</code> , for which the <code>Type</code> is the <code>owningType</code> . Each such <code>FeatureMembership</code> identifies an <code>ownedFeature</code> of the <code>Type</code> .
<code>oslc_sysmlv2:type_OwnedIntersecting</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Intersecting</code>	The <code>ownedRelationships</code> of this <code>Type</code> that are <code>Intersectings</code> , have the <code>Type</code> as their <code>typeIntersected</code> .
<code>oslc_sysmlv2:type_OwnedSpecialization</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Specialization</code>	The <code>ownedRelationships</code> of this <code>Type</code> that are <code>Specializations</code> , for which the <code>Type</code> is the <code>specific Type</code> .
<code>oslc_sysmlv2:type_OwnedUnioning</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Unioning</code>	The <code>ownedRelationships</code> of this <code>Type</code> that are <code>Unionings</code> , having the <code>Type</code> as their <code>typeUnioned</code> .
<code>oslc_sysmlv2:type_UnioningType</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The interpretations of a <code>Type</code> with <code>unioningTypes</code> are asserted to be the same as those of all the <code>unioningTypes</code> together, which are the <code>Types</code> derived from the <code>unioningType</code> of the <code>ownedUnionings</code> of this <code>Type</code> . For example, a <code>Classifier</code> for people might be the union of <code>Classifiers</code> for all the sexes. Similarly, a feature for people's children might be the union of features dividing them in the same ways as people in general.
<code>oslc:instanceShape</code>	Zero-or-one	false	Resource	Reference	<code>oslc:ResourceShape</code>	The URI of a Resource Shape that describes the possible properties, occurrence, value types, allowed values and labels. This shape information is useful in displaying the subject resource as well as guiding clients in performing modifications. Instance shapes may be specific to the authenticated user associated with the request that retrieved the resource, the current state of the resource and other factors and thus should not be cached.
<code>oslc:serviceProvider</code>	Zero-or-many	false	Resource	Reference	<code>oslc:ServiceProvider</code>	A link to the resource's OSLC Service Provider. There may be cases when the subject resource is available from a service provider that implements multiple domain specifications, which could result in multiple values for this property.

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc:shortTitle</code>	Zero-or-one	false	XMLLiteral	N/A	Unspecified	Short name identifying a resource, often used as an abbreviated identifier for presentation to end-users. <b>SHOULD</b> include only content that is valid inside an XHTML <code>&lt;span&gt;</code> element [sml-67].
<code>rdf:type</code>	Zero-or-many	false	Resource	Reference	<code>rdfs:Class</code>	The resource type URIs.

- **Describes:** <http://open-services.net/ns/sysmlv2#ViewUsage>
- **Summary:** ViewUsageShape
- **Description:** A **ViewUsage** is a usage of a **ViewDefinition** to specify the generation of a view of the **members** of a collection of **exposedNamespaces**. The **ViewUsage** can satisfy more **viewpoints** than its definition, and it can specialize the **viewRendering** specified by its definition.

#### ViewUsage Properties

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>dcterms:contributor</code>	Zero-or-many	false	AnyResource	Either	<code>oslc:Any</code>	Contributor or contributors to the resource. It is likely that the target resource will be a foaf:Person but that is not necessarily the case.
<code>dcterms:created</code>	Zero-or-one	false	dateTime	N/A	Unspecified	Timestamp of resource creation.
<code>dcterms:creator</code>	Zero-or-many	false	AnyResource	Either	<code>oslc:Any</code>	Creator or creators of the resource. It is likely that the target resource will be a foaf:Person but that is not necessarily the case.
<code>dcterms:description</code>	Zero-or-one	false	XMLLiteral	N/A	Unspecified	Descriptive text about resource represented as rich text in XHTML content.
<code>dcterms:identifier</code>	Exactly-one	true	string	N/A	Unspecified	A unique identifier for a resource. Typically read-only and assigned by the service provider when a resource is created. Not typically intended for end-user display.
<code>dcterms:modified</code>	Zero-or-one	false	dateTime	N/A	Unspecified	Timestamp of latest resource modification.

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>dcterms:source</code>	Zero-or-one	false	Resource	Reference	<code>oslc:Any</code>	The resource URI a client can perform a get on to obtain the original non-OSLC AM formatted resource that was used to create this resource. The source resource is usually a binary or proprietary format that the service provider can consume and convert into an OSLC AM format. The service may use content negotiation with the Accept header to obtain the desired content type.
<code>dcterms:title</code>	Exactly-one	false	XMLLiteral	N/A	Unspecified	Title of the resource represented as rich text in XHTML content.
<code>dcterms:type</code>	Zero-or-many	false	string	N/A	Unspecified	A short string representation for the type, for example 'Car'.
<code>jazz_am:derives</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The resource that derives from another resource originated from or is significantly influenced by the referenced resource. For example a model element derives from a requirement.
<code>jazz_am:elaborates</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	This resource elaborates the referenced resource.
<code>jazz_am:external</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	A generic link from a resource to an external web page.
<code>jazz_am:refine</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The target is a refinement of the source. (e.g. a use case scenario might be a refinement of a textual requirement that describes the interaction).
<code>jazz_am:satisfy</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The model element satisfies the requirement (e.g. The use case satisfies a functional requirement).
<code>jazz_am:trace</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The model element has a trace to the requirement (e.g. An attribute or its value are traced to a requirement).
<code>oslc_sysmlv2:element_AliasIds</code>	Zero-or-many	false	unspecified	Either	<code>xsd:string</code>	Various alternative identifiers for this Element. Generally, these will be set by tools.
<code>oslc_sysmlv2:element_DeclaredName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The declared name of this <b>Element</b> .

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:element_DeclaredShortName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	An optional alternative name for the <b>Element</b> that is intended to be shorter or in some way more succinct than its primary <b>name</b> . It may act as a modeler-specified identifier for the <b>Element</b> , though it is then the responsibility of the modeler to maintain the uniqueness of this identifier within a model or relative to some other context.
<code>oslc_sysmlv2:element_Documentation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Documentation</code>	The Documentation owned by this Element.
<code>oslc_sysmlv2:element_ElementId</code>	Exactly-one	false	unspecified	Either	<code>xsd:string</code>	The globally unique identifier for this Element. This is intended to be set by tooling, and it must not change during the lifetime of the Element.
<code>oslc_sysmlv2:element_IsImpliedIncluded</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether all necessary implied Relationships have been included in the <b>ownedRelationships</b> of this Element. This property may be true, even if there are not actually any <b>ownedRelationships</b> with <b>isImplied = true</b> , meaning that no such Relationships are actually implied for this Element. However, if it is false, then <b>ownedRelationships</b> may <i>not</i> contain any implied Relationships. That is, either <i>all</i> required implied Relationships must be included, or none of them.
<code>oslc_sysmlv2:element_IsLibraryElement</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether this Element is contained in the ownership tree of a library model.
<code>oslc_sysmlv2:element_Name</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The name to be used for this <b>Element</b> during name resolution within its <b>owningNamespace</b> . This is derived using the <b>effectiveName()</b> operation. By default, it is the same as the <b>declaredName</b> , but this is overridden for certain kinds of <b>Elements</b> to compute a <b>name</b> even when the <b>declaredName</b> is null.
<code>oslc_sysmlv2:element_OwnedAnnotation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Annotation</code>	The <b>ownedRelationships</b> of this <b>Element</b> that are <b>Annotations</b> , for which this <b>Element</b> is the <b>annotatedElement</b> .
<code>oslc_sysmlv2:element_OwnedElement</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The Elements owned by this Element, derived as the <b>ownedRelatedElements</b> of the <b>ownedRelationships</b> of this Element.

Standards Track Work Product

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:element_OwnedRelationship</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Relationship</code>	The Relationships for which this Element is the <code>owningRelatedElement</code> .
<code>oslc_sysmlv2:element_Owner</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The owner of this Element, derived as the <code>owningRelatedElement</code> of the <code>owningRelationship</code> of this Element, if any.
<code>oslc_sysmlv2:element_OwningMembership</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:OwningMembership</code>	The <code>owningRelationship</code> of this Element, if that Relationship is a <code>Membership</code> .
<code>oslc_sysmlv2:element_OwningNamespace</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Namespace</code>	The <code>Namespace</code> that owns this Element, which is the <code>membershipOwningNamespace</code> of the <code>owningMembership</code> of this Element, if any.
<code>oslc_sysmlv2:element_OwningRelationship</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Relationship</code>	The Relationship for which this Element is an <code>ownedRelatedElement</code> , if any.
<code>oslc_sysmlv2:element_QualifiedName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The full ownership-qualified name of this Element, represented in a form that is valid according to the KerML textual concrete syntax for qualified names (including use of unrestricted name notation and escaped characters, as necessary). The <code>qualifiedName</code> is null if this Element has no <code>owningNamespace</code> or if there is not a complete ownership chain of named <code>Namespaces</code> from a root <code>Namespace</code> to this Element.
<code>oslc_sysmlv2:element_ShortName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The short name to be used for this Element during name resolution within its <code>owningNamespace</code> . This is derived using the <code>effectiveShortName()</code> operation. By default, it is the same as the <code>declaredShortName</code> , but this is overridden for certain kinds of Elements to compute a <code>shortName</code> even when the <code>declaredName</code> is null.
<code>oslc_sysmlv2:element_TextualRepresentation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:TextualRepresentation</code>	The <code>TextualRepresentations</code> that annotate this Element.

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:feature_ChainingFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <b>Feature</b> that are chained together to determine the values of this <b>Feature</b> , derived from the <b>chainingFeatures</b> of the <b>ownedFeatureChainings</b> of this <b>Feature</b> , in the same order. The values of a <b>Feature</b> with <b>chainingFeatures</b> are the same as values of the last <b>Feature</b> in the chain, which can be found by starting with the values of the first <b>Feature</b> (for each instance of the domain of the original <b>Feature</b> ), then using each of those as domain instances to find the values of the second <b>Feature</b> in <b>chainingFeatures</b> , and so on, to values of the last <b>Feature</b> .
<code>oslc_sysmlv2:feature_Direction</code>	Zero-or-one	false	unspecified	Either	<code>oslc_sysmlv2:FeatureDirectionKind</code>	Indicates how values of this <b>Feature</b> are determined or used (as specified for the <b>FeatureDirectionKind</b> ).
<code>oslc_sysmlv2:feature_EndOwningType</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The <b>Type</b> that is related to this <b>Feature</b> by an <b>EndFeatureMembership</b> in which the <b>Feature</b> is an <b>ownedMemberFeature</b> .
<code>oslc_sysmlv2:feature_FeaturingType</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	<b>Types</b> that feature this <b>Feature</b> , such that any instance in the domain of the <b>Feature</b> must be classified by all of these <b>Types</b> , including at least all the <b>featuringTypes</b> of its <b>typeFeaturings</b> . If the <b>Feature</b> is chained, then the <b>featuringTypes</b> of the first <b>Feature</b> in the chain are also <b>featuringTypes</b> of the chained <b>Feature</b> .
<code>oslc_sysmlv2:feature_IsComposite</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether the <b>Feature</b> is a composite <b>feature</b> of its <b>featuringType</b> . If so, the values of the <b>Feature</b> cannot exist after its featuring instance no longer does.
<code>oslc_sysmlv2:feature_IsDerived</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether the values of this <b>Feature</b> can always be computed from the values of other <b>Features</b> .
<code>oslc_sysmlv2:feature_IsEnd</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether or not the this <b>Feature</b> is an end <b>Feature</b> , requiring a different interpretation of the <b>multiplicity</b> of the <b>Feature</b> .
<code>oslc_sysmlv2:feature_IsNonunique</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	isNonunique.
<code>oslc_sysmlv2:feature_IsOrdered</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether an order exists for the values of this <b>Feature</b> or not.
<code>oslc_sysmlv2:feature_IsPortion</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether the values of this <b>Feature</b> are contained in the space and time of instances of the domain of the <b>Feature</b> and represent the same thing as those instances.

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:feature_IsReadOnly</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether the values of this <b>Feature</b> can change over the lifetime of an instance of the domain.
<code>oslc_sysmlv2:feature_IsUnique</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether or not values for this <b>Feature</b> must have no duplicates or not.
<code>oslc_sysmlv2:feature_OwnedFeatureChaining</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:FeatureChaining</code>	The <b>ownedRelationships</b> of this <b>Feature</b> that are <b>FeatureChainings</b> , for which the <b>Feature</b> will be the <b>featureChained</b> .
<code>oslc_sysmlv2:feature_OwnedFeatureInverting</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:FeatureInverting</code>	The <b>ownedRelationships</b> of this <b>Feature</b> that are <b>FeatureInvertings</b> and for which the <b>Feature</b> is the <b>featureInverted</b> .
<code>oslc_sysmlv2:feature_OwnedRedefinition</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Redefinition</code>	The <b>ownedSubsettings</b> of this <b>Feature</b> that are <b>Redefinitions</b> , for which the <b>Feature</b> is the <b>redefiningFeature</b> .
<code>oslc_sysmlv2:feature_OwnedReferenceSubsetting</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:ReferenceSubsetting</code>	The one <b>ownedSubsetting</b> of this <b>Feature</b> , if any, that is a <b>ReferenceSubsetting</b> , for which the <b>Feature</b> is the <b>referencingFeature</b> .
<code>oslc_sysmlv2:feature_OwnedSubsetting</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Subsetting</code>	The <b>ownedSpecializations</b> of this <b>Feature</b> that are <b>Subsettings</b> , for which the <b>Feature</b> is the <b>subsettingFeature</b> .
<code>oslc_sysmlv2:feature_OwnedTypeFeaturing</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:TypeFeaturing</code>	The <b>ownedRelationships</b> of this <b>Feature</b> that are <b>TypeFeaturings</b> and for which the <b>Feature</b> is the <b>featureOfType</b> .
<code>oslc_sysmlv2:feature_OwnedTyping</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:FeatureTyping</code>	The <b>ownedSpecializations</b> of this <b>Feature</b> that are <b>FeatureTypings</b> , for which the <b>Feature</b> is the <b>typedFeature</b> .
<code>oslc_sysmlv2:feature_OwningFeatureMembership</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:FeatureMembership</code>	The <b>FeatureMembership</b> that owns this <b>Feature</b> as an <b>ownedMemberFeature</b> , determining its <b>owningType</b> .
<code>oslc_sysmlv2:feature_OwningType</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The <b>Type</b> that is the <b>owningType</b> of the <b>owningFeatureMembership</b> of this <b>Feature</b> .
<code>oslc_sysmlv2:feature_Type</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	<b>Types</b> that restrict the values of this <b>Feature</b> , such that the values must be instances of all the <b>types</b> . The types of a <b>Feature</b> are derived from its <b>typings</b> and the <b>types</b> of its <b>subsettings</b> . If the <b>Feature</b> is chained, then the <b>types</b> of the last <b>Feature</b> in the chain are also <b>types</b> of the chained <b>Feature</b> .

<code>oslc_sysmlv2:type_OwnedFeatureMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:FeatureMembership</code>	The <code>ownedMemberships</code> of this <code>Type</code> that are <code>FeatureMemberships</code> , for which the <code>Type</code> is the <code>owningType</code> . Each such <code>FeatureMembership</code> identifies an <code>ownedFeature</code> of the <code>Type</code> .
<code>oslc_sysmlv2:type_OwnedIntersecting</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Intersecting</code>	The <code>ownedRelationships</code> of this <code>Type</code> that are <code>Intersectings</code> , have the <code>Type</code> as their <code>typeIntersected</code> .
<code>oslc_sysmlv2:type_OwnedSpecialization</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Specialization</code>	The <code>ownedRelationships</code> of this <code>Type</code> that are <code>Specializations</code> , for which the <code>Type</code> is the <code>specific Type</code> .
<code>oslc_sysmlv2:type_OwnedUnioning</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Unioning</code>	The <code>ownedRelationships</code> of this <code>Type</code> that are <code>Unionings</code> , having the <code>Type</code> as their <code>typeUnioned</code> .
<code>oslc_sysmlv2:type_UnioningType</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The interpretations of a <code>Type</code> with <code>unioningTypes</code> are asserted to be the same as those of all the <code>unioningTypes</code> together, which are the <code>Types</code> derived from the <code>unioningType</code> of the <code>ownedUnionings</code> of this <code>Type</code> . For example, a <code>Classifier</code> for people might be the union of <code>Classifiers</code> for all the sexes. Similarly, a feature for people's children might be the union of features dividing them in the same ways as people in general.
<code>oslc_sysmlv2:usage_Definition</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Classifier</code>	The <code>Classifiers</code> that are the types of this <code>Usage</code> . Nominally, these are <code>Definitions</code> , but other kinds of Kernel <code>Classifiers</code> are also allowed, to permit use of <code>Classifiers</code> from the Kernel Model Libraries.
<code>oslc_sysmlv2:usage_DirectedUsage</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Usage</code>	The <code>usages</code> of this <code>Usage</code> that are <code>directedFeatures</code> .
<code>oslc_sysmlv2:usage_IsReference</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether this <code>Usage</code> is a referential <code>Usage</code> , that is, it has <code>isComposite = false</code> .
<code>oslc_sysmlv2:usage_IsVariation</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether this <code>Usage</code> is for a variation point or not. If true, then all the <code>memberships</code> of the <code>Usage</code> must be <code>VariantMemberships</code> .

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:viewUsage_SatisfiedViewpoint</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:ViewpointUsage</code>	The <b>nestedRequirements</b> of this <b>ViewUsage</b> that are <b>ViewpointUsages</b> for (additional) viewpoints satisfied by the <b>ViewUsage</b> .
<code>oslc_sysmlv2:viewUsage_ViewCondition</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Expression</code>	The <b>Expressions</b> related to this <b>ViewUsage</b> by <b>ElementFilterMemberships</b> , which specify conditions on <b>Elements</b> to be rendered in a view.
<code>oslc_sysmlv2:viewUsage_ViewDefinition</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:ViewDefinition</code>	The <b>ViewDefinition</b> that is the <b>definition</b> of this <b>ViewUsage</b> .
<code>oslc_sysmlv2:viewUsage_ViewRendering</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:RenderingUsage</code>	The <b>RenderingUsage</b> to be used to render views defined by this <b>ViewUsage</b> , which is the <b>referencedRendering</b> of the <b>ViewRenderingMembership</b> of the <b>ViewUsage</b> .
<code>oslc:instanceShape</code>	Zero-or-one	false	Resource	Reference	<code>oslc:ResourceShape</code>	The URI of a Resource Shape that describes the possible properties, occurrence, value types, allowed values and labels. This shape information is useful in displaying the subject resource as well as guiding clients in performing modifications. Instance shapes may be specific to the authenticated user associated with the request that retrieved the resource, the current state of the resource and other factors and thus should not be cached.
<code>oslc:serviceProvider</code>	Zero-or-many	false	Resource	Reference	<code>oslc:ServiceProvider</code>	A link to the resource's OSLC Service Provider. There may be cases when the subject resource is available from a service provider that implements multiple domain specifications, which could result in multiple values for this property.
<code>oslc:shortTitle</code>	Zero-or-one	false	XMLLiteral	N/A	Unspecified	Short name identifying a resource, often used as an abbreviated identifier for presentation to end-users. <b>SHOULD</b> include only content that is valid inside an XHTML <code>&lt;span&gt;</code> element [sml-68].
<code>rdf:type</code>	Zero-or-many	false	Resource	Reference	<code>rdfs:Class</code>	The resource type URIs.

- **Describes:** <http://open-services.net/ns/sysmlv2#AttributeDefinition>
- **Summary:** AttributeDefinitionShape
- **Description:** An **AttributeDefinition** is a **Definition** and a **DataType** of information about a quality or characteristic of a system or part of a system that has no independent identity other than its value. All **features** of an **AttributeDefinition** must be referential (non-composite).

## AttributeDefinition Properties

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>dcterms:contributor</code>	Zero-or-many	false	AnyResource	Either	<code>oslc:Any</code>	Contributor or contributors to the resource. It is likely that the target resource will be a foaf:Person but that is not necessarily the case.
<code>dcterms:created</code>	Zero-or-one	false	dateTime	N/A	Unspecified	Timestamp of resource creation.
<code>dcterms:creator</code>	Zero-or-many	false	AnyResource	Either	<code>oslc:Any</code>	Creator or creators of the resource. It is likely that the target resource will be a foaf:Person but that is not necessarily the case.
<code>dcterms:description</code>	Zero-or-one	false	XMLLiteral	N/A	Unspecified	Descriptive text about resource represented as rich text in XHTML content.
<code>dcterms:identifier</code>	Exactly-one	true	string	N/A	Unspecified	A unique identifier for a resource. Typically read-only and assigned by the service provider when a resource is created. Not typically intended for end-user display.
<code>dcterms:modified</code>	Zero-or-one	false	dateTime	N/A	Unspecified	Timestamp of latest resource modification.
<code>dcterms:source</code>	Zero-or-one	false	Resource	Reference	<code>oslc:Any</code>	The resource URI a client can perform a get on to obtain the original non-OSLC AM formatted resource that was used to create this resource. The source resource is usually a binary or proprietary format that the service provider can consume and convert into an OSLC AM format. The service may use content negotiation with the Accept header to obtain the desired content type.
<code>dcterms:title</code>	Exactly-one	false	XMLLiteral	N/A	Unspecified	Title of the resource represented as rich text in XHTML content.
<code>dcterms:type</code>	Zero-or-many	false	string	N/A	Unspecified	A short string representation for the type, for example 'Car'.
<code>jazz_am:derives</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The resource that derives from another resource originated from or is significantly influenced by the referenced resource. For example a model element derives from a requirement.
<code>jazz_am:elaborates</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	This resource elaborates the referenced resource.

## Standards Track Work Product

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>jazz_am:external</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	A generic link from a resource to an external web page.
<code>jazz_am:refine</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The target is a refinement of the source. (e.g. a use case scenario might be a refinement of a textual requirement that describes the interaction).
<code>jazz_am:satisfy</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The model element satisfies the requirement (e.g. The use case satisfies a functional requirement).
<code>jazz_am:trace</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The model element has a trace to the requirement (e.g. An attribute or its value are traced to a requirement).
<code>oslc_sysmlv2:classifier_OwnedSubclassification</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Subclassification</code>	The <code>ownedSpecializations</code> of this <code>Classifier</code> that are <code>Subclassifications</code> , for which this <code>Classifier</code> is the <code>subclassifier</code> .
<code>oslc_sysmlv2:definition_DirectedUsage</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Usage</code>	The <code>usages</code> of this <code>Definition</code> that are <code>directedFeatures</code> .
<code>oslc_sysmlv2:definition_IsVariation</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether this <code>Definition</code> is for a variation point or not. If true, then all the <code>memberships</code> of the <code>Definition</code> must be <code>VariantMemberships</code> .
<code>oslc_sysmlv2:definition_OwnedAction</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:ActionUsage</code>	The <code>ActionUsages</code> that are <code>ownedUsages</code> of this <code>Definition</code> .
<code>oslc_sysmlv2:definition_OwnedAllocation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:AllocationUsage</code>	The <code>AllocationUsages</code> that are <code>ownedUsages</code> of this <code>Definition</code> .
<code>oslc_sysmlv2:definition_OwnedAnalysisCase</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:AnalysisCaseUsage</code>	The <code>AnalysisCaseUsages</code> that are <code>ownedUsages</code> of this <code>Definition</code> .
<code>oslc_sysmlv2:definition_OwnedAttribute</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:AttributeUsage</code>	The <code>AttributeUsages</code> that are <code>ownedUsages</code> of this <code>Definition</code> .

<code>oslc_sysmlv2:element_AliasIds</code>	Zero-or-many	false	unspecified	Either	<code>xsd:string</code>	Various alternative identifiers for this Element. Generally, these will be set by tools.
<code>oslc_sysmlv2:element_DeclaredName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The declared name of this <b>Element</b> .
<code>oslc_sysmlv2:element_DeclaredShortName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	An optional alternative name for the <b>Element</b> that is intended to be shorter or in some way more succinct than its primary <b>name</b> . It may act as a modeler-specified identifier for the <b>Element</b> , though it is then the responsibility of the modeler to maintain the uniqueness of this identifier within a model or relative to some other context.
<code>oslc_sysmlv2:element_Documentation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Documentation</code>	The Documentation owned by this Element.
<code>oslc_sysmlv2:element_ElementId</code>	Exactly-one	false	unspecified	Either	<code>xsd:string</code>	The globally unique identifier for this Element. This is intended to be set by tooling, and it must not change during the lifetime of the Element.

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:element_IsImpliedIncluded</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether all necessary implied Relationships have been included in the <code>ownedRelationships</code> of this Element. This property may be true, even if there are not actually any <code>ownedRelationships</code> with <code>isImplied = true</code> , meaning that no such Relationships are actually implied for this Element. However, if it is false, then <code>ownedRelationships</code> may <i>not</i> contain any implied Relationships. That is, either <i>all</i> required implied Relationships must be included, or none of them.
<code>oslc_sysmlv2:element_IsLibraryElement</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether this Element is contained in the ownership tree of a library model.
<code>oslc_sysmlv2:element_Name</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The name to be used for this Element during name resolution within its <code>owningNamespace</code> . This is derived using the <code>effectiveName()</code> operation. By default, it is the same as the <code>declaredName</code> , but this is overridden for certain kinds of Elements to compute a name even when the <code>declaredName</code> is null.
<code>oslc_sysmlv2:element_OwnedAnnotation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Annotation</code>	The <code>ownedRelationships</code> of this Element that are Annotations, for which this Element is the <code>annotatedElement</code> .
<code>oslc_sysmlv2:element_OwnedElement</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The Elements owned by this Element, derived as the <code>ownedRelatedElements</code> of the <code>ownedRelationships</code> of this Element.
<code>oslc_sysmlv2:element_OwnedRelationship</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Relationship</code>	The Relationships for which this Element is the <code>owningRelatedElement</code> .
<code>oslc_sysmlv2:element_Owner</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The owner of this Element, derived as the <code>owningRelatedElement</code> of the <code>owningRelationship</code> of this Element, if any.
<code>oslc_sysmlv2:element_OwningMembership</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:OwningMembership</code>	The <code>owningRelationship</code> of this Element, if that Relationship is a Membership.
<code>oslc_sysmlv2:element_OwningNamespace</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Namespace</code>	The Namespace that owns this Element, which is the <code>membershipOwningNamespace</code> of the <code>owningMembership</code> of this Element, if any.
<code>oslc_sysmlv2:element_OwningRelationship</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Relationship</code>	The Relationship for which this Element is an <code>ownedRelatedElement</code> , if any.

## Standards Track Work Product

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:element_QualifiedName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The full ownership-qualified name of this <b>Element</b> , represented in a form that is valid according to the KerML textual concrete syntax for qualified names (including use of unrestricted name notation and escaped characters, as necessary). The <code>qualifiedName</code> is null if this <b>Element</b> has no <code>owningNamespace</code> or if there is not a complete ownership chain of named <b>Namespaces</b> from a root <b>Namespace</b> to this <b>Element</b> .
<code>oslc_sysmlv2:element_ShortName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The short name to be used for this <b>Element</b> during name resolution within its <code>owningNamespace</code> . This is derived using the <code>effectiveShortName()</code> operation. By default, it is the same as the <code>declaredShortName</code> , but this is overridden for certain kinds of <b>Elements</b> to compute a <code>shortName</code> even when the <code>declaredName</code> is null.
<code>oslc_sysmlv2:element_TextualRepresentation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:TextualRepresentation</code>	The <b>TextualRepresentations</b> that annotate this <b>Element</b> .
<code>oslc_sysmlv2:namespace_ImportedMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Membership</code>	The <b>Memberships</b> in this <b>Namespace</b> that result from the <code>ownedImports</code> of this <b>Namespace</b> .
<code>oslc_sysmlv2:namespace_Member</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The set of all member <b>Elements</b> of this <b>Namespace</b> , which are the <code>memberElements</code> of all <code>memberships</code> of the <b>Namespace</b> .
<code>oslc_sysmlv2:namespace_Membership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Membership</code>	All <b>Memberships</b> in this <b>Namespace</b> , including (at least) the union of <code>ownedMemberships</code> and <code>importedMemberships</code> .
<code>oslc_sysmlv2:namespace_OwnedImport</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Import</code>	The <code>ownedRelationships</code> of this <b>Namespace</b> that are <b>Imports</b> , for which the <b>Namespace</b> is the <code>importOwningNamespace</code> .
<code>oslc_sysmlv2:namespace_OwnedMember</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The owned <b>members</b> of this <b>Namespace</b> , which are the <code>ownedMemberElements</code> of the <code>ownedMemberships</code> of the ..
<code>oslc_sysmlv2:namespace_OwnedMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Membership</code>	The <code>ownedRelationships</code> of this <b>Namespace</b> that are <b>Memberships</b> , for which the <b>Namespace</b> is the <code>membershipOwningNamespace</code> .

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:type_DifferencingType</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The interpretations of a <b>Type</b> with <b>differencingTypes</b> are asserted to be those of the first of those <b>Types</b> , but not including those of the remaining <b>Types</b> . For example, a <b>Classifier</b> might be the difference of a <b>Classifier</b> for people and another for people of a particular nationality, leaving people who are not of that nationality. Similarly, a feature of people might be the difference between a feature for their children and a <b>Classifier</b> for people of a particular sex, identifying their children not of that sex (because the interpretations of the children <b>Feature</b> that identify those of that sex are also interpretations of the <b>Classifier</b> for that sex).
<code>oslc_sysmlv2:type_DirectedFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <b>features</b> of this <b>Type</b> that have a non-null <b>direction</b> .
<code>oslc_sysmlv2:type_EndFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All <b>features</b> of this <b>Type</b> with <b>isEnd</b> = <b>true</b> .
<code>oslc_sysmlv2:type_Feature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <b>ownedMemberFeatures</b> of the <b>featureMemberships</b> of this <b>Type</b> .
<code>oslc_sysmlv2:type_FeatureMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:FeatureMembership</code>	The <b>FeatureMemberships</b> for <b>features</b> of this <b>Type</b> , which include all <b>ownedFeatureMemberships</b> and those <b>inheritedMemberships</b> that are <b>FeatureMemberships</b> (but does <i>not</i> include any <b>importedMemberships</b> ).
<code>oslc_sysmlv2:type_InheritedFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All the <b>memberFeatures</b> of the <b>inheritedMemberships</b> of this <b>Type</b> that are <b>FeatureMemberships</b> .
<code>oslc_sysmlv2:type_InheritedMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Membership</code>	All <b>Memberships</b> inherited by this <b>Type</b> via <b>Specialization</b> or <b>Conjugation</b> . These are included in the derived union for the <b>memberships</b> of the <b>Type</b> .
<code>oslc_sysmlv2:type_Input</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All <b>features</b> related to this <b>Type</b> by <b>FeatureMemberships</b> that have <b>direction</b> <b>in</b> or <b>inout</b> ..

## Standards Track Work Product

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:type_IntersectingType</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The interpretations of a <b>Type</b> with <b>intersectingTypes</b> are asserted to be those in common among the <b>intersectingTypes</b> , which are the <b>Types</b> derived from the <b>intersectingType</b> of the <b>ownedIntersectings</b> of this <b>Type</b> . For example, a <b>Classifier</b> might be an intersection of <b>Classifiers</b> for people of a particular sex and of a particular nationality. Similarly, a feature for people's children of a particular sex might be the intersection of a <b>Feature</b> for their children and a <b>Classifier</b> for people of that sex (because the interpretations of the children <b>Feature</b> that identify those of that sex are also interpretations of the <b>Classifier</b> for that sex).
<code>oslc_sysmlv2:type_IsAbstract</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Indicates whether instances of this <b>Type</b> must also be instances of at least one of its specialized <b>Types</b> .
<code>oslc_sysmlv2:type_IsConjugated</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Indicates whether this <b>Type</b> has an <b>ownedConjugator</b> .
<code>oslc_sysmlv2:type_IsSufficient</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether all things that meet the classification conditions of this <b>Type</b> must be classified by the <b>Type</b> .
<code>oslc_sysmlv2:type_Multiplicity</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Multiplicity</code>	An <b>ownedMember</b> of this <b>Type</b> that is a <b>Multiplicity</b> , which constrains the cardinality of the <b>Type</b> . If there is no such <b>ownedMember</b> , then the cardinality of this <b>Type</b> is constrained by all the <b>Multiplicity</b> constraints applicable to any direct supertypes.
<code>oslc_sysmlv2:type_Output</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All <b>features</b> related to this <b>Type</b> by <b>FeatureMemberships</b> that have <b>direction out or inout</b> .
<code>oslc_sysmlv2:type_OwnedConjugator</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Conjugation</code>	A <b>Conjugation</b> owned by this <b>Type</b> for which the <b>Type</b> is the <b>originalType</b> .
<code>oslc_sysmlv2:type_OwnedDifferencing</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Differencing</code>	The <b>ownedRelationships</b> of this <b>Type</b> that are <b>Differencings</b> , having this <b>Type</b> as their <b>typeDifferenced</b> .
<code>oslc_sysmlv2:type_OwnedDisjoining</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Disjoining</code>	The <b>ownedRelationships</b> of this <b>Type</b> that are <b>Disjoinings</b> , for which the <b>Type</b> is the <b>typeDisjoined Type</b> .
<code>oslc_sysmlv2:type_OwnedEndFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All <b>endFeatures</b> of this <b>Type</b> that are <b>ownedFeatures</b> .

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:type_OwnedFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <code>ownedMemberFeatures</code> of the <code>ownedFeatureMemberships</code> of this <code>Type</code> .
<code>oslc_sysmlv2:type_OwnedFeatureMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:FeatureMembership</code>	The <code>ownedMemberships</code> of this <code>Type</code> that are <code>FeatureMemberships</code> , for which the <code>Type</code> is the <code>owningType</code> . Each such <code>FeatureMembership</code> identifies an <code>ownedFeature</code> of the <code>Type</code> .
<code>oslc_sysmlv2:type_OwnedIntersecting</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Intersecting</code>	The <code>ownedRelationships</code> of this <code>Type</code> that are <code>Intersectings</code> , have the <code>Type</code> as their <code>typeIntersected</code> .
<code>oslc_sysmlv2:type_OwnedSpecialization</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Specialization</code>	The <code>ownedRelationships</code> of this <code>Type</code> that are <code>Specializations</code> , for which the <code>Type</code> is the <code>specific Type</code> .
<code>oslc_sysmlv2:type_OwnedUnioning</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Unioning</code>	The <code>ownedRelationships</code> of this <code>Type</code> that are <code>Unionings</code> , having the <code>Type</code> as their <code>typeUnioned</code> .
<code>oslc_sysmlv2:type_UnioningType</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The interpretations of a <code>Type</code> with <code>unioningTypes</code> are asserted to be the same as those of all the <code>unioningTypes</code> together, which are the <code>Types</code> derived from the <code>unioningType</code> of the <code>ownedUnionings</code> of this <code>Type</code> . For example, a <code>Classifier</code> for people might be the union of <code>Classifiers</code> for all the sexes. Similarly, a feature for people's children might be the union of features dividing them in the same ways as people in general.
<code>oslc:instanceShape</code>	Zero-or-one	false	Resource	Reference	<code>oslc:ResourceShape</code>	The URI of a Resource Shape that describes the possible properties, occurrence, value types, allowed values and labels. This shape information is useful in displaying the subject resource as well as guiding clients in performing modifications. Instance shapes may be specific to the authenticated user associated with the request that retrieved the resource, the current state of the resource and other factors and thus should not be cached.
<code>oslc:serviceProvider</code>	Zero-or-many	false	Resource	Reference	<code>oslc:ServiceProvider</code>	A link to the resource's OSLC Service Provider. There may be cases when the subject resource is available from a service provider that implements multiple domain specifications, which could result in multiple values for this property.
<code>oslc:shortTitle</code>	Zero-or-one	false	XMLLiteral	N/A	Unspecified	Short name identifying a resource, often used as an abbreviated identifier for presentation to end-users. <b>SHOULD</b> include only content that is valid inside an XHTML <code>&lt;span&gt;</code> element [sml-69].

Prefixes	Prefixes	Prefixes	Prefixes	Prefixes	Prefixes	Prefixes
Prefixes	Prefixes	Prefixes	Prefixes	Prefixes	Prefixes	Prefixes
<code>rdf:type</code>	Zero-or-many	false	Resource	Reference	<code>rdfs:Class</code>	The resource type URIs.

- **Describes:** <http://open-services.net/ns/sysmlv2#Metaclass>
- **Summary:** MetaclassShape
- **Description:** A **Metaclass** is a **Structure** used to type **MetadataFeatures**.

### Metaclass Properties

Prefixes	Prefixes	Prefixes	Prefixes	Prefixes	Prefixes	Prefixes
Prefixes	Prefixes	Prefixes	Prefixes	Prefixes	Prefixes	Prefixes
<code>dcterms:contributor</code>	Zero-or-many	false	AnyResource	Either	<code>oslc:Any</code>	Contributor or contributors to the resource. It is likely that the target resource will be a foaf:Person but that is not necessarily the case.
<code>dcterms:created</code>	Zero-or-one	false	dateTime	N/A	Unspecified	Timestamp of resource creation.
<code>dcterms:creator</code>	Zero-or-many	false	AnyResource	Either	<code>oslc:Any</code>	Creator or creators of the resource. It is likely that the target resource will be a foaf:Person but that is not necessarily the case.
<code>dcterms:description</code>	Zero-or-one	false	XMLLiteral	N/A	Unspecified	Descriptive text about resource represented as rich text in XHTML content.
<code>dcterms:identifier</code>	Exactly-one	true	string	N/A	Unspecified	A unique identifier for a resource. Typically read-only and assigned by the service provider when a resource is created. Not typically intended for end-user display.
<code>dcterms:modified</code>	Zero-or-one	false	dateTime	N/A	Unspecified	Timestamp of latest resource modification.
<code>dcterms:source</code>	Zero-or-one	false	Resource	Reference	<code>oslc:Any</code>	The resource URI a client can perform a get on to obtain the original non-OSLC AM formatted resource that was used to create this resource. The source resource is usually a binary or proprietary format that the service provider can consume and convert into an OSLC AM format. The service may use content negotiation with the Accept header to obtain the desired content type.
<code>dcterms:title</code>	Exactly-one	false	XMLLiteral	N/A	Unspecified	Title of the resource represented as rich text in XHTML content.

Standards Track Work Product

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
dcterms:type	Zero-or-many	false	string	N/A	Unspecified	A short string representation for the type, for example 'Car'.
jazz_am:derives	Zero-or-many	false	Resource	Reference	oslc:Any	The resource that derives from another resource originated from or is significantly influenced by the referenced resource. For example a model element derives from a requirement.
jazz_am:elaborates	Zero-or-many	false	Resource	Reference	oslc:Any	This resource elaborates the referenced resource.
jazz_am:external	Zero-or-many	false	Resource	Reference	oslc:Any	A generic link from a resource to an external web page.
jazz_am:refine	Zero-or-many	false	Resource	Reference	oslc:Any	The target is a refinement of the source. (e.g. a use case scenario might be a refinement of a textual requirement that describes the interaction).
jazz_am:satisfy	Zero-or-many	false	Resource	Reference	oslc:Any	The model element satisfies the requirement (e.g. The use case satisfies a functional requirement).
jazz_am:trace	Zero-or-many	false	Resource	Reference	oslc:Any	The model element has a trace to the requirement (e.g. An attribute or its value are traced to a requirement).
oslc_sysmlv2:classifier_OwnedSubclassification	Zero-or-many	false	Resource	Either	oslc_sysmlv2:Subclassification	The <b>ownedSpecializations</b> of this <b>Classifier</b> that are <b>Subclassifications</b> , for which this <b>Classifier</b> is the <b>subclassifier</b> .
oslc_sysmlv2:element_AliasIds	Zero-or-many	false	unspecified	Either	xsd:string	Various alternative identifiers for this Element. Generally, these will be set by tools.
oslc_sysmlv2:element_DeclaredName	Zero-or-one	false	unspecified	Either	xsd:string	The declared name of this <b>Element</b> .
oslc_sysmlv2:element_DeclaredShortName	Zero-or-one	false	unspecified	Either	xsd:string	An optional alternative name for the <b>Element</b> that is intended to be shorter or in some way more succinct than its primary <b>name</b> . It may act as a modeler-specified identifier for the <b>Element</b> , though it is then the responsibility of the modeler to maintain the uniqueness of this identifier within a model or relative to some other context.

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:element_Documentation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Documentation</code>	The Documentation owned by this Element.
<code>oslc_sysmlv2:element_ElementId</code>	Exactly-one	false	unspecified	Either	<code>xsd:string</code>	The globally unique identifier for this Element. This is intended to be set by tooling, and it must not change during the lifetime of the Element.
<code>oslc_sysmlv2:element_IsImpliedIncluded</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether all necessary implied Relationships have been included in the <code>ownedRelationships</code> of this Element. This property may be true, even if there are not actually any <code>ownedRelationships</code> with <code>isImplied = true</code> , meaning that no such Relationships are actually implied for this Element. However, if it is false, then <code>ownedRelationships</code> may <i>not</i> contain any implied Relationships. That is, either <i>all</i> required implied Relationships must be included, or none of them.
<code>oslc_sysmlv2:element_IsLibraryElement</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether this Element is contained in the ownership tree of a library model.
<code>oslc_sysmlv2:element_Name</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The name to be used for this <code>Element</code> during name resolution within its <code>owningNamespace</code> . This is derived using the <code>effectiveName()</code> operation. By default, it is the same as the <code>declaredName</code> , but this is overridden for certain kinds of <code>Elements</code> to compute a <code>name</code> even when the <code>declaredName</code> is null.
<code>oslc_sysmlv2:element_OwnedAnnotation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Annotation</code>	The <code>ownedRelationships</code> of this <code>Element</code> that are <code>Annotations</code> , for which this <code>Element</code> is the <code>annotatedElement</code> .
<code>oslc_sysmlv2:element_OwnedElement</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The Elements owned by this Element, derived as the <code>ownedRelatedElements</code> of the <code>ownedRelationships</code> of this Element.
<code>oslc_sysmlv2:element_OwnedRelationship</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Relationship</code>	The Relationships for which this Element is the <code>owningRelatedElement</code> .
<code>oslc_sysmlv2:element_Owner</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The owner of this Element, derived as the <code>owningRelatedElement</code> of the <code>owningRelationship</code> of this Element, if any.
<code>oslc_sysmlv2:element_OwningMembership</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:OwningMembership</code>	The <code>owningRelationship</code> of this <code>Element</code> , if that <code>Relationship</code> is a <code>Membership</code> .

Standards Track Work Product

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:type_OwnedEndFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All <code>endFeatures</code> of this <code>Type</code> that are <code>ownedFeatures</code> .
<code>oslc_sysmlv2:type_OwnedFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <code>ownedMemberFeatures</code> of the <code>ownedFeatureMemberships</code> of this <code>Type</code> .
<code>oslc_sysmlv2:type_OwnedFeatureMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:FeatureMembership</code>	The <code>ownedMemberships</code> of this <code>Type</code> that are <code>FeatureMemberships</code> , for which the <code>Type</code> is the <code>owningType</code> . Each such <code>FeatureMembership</code> identifies an <code>ownedFeature</code> of the <code>Type</code> .
<code>oslc_sysmlv2:type_OwnedIntersecting</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Intersecting</code>	The <code>ownedRelationships</code> of this <code>Type</code> that are <code>Intersectings</code> , have the <code>Type</code> as their <code>typeIntersected</code> .
<code>oslc_sysmlv2:type_OwnedSpecialization</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Specialization</code>	The <code>ownedRelationships</code> of this <code>Type</code> that are <code>Specializations</code> , for which the <code>Type</code> is the <code>specific Type</code> .
<code>oslc_sysmlv2:type_OwnedUnioning</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Unioning</code>	The <code>ownedRelationships</code> of this <code>Type</code> that are <code>Unionings</code> , having the <code>Type</code> as their <code>typeUnioned</code> .
<code>oslc_sysmlv2:type_UnioningType</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The interpretations of a <code>Type</code> with <code>unioningTypes</code> are asserted to be the same as those of all the <code>unioningTypes</code> together, which are the <code>Types</code> derived from the <code>unioningType</code> of the <code>ownedUnionings</code> of this <code>Type</code> . For example, a <code>Classifier</code> for people might be the union of <code>Classifiers</code> for all the sexes. Similarly, a feature for people's children might be the union of features dividing them in the same ways as people in general.
<code>oslc:instanceShape</code>	Zero-or-one	false	Resource	Reference	<code>oslc:ResourceShape</code>	The URI of a Resource Shape that describes the possible properties, occurrence, value types, allowed values and labels. This shape information is useful in displaying the subject resource as well as guiding clients in performing modifications. Instance shapes may be specific to the authenticated user associated with the request that retrieved the resource, the current state of the resource and other factors and thus should not be cached.
<code>oslc:serviceProvider</code>	Zero-or-many	false	Resource	Reference	<code>oslc:ServiceProvider</code>	A link to the resource's OSLC Service Provider. There may be cases when the subject resource is available from a service provider that implements multiple domain specifications, which could result in multiple values for this property.

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc:shortTitle</code>	Zero-or-one	false	XMLLiteral	N/A	Unspecified	Short name identifying a resource, often used as an abbreviated identifier for presentation to end-users. <b>SHOULD</b> include only content that is valid inside an XHTML <code>&lt;span&gt;</code> element [sml-70].
<code>rdf:type</code>	Zero-or-many	false	Resource	Reference	<code>rdfs:Class</code>	The resource type URIs.

- **Describes:** <http://open-services.net/ns/sysmlv2#UseCaseDefinition>
- **Summary:** UseCaseDefinitionShape
- **Description:** A `UseCaseDefinition` is a `CaseDefinition` that specifies a set of actions performed by its subject, in interaction with one or more actors external to the subject. The objective is to yield an observable result that is of value to one or more of the actors.

#### UseCaseDefinition Properties

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>dcterms:contributor</code>	Zero-or-many	false	AnyResource	Either	<code>oslc:Any</code>	Contributor or contributors to the resource. It is likely that the target resource will be a foaf:Person but that is not necessarily the case.
<code>dcterms:created</code>	Zero-or-one	false	dateTime	N/A	Unspecified	Timestamp of resource creation.
<code>dcterms:creator</code>	Zero-or-many	false	AnyResource	Either	<code>oslc:Any</code>	Creator or creators of the resource. It is likely that the target resource will be a foaf:Person but that is not necessarily the case.
<code>dcterms:description</code>	Zero-or-one	false	XMLLiteral	N/A	Unspecified	Descriptive text about resource represented as rich text in XHTML content.
<code>dcterms:identifier</code>	Exactly-one	true	string	N/A	Unspecified	A unique identifier for a resource. Typically read-only and assigned by the service provider when a resource is created. Not typically intended for end-user display.
<code>dcterms:modified</code>	Zero-or-one	false	dateTime	N/A	Unspecified	Timestamp of latest resource modification.

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>dcterms:source</code>	Zero-or-one	false	Resource	Reference	<code>oslc:Any</code>	The resource URI a client can perform a get on to obtain the original non-OSLC AM formatted resource that was used to create this resource. The source resource is usually a binary or proprietary format that the service provider can consume and convert into an OSLC AM format. The service may use content negotiation with the Accept header to obtain the desired content type.
<code>dcterms:title</code>	Exactly-one	false	XMLLiteral	N/A	Unspecified	Title of the resource represented as rich text in XHTML content.
<code>dcterms:type</code>	Zero-or-many	false	string	N/A	Unspecified	A short string representation for the type, for example 'Car'.
<code>jazz_am:derives</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The resource that derives from another resource originated from or is significantly influenced by the referenced resource. For example a model element derives from a requirement.
<code>jazz_am:elaborates</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	This resource elaborates the referenced resource.
<code>jazz_am:external</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	A generic link from a resource to an external web page.
<code>jazz_am:refine</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The target is a refinement of the source. (e.g. a use case scenario might be a refinement of a textual requirement that describes the interaction).
<code>jazz_am:satisfy</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The model element satisfies the requirement (e.g. The use case satisfies a functional requirement).
<code>jazz_am:trace</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The model element has a trace to the requirement (e.g. An attribute or its value are traced to a requirement).
<code>oslc_sysmlv2:actionDefinition_Action</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:ActionUsage</code>	The <b>ActionUsages</b> that are <b>steps</b> in this <b>ActionDefinition</b> , which define the actions that specify the behavior of the <b>ActionDefinition</b> .
<code>oslc_sysmlv2:behavior_Parameter</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The parameters of this <b>Behavior</b> , which are defined as its <b>directedFeatures</b> , whose values are passed into and/or out of a performance of the <b>Behavior</b> .

Standards Track Work Product

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:behavior_Step</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Step</code>	The <b>Steps</b> that make up this <b>Behavior</b> .
<code>oslc_sysmlv2:calculationDefinition_Calculation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:CalculationUsage</code>	The <b>actions</b> of this <b>CalculationDefinition</b> that are <b>CalculationUsages</b> .
<code>oslc_sysmlv2:caseDefinition_ActorParameter</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:PartUsage</code>	The <b>parameters</b> of this <b>CaseDefinition</b> that represent actors involved in the case.
<code>oslc_sysmlv2:caseDefinition_ObjectiveRequirement</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:RequirementUsage</code>	The <b>RequirementUsage</b> representing the objective of this <b>CaseDefinition</b> .
<code>oslc_sysmlv2:caseDefinition_SubjectParameter</code>	Exactly-one	false	Resource	Either	<code>oslc_sysmlv2:Usage</code>	The <b>parameter</b> of this <b>CaseDefinition</b> that represents its subject.
<code>oslc_sysmlv2:classifier_OwnedSubclassification</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Subclassification</code>	The <b>ownedSpecializations</b> of this <b>Classifier</b> that are <b>Subclassifications</b> , for which this <b>Classifier</b> is the <b>subclassifier</b> .
<code>oslc_sysmlv2:definition_DirectedUsage</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Usage</code>	The <b>usages</b> of this <b>Definition</b> that are <b>directedFeatures</b> .
<code>oslc_sysmlv2:definition_IsVariation</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether this <b>Definition</b> is for a variation point or not. If true, then all the <b>memberships</b> of the <b>Definition</b> must be <b>VariantMemberships</b> .
<code>oslc_sysmlv2:definition_OwnedAction</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:ActionUsage</code>	The <b>ActionUsages</b> that are <b>ownedUsages</b> of this <b>Definition</b> .
<code>oslc_sysmlv2:definition_OwnedAllocation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:AllocationUsage</code>	The <b>AllocationUsages</b> that are <b>ownedUsages</b> of this <b>Definition</b> .
<code>oslc_sysmlv2:definition_OwnedAnalysisCase</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:AnalysisCaseUsage</code>	The <b>AnalysisCaseUsages</b> that are <b>ownedUsages</b> of this <b>Definition</b> .

<code>oslc_sysmlv2:definition_OwnedUseCase</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:UseCaseUsage</code>	The <code>UseCaseUsages</code> that are <code>ownedUsages</code> of this <code>Definition</code> .
<code>oslc_sysmlv2:definition_OwnedVerificationCase</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:VerificationCaseUsage</code>	The <code>VerificationCaseUsages</code> that are <code>ownedUsages</code> of this <code>Definition</code> .

Standards Track Work Product

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:definition_OwnedView</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:ViewUsage</code>	The <code>ViewUsages</code> that are <code>ownedUsages</code> of this <code>Definition</code> .
<code>oslc_sysmlv2:definition_OwnedViewpoint</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:ViewpointUsage</code>	The <code>ViewpointUsages</code> that are <code>ownedUsages</code> of this <code>Definition</code> .
<code>oslc_sysmlv2:definition_Usage</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Usage</code>	The <code>Usages</code> that are <code>features</code> of this <code>Definition</code> (not necessarily owned).
<code>oslc_sysmlv2:definition_Variant</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Usage</code>	The <code>Usages</code> which represent the variants of this <code>Definition</code> as a variation point <code>Definition</code> , if <code>isVariation</code> = true. If <code>isVariation</code> = false, there must be no <code>variants</code> .
<code>oslc_sysmlv2:definition_VariantMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:VariantMembership</code>	The <code>ownedMemberships</code> of this <code>Definition</code> that are <code>VariantMemberships</code> . If <code>isVariation</code> = true, then this must be all <code>ownedMemberships</code> of the <code>Definition</code> . If <code>isVariation</code> = false, then <code>variantMembership</code> must be empty.
<code>oslc_sysmlv2:element_AliasIds</code>	Zero-or-many	false	unspecified	Either	<code>xsd:string</code>	Various alternative identifiers for this <code>Element</code> . Generally, these will be set by tools.
<code>oslc_sysmlv2:element_DeclaredName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The declared name of this <code>Element</code> .
<code>oslc_sysmlv2:element_DeclaredShortName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	An optional alternative name for the <code>Element</code> that is intended to be shorter or in some way more succinct than its primary <code>name</code> . It may act as a modeler-specified identifier for the <code>Element</code> , though it is then the responsibility of the modeler to maintain the uniqueness of this identifier within a model or relative to some other context.
<code>oslc_sysmlv2:element_Documentation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Documentation</code>	The <code>Documentation</code> owned by this <code>Element</code> .
<code>oslc_sysmlv2:element_ElementId</code>	Exactly-one	false	unspecified	Either	<code>xsd:string</code>	The globally unique identifier for this <code>Element</code> . This is intended to be set by tooling, and it must not change during the lifetime of the <code>Element</code> .

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:element_IsImpliedIncluded</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether all necessary implied Relationships have been included in the <code>ownedRelationships</code> of this Element. This property may be true, even if there are not actually any <code>ownedRelationships</code> with <code>isImplied = true</code> , meaning that no such Relationships are actually implied for this Element. However, if it is false, then <code>ownedRelationships</code> may <i>not</i> contain any implied Relationships. That is, either <i>all</i> required implied Relationships must be included, or none of them.
<code>oslc_sysmlv2:element_IsLibraryElement</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether this Element is contained in the ownership tree of a library model.
<code>oslc_sysmlv2:element_Name</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The name to be used for this Element during name resolution within its <code>owningNamespace</code> . This is derived using the <code>effectiveName()</code> operation. By default, it is the same as the <code>declaredName</code> , but this is overridden for certain kinds of Elements to compute a <code>name</code> even when the <code>declaredName</code> is null.
<code>oslc_sysmlv2:element_OwnedAnnotation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Annotation</code>	The <code>ownedRelationships</code> of this Element that are <code>Annotations</code> , for which this Element is the <code>annotatedElement</code> .
<code>oslc_sysmlv2:element_OwnedElement</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The Elements owned by this Element, derived as the <code>ownedRelatedElements</code> of the <code>ownedRelationships</code> of this Element.
<code>oslc_sysmlv2:element_OwnedRelationship</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Relationship</code>	The Relationships for which this Element is the <code>owningRelatedElement</code> .
<code>oslc_sysmlv2:element_Owner</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The owner of this Element, derived as the <code>owningRelatedElement</code> of the <code>owningRelationship</code> of this Element, if any.
<code>oslc_sysmlv2:element_OwningMembership</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:OwningMembership</code>	The <code>owningRelationship</code> of this Element, if that Relationship is a <code>Membership</code> .
<code>oslc_sysmlv2:element_OwningNamespace</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Namespace</code>	The <code>Namespace</code> that owns this Element, which is the <code>membershipOwningNamespace</code> of the <code>owningMembership</code> of this Element, if any.
<code>oslc_sysmlv2:element_OwningRelationship</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Relationship</code>	The Relationship for which this Element is an <code>ownedRelatedElement</code> , if any.

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:element_QualifiedName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The full ownership-qualified name of this <b>Element</b> , represented in a form that is valid according to the KerML textual concrete syntax for qualified names (including use of unrestricted name notation and escaped characters, as necessary). The <code>qualifiedName</code> is null if this <b>Element</b> has no <code>owningNamespace</code> or if there is not a complete ownership chain of named <b>Namespaces</b> from a root <b>Namespace</b> to this <b>Element</b> .
<code>oslc_sysmlv2:element_ShortName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The short name to be used for this <b>Element</b> during name resolution within its <code>owningNamespace</code> . This is derived using the <code>effectiveShortName()</code> operation. By default, it is the same as the <code>declaredShortName</code> , but this is overridden for certain kinds of <b>Elements</b> to compute a <code>shortName</code> even when the <code>declaredName</code> is null.
<code>oslc_sysmlv2:element_TextualRepresentation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:TextualRepresentation</code>	The <b>TextualRepresentations</b> that annotate this <b>Element</b> .
<code>oslc_sysmlv2:function_Expression</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Expression</code>	The <b>Expressions</b> that are <b>steps</b> in the calculation of the <b>result</b> of this <b>Function</b> .
<code>oslc_sysmlv2:function_IsModelLevelEvaluable</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether this <b>Function</b> can be used as the <b>function</b> of a model-level evaluable <b>InvocationExpression</b> . Certain <b>Functions</b> from the Kernel Functions Library are considered to have <code>isModelLevelEvaluable = true</code> . For all other <b>Functions</b> it is <code>false</code> .
<code>oslc_sysmlv2:function_Result</code>	Exactly-one	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <b>result parameter</b> of the <b>Function</b> , which is owned by the <b>Function</b> via a <b>ReturnParameterMembership</b> .
<code>oslc_sysmlv2:namespace_ImportedMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Membership</code>	The <b>Memberships</b> in this <b>Namespace</b> that result from the <b>ownedImports</b> of this <b>Namespace</b> .
<code>oslc_sysmlv2:namespace_Member</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The set of all member <b>Elements</b> of this <b>Namespace</b> , which are the <b>memberElements</b> of all <b>memberships</b> of the <b>Namespace</b> .
<code>oslc_sysmlv2:namespace_Membership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Membership</code>	All <b>Memberships</b> in this <b>Namespace</b> , including (at least) the union of <b>ownedMemberships</b> and <b>importedMemberships</b> .

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:namespace_OwnedImport</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Import</code>	The <code>ownedRelationships</code> of this <code>Namespace</code> that are <code>Imports</code> , for which the <code>Namespace</code> is the <code>importOwningNamespace</code> .
<code>oslc_sysmlv2:namespace_OwnedMember</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The owned <code>members</code> of this <code>Namespace</code> , which are the <code>ownedMemberElements</code> of the <code>ownedMemberships</code> of the ..
<code>oslc_sysmlv2:namespace_OwnedMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Membership</code>	The <code>ownedRelationships</code> of this <code>Namespace</code> that are <code>Memberships</code> , for which the <code>Namespace</code> is the <code>membershipOwningNamespace</code> .
<code>oslc_sysmlv2:occurrenceDefinition_IsIndividual</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether this <code>OccurrenceDefinition</code> is constrained to represent single individual.
<code>oslc_sysmlv2:occurrenceDefinition_LifeClass</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:LifeClass</code>	If <code>isIndividual</code> is true, a <code>LifeClass</code> that specializes this <code>OccurrenceDefinition</code> , restricting it to represent an individual.
<code>oslc_sysmlv2:type_DifferencingType</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The interpretations of a <code>Type</code> with <code>differencingTypes</code> are asserted to be those of the first of those <code>Types</code> , but not including those of the remaining <code>Types</code> . For example, a <code>Classifier</code> might be the difference of a <code>Classifier</code> for people and another for people of a particular nationality, leaving people who are not of that nationality. Similarly, a feature of people might be the difference between a feature for their children and a <code>Classifier</code> for people of a particular sex, identifying their children not of that sex (because the interpretations of the children <code>Feature</code> that identify those of that sex are also interpretations of the <code>Classifier</code> for that sex).
<code>oslc_sysmlv2:type_DirectedFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <code>features</code> of this <code>Type</code> that have a non-null <code>direction</code> .
<code>oslc_sysmlv2:type_EndFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All <code>features</code> of this <code>Type</code> with <code>isEnd = true</code> .
<code>oslc_sysmlv2:type_Feature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <code>ownedMemberFeatures</code> of the <code>featureMemberships</code> of this <code>Type</code> .

Standards Track Work Product

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:type_FeatureMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:FeatureMembership</code>	The <b>FeatureMemberships</b> for <b>features</b> of this <b>Type</b> , which include all <b>ownedFeatureMemberships</b> and those <b>inheritedMemberships</b> that are <b>FeatureMemberships</b> (but does <i>not</i> include any <b>importedMemberships</b> ).
<code>oslc_sysmlv2:type_InheritedFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All the <b>memberFeatures</b> of the <b>inheritedMemberships</b> of this <b>Type</b> that are <b>FeatureMemberships</b> .
<code>oslc_sysmlv2:type_InheritedMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Membership</code>	All <b>Memberships</b> inherited by this <b>Type</b> via <b>Specialization</b> or <b>Conjugation</b> . These are included in the derived union for the <b>memberships</b> of the <b>Type</b> .
<code>oslc_sysmlv2:type_Input</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All <b>features</b> related to this <b>Type</b> by <b>FeatureMemberships</b> that have <b>direction in or inout</b> .
<code>oslc_sysmlv2:type_IntersectingType</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The interpretations of a <b>Type</b> with <b>intersectingTypes</b> are asserted to be those in common among the <b>intersectingTypes</b> , which are the <b>Types</b> derived from the <b>intersectingType</b> of the <b>ownedIntersectings</b> of this <b>Type</b> . For example, a <b>Classifier</b> might be an intersection of <b>Classifiers</b> for people of a particular sex and of a particular nationality. Similarly, a feature for people's children of a particular sex might be the intersection of a <b>Feature</b> for their children and a <b>Classifier</b> for people of that sex (because the interpretations of the children <b>Feature</b> that identify those of that sex are also interpretations of the Classifier for that sex).
<code>oslc_sysmlv2:type_IsAbstract</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Indicates whether instances of this <b>Type</b> must also be instances of at least one of its specialized <b>Types</b> .
<code>oslc_sysmlv2:type_IsConjugated</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Indicates whether this <b>Type</b> has an <b>ownedConjugator</b> .
<code>oslc_sysmlv2:type_IsSufficient</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether all things that meet the classification conditions of this <b>Type</b> must be classified by the <b>Type</b> .
<code>oslc_sysmlv2:type_Multiplicity</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Multiplicity</code>	An <b>ownedMember</b> of this <b>Type</b> that is a <b>Multiplicity</b> , which constraints the cardinality of the <b>Type</b> . If there is no such <b>ownedMember</b> , then the cardinality of this <b>Type</b> is constrained by all the <b>Multiplicity</b> constraints applicable to any direct supertypes.

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:type_UnioningType</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The interpretations of a <b>Type</b> with <b>unioningTypes</b> are asserted to be the same as those of all the <b>unioningTypes</b> together, which are the <b>Types</b> derived from the <b>unioningType</b> of the <b>ownedUnionings</b> of this <b>Type</b> . For example, a <b>Classifier</b> for people might be the union of <b>Classifiers</b> for all the sexes. Similarly, a feature for people's children might be the union of features dividing them in the same ways as people in general.
<code>oslc_sysmlv2:useCaseDefinition_IncludedUseCase</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:UseCaseUsage</code>	The <b>UseCaseUsages</b> that are included by this <b>UseCaseDefinition</b> , which are the <b>useCaseIncluded</b> s of the <b>IncludeUseCaseUsages</b> owned by this <b>UseCaseDefinition</b> ..
<code>oslc:instanceShape</code>	Zero-or-one	false	Resource	Reference	<code>oslc:ResourceShape</code>	The URI of a Resource Shape that describes the possible properties, occurrence, value types, allowed values and labels. This shape information is useful in displaying the subject resource as well as guiding clients in performing modifications. Instance shapes may be specific to the authenticated user associated with the request that retrieved the resource, the current state of the resource and other factors and thus should not be cached.
<code>oslc:serviceProvider</code>	Zero-or-many	false	Resource	Reference	<code>oslc:ServiceProvider</code>	A link to the resource's OSLC Service Provider. There may be cases when the subject resource is available from a service provider that implements multiple domain specifications, which could result in multiple values for this property.
<code>oslc:shortTitle</code>	Zero-or-one	false	XMLLiteral	N/A	Unspecified	Short name identifying a resource, often used as an abbreviated identifier for presentation to end-users. <b>SHOULD</b> include only content that is valid inside an XHTML <code>&lt;span&gt;</code> element [sml-71].
<code>rdf:type</code>	Zero-or-many	false	Resource	Reference	<code>rdfs:Class</code>	The resource type URIs.

- **Describes:** <http://open-services.net/ns/sysmlv2#Step>
- **Summary:** StepShape
- **Description:** A **Step** is a **Feature** that is typed by one or more **Behaviors**. **Steps** may be used by one **Behavior** to coordinate the performance of other **Behaviors**, supporting a steady refinement of behavioral descriptions. **Steps** can be ordered in time and can be connected using **ItemFlows** to specify things flowing between their **parameters**.

Step Properties

Standards Track Work Product

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>dcterms:contributor</code>	Zero-or-many	false	AnyResource	Either	<code>oslc:Any</code>	Contributor or contributors to the resource. It is likely that the target resource will be a foaf:Person but that is not necessarily the case.
<code>dcterms:created</code>	Zero-or-one	false	dateTime	N/A	Unspecified	Timestamp of resource creation.
<code>dcterms:creator</code>	Zero-or-many	false	AnyResource	Either	<code>oslc:Any</code>	Creator or creators of the resource. It is likely that the target resource will be a foaf:Person but that is not necessarily the case.
<code>dcterms:description</code>	Zero-or-one	false	XMLLiteral	N/A	Unspecified	Descriptive text about resource represented as rich text in XHTML content.
<code>dcterms:identifier</code>	Exactly-one	true	string	N/A	Unspecified	A unique identifier for a resource. Typically read-only and assigned by the service provider when a resource is created. Not typically intended for end-user display.
<code>dcterms:modified</code>	Zero-or-one	false	dateTime	N/A	Unspecified	Timestamp of latest resource modification.
<code>dcterms:source</code>	Zero-or-one	false	Resource	Reference	<code>oslc:Any</code>	The resource URI a client can perform a get on to obtain the original non-OSLC AM formatted resource that was used to create this resource. The source resource is usually a binary or proprietary format that the service provider can consume and convert into an OSLC AM format. The service may use content negotiation with the Accept header to obtain the desired content type.
<code>dcterms:title</code>	Exactly-one	false	XMLLiteral	N/A	Unspecified	Title of the resource represented as rich text in XHTML content.
<code>dcterms:type</code>	Zero-or-many	false	string	N/A	Unspecified	A short string representation for the type, for example 'Car'.
<code>jazz_am:derives</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The resource that derives from another resource originated from or is significantly influenced by the referenced resource. For example a model element derives from a requirement.
<code>jazz_am:elaborates</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	This resource elaborates the referenced resource.

Standards Track Work Product

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>jazz_am:external</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	A generic link from a resource to an external web page.
<code>jazz_am:refine</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The target is a refinement of the source. (e.g. a use case scenario might be a refinement of a textual requirement that describes the interaction).
<code>jazz_am:satisfy</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The model element satisfies the requirement (e.g. The use case satisfies a functional requirement).
<code>jazz_am:trace</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The model element has a trace to the requirement (e.g. An attribute or its value are traced to a requirement).
<code>oslc_sysmlv2:element_AliasIds</code>	Zero-or-many	false	unspecified	Either	<code>xsd:string</code>	Various alternative identifiers for this Element. Generally, these will be set by tools.
<code>oslc_sysmlv2:element_DeclaredName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The declared name of this <b>Element</b> .
<code>oslc_sysmlv2:element_DeclaredShortName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	An optional alternative name for the <b>Element</b> that is intended to be shorter or in some way more succinct than its primary <b>name</b> . It may act as a modeler-specified identifier for the <b>Element</b> , though it is then the responsibility of the modeler to maintain the uniqueness of this identifier within a model or relative to some other context.
<code>oslc_sysmlv2:element_Documentation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Documentation</code>	The Documentation owned by this Element.
<code>oslc_sysmlv2:element_ElementId</code>	Exactly-one	false	unspecified	Either	<code>xsd:string</code>	The globally unique identifier for this Element. This is intended to be set by tooling, and it must not change during the lifetime of the Element.

## Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:element_IsImpliedIncluded</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether all necessary implied Relationships have been included in the <code>ownedRelationships</code> of this Element. This property may be true, even if there are not actually any <code>ownedRelationships</code> with <code>isImplied = true</code> , meaning that no such Relationships are actually implied for this Element. However, if it is false, then <code>ownedRelationships</code> may <i>not</i> contain any implied Relationships. That is, either <i>all</i> required implied Relationships must be included, or none of them.
<code>oslc_sysmlv2:element_IsLibraryElement</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether this Element is contained in the ownership tree of a library model.
<code>oslc_sysmlv2:element_Name</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The name to be used for this <code>Element</code> during name resolution within its <code>owningNamespace</code> . This is derived using the <code>effectiveName()</code> operation. By default, it is the same as the <code>declaredName</code> , but this is overridden for certain kinds of <code>Elements</code> to compute a <code>name</code> even when the <code>declaredName</code> is null.
<code>oslc_sysmlv2:element_OwnedAnnotation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Annotation</code>	The <code>ownedRelationships</code> of this <code>Element</code> that are <code>Annotations</code> , for which this <code>Element</code> is the <code>annotatedElement</code> .
<code>oslc_sysmlv2:element_OwnedElement</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The Elements owned by this Element, derived as the <code>ownedRelatedElements</code> of the <code>ownedRelationships</code> of this Element.
<code>oslc_sysmlv2:element_OwnedRelationship</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Relationship</code>	The Relationships for which this Element is the <code>owningRelatedElement</code> .
<code>oslc_sysmlv2:element_Owner</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The owner of this Element, derived as the <code>owningRelatedElement</code> of the <code>owningRelationship</code> of this Element, if any.
<code>oslc_sysmlv2:element_OwningMembership</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:OwningMembership</code>	The <code>owningRelationship</code> of this <code>Element</code> , if that <code>Relationship</code> is a <code>Membership</code> .
<code>oslc_sysmlv2:element_OwningNamespace</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Namespace</code>	The <code>Namespace</code> that owns this <code>Element</code> , which is the <code>membershipOwningNamespace</code> of the <code>owningMembership</code> of this <code>Element</code> , if any.
<code>oslc_sysmlv2:element_OwningRelationship</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Relationship</code>	The Relationship for which this Element is an <code>ownedRelatedElement</code> , if any.

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:element_QualifiedName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The full ownership-qualified name of this <b>Element</b> , represented in a form that is valid according to the KerML textual concrete syntax for qualified names (including use of unrestricted name notation and escaped characters, as necessary). The <code>qualifiedName</code> is null if this <b>Element</b> has no <code>owningNamespace</code> or if there is not a complete ownership chain of named <b>Namespaces</b> from a root <b>Namespace</b> to this <b>Element</b> .
<code>oslc_sysmlv2:element_ShortName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The short name to be used for this <b>Element</b> during name resolution within its <code>owningNamespace</code> . This is derived using the <code>effectiveShortName()</code> operation. By default, it is the same as the <code>declaredShortName</code> , but this is overridden for certain kinds of <b>Elements</b> to compute a <code>shortName</code> even when the <code>declaredName</code> is null.
<code>oslc_sysmlv2:element_TextualRepresentation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:TextualRepresentation</code>	The <b>TextualRepresentations</b> that annotate this <b>Element</b> .
<code>oslc_sysmlv2:feature_ChainingFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <b>Feature</b> that are chained together to determine the values of this <b>Feature</b> , derived from the <code>chainingFeatures</code> of the <code>ownedFeatureChainings</code> of this <b>Feature</b> , in the same order. The values of a <b>Feature</b> with <code>chainingFeatures</code> are the same as values of the last <b>Feature</b> in the chain, which can be found by starting with the values of the first <b>Feature</b> (for each instance of the domain of the original <b>Feature</b> ), then using each of those as domain instances to find the values of the second <b>Feature</b> in <code>chainingFeatures</code> , and so on, to values of the last <b>Feature</b> .
<code>oslc_sysmlv2:feature_Direction</code>	Zero-or-one	false	unspecified	Either	<code>oslc_sysmlv2:FeatureDirectionKind</code>	Indicates how values of this <b>Feature</b> are determined or used (as specified for the <code>FeatureDirectionKind</code> ).
<code>oslc_sysmlv2:feature_EndOwningType</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The <b>Type</b> that is related to this <b>Feature</b> by an <code>EndFeatureMembership</code> in which the <b>Feature</b> is an <code>ownedMemberFeature</code> .
<code>oslc_sysmlv2:feature_FeaturingType</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	<b>Types</b> that feature this <b>Feature</b> , such that any instance in the domain of the <b>Feature</b> must be classified by all of these <b>Types</b> , including at least all the <code>featuringTypes</code> of its <code>typeFeaturings</code> . If the <b>Feature</b> is chained, then the <code>featuringTypes</code> of the first <b>Feature</b> in the chain are also <code>featuringTypes</code> of the chained <b>Feature</b> .

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:feature_IsComposite</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether the <b>Feature</b> is a composite <b>feature</b> of its <b>featuringType</b> . If so, the values of the <b>Feature</b> cannot exist after its featuring instance no longer does.
<code>oslc_sysmlv2:feature_IsDerived</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether the values of this <b>Feature</b> can always be computed from the values of other <b>Features</b> .
<code>oslc_sysmlv2:feature_IsEnd</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether or not the this <b>Feature</b> is an end <b>Feature</b> , requiring a different interpretation of the <b>multiplicity</b> of the <b>Feature</b> .
<code>oslc_sysmlv2:feature_IsNonunique</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	isNonunique.
<code>oslc_sysmlv2:feature_IsOrdered</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether an order exists for the values of this <b>Feature</b> or not.
<code>oslc_sysmlv2:feature_IsPortion</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether the values of this <b>Feature</b> are contained in the space and time of instances of the domain of the <b>Feature</b> and represent the same thing as those instances.
<code>oslc_sysmlv2:feature_IsReadOnly</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether the values of this <b>Feature</b> can change over the lifetime of an instance of the domain.
<code>oslc_sysmlv2:feature_IsUnique</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether or not values for this <b>Feature</b> must have no duplicates or not.
<code>oslc_sysmlv2:feature_OwnedFeatureChaining</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:FeatureChaining</code>	The <b>ownedRelationships</b> of this <b>Feature</b> that are <b>FeatureChainings</b> , for which the <b>Feature</b> will be the <b>featureChained</b> .
<code>oslc_sysmlv2:feature_OwnedFeatureInverting</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:FeatureInverting</code>	The <b>ownedRelationships</b> of this <b>Feature</b> that are <b>FeatureInvertings</b> and for which the <b>Feature</b> is the <b>featureInverted</b> .
<code>oslc_sysmlv2:feature_OwnedRedefinition</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Redefinition</code>	The <b>ownedSubsettings</b> of this <b>Feature</b> that are <b>Redefinitions</b> , for which the <b>Feature</b> is the <b>redefiningFeature</b> .
<code>oslc_sysmlv2:feature_OwnedReferenceSubsetting</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:ReferenceSubsetting</code>	The one <b>ownedSubsetting</b> of this <b>Feature</b> , if any, that is a <b>ReferenceSubsetting</b> , for which the <b>Feature</b> is the <b>referencingFeature</b> .
<code>oslc_sysmlv2:feature_OwnedSubsetting</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Subsetting</code>	The <b>ownedSpecializations</b> of this <b>Feature</b> that are <b>Subsettings</b> , for which the <b>Feature</b> is the <b>subsettingFeature</b> .

<code>oslc_sysmlv2:type_OwnedEndFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All <code>endFeatures</code> of this <code>Type</code> that are <code>ownedFeatures</code> .
<code>oslc_sysmlv2:type_OwnedFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <code>ownedMemberFeatures</code> of the <code>ownedFeatureMemberships</code> of this <code>Type</code> .
<code>oslc_sysmlv2:type_OwnedFeatureMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:FeatureMembership</code>	The <code>ownedMemberships</code> of this <code>Type</code> that are <code>FeatureMemberships</code> , for which the <code>Type</code> is the <code>owningType</code> . Each such <code>FeatureMembership</code> identifies an <code>ownedFeature</code> of the <code>Type</code> .
<code>oslc_sysmlv2:type_OwnedIntersecting</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Intersecting</code>	The <code>ownedRelationships</code> of this <code>Type</code> that are <code>Intersectings</code> , have the <code>Type</code> as their <code>typeIntersected</code> .
<code>oslc_sysmlv2:type_OwnedSpecialization</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Specialization</code>	The <code>ownedRelationships</code> of this <code>Type</code> that are <code>Specializations</code> , for which the <code>Type</code> is the <code>specific Type</code> .
<code>oslc_sysmlv2:type_OwnedUnioning</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Unioning</code>	The <code>ownedRelationships</code> of this <code>Type</code> that are <code>Unionings</code> , having the <code>Type</code> as their <code>typeUnioned</code> .
<code>oslc_sysmlv2:type_UnioningType</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The interpretations of a <code>Type</code> with <code>unioningTypes</code> are asserted to be the same as those of all the <code>unioningTypes</code> together, which are the <code>Types</code> derived from the <code>unioningType</code> of the <code>ownedUnionings</code> of this <code>Type</code> . For example, a <code>Classifier</code> for people might be the union of <code>Classifiers</code> for all the sexes. Similarly, a feature for people's children might be the union of features dividing them in the same ways as people in general.
<code>oslc:instanceShape</code>	Zero-or-one	false	Resource	Reference	<code>oslc:ResourceShape</code>	The URI of a Resource Shape that describes the possible properties, occurrence, value types, allowed values and labels. This shape information is useful in displaying the subject resource as well as guiding clients in performing modifications. Instance shapes may be specific to the authenticated user associated with the request that retrieved the resource, the current state of the resource and other factors and thus should not be cached.

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc:serviceProvider</code>	Zero-or-many	false	Resource	Reference	<code>oslc:ServiceProvider</code>	A link to the resource's OSLC Service Provider. There may be cases when the subject resource is available from a service provider that implements multiple domain specifications, which could result in multiple values for this property.
<code>oslc:shortTitle</code>	Zero-or-one	false	XMLLiteral	N/A	Unspecified	Short name identifying a resource, often used as an abbreviated identifier for presentation to end-users. <b>SHOULD</b> include only content that is valid inside an XHTML <code>&lt;span&gt;</code> element [sml-72].
<code>rdf:type</code>	Zero-or-many	false	Resource	Reference	<code>rdfs:Class</code>	The resource type URIs.

- **Describes:** <http://open-services.net/ns/sysmlv2#AssociationStructure>
- **Summary:** AssociationStructureShape
- **Description:** An **AssociationStructure** is an **Association** that is also a **Structure**, classifying link objects that are both links and objects. As objects, link objects can be created and destroyed, and their non-end **Features** can change over time. However, the values of the end **Features** of a link object are fixed and cannot change over its lifetime.

#### AssociationStructure Properties

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>dcterms:contributor</code>	Zero-or-many	false	AnyResource	Either	<code>oslc:Any</code>	Contributor or contributors to the resource. It is likely that the target resource will be a foaf:Person but that is not necessarily the case.
<code>dcterms:created</code>	Zero-or-one	false	dateTime	N/A	Unspecified	Timestamp of resource creation.
<code>dcterms:creator</code>	Zero-or-many	false	AnyResource	Either	<code>oslc:Any</code>	Creator or creators of the resource. It is likely that the target resource will be a foaf:Person but that is not necessarily the case.
<code>dcterms:description</code>	Zero-or-one	false	XMLLiteral	N/A	Unspecified	Descriptive text about resource represented as rich text in XHTML content.
<code>dcterms:identifier</code>	Exactly-one	true	string	N/A	Unspecified	A unique identifier for a resource. Typically read-only and assigned by the service provider when a resource is created. Not typically intended for end-user display.
<code>dcterms:modified</code>	Zero-or-one	false	dateTime	N/A	Unspecified	Timestamp of latest resource modification.

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>dcterms:source</code>	Zero-or-one	false	Resource	Reference	<code>oslc:Any</code>	The resource URI a client can perform a get on to obtain the original non-OSLC AM formatted resource that was used to create this resource. The source resource is usually a binary or proprietary format that the service provider can consume and convert into an OSLC AM format. The service may use content negotiation with the Accept header to obtain the desired content type.
<code>dcterms:title</code>	Exactly-one	false	XMLLiteral	N/A	Unspecified	Title of the resource represented as rich text in XHTML content.
<code>dcterms:type</code>	Zero-or-many	false	string	N/A	Unspecified	A short string representation for the type, for example 'Car'.
<code>jazz_am:derives</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The resource that derives from another resource originated from or is significantly influenced by the referenced resource. For example a model element derives from a requirement.
<code>jazz_am:elaborates</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	This resource elaborates the referenced resource.
<code>jazz_am:external</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	A generic link from a resource to an external web page.
<code>jazz_am:refine</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The target is a refinement of the source. (e.g. a use case scenario might be a refinement of a textual requirement that describes the interaction).
<code>jazz_am:satisfy</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The model element satisfies the requirement (e.g. The use case satisfies a functional requirement).
<code>jazz_am:trace</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The model element has a trace to the requirement (e.g. An attribute or its value are traced to a requirement).
<code>oslc_sysmlv2:association_AssociationEnd</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <b>features</b> of the <b>Association</b> that identify the things that can be related by it. A concrete <b>Association</b> must have at least two <b>associationEnds</b> . When it has exactly two, the <b>Association</b> is called a <i>binary Association</i> .

Standards Track Work Product

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:association_RelatedType</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The <b>types</b> of the <b>associationEnds</b> of the <b>Association</b> , which are the <b>relatedElements</b> of the <b>Association</b> considered as a <b>Relationship</b> .
<code>oslc_sysmlv2:association_SourceType</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The source <b>relatedType</b> for this <b>Association</b> . It is the first <b>relatedType</b> of the <b>Association</b> .
<code>oslc_sysmlv2:association_TargetType</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The target <b>relatedTypes</b> for this <b>Association</b> . This includes all the <b>relatedTypes</b> other than the <b>sourceType</b> .
<code>oslc_sysmlv2:classifier_OwnedSubclassification</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Subclassification</code>	The <b>ownedSpecializations</b> of this <b>Classifier</b> that are <b>Subclassifications</b> , for which this <b>Classifier</b> is the <b>subclassifier</b> .
<code>oslc_sysmlv2:element_AliasIds</code>	Zero-or-many	false	unspecified	Either	<code>xsd:string</code>	Various alternative identifiers for this Element. Generally, these will be set by tools.
<code>oslc_sysmlv2:element_DeclaredName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The declared name of this <b>Element</b> .
<code>oslc_sysmlv2:element_DeclaredShortName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	An optional alternative name for the <b>Element</b> that is intended to be shorter or in some way more succinct than its primary <b>name</b> . It may act as a modeler-specified identifier for the <b>Element</b> , though it is then the responsibility of the modeler to maintain the uniqueness of this identifier within a model or relative to some other context.
<code>oslc_sysmlv2:element_Documentation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Documentation</code>	The Documentation owned by this Element.
<code>oslc_sysmlv2:element_ElementId</code>	Exactly-one	false	unspecified	Either	<code>xsd:string</code>	The globally unique identifier for this Element. This is intended to be set by tooling, and it must not change during the lifetime of the Element.
<code>oslc_sysmlv2:element_IsImpliedIncluded</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether all necessary implied Relationships have been included in the <b>ownedRelationships</b> of this Element. This property may be true, even if there are not actually any <b>ownedRelationships</b> with <b>isImplied = true</b> , meaning that no such Relationships are actually implied for this Element. However, if it is false, then <b>ownedRelationships</b> may <i>not</i> contain any implied Relationships. That is, either <i>all</i> required implied Relationships must be included, or none of them.

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc:instanceShape</code>	Zero-or-one	false	Resource	Reference	<code>oslc:ResourceShape</code>	The URI of a Resource Shape that describes the possible properties, occurrence, value types, allowed values and labels. This shape information is useful in displaying the subject resource as well as guiding clients in performing modifications. Instance shapes may be specific to the authenticated user associated with the request that retrieved the resource, the current state of the resource and other factors and thus should not be cached.
<code>oslc:serviceProvider</code>	Zero-or-many	false	Resource	Reference	<code>oslc:ServiceProvider</code>	A link to the resource's OSLC Service Provider. There may be cases when the subject resource is available from a service provider that implements multiple domain specifications, which could result in multiple values for this property.
<code>oslc:shortTitle</code>	Zero-or-one	false	XMLLiteral	N/A	Unspecified	Short name identifying a resource, often used as an abbreviated identifier for presentation to end-users. <b>SHOULD</b> include only content that is valid inside an XHTML <code>&lt;span&gt;</code> element [sml-74].
<code>rdf:type</code>	Zero-or-many	false	Resource	Reference	<code>rdfs:Class</code>	The resource type URIs.

- **Describes:** <http://open-services.net/ns/sysmlv2#MembershipImport>
- **Summary:** MembershipImportShape
- **Description:** A `MembershipImport` is an `Import` that imports its `importedMembership` into the `importOwningNamespace`. If `isRecursive = true` and the `memberElement` of the `importedMembership` is a `Namespace`, then the equivalent of a recursive `NamespaceImport` is also performed on that `Namespace`.

The service may use content negotiation with the Accept header to obtain the desired content type.
<b>dcterms:title</b>	Exactly-one	false	XMLLiteral	N/A	Unspecified	Title of the resource represented as rich text in XHTML content.
<b>dcterms:type</b>	Zero-or-many	false	string	N/A	Unspecified	A short string representation for the type, for example 'Car'.
<b>jazz_am:derives</b>	Zero-or-many	false	Resource	Reference	<b>oslc:Any</b>	The resource that derives from another resource originated from or is significantly influenced by the referenced resource. For example a model element derives from a requirement.
<b>jazz_am:elaborates</b>	Zero-or-many	false	Resource	Reference	<b>oslc:Any</b>	This resource elaborates the referenced resource.
<b>jazz_am:external</b>	Zero-or-many	false	Resource	Reference	<b>oslc:Any</b>	A generic link from a resource to an external web page.

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>jazz_am:refine</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The target is a refinement of the source. (e.g. a use case scenario might be a refinement of a textual requirement that describes the interaction).
<code>jazz_am:satisfy</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The model element satisfies the requirement (e.g. The use case satisfies a functional requirement).
<code>jazz_am:trace</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The model element has a trace to the requirement (e.g. An attribute or its value are traced to a requirement).
<code>oslc_sysmlv2:element_AliasIds</code>	Zero-or-many	false	unspecified	Either	<code>xsd:string</code>	Various alternative identifiers for this Element. Generally, these will be set by tools.
<code>oslc_sysmlv2:element_DeclaredName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The declared name of this <b>Element</b> .
<code>oslc_sysmlv2:element_DeclaredShortName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	An optional alternative name for the <b>Element</b> that is intended to be shorter or in some way more succinct than its primary <b>name</b> . It may act as a modeler-specified identifier for the <b>Element</b> , though it is then the responsibility of the modeler to maintain the uniqueness of this identifier within a model or relative to some other context.
<code>oslc_sysmlv2:element_Documentation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Documentation</code>	The Documentation owned by this Element.
<code>oslc_sysmlv2:element_ElementId</code>	Exactly-one	false	unspecified	Either	<code>xsd:string</code>	The globally unique identifier for this Element. This is intended to be set by tooling, and it must not change during the lifetime of the Element.
<code>oslc_sysmlv2:element_IsImpliedIncluded</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether all necessary implied Relationships have been included in the <b>ownedRelationships</b> of this Element. This property may be true, even if there are not actually any <b>ownedRelationships</b> with <b>isImplied = true</b> , meaning that no such Relationships are actually implied for this Element. However, if it is false, then <b>ownedRelationships</b> may <i>not</i> contain any implied Relationships. That is, either <i>all</i> required implied Relationships must be included, or none of them.
<code>oslc_sysmlv2:element_IsLibraryElement</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether this Element is contained in the ownership tree of a library model.

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:element_Name</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The name to be used for this <b>Element</b> during name resolution within its <b>owningNamespace</b> . This is derived using the <b>effectiveName()</b> operation. By default, it is the same as the <b>declaredName</b> , but this is overridden for certain kinds of <b>Elements</b> to compute a <b>name</b> even when the <b>declaredName</b> is null.
<code>oslc_sysmlv2:element_OwnedAnnotation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Annotation</code>	The <b>ownedRelationships</b> of this <b>Element</b> that are <b>Annotations</b> , for which this <b>Element</b> is the <b>annotatedElement</b> .
<code>oslc_sysmlv2:element_OwnedElement</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The <b>Elements</b> owned by this <b>Element</b> , derived as the <b>ownedRelatedElements</b> of the <b>ownedRelationships</b> of this <b>Element</b> .
<code>oslc_sysmlv2:element_OwnedRelationship</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Relationship</code>	The <b>Relationships</b> for which this <b>Element</b> is the <b>owningRelatedElement</b> .
<code>oslc_sysmlv2:element_Owner</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The owner of this <b>Element</b> , derived as the <b>owningRelatedElement</b> of the <b>owningRelationship</b> of this <b>Element</b> , if any.
<code>oslc_sysmlv2:element_OwningMembership</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:OwningMembership</code>	The <b>owningRelationship</b> of this <b>Element</b> , if that <b>Relationship</b> is a <b>Membership</b> .
<code>oslc_sysmlv2:element_OwningNamespace</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Namespace</code>	The <b>Namespace</b> that owns this <b>Element</b> , which is the <b>membershipOwningNamespace</b> of the <b>owningMembership</b> of this <b>Element</b> , if any.
<code>oslc_sysmlv2:element_OwningRelationship</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Relationship</code>	The <b>Relationship</b> for which this <b>Element</b> is an <b>ownedRelatedElement</b> , if any.
<code>oslc_sysmlv2:element_QualifiedName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The full ownership-qualified name of this <b>Element</b> , represented in a form that is valid according to the KerML textual concrete syntax for qualified names (including use of unrestricted name notation and escaped characters, as necessary). The <b>qualifiedName</b> is null if this <b>Element</b> has no <b>owningNamespace</b> or if there is not a complete ownership chain of named <b>Namespaces</b> from a root <b>Namespace</b> to this <b>Element</b> .

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:element_ShortName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The short name to be used for this <b>Element</b> during name resolution within its <b>owningNamespace</b> . This is derived using the <code>effectiveShortName()</code> operation. By default, it is the same as the <code>declaredShortName</code> , but this is overridden for certain kinds of <b>Elements</b> to compute a <code>shortName</code> even when the <code>declaredName</code> is null.
<code>oslc_sysmlv2:element_TextualRepresentation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:TextualRepresentation</code>	The <b>TextualRepresentations</b> that annotate this <b>Element</b> .
<code>oslc_sysmlv2:feature_ChainingFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <b>Feature</b> that are chained together to determine the values of this <b>Feature</b> , derived from the <b>chainingFeatures</b> of the <b>ownedFeatureChainings</b> of this <b>Feature</b> , in the same order. The values of a <b>Feature</b> with <b>chainingFeatures</b> are the same as values of the last <b>Feature</b> in the chain, which can be found by starting with the values of the first <b>Feature</b> (for each instance of the domain of the original <b>Feature</b> ), then using each of those as domain instances to find the values of the second <b>Feature</b> in <b>chainingFeatures</b> , and so on, to values of the last <b>Feature</b> .
<code>oslc_sysmlv2:feature_Direction</code>	Zero-or-one	false	unspecified	Either	<code>oslc_sysmlv2:FeatureDirectionKind</code>	Indicates how values of this <b>Feature</b> are determined or used (as specified for the <b>FeatureDirectionKind</b> ).
<code>oslc_sysmlv2:feature_EndOwningType</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The <b>Type</b> that is related to this <b>Feature</b> by an <b>EndFeatureMembership</b> in which the <b>Feature</b> is an <b>ownedMemberFeature</b> .
<code>oslc_sysmlv2:feature_FeaturingType</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	<b>Types</b> that feature this <b>Feature</b> , such that any instance in the domain of the <b>Feature</b> must be classified by all of these <b>Types</b> , including at least all the <b>featuringTypes</b> of its <b>typeFeaturings</b> . If the <b>Feature</b> is chained, then the <b>featuringTypes</b> of the first <b>Feature</b> in the chain are also <b>featuringTypes</b> of the chained <b>Feature</b> .
<code>oslc_sysmlv2:feature_IsComposite</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether the <b>Feature</b> is a composite <b>feature</b> of its <b>featuringType</b> . If so, the values of the <b>Feature</b> cannot exist after its <b>featuring</b> instance no longer does.
<code>oslc_sysmlv2:feature_IsDerived</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether the values of this <b>Feature</b> can always be computed from the values of other <b>Features</b> .
<code>oslc_sysmlv2:feature_IsEnd</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether or not the this <b>Feature</b> is an end <b>Feature</b> , requiring a different interpretation of the <b>multiplicity</b> of the <b>Feature</b> .

Standards Track Work Product

<code>oslc_sysmlv2:feature_IsNonunique</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	isNonunique.
<code>oslc_sysmlv2:feature_IsOrdered</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether an order exists for the values of this <b>Feature</b> or not.
<code>oslc_sysmlv2:feature_IsPortion</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether the values of this <b>Feature</b> are contained in the space and time of instances of the domain of the <b>Feature</b> and represent the same thing as those instances.
<code>oslc_sysmlv2:feature_IsReadOnly</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether the values of this <b>Feature</b> can change over the lifetime of an instance of the domain.
<code>oslc_sysmlv2:feature_IsUnique</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether or not values for this <b>Feature</b> must have no duplicates or not.
<code>oslc_sysmlv2:feature_OwnedFeatureChaining</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:FeatureChaining</code>	The <b>ownedRelationships</b> of this <b>Feature</b> that are <b>FeatureChainings</b> , for which the <b>Feature</b> will be the <b>featureChained</b> .
<code>oslc_sysmlv2:feature_OwnedFeatureInverting</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:FeatureInverting</code>	The <b>ownedRelationships</b> of this <b>Feature</b> that are <b>FeatureInvertings</b> and for which the <b>Feature</b> is the <b>featureInverted</b> .
<code>oslc_sysmlv2:feature_OwnedRedefinition</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Redefinition</code>	The <b>ownedSubsettings</b> of this <b>Feature</b> that are <b>Redefinitions</b> , for which the <b>Feature</b> is the <b>redefiningFeature</b> .
<code>oslc_sysmlv2:feature_OwnedReferenceSubsetting</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:ReferenceSubsetting</code>	The one <b>ownedSubsetting</b> of this <b>Feature</b> , if any, that is a <b>ReferenceSubsetting</b> , for which the <b>Feature</b> is the <b>referencingFeature</b> .
<code>oslc_sysmlv2:feature_OwnedSubsetting</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Subsetting</code>	The <b>ownedSpecializations</b> of this <b>Feature</b> that are <b>Subsettings</b> , for which the <b>Feature</b> is the <b>subsettingFeature</b> .
<code>oslc_sysmlv2:feature_OwnedTypeFeaturing</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:TypeFeaturing</code>	The <b>ownedRelationships</b> of this <b>Feature</b> that are <b>TypeFeaturings</b> and for which the <b>Feature</b> is the <b>featureOfType</b> .
<code>oslc_sysmlv2:feature_OwnedTyping</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:FeatureTyping</code>	The <b>ownedSpecializations</b> of this <b>Feature</b> that are <b>FeatureTypings</b> , for which the <b>Feature</b> is the <b>typedFeature</b> .
<code>oslc_sysmlv2:feature_OwningFeatureMembership</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:FeatureMembership</code>	The <b>FeatureMembership</b> that owns this <b>Feature</b> as an <b>ownedMemberFeature</b> , determining its <b>owningType</b> .

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:feature_OwningType</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The <b>Type</b> that is the <b>owningType</b> of the <b>owningFeatureMembership</b> of this <b>Feature</b> .
<code>oslc_sysmlv2:feature_Type</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	<b>Types</b> that restrict the values of this <b>Feature</b> , such that the values must be instances of all the <b>types</b> . The types of a <b>Feature</b> are derived from its <b>typings</b> and the <b>types</b> of its <b>subsettings</b> . If the <b>Feature</b> is chained, then the <b>types</b> of the last <b>Feature</b> in the chain are also <b>types</b> of the chained <b>Feature</b> .
<code>oslc_sysmlv2:namespace_ImportedMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Membership</code>	The <b>Memberships</b> in this <b>Namespace</b> that result from the <b>ownedImports</b> of this <b>Namespace</b> .
<code>oslc_sysmlv2:namespace_Member</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The set of all member <b>Elements</b> of this <b>Namespace</b> , which are the <b>memberElements</b> of all <b>memberships</b> of the <b>Namespace</b> .
<code>oslc_sysmlv2:namespace_Membership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Membership</code>	All <b>Memberships</b> in this <b>Namespace</b> , including (at least) the union of <b>ownedMemberships</b> and <b>importedMemberships</b> .
<code>oslc_sysmlv2:namespace_OwnedImport</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Import</code>	The <b>ownedRelationships</b> of this <b>Namespace</b> that are <b>Imports</b> , for which the <b>Namespace</b> is the <b>importOwningNamespace</b> .
<code>oslc_sysmlv2:namespace_OwnedMember</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Element</code>	The owned <b>members</b> of this <b>Namespace</b> , which are the <b>ownedMemberElements</b> of the <b>ownedMemberships</b> of the ..
<code>oslc_sysmlv2:namespace_OwnedMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Membership</code>	The <b>ownedRelationships</b> of this <b>Namespace</b> that are <b>Memberships</b> , for which the <b>Namespace</b> is the <b>membershipOwningNamespace</b> .
<code>oslc_sysmlv2:occurrenceUsage_IndividualDefinition</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:OccurrenceDefinition</code>	The at most one <b>occurrenceDefinition</b> that has <b>isIndividual = true</b> .
<code>oslc_sysmlv2:occurrenceUsage_IsIndividual</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether this <b>OccurrenceUsage</b> represents the usage of the specific individual (or portion of it) represented by its <b>individualDefinition</b> .
<code>oslc_sysmlv2:occurrenceUsage_OccurrenceDefinition</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Class</code>	The <b>Classes</b> that are the types of this <b>OccurrenceUsage</b> . Nominally, these are <b>OccurrenceDefinitions</b> , but other kinds of kernel <b>Classes</b> are also allowed, to permit use of <b>Classes</b> from the Kernel Model Libraries.

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:occurrenceUsage_PortionKind</code>	Zero-or-one	false	unspecified	Either	<code>oslc_sysmlv2:PortionKind</code>	The kind of (temporal) portion of the life of the <code>occurrenceDefinition</code> represented by this <code>OccurrenceUsage</code> , if it is so restricted.
<code>oslc_sysmlv2:portUsage_PortDefinition</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:PortDefinition</code>	The <code>occurrenceDefinitions</code> of this <code>PortUsage</code> , which must all be <code>PortDefinitions</code> .
<code>oslc_sysmlv2:type_DifferencingType</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The interpretations of a <code>Type</code> with <code>differencingTypes</code> are asserted to be those of the first of those <code>Types</code> , but not including those of the remaining <code>Types</code> . For example, a <code>Classifier</code> might be the difference of a <code>Classifier</code> for people and another for people of a particular nationality, leaving people who are not of that nationality. Similarly, a feature of people might be the difference between a feature for their children and a <code>Classifier</code> for people of a particular sex, identifying their children not of that sex (because the interpretations of the children <code>Feature</code> that identify those of that sex are also interpretations of the <code>Classifier</code> for that sex).
<code>oslc_sysmlv2:type_DirectedFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <code>features</code> of this <code>Type</code> that have a non-null <code>direction</code> .
<code>oslc_sysmlv2:type_EndFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All <code>features</code> of this <code>Type</code> with <code>isEnd = true</code> .
<code>oslc_sysmlv2:type_Feature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The <code>ownedMemberFeatures</code> of the <code>featureMemberships</code> of this <code>Type</code> .
<code>oslc_sysmlv2:type_FeatureMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:FeatureMembership</code>	The <code>FeatureMemberships</code> for <code>features</code> of this <code>Type</code> , which include all <code>ownedFeatureMemberships</code> and those <code>inheritedMemberships</code> that are <code>FeatureMemberships</code> (but does <i>not</i> include any <code>importedMemberships</code> ).
<code>oslc_sysmlv2:type_InheritedFeature</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All the <code>memberFeatures</code> of the <code>inheritedMemberships</code> of this <code>Type</code> that are <code>FeatureMemberships</code> .

Standards Track Work Product

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:type_InheritedMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Membership</code>	All <b>Memberships</b> inherited by this <b>Type</b> via <b>Specialization</b> or <b>Conjugation</b> . These are included in the derived union for the <b>memberships</b> of the <b>Type</b> .
<code>oslc_sysmlv2:type_Input</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All <b>features</b> related to this <b>Type</b> by <b>FeatureMemberships</b> that have <b>direction in or inout..</b>
<code>oslc_sysmlv2:type_IntersectingType</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Type</code>	The interpretations of a <b>Type</b> with <b>intersectingTypes</b> are asserted to be those in common among the <b>intersectingTypes</b> , which are the <b>Types</b> derived from the <b>intersectingType</b> of the <b>ownedIntersectings</b> of this <b>Type</b> . For example, a <b>Classifier</b> might be an intersection of <b>Classifiers</b> for people of a particular sex and of a particular nationality. Similarly, a feature for people's children of a particular sex might be the intersection of a <b>Feature</b> for their children and a <b>Classifier</b> for people of that sex (because the interpretations of the children <b>Feature</b> that identify those of that sex are also interpretations of the Classifier for that sex).
<code>oslc_sysmlv2:type_IsAbstract</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Indicates whether instances of this <b>Type</b> must also be instances of at least one of its specialized <b>Types</b> .
<code>oslc_sysmlv2:type_IsConjugated</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Indicates whether this <b>Type</b> has an <b>ownedConjugator</b> .
<code>oslc_sysmlv2:type_IsSufficient</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether all things that meet the classification conditions of this <b>Type</b> must be classified by the <b>Type</b> .
<code>oslc_sysmlv2:type_Multiplicity</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Multiplicity</code>	An <b>ownedMember</b> of this <b>Type</b> that is a <b>Multiplicity</b> , which constrains the cardinality of the <b>Type</b> . If there is no such <b>ownedMember</b> , then the cardinality of this <b>Type</b> is constrained by all the <b>Multiplicity</b> constraints applicable to any direct supertypes.
<code>oslc_sysmlv2:type_Output</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	All <b>features</b> related to this <b>Type</b> by <b>FeatureMemberships</b> that have <b>direction out or inout..</b>
<code>oslc_sysmlv2:type_OwnedConjugator</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Conjugation</code>	A <b>Conjugation</b> owned by this <b>Type</b> for which the <b>Type</b> is the <b>originalType</b> .
<code>oslc_sysmlv2:type_OwnedDifferencing</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Differencing</code>	The <b>ownedRelationships</b> of this <b>Type</b> that are <b>Differencings</b> , having this <b>Type</b> as their <b>typeDifferenced</b> .

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:usage_NestedTransition</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:TransitionUsage</code>	The <code>TransitionUsages</code> that are <code>nestedUsages</code> of this <code>Usage</code> .
<code>oslc_sysmlv2:usage_NestedUsage</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Usage</code>	The <code>Usages</code> that are <code>ownedFeatures</code> of this <code>Usage</code> .
<code>oslc_sysmlv2:usage_NestedUseCase</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:UseCaseUsage</code>	The <code>UseCaseUsages</code> that are <code>nestedUsages</code> of this <code>Usage</code> .
<code>oslc_sysmlv2:usage_NestedVerificationCase</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:VerificationCaseUsage</code>	The <code>VerificationCaseUsages</code> that are <code>nestedUsages</code> of this <code>Usage</code> .
<code>oslc_sysmlv2:usage_NestedView</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:ViewUsage</code>	The <code>ViewUsages</code> that are <code>nestedUsages</code> of this <code>Usage</code> .
<code>oslc_sysmlv2:usage_NestedViewpoint</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:ViewpointUsage</code>	The <code>ViewpointUsages</code> that are <code>nestedUsages</code> of this <code>Usage</code> .
<code>oslc_sysmlv2:usage_OwningDefinition</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Definition</code>	The <code>Definition</code> that owns this <code>Usage</code> (if any).
<code>oslc_sysmlv2:usage_OwningUsage</code>	Zero-or-one	false	Resource	Either	<code>oslc_sysmlv2:Usage</code>	The <code>Usage</code> in which this <code>Usage</code> is nested (if any).
<code>oslc_sysmlv2:usage_Usage</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Usage</code>	The <code>Usages</code> that are <code>features</code> of this <code>Usage</code> (not necessarily owned).
<code>oslc_sysmlv2:usage_Variant</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Usage</code>	The <code>Usages</code> which represent the variants of this <code>Usage</code> as a variation point <code>Usage</code> , if <code>isVariation = true</code> . If <code>isVariation = false</code> , then there must be no <code>variants</code> .
<code>oslc_sysmlv2:usage_VariantMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:VariantMembership</code>	The <code>ownedMemberships</code> of this <code>Usage</code> that are <code>VariantMemberships</code> . If <code>isVariation = true</code> , then this must be all <code>memberships</code> of the <code>Usage</code> . If <code>isVariation = false</code> , then <code>variantMembership</code> must be empty.

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc:instanceShape</code>	Zero-or-one	false	Resource	Reference	<code>oslc:ResourceShape</code>	The URI of a Resource Shape that describes the possible properties, occurrence, value types, allowed values and labels. This shape information is useful in displaying the subject resource as well as guiding clients in performing modifications. Instance shapes may be specific to the authenticated user associated with the request that retrieved the resource, the current state of the resource and other factors and thus should not be cached.
<code>oslc:serviceProvider</code>	Zero-or-many	false	Resource	Reference	<code>oslc:ServiceProvider</code>	A link to the resource's OSLC Service Provider. There may be cases when the subject resource is available from a service provider that implements multiple domain specifications, which could result in multiple values for this property.
<code>oslc:shortTitle</code>	Zero-or-one	false	XMLLiteral	N/A	Unspecified	Short name identifying a resource, often used as an abbreviated identifier for presentation to end-users. <b>SHOULD</b> include only content that is valid inside an XHTML <code>&lt;span&gt;</code> element [sml-76].
<code>rdf:type</code>	Zero-or-many	false	Resource	Reference	<code>rdfs:Class</code>	The resource type URIs.

- **Describes:** <http://open-services.net/ns/sysmlv2#ConstraintDefinition>
- **Summary:** ConstraintDefinitionShape
- **Description:** A `ConstraintDefinition` is an `OccurrenceDefinition` that is also a `Predicate` that defines a constraint that may be asserted to hold on a system or part of a system.

ConstraintDefinition Properties

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>dcterms:contributor</code>	Zero-or-many	false	AnyResource	Either	<code>oslc:Any</code>	Contributor or contributors to the resource. It is likely that the target resource will be a foaf:Person but that is not necessarily the case.
<code>dcterms:created</code>	Zero-or-one	false	dateTime	N/A	Unspecified	Timestamp of resource creation.
<code>dcterms:creator</code>	Zero-or-many	false	AnyResource	Either	<code>oslc:Any</code>	Creator or creators of the resource. It is likely that the target resource will be a foaf:Person but that is not necessarily the case.

Standards Track Work Product

Prefixes Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>dcterms:description</code>	Zero-or-one	false	XMLLiteral	N/A	Unspecified	Descriptive text about resource represented as rich text in XHTML content.
<code>dcterms:identifier</code>	Exactly-one	true	string	N/A	Unspecified	A unique identifier for a resource. Typically read-only and assigned by the service provider when a resource is created. Not typically intended for end-user display.
<code>dcterms:modified</code>	Zero-or-one	false	dateTime	N/A	Unspecified	Timestamp of latest resource modification.
<code>dcterms:source</code>	Zero-or-one	false	Resource	Reference	<code>oslc:Any</code>	The resource URI a client can perform a get on to obtain the original non-OSLC AM formatted resource that was used to create this resource. The source resource is usually a binary or proprietary format that the service provider can consume and convert into an OSLC AM format. The service may use content negotiation with the Accept header to obtain the desired content type.
<code>dcterms:title</code>	Exactly-one	false	XMLLiteral	N/A	Unspecified	Title of the resource represented as rich text in XHTML content.
<code>dcterms:type</code>	Zero-or-many	false	string	N/A	Unspecified	A short string representation for the type, for example 'Car'.
<code>jazz_am:derives</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The resource that derives from another resource originated from or is significantly influenced by the referenced resource. For example a model element derives from a requirement.
<code>jazz_am:elaborates</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	This resource elaborates the referenced resource.
<code>jazz_am:external</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	A generic link from a resource to an external web page.
<code>jazz_am:refine</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The target is a refinement of the source. (e.g. a use case scenario might be a refinement of a textual requirement that describes the interaction).
<code>jazz_am:satisfy</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The model element satisfies the requirement (e.g. The use case satisfies a functional requirement).

Standards Track Work Product

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>jazz_am:trace</code>	Zero-or-many	false	Resource	Reference	<code>oslc:Any</code>	The model element has a trace to the requirement (e.g. An attribute or its value are traced to a requirement).
<code>oslc_sysmlv2:behavior_Parameter</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Feature</code>	The parameters of this <b>Behavior</b> , which are defined as its <b>directedFeatures</b> , whose values are passed into and/or out of a performance of the <b>Behavior</b> .
<code>oslc_sysmlv2:behavior_Step</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Step</code>	The <b>Steps</b> that make up this <b>Behavior</b> .
<code>oslc_sysmlv2:classifier_OwnedSubclassification</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Subclassification</code>	The <b>ownedSpecializations</b> of this <b>Classifier</b> that are <b>Subclassifications</b> , for which this <b>Classifier</b> is the <b>subclassifier</b> .
<code>oslc_sysmlv2:definition_DirectedUsage</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Usage</code>	The <b>usages</b> of this <b>Definition</b> that are <b>directedFeatures</b> .
<code>oslc_sysmlv2:definition_IsVariation</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether this <b>Definition</b> is for a variation point or not. If true, then all the <b>memberships</b> of the <b>Definition</b> must be <b>VariantMemberships</b> .
<code>oslc_sysmlv2:definition_OwnedAction</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:ActionUsage</code>	The <b>ActionUsages</b> that are <b>ownedUsages</b> of this <b>Definition</b> .
<code>oslc_sysmlv2:definition_OwnedAllocation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:AllocationUsage</code>	The <b>AllocationUsages</b> that are <b>ownedUsages</b> of this <b>Definition</b> .
<code>oslc_sysmlv2:definition_OwnedAnalysisCase</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:AnalysisCaseUsage</code>	The <b>AnalysisCaseUsages</b> that are <b>ownedUsages</b> of this <b>Definition</b> .
<code>oslc_sysmlv2:definition_OwnedAttribute</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:AttributeUsage</code>	The <b>AttributeUsages</b> that are <b>ownedUsages</b> of this <b>Definition</b> .
<code>oslc_sysmlv2:definition_OwnedCalculation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:CalculationUsage</code>	The <b>CalculationUsages</b> that are <b>ownedUsages</b> of this <b>Definition</b> .

<code>oslc_sysmlv2:definition_OwnedRendering</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:RenderingUsage</code>	The <code>RenderingUsages</code> that are <code>ownedUsages</code> of this <code>Definition</code> .
<code>oslc_sysmlv2:definition_OwnedRequirement</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:RequirementUsage</code>	The <code>RequirementUsages</code> that are <code>ownedUsages</code> of this <code>Definition</code> .
<code>oslc_sysmlv2:definition_OwnedState</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:StateUsage</code>	The <code>StateUsages</code> that are <code>ownedUsages</code> of this <code>Definition</code> .
<code>oslc_sysmlv2:definition_OwnedTransition</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:TransitionUsage</code>	The <code>TransitionUsages</code> that are <code>ownedUsages</code> of this <code>Definition</code> .
<code>oslc_sysmlv2:definition_OwnedUsage</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Usage</code>	The <code>Usages</code> that are <code>ownedFeatures</code> of this <code>Definition</code> .
<code>oslc_sysmlv2:definition_OwnedUseCase</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:UseCaseUsage</code>	The <code>UseCaseUsages</code> that are <code>ownedUsages</code> of this <code>Definition</code> .
<code>oslc_sysmlv2:definition_OwnedVerificationCase</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:VerificationCaseUsage</code>	The <code>VerificationCaseUsages</code> that are <code>ownedUsages</code> of this <code>Definition</code> .
<code>oslc_sysmlv2:definition_OwnedView</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:ViewUsage</code>	The <code>ViewUsages</code> that are <code>ownedUsages</code> of this <code>Definition</code> .
<code>oslc_sysmlv2:definition_OwnedViewpoint</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:ViewpointUsage</code>	The <code>ViewpointUsages</code> that are <code>ownedUsages</code> of this <code>Definition</code> .

Standards Track Work Product

Prefixed Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:definition_Usage</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Usage</code>	The <b>Usages</b> that are <b>features</b> of this <b>Definition</b> (not necessarily owned).
<code>oslc_sysmlv2:definition_Variant</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Usage</code>	The <b>Usages</b> which represent the variants of this <b>Definition</b> as a variation point <b>Definition</b> , if <b>isVariation</b> = true. If <b>isVariation</b> = false, then there must be no <b>variants</b> .
<code>oslc_sysmlv2:definition_VariantMembership</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:VariantMembership</code>	The <b>ownedMemberships</b> of this <b>Definition</b> that are <b>VariantMemberships</b> . If <b>isVariation</b> = true, then this must be all <b>ownedMemberships</b> of the <b>Definition</b> . If <b>isVariation</b> = false, then <b>variantMembership</b> must be empty.
<code>oslc_sysmlv2:element_AliasIds</code>	Zero-or-many	false	unspecified	Either	<code>xsd:string</code>	Various alternative identifiers for this Element. Generally, these will be set by tools.
<code>oslc_sysmlv2:element_DeclaredName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	The declared name of this <b>Element</b> .
<code>oslc_sysmlv2:element_DeclaredShortName</code>	Zero-or-one	false	unspecified	Either	<code>xsd:string</code>	An optional alternative name for the <b>Element</b> that is intended to be shorter or in some way more succinct than its primary <b>name</b> . It may act as a modeler-specified identifier for the <b>Element</b> , though it is then the responsibility of the modeler to maintain the uniqueness of this identifier within a model or relative to some other context.
<code>oslc_sysmlv2:element_Documentation</code>	Zero-or-many	false	Resource	Either	<code>oslc_sysmlv2:Documentation</code>	The Documentation owned by this Element.
<code>oslc_sysmlv2:element_ElementId</code>	Exactly-one	false	unspecified	Either	<code>xsd:string</code>	The globally unique identifier for this Element. This is intended to be set by tooling, and it must not change during the lifetime of the Element.
<code>oslc_sysmlv2:element_IsImpliedIncluded</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether all necessary implied Relationships have been included in the <b>ownedRelationships</b> of this Element. This property may be true, even if there are not actually any <b>ownedRelationships</b> with <b>isImplied</b> = true, meaning that no such Relationships are actually implied for this Element. However, if it is false, then <b>ownedRelationships</b> may <i>not</i> contain any implied Relationships. That is, either <i>all</i> required implied Relationships must be included, or none of them.

Standards Track Work Product

Prefix Name	Occurs	Read-only	Value-type	Representation	Range	Description
<code>oslc_sysmlv2:element_IsLibraryElement</code>	Exactly-one	false	unspecified	Either	<code>xsd:boolean</code>	Whether this Element is contained in the ownership tree of a library model.
